Arab American organisations have reported an increase in anti-Arab epithets, threats, and discrimination since Iraq's invasion of Kuwait August 2.

Asked about the situation in the Gulf, the president said the administration would not negotiate with the Iraqi government until it withdraws its troops from Kuwait.

Asked why Washington was acting in concert with Syria when that country still had troops in Lebanon, Bush said he regretted not being able to do more for Lebanon, but that ties between nations were changing in view of the crisis.

MANAMA (SEPT. 24) - The exiled ruler of Kuwait, Sheikh Jaber al-Ahmad al-Sabah, will travel Tuesday to New York for the 45th session of the U.N. General Assembly, the Gulf News Agency (GNA) reported Monday.

The Manama-based agency said Sheikh Jaber was to address the General Assembly session, expected to be dominated by the Iraqi invasion of Kuwait.

The emir will be accompanied by a senior government delegation, including Foreign Minister Sabah al-Ahmad al-Sabah and Finance Minister Ali al-Khalifa al-Sabah, the agency said in a dispatch from the western Saudi resort of Taif.

The ruling family has taken refuge in Taif since the August 2 invasion.

WASHINGTON (SEPT. 24) - Salvadoran President Alfredo Cristiani Monday began a flurry of meetings with Congressmen here to warn them that any cutoff in U.S. aid to his country might intensify guerrilla warfare there.

Mr. Cristiani had meetings scheduled with some 50 Congressmen who want to place conditions on 85 million dollars in aid to El Salvador in 1991.

Those conditions include progress in peace talks between the government and rebels, and progress in the investigation into the murder of six Jesuit priests last November in San Salvador.

The United States pumped four-billion dollars in economic and military aid into El Salvador during the past decade.

Salvadoran Ambassador Miguel Salavarria has said any reduction in U.S. aid might induce leftist guerrillas in his country to break off peace talks begun a year ago and step up their armed offensive.

Negotiations between Mr. Cristiani's government and the Farabundo Marti National Liberation Front broke off last week on a disagreement over the future role of the armed forces.

BAGHDAD (SEPT. 24) - Iraq is ready ''to fight for 1,000 years for Kuwait'', Baghdad radio Monday quoted Iraqi President Saddam Hussein as saying.

''Kuwait is Iraq''. We will not give it up even if we had to fight for 1,000 years'', the president was reported as saying.

Saddam, speaking to a visiting Islamic delegation, said Kuwait had been historically part of Iraq and only became independent through colonial separation carried out by Britain.

The Iraqi occupation of Kuwait had returned the territory to the Iraqi nation, Saddam said.

CAIRO (SEPT 24) - Seven Egyptian doctors have arrived here from Kuwait with tales of how Iraqi soldiers were stealing food from the mouths of patients in Kuwaiti hospitals and demanding treatment at gunpoint.

"Iraqi soldiers would come in to the operating theatres with guns in their hands, forcing us to give priority to their wounded," said one doctor, addressing a press conference Monday.

The seven said that after more than a month in Kuwait under Iraqi occupation, they could work no longer "in terror" and decided jointly to leave.

"We tried to talk to (the soldiers') superiors, to say that we could not carry on working like that, but nothing helped," said Dr. Hussein Al Bacha, anaesthetist at Al-Sabah Hospital, which has been renamed Saddam Hospital.

The doctor, who left Kuwait on September 5, told how the Iraqi soldiers would take food meant for the sick, at gunpoint.

Eventually, there was nothing left in the hospital -- no supplies, no medicines. "The Iraqis took everything they could lay their hands on," said Dr. Farid Ghazaoui, who treats allergies and has worked in Kuwait for 20 years.

"So I just stayed home, where my patients would call me. But the Iraqis came looking for me and, when I refused to go back to the hospital under their control, they threatened to courtmartial me. That is why I left," he said.

Several medical buildings, such as a geriatric centre, a psychiatric hospital and a reception centre for the handicapped, were turned into barracks after the occupants were turfed out, said the doctors.

They said the Kuwaiti hospitals were looted (by Iraqi officers) "at a very high level".

Dr. Jilan Abdelwahab, who worked at Kuwait's new military hospital, commissioned last November, said that over 300 Iraqi soldiers were treated there in the first three days following Iraq's invasion of Kuwait on August 2.

She added: "After that, the Iraqis repatriated their wounded to Iraq while they waited for new Iraqi doctors to arrive. I don't believe they wanted us to know how many of their men were wounded."

BANGKOK (SEPT 24) - Military authorities have arrested a senior member of a leading Burmese opposition party, charging him with possessing and publishing illegal material, Radio Rangoon reported Monday.

U Kyi Hla, 43, an executive committee member of the National League for Democracy (NLD), was arrested Thursday on charges of publishing illegal books, pamphlets and documents, the official radio said in a dispatch monitored here.

Mr. Kyi Hla, who also headed the party's information section, had allegedly written books and pamphlets attacking the current military government as well as criticizing former and present military leaders.

The arrest of Mr. Kyi Hla brought to seven the number of top NLD members arrested after the general election on May 27.

The NLD made a clean sweep in the general election but the government has not yet transferred power to the party.

NEWCASTLE, England (SEPT. 24) - England's solo sailor David Cowper was given

a hero's welcome as he completed his record-breaking 'round-the-world' voyage on Monday.

The 48-year-old chartered surveyor was greeted by a flotilla of small craft, a band playing 'Rule Britannia' and a flag-waving crowd as his converted former lifeboat moored in St Peter's Basin on the River Tyne.

His historic voyage in his 42ft boat, Mabel E Holland, included the first solo navigation of the North West Passage and was the first lone 'round-the-world' trip by that route.

"It has been a most rousing welcome which gave me quite a lump in my throat. I am most relieved to get the boat back. At times I feared she wouldn't make it " he said.

Despite facing numerous dangers, Cowper hinted his taste for epic travel had not been satisfied. But he said he was keeping his next venture a secret in case somebody else beat him to it.

Cowper's 30,000-mile journey took more than 50 months, making it the slowest of his four lone circumnavigations since 1979.

He opted to reach the Pacific Ocean via the frozen waters of the 2,200-mile North West Passage around the Arctic coasts of Canada and Alaska.

Two months after leaving the Tyne in July 1986, his boat was trapped in pack ice. He continued his journey two years later but the 33-year-old boat was again halted by pack ice again after 1,500 miles.

"Considering all she has been through and the fact she has not been properly serviced for over four years, she is in an incredible condition. She really is a tough old girl," said Cowper.

Cowper's previous voyages include two fastest round-the-world trips.

#90267d5240 09/24/1990 ~French/German News Agency

PANAMA CITY (SEPT. 24) - A Panamanian official Monday dismissed reports that a close aide to ousted strongman Manuel Antonio Noriega was in Miami, Florida, to testify against his former boss, who is facing trial on drug trafficking charges.

Deputy Security Minister Ramon Lima said "there is no confirmation" that Mr. Noriega's former chief of security, Captain Elicier Gaytan, had been smuggled out of Panama a week ago by U.S. Drug Enforcement Administration (DEA) agents.

Mr. Elicier last week abandoned the Vatican Nunciature here, where he had been

holed up since the December 20 U.S. miltary invasion of Panama.

Local newspapers quoted "reliable sources this weekend as saying the DEA had arrested Mr. Elicier and secretly whisked him out of Panama to testify against Mr. Noriega.

U.S. officials in Panama have neither confirmed nor denied reports of Mr. Elicier's whereabouts.

Papal Nuncio Sebastian Laboa also doubted Mr. Elicier was in the United States.

It "seems an unlikely destination for Mr. Noriega's former bodyguard," since he had always been interested in seeking asylum in either Spain or Argentina, he said.

SANTO DOMINGO (SEPT. 24) - A powerful bomb killed three students and injured two others at a leftist students' union at the Autonomous University here, Police Chief Jose Ramon Mota Paulino said Monday.

One of the injured students was in "very serious condition," he added.

The seemingly accidental blast occurred Sunday in a room of the Revolutionary Students' Union, where police later found eight other unexploded, home-made bombs and materials to build them.

Two people were arrested and a search was under way for the remaining student union leaders, the police chief said.

#90267d5430 09/24/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT 24) - The U.N. Security Council Monday unanimously adopted a resolution calling for consideration of aid requests by all countries suffering economic hardship as a result of the U.N. embargo against Iraq.

The 15-member council called on its sanctions committee to look into the matter and make "recommendations to the president of the Security Council for appropriate action."

Some 15 countries, including India, Jordan, Yemen, Sri Lanka, Bulgaria and Romania have already approached the sanctions committee to explain the economic cost of the mandatory U.N. sanctions imposed in a bid to force Iraq to end its occupation of Kuwait.

Jordan was one of the first countries to bring its case to the council. But a draft resolution aimed at rushing aid to Amman was opposed by the United States on the ground that it might lead to similar texts for countries suffering economic pproblems, diplomatic sources said.

The Council in the end opted for a resolution that would encompass all aid requests resulting from the effects of the embargo.

WASHINGTON (SEPT 24) - The United States Monday tried to avert a possible Salvadoran rebel attack against the U.S. Embassy in San Salvador after guerrillas alleged the mission was playing a military role.

The incident coincided with a visit to Washington by rightist Salvadoran President Alfredo Cristiani to defend U.S. economic and military aid to the tiny war-torn country.

The State Department said a communique signed by the leftist Farabundo Marti National Liberation Front (FMLN) which appeared in a Salvadoran newspaper Saturday called on the group's leaders "to consider the personnel and installations of the U.S. Government as targets."

"We cannot judge the authenticity of this statement, however, we state categorically that American Embassy personnel are involved in no military or police operations whatsoever," the department said.

Salvadoran press reports that embassy personnel had arrested some of the rebels prompted the FMLN statement, said the department.

U.S. officials said Salvadoran police protecting the diplomatic mission had arrested five suspected rebels who attempted to flee in a taxi after allegedly bombing a nearby light pole.

"Salvadoran civilian guards under contract to provide security to the U.S. Embassy were in the vehicle with the police," the State Department said. "These guards played no role in the arrest of the suspects. No U.S. Embassy staff were in any way involved in the matter."

#90267d5710 09/24/1990 ~French/German News Agency
NEW YORK (SEPT 25) - The 12 E.C. countries plan to issue a ''Trans-Atlantic Declaration'' cementing ties between the continent and America on such issues as the Gulf crisis, German Foreign Minister Hans-Dietrich Genscher announced here Monday.

His comments came as common market ministers gathered for preliminary talks on the plan and other issues with Secretary of State James Baker Tuesday evening in New York. The Gulf crisis tops the agenda of the meeting.

Genscher also said he and Iranian Foreign Minister Ali Akbar Velayati had agreed on a broad array of subjects during talks earlier Monday.

The Iranian minister stressed on the periphery of the U.N. General Assembly session Monday that Teheran remains committed to Security Council resolutions aimed at getting Iraq to withdraw from Kuwait.

Velayati told the General Assembly, ''It is the firm conviction of the Islamic Republic of Iran that faithful commitment to and compliance with the relevant Security Council resolutions by all countries, particularly Iraq, is the only path to the establishment of peace and tranquility in our area.''

#90267d5740 09/24/1990 ~French/German News Agency

WASHINGTON (SEPT 24) - The United States and Angola have agreed to ship food rapidly to tens of thousands of people facing starvation in both government and rebel-held areas of the southern African country, a U.S. official said Monday.

An agreement struck last Wednesday at an undisclosed location said both sides "agreed on the need for prompt and efficient delivery of relief supplies to all affected populations in Angola."

The agreement was a breakthrough, said Andrew Natsios, who heads the Office of U.S. Foreign Disaster Assistance for the U.S. Agency for International Development and has just returned from a two-week tour of Angola.

The joint statement added that "the United States side reiterated its commitment to join with other donors in the U.N.-led efforts to provide the necessary assistance to Angola."

A U.N. plan calls for sending 100,000 tonnes of food to people under control of the Angolan Government.

"The U.N. plan must be implemented immediately," Mr. Natsios warned. "Time is running short. Humanitarian assistance must reach the Angolans in the next 30 to 60 days."

The Luanda government had long resisted U.S. efforts to ship food to starving Angolans, fearing the shipments would be used as a cover to send arms to the National Union for the Total Independence of Angola (UNITA) rebels.

The rebels have been fighting the Marxist government since Angola's

independence from Portugal in 1975 and the United States has helped supply the anti-communist UNITA rebels since 1986.

One U.S. official who spoke on the condition of anonymity said Angolan President Eduardo Dos Santos might have changed his stand because of a vote coming up in Congress next week to increase aid to UNITA, which is headed by Jonas Savimbi. Mr. Savimbi is due in Washington next weekend.

More than half of Angola, the area south of Luanda, has been affected by a severe drought which is variously estimated to have killed between 3,800 and 10,000 people since January.

Mr. Natsios said that in one village he found five children who had been eating nothing but mice.

Angolan officials snubbed Mr. Natsios when he was in Luanda two weeks ago, but the government apparently underwent a change of heart and agreed suddenly to meet his team.

SALTA, Argentina (SEPT 24) - Thirteen children and two adults drowned when a boat capsized on a lake in northern Argentina, police reported Monday.

Only one person was known to have survived. Police said four were missing.

The boat -- presumed to have been overloaded -- capsized around midday Sunday on the lake near the town of Las Lajitas, some 1,400 kilometers (870 miles) north of Buenos Aires.

Nearly all the passengers were the children of farm workers taking a trip to mark the arrival of spring.

WASHINGTON (SEPT. 24) - Major industrial states are preparing to reward China for supporting the embargo against Iraq in the United Nations Security Council by resuming normal economic and financial ties with Beijing, senior Western officials suggested here Monday.

Western governments and multilateral institutions imposed a freeze on lending to China in the wake of the bloody repression of Chinese students' pro-democracy demonstrations in Beijing in June 1989. The sanctions have been gradually eased since early this year.

World Bank president Barber Conable told a news conference the Bank was

"moving toward a normal program (with China) next year."

And French Economy and Finance Minister Pierre Beregovoy disclosed Monday that finance ministers of the Group of Seven (G7) countries reviewed relations with China when they met here Saturday.

He told correspondents they discussed China in the light of the "easing of internal conditions" and its attitude in the Security Council debates on the Gulf crisis.

Mr Beregovoy said the G7 ministers made no formal decisions. But he said he thought that "we may move towards a gradual and concerted normalization."

Mr Conable told reporters that the Bank expected to approve one loan to China next month and another in November.

He said he expected a "steady flow" of lending to the country, adding that most of the loans now being considered were designed to support economic reform.

The Bank had held several meetings with Chinese officials here and relations with China were "moving along well," Mr Conable said.

He was replying to questions at a news conference after the semi-annual session of the joint International Monetary Fund (IMF) and World Bank Development Committee, on the eve of the two institutions' annual meetings due to open here Tuesday.

#90267d6220 09/24/1990 ~French/German News Agency

SYDNEY (SEPT. 25) - The Australian share market fell sharply Tuesday, sparked by soaring crude oil prices and falls overnight in Tokyo and New York.

The first few minutes of trading saw the all ordinaries drop 12.8 points, pushing the Australian market fractionally below the important 1,400 support level for the first time since May 10, 1988.

It dived a further 7.2 points, reaching 1,394.5 by 10:30 a.m. local time (0030 GMT).

"The key to this was the fall in the Japanese market this morning, which reacted to the drop in the Dow overnight," said a senior broker with Barclays De Zoete Wedd.

Another broker said that although the index was looking for the market to go weaker and there was general overall weakness, there did not appear to be any panic.

WELLINGTON (SEPT. 25) - New Zealand's biggest company, Fletcher Challenge Ltd. (FCL), said Tuesday it has sold its deepwater fishing interests for 190 million New Zealand dollars (117 million U.S.).

In a statement it said Sealord Products Ltd., a subsidiary of Carter Holt Harvey Ltd. (CHH) of New Zealand, had purchased the bulk of the interests.

It said that in a separate transaction the deep-sea vessel Acona had been purchased by American Seafoods Co. of Seattle, Washington.

The Acona and the other interests would sell for an estimated 190 million dollars (117 million U.S.), although the final price would depend on stock levels at settlement date.

CHH's purchase includes 118,000 tons of quota for mainly hoki and orange roughy, a processing plant and office facilities.

Earlier this month FCL sold its inshore fisheries to a consortium of Skeggs Seafoods Ltd. and the Maori Development Corp., both of New Zealand.

FCL announced earlier this year that they were rationalising their business interests and no longer wanted to be involved in fishing.

#90267e0030 09/24/1990 ~Latin America New Agency
LISBON (SEPT. 24) EFE - Angloan rebel leader Jonas Savimbi said he would present a proposal which he hoped wONtal this week.

Savimbi, the head of UNITA (National Union for the Total Independence of

Angola), said in a statement received in Lisbon that his delegation was approaching the latest round of talks with the leftist government of Angola in a +positive and flexible+ mood.

This week's talks -- the fourth to be hosted by Portugal this year -- were due to open Monday or Tuesday and are the latest efforts by the opposing sides to end the 15-year-old war.

The previous round, three weeks ago and also in Lisbon, broke down after UNITA insisted on its recognition by the government and demanded that the government begin to dissolve one-party rule as preconditions for a cease-fire.

The government wanted a cease-fire in place before it would consider political changes.

The United States and the Soviet Union, backers of UNITA and Luanda respectively, were invited to attend the Portuguese-mediated talks but will only participate as observers.

Portuguese organiser, Secretary of State for Foreign Affairs Jose Durao Barroso, said on his return from Luanda at the weekend that he was +moderately optimistic+ about the outcome of the latest peace efforts.

The Angolan delegation is headed by Antonio Pitra Neto, a close adviser of President Jose Eduardo dos Santos, and the UNITA team by its Lisbon representatives.

PALMA DE MALLORCA, Spain (SEPT. 24) EFE - Spanish Foreign Minister Francisco

Fernando Ordonez warned Monday that no system existed to prevent and manage crises in the Mediterranean and called for nations in the region to set one up.

He was speaking on the first day of the month-long Conference on Security and Cooperation in Europe, opened by Spain's King Juan Carlos and attended by representatives from 35 European countries.

Ordonez said the latest Gulf tensions "dramatically illustrated the lack of a system in the region to prevent and manage crises".

He said Spain and other European Community nations have proposed the idea of holding a Conference on Security and Cooperation in the Mediterrenean +to create a model for coexistence and stability+.

The new forum would seek to reduce tensions in the Mediterranean by exchanging information on military manuevres and defence issues.

It would be formed by Mediterrenean European countries -- Spain, Italy, France and Portugal -- and other states in the Middle East and the Gulf, according to the minister.

CHIHUAHUA, MEXICO (SEPT. 24) EFE - Forty people have died and another 200 were missing after torrential rains caused three dams to overflow near the capital of the northern state of Chihuahua, Mexican rescue authorities reported Monday.

Another 5,000 have been washed out of their homes and 20 injured in the floods which started Sunday after what were described as the worst rains in 90 years in the area, 1,100 km northwest of Mexico City.

With water running as deep as five meters in some parts of the city, rescue crews said some 2,000 shanty homes had been destroyed in the torrent which swept away peopln the area Sunday night by President Carlos Salinas de Gortari with the Army, rescue services, firemen and volunteers shipping in clothes and food for the homeless.

They were also working to restore electricity, fresh water supplies and transport links to the stricken zone as the search went on for survivors.

The National Water Commission said that although rain was still falling and some water continued to flow over the dams, the situation was now 'stable and under control'.

BUENOS AIRES (SEPT 24) EFE - The consortium set to take over part of Argentina's ENTel phone company Monday denied reports that its major financial backer, Manufacturers Hanover, had withdrawn from the purchase.

The group headed by Bell Atlantic released an official statement saying, "Manufacturers as well as the other members of the consortium maintain their unchanging interest in the operation."

On Sunday, the Buenos Aires daily Clarin reported that the U.S. bank had pulled out of the purchase of Telco Norte, created to take over ENTel's current operations in northern Argentina, because it could not raise the dlrs 2.1 billion in Argentine debt bonds.

But Argentine business officials involved in the deal said Monday there were no financial problems.

Contributing 49 per cent of the cash, Manufacturers Hanover is the consortium's principal backer, while the rest is divided among Bell Atlantic and Argentine concerns.

President Carlos Menem earlier Monday ruled out giving the sale procedures extra time, saying the October 8 deadline for formalizing the sale was

"unchangeable."

Menem said that if the consortium had problems adhering to the terms of the sale, Telco Norte could go to other groups participating in the bidding.

If Bell Atlantic loses the sale, the government may approach a consortium headed by Italian company STET and France's Cable et Television which lost out in the bidding but is reportedly still interested.

Manufacturers Hanover general director Carlos Agote has admitted that some complications had arisen in the transaction, but said the bank had not lost interest.

"We know we are working with the principal telephone operator in the world and the transaction is, financially, interesting," Agote said.

Telco Sur, accounting for telecommunications in southern Argentina, was bought by Spain's Telefonica together with the U.S. Citibank and the Italian-Argentine company Techint.

SAN SALVADOR (SEPT. 24) EFE - Nineteen people were killed or wounded Monday in two separate clashes between leftist Salvadoran guerrillas and the Armed Forces, a military press officer said.

Three soldiers were killed and seven wounded in a clash with rebels of the Farabundo Marti National Liberation Front (FMLN) in the department of Usulutan about 110 km east of the capital, according to the Armed Forces press office (COPREFA).

Six FMLN rebels were killed in the battle, the official claimed.

In the department of Chalatenango, some 80 km north of San Salvador, the FMLN killed one soldier and wounded two others, the official said, but no details were given on rebel casualties.

Observers said that a renewed rebel offensive has been in the offing since talks in Costa Rica between the FMLN and the government of President Alfredo Cristiani ended in stalemate six days ago.

The United Nations-sponsored talks were the fifth in a monthly series of meetings between the two sides aimed at negotiating a cease-fire and an eventual settlement of the decade-long civil war in El Salvador that has claimed 70,000 lives.

Both sides are scheduled to meet again in Mexico before October 4.

CANBERRA (SEPT. 23) XINHUA - HEROIN USE IN CANBERRA HAS INCREASED THIS YEAR, ACCORDING TO A DRUG REFERRAL AGENCY.

THE AGENCY SAID IN A STATEMENT RELEASED TODAY THAT THERE COULD BE AS MANY AS 7,000 HEROIN USERS IN CANBERRA.

THE COORDINATOR OF THE DRUG REFERRAL AND INFORMATION CENTER, MARIAN WATSON, SAID THE NEEDLE EXCHANGE PROGRAM CURRENTLY HAD 1,000 REGISTERS.

WATSON SAID THAT IN THE FIRST SIX MONTHS OF THIS YEAR THERE WAS A FLOOD OF HEROIN ON THE CANBERRA MARKET WHICH DRASTICALLY INCREASED USAGE.

"SOMEBODY IN THE AUSTRALIAN CAPITAL TERRITORY WAS MAKING SURE THE SUPPLY WAS REGULAR," WATSON SAID.

SHE SAID SHE HAD HEARD OF SEVERAL DEATHS IN CANBERRA THIS YEAR CAUSED THROUGH HEROIN.

WITH THE AVDENT OF AIDS, WATSON SAID, IT WAS VERY IMPORTANT THAT THE NEEDLE EXCHANGE PROGRAM CONTINUED TO OPERATE.

SHE SAID THAT WHEN THE SUPPLY OF HEROIN IN CANBERRA WAS LOW, THE PURITY OF THE DRUG WAS REDUCED AND COULD CAUSE AN INCREASE IN DEATHS.

DRUG USERS ARE THE MAIN VICTIMS OF AIDS IN AUSTRALIA. IT HAS THE GREATEST NUMBER OF AIDS CASES IN ASIA AND THE PACIFIC, OR RANKS SIX AMONG DEVELOPED COUNTRIES. A TOTAL OF 2,263 CASES OF THE DISEASE HAD BEEN REPORTED BY THE END OF JULY THIS YEAR.

DAR ES SALAAM (SEPT. 24) XINHUA - TANZANIA PRESIDENT ALI HASSAN MWINYI HAS CALLED FOR MORE FOREIGN INVESTMENT IN HIS COUNTRY'S SOCIAL SERVICE SECTOR AND ASSURED THAT PRIVATE INSTI- TUTIONS WILL NOT BE NATIONALIZED.

THE PRESIDENT MADE THE CALL HERE YESTERDAY AT A FUND-RAISING CHARITY WALK ORGANISED BY AN INDIAN MEDICAL SERVICE SOCIETY BASED IN TANZANIA.

HE SAID THE TANZANIAN PEOPLE BADLY NEED MORE SOCIAL SERVICE INSTITUTIONS AND FOREIGN INVESTMENT HAS TO BE DRAWN TO THE FIELD, INCLUDING HOSPITALS AND SCHOOLS.

HE URGED THE PRIVATE SOCIAL SERVICE SECTOR AND FOREIGN FIRMS IN THE EAST

AFRICAN COUNTRY TO IMPORT MORE MEDICAL EQUIPMENT INTO THE COUNTRY SO AS TO BRIDGE THE BIG GAP BETWEEN THE PEOPLE'S NEED AND THE GOVERNMENT'S INCAPABILITY TO PROVIDE.

THE PRESIDENT ASSURED THE INDIANS THAT NOBODY WILL NATIONALISE THESE INSTITUTIONS.

TANZANIA NATIONALIZED PRIVATED ECONOMY IN THE EARLY 1970'S. BUT SINCE THE COUNTRY LAUNCHED AN ECONOMIC RECOVERY PROGRAM IN 1986, THE MAJORITY OF THE NATIONALIZED FIRMS HAVE BEEN RETURNED TO THE OWNERS.

PRIVATE FIRMS IN THE SOCIAL SERVICE SECTOR HAVE INCREASED RAPIDLY DURING THE PAST FEW YEARS, INCLUDING PRIVATE CLINICS, HOSPITALS AND SCHOOLS.

#90267h0070 09/24/1990 ~Chinese News Agency

BUDAPEST (SEPT. 23) XINHUA - ABOUT 66,000 HUNGARIANS QUIT FARMING IN THE FIRST HALF OF THIS YEAR, DOUBLING THE NUMBER OF THE SAME PERIOD LAST YEAR, THE HUNGARIAN NEWS AGENCY SAID TODAY.

IT IS ESTIMATED THAT FARMERS WHOO QUIT THEIR JOBS IN THE SECOND HALF OF THIS YEAR WILL WELL MATCH THAT IN THE FIRST SIX MONTHS OF THIS YEAR, THE AGENCY QUOTED STATISTICS FROM HUNGARIAN AGRICULTURAL MINISTRY AS SAYING.

THE STAFF MEMBERS IN STATE-OWNED FARMS WILL THEREFORE DECREASE BY 10 PERCENT AT THE END OF THIS YEAR AND THAT IN COOPERATIVE FARMS BY 8-9 PERCENT, COMPARED WITH AN AVERAGE 4 PERCENT OF EMPLOYMENT DECREASE LAST YEAR, THE AGENCY SAID.

THE DOWNWARD EMPLOYMENT IN AGRICULTURE IS DUE TO A SLUMP MARKET AND THE GOVERNMENT'S REDUCTION OF PREFERENTIAL TREATMENT SUCH AS PRICE SUBSIDIES TO FARMING PRODUCTS IN AREAS WITH AN UNFAVORABLE NATURAL CONDITIONS, THE AGENCY STRESSED.

#90267h0122 09/24/1990 ~Chinese News Agency

CAIRO (SEPT. 24) XINHUA - ISRAELI DEFENSE MINISTER MOSHE ARENS HAS DECIDED TO DEPORT PALESTINIANS IN A GAZA STRIP REFUGEE CAMP WHO WERE INVOLVED IN THE THURSDAY KILLING OF A RESERVE SOLDIER, ISRAEL RADIO REPORTED TODAY.

ARENS HAS ALSO DECIDED TO "WIDEN THE ROAD" WHERE THE INCIDENT OCCURRED, WHICH "WILL MEAN THE DEMOLITION OF HOMES ALONG THE ROAD," AND EVEN OTHER HOUSES IN THE CAMP, SAID THE RADIO.

THE ARMY HAS OFTEN BULLDOZED OR BLOWN UP ARAB HOMES AS PUNISHMENT OF THEIR UPRISING AGAINST ISRAELI OCCUPATION OF THE WEST BANK AND GAZA STRIP SEIZED BY ISRAEL IN 1967. DOZENS OF PALESTINIANS HAVE BEEN DEPORTED IN THE PAST YEARS.

IN GAZA, ISRAELI SOLDIERS HELD THE BUREIJ REFUGEE CAMP, THE HOME OF 20,000 PALESTINIANS, UNDER CURFEW FOR THE FIFTH DAY WHILE COMBING THE AREA FOR SUSPECTS. RESIDENTS OF THE CAMP WHO FLED AFTER THE INCIDENT ARE ALSO BEING SOUGHT BY THE ARMY, SAID THE RADIO.

THE ISRAELI SOLDIER WAS KILLED AFTER HE ENTERED THE CAMP. HIS CAR WAS REPORTED STONED AND SET ON FIRE AFTER IT HIT A CART, INJURING TWO ARAB YOUTHS.

ISRAELI HEALTH MINISTER EHUD OLMERT CLAIMED SUNDAY AFTER THE INCIDENT THAT ISRAELIS SHOULD BE ALLOWED TO SHOOT MORE FREELY AT ARAB STONE-THROWERS.

SINCE THE UPRISING THAT STARTED IN DECEMBER 1987, ISRAELI SOLDIERS HAVE KILLED SOME 730 PALESTINIANS. FORTY EIGHT ISRAELIS HAVE ALSO BEEN KILLED.

#90267h0156 09/24/1990 ~Chinese News Agency

SANAA (SEPT. 24) XINHUA - YEMEN HAS ACCUSED SAUDI ARABIA OF ORDERING THE MAJORITY OF YEMENI STAFFERS TO LEAVE DIPLOMATIC MISSIONS IN THE KINGDOM, THE YEMENI NEWSPAPER "AL- THAWRA" QUOTED A FOREIGN MINISTRY OFFICIAL AS SAYING TODAY.

THE OFFICIAL, WHO WAS NOT NAMED, SAID THAT THE SAUDI GOVERNMENT SATURDAY ORDERED ALL BUT FOUR STAFFERS TO LEAVE THE FIFTY-MEMBER YEMENI CONSULATE IN JEDDAH, THE SUMMER CAPITAL OF THE KINGDOM, JUST AS IT DID TO THE YEMENI EMBASSY IN RIYADH.

DIPLOMATIC SOURCES IN RIYADH SAID SATURDAY THAT THE KINGDOM HAD ORDERED ALL BUT THREE STAFFERS EACH TO LEAVE THE YEMENI AND JORDANIAN EMBASSIES IN RIYADH IN A SHARP REACTION AGAINST SUPPORT FOR IRAQ.

THE STATEMENT OF THE YEMENI OFFICIAL CONFIRMED THE SAUDI ORDER WHILE JORDAN HAS SO FAR DENIED THAT IT HAS BEEN INFORMED OF THE EXPULSION ORDER.

YEMENI DIPLOMATS IN RIYADH SAID ITS 50-MEMBER STAFF AT THE EMBASSY IN RIYADH WAS BEING REDUCED AFTER SAUDI ARABIA LAST WEEK ABOLISHED IMMIGRATION AND TRADE PRIVILEGES FOR YEMENIS IN THE KINGDOM.

THE YEMENI OFFICIAL DISMISSED THE SAUDI ALLEGATIONS THAT THESE MEASURES WERE TAKEN "TO PROTECT THE KINGDOM'S NATIONAL SECURITY" AS BASELESS. THE MOVE COULD ONLY SERVE THE ENEMIES OF THE TWO COUNTRIES AND STRAIN RELATIONS BETWEEN THE TWO NEIGHBOURS, HE SAID.

THE OFFICIAL MADE NO MENTION OF WHETHER THE YEMENI GOVERNMENT WOULD TAKE COUNTER-MEASURES, NOTING THAT SOME TWO MILLION YEMENIS WORKING IN THE KINGDOM NEEDED TO BE LOOKED AFTER BY THEIR GOVERNMENT.

#90267h0168 09/24/1990 ~Chinese News Agency

BAGHDAD (SEPT. 24) XINHUA - IRAQ HAS DECLARED THAT THE KUWAITI CURRENCY, DINAR, INVALID AND BANNED ITS CIRCULATION, THE OFFICIAL IRAQI NEWS AGENCY SAID IN A REPORT PUBLISHED TODAY.

IRAQ WILL REIMBURSE HOLDERS OF THE KUWAITI DINAR WITH THE IRAQI DINAR ON A ONE-FOR-ONE BASIS, AS OF TODAY, UNTIL OCTOBER 6, AFTER WHICH THE KUWAITI CURRENCY WILL BE CONSIDERED ILLEGAL TENDER, THE AGENCY QUOTED THE GOVERNMENT'S ECONOMIC COMMITTEE AS SAYING.

THE CURRENCY MEASURE WAS TAKEN "TO FACILITATE TRANSACTIONS THROUGHOUT IRAQ AND ENDING DUALITY IN THE MONETARY DEALING," THE COMMITTEE SAID.

IRAQ INVADED KUWAIT ON AUGUST 2, ANNEXED IT FOUR DAYS LATER AND DECLARED THE OIL-RICH EMIRATE ITS 19TH PROVINCE. IRAQ HAS ALSO "OUTLAWED" KUWAIT'S GOVERNMENT, ARMY, AIRLINE AND FORCED THE CLOSURE OF FOREIGN EMBASSIES THERE.

BEFORE THE INVASION, KUWAITI DINAR WAS INTERNATIONALLY CONVERTIBLE AND SOLD FOR 3.45 U.S. DOLLARS AT OFFICIAL RATES WHILE THE IRAQI DINAR WAS WORTH 3.22 U.S. DOLLARS BUT WAS NOT INTERNATIONALLY CONVERTIBLE. THE IRAQI CURRENCY WAS ONLY ABOUT ONE 10TH OF THE OFFICIAL VALUE AT THE BLACK MARKET.

IRAQ DECLARED THE ONE-FOR-ONE EXCHANGE RATE BETWEEN KUWAITI AND IRAQ CURRENCIES SHORTLY AFTER THE INVASION.

#90267h0169 09/24/1990 ~Chinese News Agency

TIANJIN (SEPT. 24) XINHUA - LOOKING AT STRETCHES OF GREEN VEGETABLES AND ROWS OF PIGPENS AND HEN-HOUSES, AS WELL AS THE LAWNS AND GARDENS ON THE OUTSKIRTS OF TIANJIN, IT IS UNBELIEVABLE THAT THIS IS A MUNICIPAL GARBAGE DUMP.

THIS 14.7-HECTARE DUMP RECEIVES 600 TONS, OR ONE SIXTH, OF THE CITY'S TOTAL GARBAGE EACH DAY AND PROCESSES IT INTO ORGANIC FERTILIZER.

ACCORDING TO LIN XIUSEN, DIRECTOR OF THE HEBEI DISTRICT ENVIRONMENTAL PROTECTION BUREAU, BY THE END OF 1988, THE DUMP WAS PILED 17 METERS HIGH WITH GARBAGE AND THE AMOUNT WAS INCREASING DAILY.

"SINCE IT IS SO EXPENSIVE TO IMPORT FOREIGN FACILITIES TO PROCESS GARBAGE," THE DIRECTOR SAID, "WE TRIED AND SUCCEEDED IN TRANSFORMING A WORN-OUT CEMENT MIXER INTO A MOBILE ROLLING GARBAGE SCREENING MACHINE CAPABLE OF SEPARATING ORGANIC FERTILIZER FROM WASTE RESIDUE."

USING FOUR SUCH MACHINES THAT CAN PROCESS 150 TONS OF GARBAGE PER DAY, THE PILE OF GARBAGE HAS DISAPPEARED.

ACCORDING TO LIN, THE GARBAGE FERMENTS NATURALLY WITHIN THREE MONTHS BEFORE BEING SCREENED. SEVENTY PERCENT OF IT WILL BECOME ORGANIC FERTILIZER WHICH IS WELCOMED BY FARMERS.

ABOUT 200 PIGS AND 10,000 LAYING HENS ARE BEING RAISED IN THE DUMP AREA. TESTS FOR POLLUTION AND LABORATORY EXAMINATIONS HAVE SHOWN THAT THE QUALITY OF THE MEAT AND EGGS IS THE SAME AS ELSEWHERE.

LIN NOTED THAT WHILE THE DUMP USED TO RECEIVE 180,000 YUAN (U.S. 38,300) A YEAR, IT NO LONGER NEEDS SUCH FUNDS BUT INSTEAD PAYS THE STATE 360,000 YUAN (U.S. 76,600) ANNUAL INTEREST.

LIN PLANS TO TRANSFORM THE DUMP INTO A HUGE ORCHARD BY PLANTING MORE FRUIT TREES.

A MUNICIPAL OFFICIAL SAID THAT THE SUCCESS OF THE DUMP IN TIANJIN'S HEBEI DISTRICT HAS AROUSED THE INTEREST OF EXPERTS IN ENVIRONMENTAL PROTECTION BOTH AT HOME AND ABROAD. THERE IS A STEADY STREAM EXPERTS TO THE DISTRICT ON INSPECTION TOURS AND TO CONDUCT STUDIES.

A BRITISH EXPERT PRAISED CHINA FOR HAVING FOUND "THE BEST WAY TO SOLVE THE PROBLEM OF URBAN GARBAGE".

THE HEBEI DISTRICT ENVIRONMENTAL PROTECTION DEPARTMENT IS SPREADING ITS EXPERIENCE ACROSS THE COUNTRY.

#90267h0277 09/24/1990 ~Chinese News Agency

KATHMANDU (SEPT. 24) XINHUA - THE INTERNATIONAL DEVELOPMENT AGENCY OF THE WORLD BANK HAS AGREED TO PROVIDE A LOAN ASSISTANCE OF 1,378.2 MILLION NEPALESE RUPEES (45.48 MILLION U.S. DOLLARS) TO NEPAL FOR IMPLEMENTATION OF THE THIRD BHAIRAHAWA-LUMBINI UNDERGROUND WATER IRRIGATION PROJECT IN WESTERN NEPAL.

THE NEPALESE FINANCE MINISTRY TODAY ANNOUNCED THAT NEPAL WILL USE THE LOAN ASSISTANCE TO INSTAL 73 DEEP TUBE WELLS AT THE BHAIRAHAWA AND LUMBINI AREAS TO IRRIGATE AN ADDITIONAL 8,600 HECTARES OF LAND.

SIMILARLY, NEW UNDERGROUND WATER IRRIGATION PROGRAMS WILL BE IMPLEMENTED IN THE WESTERN, MID WESTERN AND FAR WESTERN REGIONS WITH THE ACTIVE PARTICIPATION OF THE FARMER COMMUNITIES. THE INFRASTRUCTURES OF THE SURFACE IRRIGATION PROJECTS WILL BE IMPROVED TO IRRIGATE 6,600 HECTARES OF LAND.

#90267h0309 09/24/1990 ~Chinese News Agency

TEHRAN (SEPT. 24) XINHUA - FORTY-NINE DRUG SMUGGLERS WERE EXECUTED RECENTLY

IN IRAN, BRINGING THE NUMBER OF THE EXECUTED TO 114 THIS MONTH.

ACCORDING TO THE LOCAL PERSIAN DAILY "KAYHAN," 44 TRAFFICKERS WERE EXECUTED ON SUNDAY IN MASHHAD, PROVINCIAL CAPITAL OF NORTH- EASTERN KHORASAN, WHILE FIVE OTHERS WERE HANGED ON SEPTEMBER 18 IN HAMADAN, NORTHWESTERN HAMADAN PROVINCE.

THE DAILY NAMED ALL THE EXECUTED, BUT IT DID NOT GIVE MORE DETAILS. EARLIER THIS MONTH, THE ISLAMIC REVOLUTIONARY COMMITTEE LAUNCHED A WEEK-LONG COUNTRY-WIDE ANTI-DRUG COMPAIGN TO ELIMINATE THE DRUG- RELATED CRIMES IN THE COUNTRY.

DURING THE PERIOD, THREE SMUGGLERS WERE KILLED IN CLASHES WITH THE COMMITTEE GUARDS WHILE 559 OTHERS ARRESTED WITH 2,215 KILOGRAMS OF NARCOTICS.

IRAN ISSUED A STRICT ANTI-DRUG LAW IN JANUARY 1989, UNDER WHICH ANY DRUG TRAFFICKER CAUGHT WITH 30 GRAMS OF HEROIN OR FIVE KILOGRAMS OF OPIUM WOULD BE SENTENCED TO DEATH.

LATER LAST MONTH, THE IRANIAN JUDICIAL AUTHORITIES ANNOUNCED THAT DRUG SMUGGLERS WOULD BE TRIED IMMEDIATELY AFTER THEIR ARRESTS AND WOULD BE EXECUTED WITHIN 15 DAYS IF THEY DESERVE THE CAPITAL PUNISHMENT.

#90267k0089 09/24/1990 ~Japanese News Agency

TOKYO (SEPT. 25) KYODO - TENSIONS IN THE PERSIAN GULF AND THE SURGE OF CRUDE OIL PRICES WORKED TO PUSH JAPANESE GOVERNMENT BONDS IN THE SPOT AND FUTURES MARKETS TO RECORD LOWS TUESDAY MORNING.

THE BELLWETHER NO. 119 ISSUE OF 10-YEAR BONDS IN THE SPOT SECTOR FELL 0.30 YEN FROM THE PREVIOUS TRADING DAY TO 80.68 YEN, SENDING THE YIELD 0.080 PERCENTAGE POINT HIGHER TO 8.690 PERCENT.

IN THE FUTURES SECTOR, THE KEY DECEMBER CONTRACT DROPPED 0.34 YEN TO 87.42 YEN YIELDING 0.071 POINT MORE AT 8.302 PERCENT.

SELLING WAS STRONG FROM THE BEGINNING OF THE MORNING SESSION, AS THE MARKET LARGELY IGNORED THE FIRMING OF THE YEN AGAINST THE U.S. DOLLAR IN FOREIGN EXCHANGE DEALINGS.

THE YIELD ON THE NO. 119 ISSUE REACHED AS HIGH AS 8.710 PERCENT AT ONE POINT, DEALERS SAID.

''THE ENVIRONMENT IS BAD. WE CAN'T TELL HOW FAR PRICES ARE GOING TO SLIDE,'' A DEALER AT A MAJOR SECURITIES FIRM SAID.

-30- 1065

#90267m0001 09/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY. IN THE NEWS:

The London FTSE is down about 10 points at midday. ... The Tokyo exchange is closed for a holiday. ... U.S. stocks in London are lower - the EXMI down about 1.50.

The dollar is sharply lower, trading at 135.56 against the yen. ... Bond prices continue to move down with the 30-year yielding 9.15%. ... North Sea crude moves above $36 a barrel. ... The seven major industrialized nations have agreed in Washington to try to hold interest rates firm. ... "The Wall Street Journal" reports this morning that AMERICAN EXPRESS engaged in a covert campaign to ruin the reputation of Swedish banker EDMOND SAFRA. ... The CANADIAN AUTO WORKERS union has ratified a contract with FORD OF CANADA. ... Orders for U.S.-made machine tools jumped 23% in August, reports the ASSOCIATION FOR MANUFACTURING TECHNOLOGY. ... R.J. REYNOLDS says it has reached agreement with the SOVIET UNION to sell an additional 3.2 billion cigarettes there on top of the 14-billion cigarette deal announced earlier.

WHAT'S AHEAD:

PRESIDENT BUSH meets SOUTH AFRICAN PRESIDENT F.W. de KLERK this morning at the White House and the TREASURY DEPARTMENT releases budget deficit figures for August. The COMMERCE DEPARTMENT issues final second-quarter GNP and corporate earnings reports tomorrow. Other economic reports due out this week include personal income and outlays as well as durable goods, manufacturers' shipments and orders - both on Wednesday from Commerce. On Friday, the FEDERAL RESERVE reports on leading economic indicators.

FROM THE BULLS: "The yield spread between stocks and bonds is now at its lowest point since the bull market began in '82 ... [and] the average stock is down about 40% from its 52- week high," says a bullish KEN HACKEL, president of SYSTEMATIC FINANCIAL MANAGEMENT. "This is not the time one should be selling, this is the time one should be buying. ... I think when the sands settle in the Mideast, oil prices will be a lot lower and stock prices will be a lot higher." (CNBC "Market Wrap-Up", 9/21)

FROM THE BEARS:

"I think we're going lower," says HOWARD COLHOUN. "As much as I don't like it, I think we may see some shooting in the Middle East and that will likely cause the market to go off maybe 200 points the day that occurs. That will make your bottom." ("Wall Street Week", 9/21)

"The market is still in a bearish trend," says ALFRED GOLDMAN of A.G. EDWARDS. "What we are seeing is a retest of the Dow low of 2483 on Aug. 23. I am seeing some bottom-fishing. Normally, that's not seen at a bottom. So, my feeling is the Dow may have to take out the lows and fall to 2400 to 2450. ... That could take another week. If we get a good low, then there will be

a tradeable rally. Traders should buy on the washout day and investors when selling gets irrational." ("Investor's Daily", 9/24)

I think we're seeing a testing of the lows," says ROBERT BRINKER, editor of "Bob Brinker's Marketimer." He says this 2400 range "is an excellent opportunity for those who are under invested in U.S. stocks to put some money to work." ("Nightly Business Report", 9/21)

STOCK MARKET:

"The collapse in stock prices over the past month has created opportunities and we've put some cash to work," says MARK STUMPP, director of research for PDI STRATEGIES, a unit of the PRUDENTIAL INSURANCE COMPANY OF AMERICA. (NYT, 9/23)

Taking a long-term perspective, the market could be near its bottom, says MONTE GORDON of DREYFUS CORP. "[However] in the near-term, the market is so emotionally traumatized ... that you could get a spike downward -- you could get as low as 2400 or 2350." Gordon says it is important to remember that economies

go through periods of recession and correction. "It's in those periods that you get ... buying opportunities, [but] I'm not talking about tomorrow." He says the market trauma "is overwhelming whatever favorable signs there are as far as the economy is concerned and not at all recognizing that this condition we're passing through now, while it may last several months longer, is nonetheless transitory because the economy is in the process of correcting a lot of its basic problems." (CNBC "World Business", 9/24 and "Wall Street Week", 9/21)

"You have total capitulation -- no tolerance to own

stocks with a question regarding the fundamentals," says JAMES AWAD, president of BMI CAPITAL CORP. He says the stock-by-stock battering "is as bad as if there had been an aggregate cleanout in the market, as in October 1987." (WSJ, 9/24)

"Stocks are a lot closer to being more reasonably valued now than they were a couple of months ago," says 2 ELIZABETH DATER. "I don't think that they are compelling values as yet, but they are really getting there." ("Wall Street Week", 9/21)

STOCK TIPS:

DAN DORFMAN rounds up in "USA Today" this morning the 18 top picks of six money managers who attended MONTGOMERY SECURITIES' annual conference. The various pickers list these six as their respective No. 1 choices: QUICKSILVER, PHOENIX TECHNOLOGY, URCARCO, BIRD MEDICAL TECHNOLOGIES, COLLINS FOODS INTERNATIONAL and POOL ENERGY SERVICES. ("USA Today", 9/24)

IBM is intriguing to EUGENE PERONI JR. at JANNEY

MONTGOMERY SCOTT. The stock is showing the best relative strength in quite some time and diverging favorably from the technology sector, says Peroni. "I think IBM is going to be a leader once this market stabilizes and resumes its uptrend." Peroni likes Big Blue at 105 and sees a short-term potential into the teens with longer-term potential up to the 150 area. On energy stocks, Peroni says long term trends remain bullish even if oil prices come down. His current favorite is AMARADA-HESS. (FNN "World Business Update", 9/24)

"We still love the pharmaceuticals, the electric utilities and the Baby Bells," says GEORGE ZIMMERMAN, director of research at GRUNTAL & CO. Among the regional telephone companies, he particularly likes NYNEX, PACIFIC TELESIS and US WEST. (CNBC "Market Wrap-Up", 9/21)

TEJAS GAS CORP. set a new closing high in the OTC market Friday, up a point to 33 1/2, and MICK MIDKIFF of MIDKIFF CAPITAL GROUP, says it has further to go. "It continues to be undervalued by about 30% compared to other natural gas pipeline companies," he says. "You

have a very astute management and a good business climate." ("Investor's Daily", 9/24)

"We're buying manufacturing companies, we're still avoiding the banks, we're avoiding the airlines and we're avoiding all leveraged entities," says KEN HACKEL, president of SYSTEMATIC FINANCIAL MANAGEMENT. "We don't buy stocks for a quarter or two quarters or three quarters. My time horizon is three-to-five-years. One should not be in the equity market if they have a one- or two-quarter time horizon. Stocks are so cheap now it pays to be patient." Among his favorites: SQUARE D CO.,

ROHM & HAAS CO., LUBRIZOL CORP, NCR, LANCE and ROADWAY SERVICES. Among oils, he likes MOBIL and ROYAL DUTCH. (CNBC "Market Wrap-Up", 9/21)

CHASE MANHATTAN CORP. says it will lose $625 million in the third quarter as it cuts 5,000 jobs and sharply increases reserves for problem real estate loans. The stock fell after the announcement Friday, closing off a point at 12 3/4. ("Investor's Daily", 9/24)

"I think [CHASE MANHATTAN's] announcement was somewhat surprising," says RICHARD BOVE of DEAN WITTER REYNOLDS. "By taking the action now, what they are saying is that maintaining capital is an incredibly important thing for them to do." (FNN "Marketwrap", 9/21) 3

"There are lot of weak banks out there," says ROBERT DOLL, portfolio strategist at OPPENHEIMER & CO. "They need to be able to come up with some reasons to merge so that they can have some economies of scale to sell some assets and build their equity base. We need that to happen in this country. [There is] too much capacity in the financial services sector." GEORGE ZIMMERMAN, director of research at GRUNTAL & CO., says he expects

at least one merger among major New York City banks in 1991, with CHEMICAL BANK, MANUFACTURERS HANOVER and CHASE MANHATTAN the most likely candidates to be "jockeying for position" in a merger. (CNBC "Market Wrap-Up", 9/22)

"I think bank stocks are going to continue to have a hard time for the foreseeable future," says JAMES MARKS, a partner in SNL SECURITIES, a bank and thrift research company. He says the accumulation of bank stock by LAURENCE and PRESTON TISCH is "high-risk investing" but notes that they have taken chances before with great success "which is exactly why people like myself are hesitant to criticize them." A report in "The Washington Post" Sunday edition notes that the Tish brothers have recently disclosed major purchases of stock in BANK OF BOSTON CORP., BAYBANKS, EQUIMARK CORP. and CONTINENTAL BANK CORP. Banking analyst BUCKY RULON-MILLER of RADNOR CAPITAL MANAGEMENT says, "That's how you make money. Throughout history, successful investors have been people who buy their straw hats in January." ("The Washington Post", 9/23)

"If there's one thing about banks, they're never

boring," says CAROLE BERGER, a senior vice president at

C.J. LAWRENCE, MORGAN GRENFELL. "They're always screwing up something." She turned bearish on most bank stocks last spring and thinks the worst credit charge-offs are ahead. Still, she now likes FEDERAL NATIONAL MORTGAGE ASSOCIATION, FIRST FIDELITY BANCORP of New Jersey and KEYCORP. ("Barron's", 9/24)

KLA INSTRUMENTS shares are trading at their lowest level in seven years, but "Barron's" reports in a feature story that "investors have so fixed on the immediate outlook for KLA that they've completely lost sight of

the company's brighter long-term prospects. Indeed, KLA seems just a few quarters away from enjoying a significant pick-up in profits." Elsewhere, TECO ENERGY and TEXFI INDUSTRIES are featured in the magazine's "investment news & views" section. ("Barron's", 9/24)

JOHN BALLEN, head of the $75 million MFS LIFETIME EMERGING GROWTH FUND, likes APPLEBEE'S INTERNATIONAL, a former subsidiary of W.R. GRACE that went public only a year ago. "It's the fastest growing restaurant chain in the country and it's conceivable they could end up with a thousand stores," says Ballen. ("Barron's", 9/24)

"My favorite stock right now is ... MICROSOFT," says ROBERT BRINKER, editor of "Bob Brinker's Marketimer." He predicts earnings of over $3 and says "the fundamentals are intact on this one." He also likes SUN MICROSYSTEMS. ("Nightly Business Report", 9/21)

-30- 11788

#90267m0002 09/24/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 24) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The dollar is lower this morning and CITIBANK's PAUL CHERTKOW says from London that the G-7 meeting gave no clear lead to world currency markets. "There's no

longer any conviction that there's going to be a coordinated policy response to interest rates or currency movements." Chertkow says this leaves the market focusing on the fact that Germany and Japan require high interest rates to temper inflation while the U.S. needs lower rates to boost the economy. "In those circumstances, the dollar seems set to decline further. The only question is how far." (FNN "World Business Update", 9/24)

"I think interest rates are peaking now," says EDWARD HYMAN, vice chairman at C.J. LAWRENCE, MORGAN GRENFELL INC. "I think bonds, say by next summer, will be yielding 7 1/2%. I like them [better than stocks]." He is bullish on the dollar, believing "it might be making a bottom here." ("Wall Street Week" 9/21)

"We expect a decline in the federal funds rate of about 0.5 percentage point over the next few months, with further reductions pushing the rate down to 7% or lower in the first half of 1991," says ROBERT DiCLEMENTE, a senior analyst at SALOMON BROTHERS. ("Investor's Daily", 9/24)

"The credit market has made up its mind that the economy is either in a recession or close to one," says LEONARD SANTOW of GRIGGS & SANTOW. "The Middle East, the budget and oil are the three focal points and will be until those situations are resolved." (NYT, 9/24)

"The bond market is basically caught between two giant forces," says STAN CARNES of LEHMAN BROTHERS. He says higher oil prices and signs that a recession is on its way have created an "equilibrium" around 9%. Carnes predicts a rally in bonds around the middle of next year. (FNN "Marketwrap", 9/21)

concerns seem to override all other factors operating in the fixed-income markets. (WSJ, 9/24)

THE ECONOMY:

TREASURY SECRETARY NICHOLAS BRADY says that although economic growth is "slower than it should be, I don't accept the use of the word recession. There is underlying power in this economy that's still with us." (NYT, 9/24)

"My guess is the economy is going to be flat for at least a year," says EDWARD HYMAN of C.J. LAWRENCE, MORGAN GRENFELL INC. "I am sorry to say I think it might be as much as a year before we can feel that we're out of the woods and can look for an upturn -- say in 1992." He thinks unemployment will be up to 6.5% by next summer and that inflation in 1991 will be around 3%. ("Wall Street Week", 9/21)

"We believe a recession is probably going to start beginning in the fourth quarter" says STAN CARNES of LEHMAN BROTHERS. He looks for the downturn to last two

or three quarters. (FNN "Marketwrap", 9/21)

NEIL MacKINNON, chief economist for YAMAICHI INTERNATIONAL, says there is "a big risk of a recession before the end of the year." He says that fact coupled with the growing banking crisis constrains the options the Fed has open to it. ("Nightly Business Report", 9/21)

"The next target is $40 [a barrel for oil]," says CHRISTIAN GOHLER, energy broker at MERRILL LYNCH FUTURES. "Because of the time lags in delivery, we're just now starting to feel a hole in the supply," says TOM WALLIN of "Petroleum Intelligence Weekly." JOSEPH ANCONDA, analyst at BELL & DANIELS, predicts that "even with the spigots wide open, we're going to have a shortfall of at least a million-and-a-half barrels a day." ("USA Today", 9/24)

Analysts say the first shock waves from surging oil prices are prompting lowered corporate earnings estimates. "This is the worst set of readings since the last recession in 1981," says BENJAMIN ZACKS, executive vice president of "Zachs Investment Research." "These

[earnings] numbers are getting very bleak." (WSJ, 9/24)

National economies around the world are "out of sync with one another," says ABBY COHEN at BARCLAYS de ZOETE WEDD. She says economies in the United States, Canada and the United Kingdom are much weaker than other nations, and their central banks are more likely to ease interest rates. "If you take a look at some of the other economies in Asia, some of the economies in Europe, they continue to look rather robust, at least in relative terms," says Cohen. In these countries, central banks are still inclined to fight inflation.

(FNN "World Business Update", 9/24)

IN WASHINGTON:

The SECURITIES AND EXCHANGE COMMISSION is stepping up

its review of the disclosure of environmental

liabilities, reports "Investor's Daily." The paper

quotes ENVIRONMENTAL PROTECTION AGENCY staffers as

saying the number of filings the SEC sends to EPA for

review has increased nearly 10-fold since last spring.

("Investor's Daily", 9/24)

#90267p7214 09/24/1990 ~PR Newswire

EL SEGUNDO, CA (SEPT. 24) PR NEWSWIRE - Infonet today announced that an interconnect has been established between its leading international value-added network and Japan's U-net public data network. U-net subscribers will be able to gain local access to Infonet's global network for worldwide data, electronic mail, store and forward, fax and telex transmissions from 60 Japanese cities.

Owned and operated by Nippon Unisys Co. Ltd., the U-net public data network is also a leading provider of electronic data interchange (EDI), electronic mail and database services in Japan. Nippon Unisys will connect U-net subscribers who wish to have dial-up or dedicated access to the Infonet network.

"This new interconnect will allow our multinational customers in Japan to communicate with their international locations and business partners in 110 countries via the Infonet network," said Nippon Unisys General Manager Tsutomu Nakajima. "Infonet will, for instance, handle a significant portion of the data communications traffic between Japanese enterprises and their subsidiaries in the U.S. and Europe."

Mitsui Knowledge Industry (MKI) Co. provides local telecommunications service and support for Infonet customers in Japan. MKI will make the necessary arrangements for Infonet users in Japan to become U-net subscribers.

Applied Materials Japan is one of many customers who plan on using U-net as an external gateway to Infonet. Applied Materials Japan is a wholly owned subsidiary of Applied Materials Inc., (NASDAQ: AMAT) the leading independent producer of wafer fabrication equipment used by semiconductor manufacturers worldwide.

Japan is Applied Materials' largest market. The firm has 15 sales and field service locations in Japan, including a manufacturing plant, research and engineering facility in Narita.

MKI will also connect Japanese businesses and offices of multinational firms in Japan to Infonet's Notice 400 global messaging service and install Notice 400 PC software at their sites.

Further information on Infonet products and services is available by calling Infonet at 213-335-2875 in the United States or MKI at 81-3-237-6020 in Tokyo.

CONTACT: Mike Radice of Infonet, 213-335-2875.

ENGLEWOOD, CO (SEPT. 24) PR NEWSWIRE - Michael J. Timbers, president and CEO of IHS Group Inc. has today announced the acquisition of the Baxter Corp. MMIS Division by Continental Healthcare Systems Inc. (CHS), an IHS Group company based in Overland Park, Kan.

The MMIS (Management Services/Logistics Systems) Division is a leading supplier of material management automation systems to hospitals in the U.S. The acquisition positions CHS, already a top-ranked materials and pharmaceuticals management software company, as the number one supplier in materials management automation systems. With a client base of 600 hospitals, CHS is now the leading supplier of departmental solutions in the healthcare industry.

"The acquistion is consistent with the strategic objective of IHS Group in expanding our information company portfolio to address the growing needs of our customers," Timbers elaborated in making the annoucement. "The MMIS product line significantly enhances CHS's market position as a supplier of hospital information systems. There are substantial integration opportunities in distribution, customer support, and technology similarities."

The MMIS Division product line includes hardware/software automation systems that are both minicomputer- and PC-based. The company's most recent introduction were the Advantage(TM) and Advantage Plus(TM) automation systems for the IBM PC platform. Baxter Corp. will continue to offer their IMPACT program and customer incentive programs through CHS and MATKON 2000. The CHS

systems, MATKON 2000 and PHARMAKON 2000, are designed for the IBM 370 mainframe architecture.

IHS Group is comprised of eight information companies which provide a broad spectrum of information and information management services to such diverse markets as engineering, hospitals, library management and government. In addition to Continental Healthcare Systems, the IHS Group companies include Information Handling Services, CLSI, Predicasts Inc., Global Engineering Documents, D.A.T.A. Business Publishing, Lake Publishing Corp., and, in the United Kingdom, Technical Indexes Ltd.

SAN FRANCISCO (SEPT. 24) PR NEWSWIRE - Transcisco Industries Inc., a San Francisco based company (AMEX: TNIA, TNIB), announced today the appointment of Dr. Ottokarl Finsterwalder to their Board of Directors.

Finsterwalder has been a Managing Director of Creditanstalt- Bankverein, Vienna, Austria, since 1985 and previously was their Senior Officer in charge of international operations since 1974. Creditanstalt is the largest bank in Austria with total assets of $40 billion and is considered one of the top East-West trade banks in the world.

Finsterwalder graduated from Hamburg Law School and practiced in Hamburg, New York and Paris prior to becoming a director of Hill Samuel & Co., Ltd., merchant bankers in London. Finsterwalder is also a director of the following boards: ALWA in Vienna, AWT Internationale Handels-und Finanziorunge Aktiengesellschaft in Vienna, EBIC European Banks' International in Brussels, European American Banking Corp. in New York, Leykam-Murztaler Papier-und Zellstoff Aktiengesellschaft in Gratkorn and Wirtschafts-und Privatbank in Zurich.

Mark C. Hungerford, chairman and CEO of Transcisco Industries stated, "We are very pleased to have Finsterwalder on our board and know he will be a great help with our overseas operations."

Transcisco Industries operates railcar maintenance and retrofitting operations through its Transcisco Rail Services division and its wholly owned subsidiary, Transcisco Tours, operates a dinner train in San Antonio, Texas, and will commence operation of a luxury "cruise train" service to Tahoe and Reno from the San Francisco Bay Area starting in late 1990. Transcisco owns 36 percent of PLM International, an AMEX- listed diversified equipment leasing company, and Transcisco owns 20 percent of SOVFINAMTRANS, a U.S.S.R. railcar leasing company that operates tank cars with Transcisco's Uni-Temp heating system. Transcisco expects to diversify its exposure, both in equipment-types and geography, to proprietary transportation equipment, parts and operating businesses using its own unique technologies and its proven financing skills.

SAN FRANCISCO (SEPT. 24) PR NEWSWIRE - Harper San Francisco and the Hazelden Foundation are pleased to announce the signing of a new contract, whereby Harper will bring selected Hazelden titles to the trade marketplace. Hazelden the premier publisher of addiction and recovery literature since 1954, has granted Harper an exclusive first option on all new adult trade paperback and hardcover books for six years beginning July 1, 1990, the effective date of the new contract.

"We are extremely pleased to be a supportive partner in fulfilling Hazelden's mission," said Harper San Francisco editor-in-chief Thomas Grady. "The original contract between us, signed in 1986, coincided with a tremendous growth in recovery publishing and in the development of the brand new bookstore category of recovery literature. We are proud of our joint efforts in helping to launch this new category of trade publishing and we look forward to influencing the future direction of trade recovery publishing."

Hazelden, a nonprofit foundation in Center City, Minn., is recognized

throughout the world as a pioneer in chemical dependency treatment, community and professional services, and publishing. The diversity of Hazelden's services and titles reflect the foundation's commitment to meeting the needs of the recovering community and to educating the public on issues of chemical dependency and related areas involving addictive behaviors. Hazelden's extensive publishing program includes books, pamphlets, audiocassettes, and videocassettes.

Hazelden literature was available primarily through direct mail until 1985, when Winston-Seabury brought several of its meditation books to the trade. Harper San Francisco and Hazelden first affiliated in February 1986, when Harper acquired Winston-Seabury and renegotiated the contract between Winston and Hazelden. Since that time, Hazelden has continued its successful direct mail operation, selling nearly 20 million pieces of literature to individual consumers and institutional markets in 1989 alone, while Harper has sold an additional 5 million copies of Hazelden books to the trade between Spring 1986 and Summer 1990.

Daily meditation books and self-help titles are among the most popular Hazelden titles in the trade. Hazelden's series of more than 20 meditation books, including such bestsellers as "Each Day a New Beginning" and "Twenty-Four Hours a Day," has inspired a new category that continues to flourish. Similarly, Melody Beattie's phenomenally successful "Codependent No More," which has been on the New York Times bestseller list for more than two years and has two million copies in print, helped to create a burgeoning new category of recovery literature.

Harper San Francisco has announced three new Hazelden titles for Fall 1990 and will soon announce four titles for Spring 1991. Harper San Francisco plans to license 12 to 15 Hazelden titles each year.

CONTACT: Pat Rose of Harper San Francisco, 415-477-4520; or Pat Benson of Hazelden Foundation, 612-257-4010, ext. 2120.

SALT LAKE CITY (SEPT. 24) PR NEWSWIRE - The following is an update on the joint venture exploration program from Centurion Mines CEO Spenst Hansen:

Centurion Mines Corp. (NASDAQ: CTMC) of Salt Lake City and Crown Resources Corp. (NASDAQ: CRRS) of Denver are involved in a large scale joint venture exploration program on Centurion's properties in Utah.

Ten of the planned 43 holes have been drilled. The remaining holes should be completed by year end. Drills are now operating at Lion Hill and Jackson Ridge and will be moved later to our North Oquirrh properties and to the Tintic Mining District. The number of drill holes may be increased if

exploration results are favorable. In the event that occurs we will be "Charging Forward" on the most promising sites.

One completed drill hole encountered 500 feet of anomalous gold mineralization extending from the surface all the way to the bottom of the hole (500 feet). The interval between 190 and 205 feet averaged .03 ounce per ton gold. Another interval between 260 and 350 feet averaged .014 ounce per ton gold. Four off-setting holes (100 feet in each direction) are being drilled to test this promising gold discovery.

A massive amount of exploration data has been gathered through the 1990 field season thus far by our staff of more than 20 geologists and geophysicists. More than 7,000 surface geochemical samples have been gathered. Twenty five line miles of induced polarization (IP)/Resistivity geophysical surveying has been completed. Results from this large amount of technical data has identified numerous excellent gold mineralized zones from the surface that are now being tested by reverse circulation drilling.

Centurion Properties Outside The Crown/Centurion Venture By agreement with Crown, Centurion has been assigned full ownership of its approximately 4,500 acres of mining claims and mineral leases in the Dugway mining district of Western Utah. The Dugway district has a previous history of gold production. Surface sampling by Centurion geologists in August 1990 showed localities of ore grade gold occurrence at the surface. Centurion's holdings are adjacent to properties currently being explored in that district by Gold Standard Mining Co.

The agreement relating to Centurion's West Tintic properties with Teck Resources Corp. has been terminated. Centurion now has full control of approximately 5,700 acres in the West Tintic district. The results of Teck's exploration work including the drilling of seven holes during 1990 is currently being evaluated by Centurion geologists. A preliminary review shows ares of encouraging gold mineralization. Centurion's management will later determine what further action will be taken with regard to West Tintic.

Summary Exploration work during 1990 has identified several highly prospective localities each of which has an excellent possibility of containing gold ore deposits larger than 1,000,000 ounces. These localities are now being tested by drilling. The management and technical teams of Crown Resources and Centurion Mines are working well together. Centurion believes that the exploration currently under way has a high probability of success.

CLEVELAND (SEPT. 24) PR NEWSWIRE - In the single largest commitment it has ever made in the United States to any university, BP America, Inc. has announced grants totaling more than $6.5 million to Case Western Reserve University. BP America, one of the world's largest producers of petroleum products, has been a long-time supporter of CWRU research initiatives.

The commitment is a series of gifts to the university, including a $2 million grant toward the construction of a new macromolecular science facility and an additional $2.5 million to be utilized in new BP/CWRU collaborative research initiatives.

CWRU President Agnar Pytte said the $2.5 million in research projects would be the basis for expanding the on-going relationship between BP and CWRU scientists on projects of importance. BP also presented CWRU with a $1 million gift last year for the President's Discretionary Fund.

Pytte said the grants from BP have arisen as a result of both the close relationship the university has shared with the company, and also BP's strong commitment to innovative research and product development.

"BP has been an integral research partner for the university for many years, and this significant gift reflects the company's ongoing commitment to sponsor the best and brightest in research and development," said Pytte. "We are most grateful for this handsome expression of confidence in CWRU's research mission. It will solidify the working relationship we already enjoy with BP America. I think both sides stand to benefit enormously from this continuing arrangement."

James Ross, BP America president and chief executive officer, said he viewed the gift to the university as an opportunity for BP to play an integral part in the sponsorship of mutually beneficial research initiatives and in the establishment of CWRU as a major national research center in macromolecular science.

CWRU researchers will work with BP executives to organize the new research initiatve and define the initial projects between scientists at CWRU and BP.

In addition to the research applications of the BP gift through specific projects and the new facility, Pytte said the grant was symbolically important to both CWRU and the Cleveland corporate community.

COLUMBUS, OH (SEPT. 24) PR NEWSWIRE - Skyway Airlines today announced it will begin nonstop service between Columbus and Milwaukee on Oct. 22, 1990.

According to Rolly Bergeson, president of Skyway Airlines, the new service will consist of three roundtrip flights each business day between Port Columbus International Airport and Milwaukee.

Connecting flights will be offered through the carrier's Milwaukee hub to Appleton, Madison, Green Bay, LaCrosse and Wausau/Stevens Point (Central Wisconsin Airport), Wis.; Grand Rapids and Muskegon, Mich.; and Rockford, Ill.

"The new Skyway flights will provide the business traveler with reliable, efficient air service between the two cities," Bergeson said. "We offer passengers a reliability of service that is unique in the regional airline industry."

Skyway operates new 19-seat, pressurized Beechcraft 1900 aircraft. Each aircraft is outfitted with high-backed leather seats, ample legroom and a tray table which provides a work area for the business traveler.

Skyway Airlines is a wholly owned subsidiary of Mesa Airlines, a regional carrier based in New Mexico, and operates as The Midwest Express Connection through a marketing agreement with Milwaukee-based Midwest Express Airlines. Inaugurating service in April 1989, Skyway now serves 20 markets throughout the upper Midwest and has approximately 90 employees.

GRASS VALLEY, Calif. (SEPT. 24) PR NEWSWIRE - Brush Creek Mining and Development Co. Inc. (NASDAQ: BCMD) today announced that, based on the recommendation of the company's consultants, Keewatin Engineering, it has acquired the High Commission Mine. The property is located one mile east of Downieville in the Northern Mines Region of the California Motherlode and encompasses over 1,000 acres of land.

The High Commission Mine was a former gold-producer and lies immediately to the east of the Melones Fault Zone. There is good evidence for an older, pre-motherlode phase of gold mineralization in the vicinity of the High Commission. Reconnaissance mapping and sampling have identified extensive zones of sulphide "pyrite" mineralization and sericitic alterations associated with a quartz stockwork system, within and peripheral to a large porphyritic intrusion. Preliminary sampling has yielded 0.30 ounces of gold per ton from a grab sample.

This property adds a new aspect to the company as it is different geologically from the Brush Creek gold camp. The company has requested a plan from its consultants for a detailed geological mapping and sampling program.

The company will announce preliminary reserves for the Brush Creek gold camp in October, 1990.

CONTACT: Mike Pickering of Brush Creek Mining and Development Co. Inc., 916-477-5961.

TAIPEI, TAIWAN (SEPT. 24) PR NEWSWIRE - A standard specification for a hand-held scanner programmer interface has been developed for use by the information industry worldwide.

The Standard Programmer Interface specification, or SPI, was developed by an international association of software and hardware manufacturers. Established in August 1990, the Scanner Programmer Interface Association (SPIA) is comprised of leading scanner firms, including Award Software International Inc., Mouse Systems Corporation, Media Cybernetics, Corel Systems, D.F.I., K.Y.E., Marstek, Primax, Qtronix and Guts.

The specification will facilitate the development and manufacturing of hand-held scanner products and applications by software and hardware companies. It can be used with MS-DOS, OS/2, Microsoft Windows and UNIX operating systems.

Prior to the development of the SPI, a uniform programmer interface standard was unavailable for hand-held scanner products. The lack of a specification limited software applications, particularly in the areas of graphics and desktop publishing.

As a fundamental component of the optical-electronics industry, demand for hand-held scanner products is expected to increase tremendously in the next five years. The SPIA estimates that the optical-electronics industry will expand by 300 to 500 percent and sales will total more than $5 billion during this period. The formation of the SPIA and the introduction of the new specification are expected to escalate expansion of the worldwide hand-held scanner market.

Two leading research laboratories, Opto-electronics & Systems Laboratory, and Computer & Communication Research Laboratories, provided technical support during the development of the new standard scanner programmer interface.

THOMASVILLE, GA. (SEPT. 24) PR NEWSWIRE - The board of directors of Davis Water & Waste Industries, Inc. (NYSE: DWW) has authorized the repurchase of up to 25,000 shares of its common stock, from time to time, as market conditions dictate.

"We believe our long-term prospects for growth and increased profitability are brighter than ever and feel the company's stock is underpriced at current levels," R. Doyle White, president and chief executive officer, said.

"We recently completed the acquisition of the assets of The Taulman Company, a pollution control company serving municipal markets nationwide, for $7 million cash. Taulman, with 1989 sales in excess of $26 million, also markets a patented system for converting sewage sludge into fertilizer. The system is in use in Europe and four installations are operating in the United States. We believe stringent federal regulations concerning the treatment of sludge enhance the potential for this business," White continued.

"We are also pleased by improving operating efficiencies resulting from recent restructuring that included the elimination of unprofitable and marginal product lines and consolidation of some regional sales offices," he concluded.

PERTH, WESTERN AUSTRALIA, (SEPT. 24) PR NEWSWIRE - Bond Brewing Holdings Limited ("BBH") today announced that its wholly owned subsidiary, Dimola Pty. Ltd. ("Dimola"), has extended its offer to purchase up to 90 percent of the principal amount outstanding of 12-5/8 percent extendable subordinated debentures of BBH, and the associated proration period, until 12:00 midnight, New York City time, on Friday, Sept. 28, 1990, to allow time for debentureholders to comply with new required tender procedures. Debentures tendered pursuant to the offer may be withdrawn at any time prior to the expiration of the offer, and if not sooner purchased by Dimola pursuant to the offer, at any time after 12:00 midnight, New York City time, on the third business day following the expiration date. The depositary has advised BBH and Dimola that, as of 12:00 noon, New York City time, on Friday, Sept. 21, 1990, approximately 16.7 percent of the outstanding principal amount of debentures had been tendered to the depositary pursuant to the tender offer.

BBH disclosed that Dimola intends to distribute today a Sixth Supplement, dated Sept. 24, 1990, to its offer to purchase and consent solicitation to holders of the BBH debentures. Such Sixth Supplement will, among other things describe certain prospective agreements being negotiated among BBH, its syndicate of senior lenders and certain other parties. The Sixth Supplement will be accompanied by a revised letter of transmittal and consent and an agreement and release containing, among other things, certain mutual releases to be exchanged among BBH, its senior lenders, tendering debentureholders and the trustee for the BBH debentures, in connection with ongoing litigation and prospective claims between and among such parties. All tendering debentureholders, whether or not such holders have previously tendered debentures and executed letters of transmittal and consent, will be required to execute and deliver the revised letter of transmittal and consent and the agreement and release in order to validly tender their debentures.

JACKSON, MI. (SEPT. 24) PR NEWSWIRE - CMS Energy Corporation's oil and gas exploration and production unit, NOMECO Oil & Gas Co., today announced that it has completed the acquisition from various sellers of approximately 25 billion cubic feet of Devonian Antrim Shale natural gas reserves.

The properties, located in Otsego County in Michigan's northern Lower Peninsula, consist of more than 5,000 acres divided into nine production units. NOMECO's working interests in the units range from 25.4 percent to 43.7 percent. The properties are operated by Antrim Gas, Inc.

"This represents a very significant transaction in our ongoing reserve acquisition program," said NOMECO's President, R.J. Burgess. "We will continue to aggressively seek opportunities to acquire additional Antrim Shale gas

reserves in northern Michigan, as well as oil and gas reserves in other areas."

NOMECO is among the top 100 U.S. oil and gas companies in production and reserves and is Michigan's largest independent oil and gas producer. It is engaged in exploration and/or production activities in 14 states and seven foreign countries.

CMS Energy Corporation (NYSE: CMS) is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services. CMS Energy Corporation's principal subsidiary is Consumers Power Company, Michigan's largest utility and the nation's fourth-largest combination utility.

KANSAS CITY, MO (SEPT. 24) PR NEWSWIRE - Kansas City Power & Light Company (NYSE: KLT) announced today that it has signed a confidentiality agreement with Kansas Gas and Electric Company (NYSE: KGE) in connection with Kansas City Power & Light's all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric. The agreement will enable Kansas City Power & Light to review certain non-public information regarding Kansas Gas and Electric.

Drue Jennings, president and chief executive officer of Kansas City Power & Light, said, "We welcome the opportunity to review information which has not been previously available to us. This is a desirable first step which we hope will lead to broader negotiations."

On July 23, 1990, Kansas City Power & Light commenced an all cash, fully financed tender offer for all outstanding common and preferred shares of Kansas Gas and Electric. The offer price of $27 per share for the common stock, approximately $857 million in the aggregate, represents a 37 percent premium over the market price of Kansas Gas and Electric common stock on July 20, 1990, the last trading day prior to the commencement of Kansas City Power & Light's offer.

The tender offer is scheduled to expire at 7 p.m., New York City time, on Friday, Oct. 19, 1990.

TORRANCE, CA (SEPT. 24) PR NEWSWIRE - Ashton Tate Corp. (NASDAQ: TATE) today announced Framework XE, new integrated software targeted to managers and small businesses. Carrying a suggested retail price of $149, Framework XE will be available next week through Ashton-Tate authorized resellers. AT&T Computer Systems will also offer Framework XE as part of a promotional package in the fourth quarter, 1990.

Framework XE combines seven programs -- word processing, spreadsheet, data management, graphics, outlining, telecommunications and electronic mail -- into one "windows-like" environment that maximizes productivity and ease-of-use. The software also includes a "quick start menu" for first-time and occasional users, a built-in time manager and calculator, and extensive data sharing capabilities.

"Framework XE expands our decision support product line by offering users software at different levels and on different platforms," said Bill Lyons, Ashton-Tate president and chief operating officer. "And its ease-of-use, extensive functionality and low price make Framework XE a compelling product."

Framework XE will run on IBM PC, XT, AT, PS/2's and 100 percent compatibles with 640KB RAM.

The software will be available at a suggested retail price of $149 next week through the Ashton-Tate authorized reseller network. Unlimited, free support from Ashton-Tate, along with local access to the Ashton-Tate Bulletin Board System, will be included.

Framework XE will also be available in a special fourth quarter promotion offered by AT&T Computer Systems. It will be sold as part of a bundle that includes Ashton-Tate's APPLAUSE II graphics and Control Room utility software.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has operations worldwide, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

ARLINGTON, VA (SEPT. 24) PR NEWSWIRE - Air France and USAir have signed a letter of intent to enter into a multi-faceted marketing agreement that will include coordination of automation, marketing, scheduling and joint facilities.

This agreement, which is the first of its kind between Air France and a major U.S. carrier, will enable both airlines to offer a broader spectrum of services and destinations to their passengers both in Europe and in the United States. As part of the agreement, Air France and USAir will be able to purchase a block of seats for resale on designated transatlantic flights between their two countries.

USAir Chairman and Chief Executive Officer Edwin I. Colodny said: "A

comprehensive agreement with Air France will be a major step in our program to gain a larger share of the growing international market. USAir links dozens of interior cities in the United States with virtually all of the primary international gateway airports served by Air France. This provides a myriad of joint opportunities."

Among the opportunities to be explored by the two airlines worldwide will be joint advertising and sales promotions, code sharing, cargo development, automation enhancements that include seat selection and advance boarding passes, and shared terminal facilities at Paris' Charles de Gaulle Airport when USAir begins Philadelphia-Paris service in early 1991. Air France is already a partner in the USAir Frequent Traveler Program.

As part of the agreement, Air France and USAir will have a reciprocal blocked space program on the USAir flight between Philadelphia and Paris beginning in the spring of 1991, and on an Air France flight, beginning in the spring of 1992, between Paris and another of USAir's principal hubs to be chosen by Air France. This program is subject to approval of both governments.

Airports in the United States served by both Air France and USAir are New York's John F. Kennedy, Newark, Boston, Washington Dulles International, Miami Los Angeles, San Francisco, Chicago and Houston. Air France offers more than sixty flights each week between France and the United States.

USAir currently operates daily nonstop service between Charlotte and London and Pittsburgh and Frankfurt, as well as service to three Canadian points, Bermuda and the Bahamas.

#90267p7265 09/24/1990 ~PR Newswire

MALVERN, PA (SEPT. 24) PR NEWSWIRE - Dr. Felix Zandman, chairman and chief executive officer of Vishay Intertechnology Inc. (NYSE: VSH) announced today that the previously disclosed investigation into the conduct of certain former employees of Dale Electronics Inc. has resulted in Dale's agreement to plead guilty to certain charges.

All of the acts in question occurred prior to Dale's becoming a wholly owned subsidiary of Vishay. In accordance with the agreement, Dale paid the U.S. government approximately $3.8 million in restitution, interest, fines and related costs.

As a result of this settlement and Vishay's cooperation and reputation, the government has agreed that Dale would not be debarred from doing business with the government. The government also agreed that no further prosecution

against Dale would result from these activities.

Vishay also announced that it will be reporting a pretax gain of approximately $2 million (net of associated costs) in the quarter ended Sept. 30, 1990, from the sale of a currency option that the company had purchased in conjunction with the lapsed acquisition of Crystalate Holdings plc.

Zandman stated that the net effect of these unusual items will be a reduction in earnings per share of approximately 7 cents to 10 cents per share for the quarter ended Sept. 30, 1990, depending upon dilution and tax treatment.

Vishay Intertechnology Inc. is a leading U.S. and European producer of a wide range of electronic resistors and resistive sensors. It also is a major producer of other types of passive electronic components. The company's products are used in a broad range of industries.

MINNEAPOLIS (SEPT. 24) PR NEWSWIRE - Metropolitan Financial Corporation (NYSE: MFC), Fargo, N.D., announced today that it has completed two transactions with the Resolution Trust Corporation and, as a result, has acquired First Savings Association, F.A., of Bismarck, N.D., with deposits of $85.1 million and the deposits of 12 branches of Midwest Federal Savings Bank of Minot, N.D., totaling $341.9 million. The acquisition was completed through Metropolitan Financial Corporation's savings bank subsidiary, Metropolitan Federal Bank, fsb. Metropolitan Financial paid $430,000 for the Bismarck institution and a total of $685,000 for the Minot branches and deposits.

The Bismarck transaction was a purchase of the entire institution, assets and liabilities, with options that Metropolitan can exercise on the assets within the first 120 days of the transaction. In addition to the home office in Bismarck, the institution has a branch in Mandan.

The 12 Midwest Federal Savings Bank branches include that institution's main office in downtown Minot and its two Grand Forks branches. The other branches are located in Valley City, Devils Lake, Bottineau, Cavalier, Grafton, Kenmare Rugby, Stanley and Garrison.

Stan K. Dardis, the president and chief operating officer of Metropolitan Federal Bank, fsb, commented, "We are delighted with the opportunity that these transactions provide Metropolitan Federal Bank. First, they affirm Metropolitan's commitment to North Dakota, where we were founded in 1926 and where we are the largest financial institution. Second, they will enable Metropolitan to expand the office network and broaden our market share in

solid, successful North Dakota communities."

Company officials noted that Metropolitan was able to successfully pursue and complete these transactions because the bank meets all the current and fully phased in regulatory capital levels. Metropolitan expects to use the $427 million in deposits acquired to repay more expensive wholesale borrowings and effectively lower its cost of funds, thereby improving its profitability. It does not expect any significant change in its capital levels or ratios subsequent to today's transactions.

Metropolitan Financial Corporation is one of the largest savings institutions in the country with assets in excess of $3.9 billion at June 30, 1990. Through its savings bank subsidiary it operates 103 branch offices in North Dakota, Minnesota, Iowa, South Dakota, Wisconsin, and Arizona. The company's common and preferred stock trade on the New York Stock Exchange; the common under the symbol MFC.

ATLANTA (SEPT. 24) PR NEWSWIRE - Delta Air Lines' (NYSE: DAL) senior vice president - finance, Thomas J. Roeck Jr., issued a statement that the price of jet fuel has jumped sharply in the last few days, significantly above the large increase already experienced since the Iraqi invasion of Kuwait.

Roeck stated: "Delta's fuel price as of today is approximately 94 cents per gallon, 64 percent above the price of 57 cents per gallon on July 31." Roeck noted that Delta had filed a 5.3 percent domestic fare increase effective Aug. 30 and another domestic fare increase of 4.2 percent effective Oct. 1, to offset the increase in fuel costs. However, he indicated that neither increase will have a significant impact on the September 1990 quarter's revenue.

Roeck stated: "That in view of this sharp run up in fuel prices and the current condition of the general economy, the company expects the results of operations for the September 1990 quarter will be significantly worse than the results for the 1989 quarter." He noted that the financial results for the 1989 quarter were positively impacted by a strike against a major competitor and were the highest recorded by Delta in a September quarter.

CAMBRIDGE, MA (SEPT. 24) PR NEWSWIRE - Index Technology Corporation (NASDAQ:

INDX), a leading developer of computer-aided software engineering (CASE) products, today introduced Excelerator for Design Recovery (XL/Recover), a software reverse engineering product that uses the power of CASE to address today's most critical IS challenge -- the maintenance, enhancement and replacement of existing information systems.

The new product, available now, for the first time lets organizations use Excelerator to automatically analyze, document and then revise existing COBOL applications. Excelerator is the industry's leading systems analysis and design CASE tool. To date, CASE tools have been used primarily for the development of new information systems.

Most older systems are composed of thousands, or even millions, of lines of code, which have been repeatedly patched and modified and often are undocumented. Maintenance of these systems -- which ranges from addition of new functions and bug fixes to accommodation of new hardware and operating systems -- typically consumes more than 80 percent of software development budgets.

XL/Recover, an integrated set of reverse engineering tools, scans COBOL programs, recovers data and design information and then stores it in the Excelerator repository. Unlike other products, XL/Recover captures both data structures and procedure code, as well as screen maps. The product automatically translates code into simple diagrams, which would otherwise take many hours to produce.

XL/Recover reads COBOL, IMS/MFS, CICS/BMS and IMS database definitions, and generates diagrams, design entities and detailed analysis reports that enable users to evaluate, document or completely reengineer an application. Once transferred to the Excelerator repository, analysts can use Excelerator to manipulate the information and generate specifications, such as diagrams, screen layouts and analysis reports.

Excelerator, with an installed base of more than 24,000, automates much of the systems analysis and design process, helping systems development professionals create and revise systems diagrams and charts, validate and cross-reference design data, prototype screens and reports, and create user- and system-related documentation before coding.

XL/Recover runs on the IBM PS/2, PC AT and compatibles. It is priced at $9,800; quantity discounts begin with purchases of two copies. The initial release of XL/Recover runs on the MS-DOS operating system. An OS/2 version is planned for next year.

Index Technology, founded in 1983, markets its products from its Cambridge, Mass., headquarters, from field sales and support offices throughout the U.S. and Canada, through subsidiaries in the U.K., France, West Germany and Australia, and through third-party distributors, providing coverage in

approximatley 40 countries.

#90267p7273 09/24/1990 ~PR Newswire

ROCKVILLE, MD. (SEPT. 24) PR NEWSWIRE - GE Information Services (GEIS) has announced the installation of a GEIS network node in East Berlin and plans to install network nodes in three other cities in East Germany -- Dresden, Leipzig and Chemnitz -- before the end of 1990. These GEIS network nodes in East Germany will allow direct local access to the GEIS network and its value-added applications via a local phone call.

Since the unification efforts began, demand from West German government and corporate entities for information on East German companies, branch offices and markets has grown significantly.

The GEIS clients who are accessing the GEIS network now via East Berlin include: Handelsblatt, Sueddeutsche Zeitung, and Axel Springer Verlag. Network access requirements of other GEIS clients in East Germany in the banking and manufacturing industries are also being served at this time.

With the establishment of the GEIS network node in East Berlin, followed by the three additional planned sites in East Germany, companies there can now access a variety of applications offered on the GEIS network, such as electronic message handling services, electronic data interchange (EDI) systems, network management services, as well as equipment management system, port system, order entry system, financial management and reporting system, and hotel reservation system services.

This GEIS network expansion into East Germany is the first step towards the possible further expansion of its network into other countries in Eastern Europe. The GEIS network has direct local access in 35 countries, with additional access via Public Data Networks (PDNs) in 70 more countries.

For further information on GEIS' network access in East Germany, please call GEIS' Global Support Services in the U.S. at 301-251-6510, or call GEIS in Germany at (49) 2233-6091. GE Information Services, a division of General Electric Company, USA, has its headquarters in Rockville. In Germany, GE Information Services is headquartered in Cologne and has local offices in Frankfurt, Munich and Stuttgart.

CONTACT: Steve Haracznak, 301-340-4494 or Martha Mostovych 301-340-4340, both of GE Information Services.

#90267p7274 09/24/1990 ~PR Newswire

SIMI VALLEY, CA (SEPT. 24) PR NEWSWIRE - MICOM Communications Corp. is introducing a new series of products that are the first to use Fast Packet Multiplexing for integrating data, voice, fax and LAN traffic over low-cost, low-speed leased lines.

The debut of the Marathon series of Data/Voice Network Servers begins with the introduction of the 5K model at TCA '90 in San Diego (Sept. 25-27), a product launch the company claims will start a new era that will make the benefits of integrated networks available to all wide-area network users. MICOM says small to medium sized businesses have been locked out of remote data/voice integration benefits until now.

Bal says that any user of synchronous or asynchronous devices or LAN bridges or routers can add voice and fax traffic to their data network and cut their toll call charges. Additionally, the product can be used to bring data capabilities to what have traditionally been telephone-only networks.

MICOM contends that the bottom line customer benefit of the Marathon series is a bottom line issue: saving money. By adding voice, fax, and LAN traffic to a low-speed line that previously would have been used to carry data only, the company says users can eliminate interoffice toll and fax charges between remote sites. The company says just one hour of daily phone and fax traffic between offices can allow the Marathon 5K solution to pay for itself in under one year by eliminating toll charges.

The Marathon 5K achieves this integration breakthrough by combining four bandwidth saving technologies: data compression, speech compression, fax demodulation, and Fast Packet Multiplexing (FPM). MICOM uses the term Rapid Relay to describe the combination of these technologies.

According to Guy, the key element behind MICOM's Rapid Relay technology is the low-delay, low-speed Fast Packet Multiplexing protocol. "MICOM appears to be the only company implementing Fast Packet Multiplexing on low-cost platforms for use on economical low- speed networks.

MICOM Communications Corp. is a global supplier of data/voice integration, local networking and wide area network (WAN) products including X.25 networking products.

PHOENIX, AZ. (SEPT. 24) PR NEWSWIRE - The Keebee Corporation (OTC Bulletin Board: KEBE) announced today the signing of an agreement providing for the purchase, through Express Bank, Ltd., of Washington, D.C., of 250,000 tons of processed ore concentrates containing gold, silver and platinum group metals. The new improved technology for the extraction and recovery of these metals will be used on an environmental clean-up project which will produce, as a by-product, iron hydroxide which is used by the agricultural community to enhance depleted soils.

Also to be included in the acquisition are various mineral leases. The purchase price to be paid by Keebee for the assets is 210,000,000 million shares of Keebee stock. Keebee further announced the proposed purchase of mines, equipment, mills and related real property from American Security Corporation ("ASC") of Nevada in exchange for the transfer to ASC of $100,000,000 of debentures and interest thereon which had been purchased by Keebee in June 1990 from Bristol Merchant Savings and Guardian Savings & Guaranty, Inc. Completion of the transactions is subject to, among other things, Keebee's satisfaction, after its investigation by assay and certification, of the quantity, quality and economic viability of the ore concentrates. Keebee is currently initiating the assay and certification and is unable to state when the investigation of the concentrates will be completed or what the results will be.

The general offices of Keebee will be located at 2828 North Central Ave., Suite 1200, Phoenix, AZ 85072.

HARRISBURG, PA (SEPT. 24) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) Malcolm W. Gambill, president and chief executive officer of Harsco Corp., announced today that the company's Harrisburg-based Taylor- Wharton plant has won $15 million worth of new business from West Germany for its high pressure steel cylinders after meeting stringent code approval requirements in that country.

Taylor-Wharton is a part of Harsco's Plant City Steel Division, a specialist in the manufacture of gas containment products with plants in both the United States and Europe.

In making the announcement, Gambill commented: "Taylor-Wharton's initiative and determination are commendable. Their accomplishment in winning this new business testifies to the export opportunities available to U.S. industry and to the resolve needed to meet those opportunities. We are very pleased with Taylor-Wharton and its contribution to the growing internationalization of Harsco's Engineered Products Group."

Harsco Corp. is a diversified, international, industrial company headquartered in Camp Hill, Pa. The company's 12 divisions provide products and services for defense, industrial, commercial and construction applications from more than 270 facilities in 32 states and 15 countries.

TROY, OH (SEPT. 24) PR NEWSWIRE - PMI Food Equipment Group, a business unit of Premark International (NYSE: PMI), announced today its plans to expand the company's Elgersweier, Germany, manufacturing operation.

The expansion, which is expected to cost approximately $3 million, will add 33,000 square feet to an existing 135,000 square foot facility.

The company currently produces Hobart brand commercial warewashing and waste systems in Elgesweier. The new addition will house production of highly automated warewashing systems for the airline catering market as well as advanced engineering and expanded technical training operations. Elgersweier, which currently employs 394 people, will be adding approximately 50-60 manufacturing and technical personnel.

Construction for the expansion is expected to begin immediately with the completion date of June 1991.

Enzo De Benedetti, president of PMI Food Equipment Group Europe, said, "This investment is a reflection of the company's development strategy for the European market and should further strengthen the leadership position of Hobart in the industry."

PMI Food Equipment Group is the premier supplier of equipment, systems and service to the world's food industry. Its products are marketed under the Hobart, Vulcan, Foster, Wolf, Stero, Adamatic, Tasselli, Still, Regethermic and Inoxyform trademarks and sold in more than 100 countries.

LONDON (SEPT. 24) PR NEWSWIRE - Robert Maxwell, publisher and editor-in-chief and Ian Watson, editor of The European, today announced the appointment of Tony Rennell, 42, formerly of The Sunday Times, as executive editor of The European. Rennell's extensive experience in news, features and production will be an invaluable asset in building upon the already established success of The European.

Rennell will take up his duties with The European on Monday, September 24. Rennell was managing editor of The Sunday Times arts, books, style and travel sections for the past 3 years. Before that time he was in charge of the paper's news coverage. Rennell has been with Times Newspapers for the past 13 years.

"I am delighted to be joining The European at this exciting stage of its development. The paper has clearly established itself and now intends to consolidate its position in the European market. I am sure that my experience can help the team to do just that," Rennell said.

SOMERVILLE, NJ (SEPT. 24) PR NEWSWIRE - Unimed, Inc. (NASDAQ: UMED) announced today that it has terminated negotiations on its proposed private equity placement with a Far Eastern group.

Harold J. Tenoso, Unimed's president and chief executive officer, stated, "Although we are pleased with the interest in our company by a Far Eastern group, the recent unsettled conditions in the financial markets make this an inopportune time for concluding this arrangement." He went on to say, "Our product portfolio is advancing and we are continuing to seek alliances to support our growth through their resources and established relationships in the pharmaceutical industry. We are particularly encouraged by the recent sales growth in Marinol (dronabinol), Unimed's antinausea pharmaceutical for cancer chemotherapy, and are looking forward to improved fourth quarter performance."

Unimed, Inc. is a pharmaceutical company specializing in the early acquisition development and marketing of new cancer therapeutic compounds. With its unique "technology management" strategy, the company bridges the gap between university research centers and pharmaceutical manufacturers to bring promising new therapeutics to market.

#90267p7287 09/24/1990 ~PR Newswire

LOS ANGELES, (SEPT. 24) PR NEWSWIRE - Independent Entertainment Group (NASDAQ: INDE) announced today the launch of a new satellite delivered

pay-per-view (PPV) and pay television service called "Night Action Network."

The new service is a joint venture with Avalon Pictures, Inc., a Los Angeles based PPV company which recently launched "Action Pay-Per-View," a 24-hour exclusive PPV service featuring primarily action, adventure and thriller programming. Avalon's "Action" is funded with $31 million in financing from Tokyo-based Horikoshi Entertainment Corp., a subsidiary of the $10 billion Horikoshi Corp.

"Night Action Network" is a four-hour nightime segment of the Action Pay-Per-View channel featuring sexy and provocative programming for the adult market. "Night Action Network" will be launched in at least 400,000 cable system homes in November on a pay-per-view basis and will also be available to over 700,000 backyard satellite dish homes on a pay subscription basis. PPV buyers will be charged around $5.00 per evening for "Night Action Network," and backyard satellite dish subscribers will pay approximately $60 per year.

"This new venture is well aligned with our overall PPV distribution strategy," said Tom Coleman, INDE chairman and president. "With our piece of the venture fixed, we have greatly reduced the downside of PPV channel ownership and yet maintain tremendous upside potential. Our partners in this venture have the financial resources for the long term staying power necessary to launch the new service. The flexibility and dual revenue streams of selling 'Night Action Network' in both PPV and subscription markets is very advantageous to us."

The joint venture between INDE and Avalon provides for a 50/50 sharing of revenues with Avalon contributing marketing and operating functions and INDE providing all programming and fixed cash contributions. Additionally, INDE receives a programming and distribution fee of approximately 12 percent of gross receipts and will also be supplying a portion of "Action's" programming slate.

Chief Financial Officer Lew Eisaguirre also stated, "The numbers factor out very nicely on this venture. With the way it's structured, we could see break even within a few months, and with rather conservative buy rates and household penetration we could see revenues in the $20 million range within a few years, with 20 to 30 percent of that falling to bottom line. Perhaps more important than earnings is the potential asset value of our equity position in the channel. We've all seen the kind of value created during the 1980s out of the success of targeted basic cable channels -- projects like MTV and ESPN. We think the same potential exists for PPV channels during the '90s.

"Our total investment in this project," continued Eisaguirre, "will represent a small percentage of our capitalization leaving us funds for several other opportunities we are pursuing. This deal is also well aligned with our overall PPV distribution strategy of prioritizing activities which get us a lot closer to controlling the product and ultimately the 'dollar.' The future

of this business is much bigger than being a boxing match distributor and we are directing our commitments toward these new opportunities.

INDE recently announced year-end results of $10,624,628 in revenues and $112,934 in earnings for the year ended April 30, 1990. The company specializes in the promotion, acquisition and distribution of sporting events, movies, concerts and other programming to the burgeoning pay-per-view marketplace.

#90267p7288 09/24/1990 ~PR Newswire

MURRAY HILL, NJ (SEPT. 24) PR NEWSWIRE - Airco Gases has an agreement with the Upjohn Company (NYSE: UPJ) to construct an on-site nitrogen generating plant that will supply 200 tons per day of high- purity nitrogen to Upjohn's pharmaceutical complex at Kalamazoo, Mich.

The new unit is scheduled to be on stream by August 1991 and will produce nitrogen with a purity level of 99.999 percent. It will replace an older nitrogen unit located about one-half mile from the Kalamazoo facility, from which Upjohn currently pipes nitrogen to its pharmaceutical production plant.

After considering an off-site generator, Upjohn decided it was in its best interest to have a dedicated, on-site plant, says Ron Blanke, Upjohn's contract administrator for purchased utilities. Not only will the new plant have more nitrogen capacity than the unit Upjohn currently relies upon, but it also will employ modern technology resulting in less energy consumption, Blanke notes.

Upjohn uses nitrogen primarily for blanketing chemical storage tanks so that vapors do not escape and oxygen does not enter the system. Nitrogen also is used for pressure transfer where product is pushed through piping, tanks and other vessels. Finally, nitrogen has safety applications because it can be used to inert a chemical reaction that might become unstable.

Airco has a strong record in building nitrogen generators for a variety of industries in the U.S. In addition to the Upjohn project, Airco recently completed a large nitrogen unit for another pharmaceutical company in the Northeast.

Airco Gases is a leading manufacturer and supplier of industrial gases and gas handling technology in the United States. The company's primary gas products include liquid and gaseous nitrogen, oxygen, argon, carbon dioxide, helium, hydrogen and a variety of medical, rare and special gases. The company is a member of the BOC Group, the worldwide gases company operating in more than 50 countries and with sales last year of over $4 billion.

The Upjohn Company is a worldwide, research-based provider of human health care and animal health products, agronomic and vegetable seed, and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

PHILADELPHIA (SEPT. 24) PR NEWSWIRE - The Weightman Group, a Philadelphia-based communications company, has acquired Rosenfeld Media Group, according to Weightman President and Chief Operating Officer John Goodchild.

The acquisition enhances the agency's communications capabilities by providing an expanded variety of consulting and production services to corporate, governmental, institutional, media and non-profit clients.

Stephan Rosenfeld, who for the past 17 years in the media has covered everything from California earthquakes to manners in Moscow and Philadelphia politics, will become senior vice president and director of the newly formed Media Resources Group, according to Goodchild.

Rosenfeld, whose career in television and print journalism included stints as executive news producer in Philadelphia and San Francisco and political writer for the Philadelphia Daily News, has been executive director of the Rosenfeld Media Group since 1985.

"Steph brings to our public relations company a wealth of experience in news, government, and media relations," Goodchild said. "His addition, and the creation of the Media Resources Group, adds another valuable dimension to our business that will help service our growing, national client base."

The Weightman Group is the largest independently owned and managed communications company in the Delaware Valley, with full-service capabilities including advertising, public relations, direct marketing and market research. The Weightman Group is comprised of five operating units: Weightman Advertising, Schaefer Advertising, Weightman Public Relations, Roska Direct Marketing and Weightman Research.

NEW YORK (SEPT. 24) PR NEWSWIRE - Renault Vehicules Industriels S.A. (RVI) announced today that at 5:45 p.m., New York City time, on Friday, Sept. 21, 1990, the Antitrust Division of the Department of Justice terminated the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act applicable to the tender offer by ITM Acquisition Corp., an indirect wholly owned subsidiary of RVI, to acquire all of the outstanding common stock of Mack Trucks, Inc. (NASDAQ: MACK) not owned directly or indirectly by RVI. RVI also announced that the offer has been extended until 9:00 p.m., New York City time, on Friday, Sept. 28, 1990, in order to provide more time to satisfy the 90 percent minimum tender condition to the offer. The offer had been scheduled to expire tomorrow at 9:00 p.m., New York City time.

As of 5:00 p.m., New York City time, on Sept. 21, 1990, an aggregate of 5,971,682 Mack shares (representing approximately 19.9 percent of the outstanding common stock of Mack) had been tendered pursuant to the offer. The tendered shares, together with the Mack shares beneficially owned directly or indirectly by RVI, represent approximately 64.2 percent of the total outstanding common stock of Mack.

Substantial additional information regarding RVI and the offer is available for inspection during regular business hours at the principal offices of each of the U.S. Securities and Exchange Commission and the Pennsylvania Securities Commission.

WEST PALM BEACH, FLA. (SEPT. 24) PR NEWSWIRE - Dycom Industries, Inc. announced that its common stock has been listed for trading on the New York Stock Exchange, effective today, under the symbol "DY". The company's common stock was previously traded over-the-counter and reported on the NASDAQ National Market list under the symbol "DYCO".

"This is an historic day for Dycom," stated Thomas R. Pledger, president and CEO of Dycom Industries. "We recently had an operating performance record for fiscal 1990 and we have developed a clear strategy for continued growth and profitability. Now we have taken an important step with the New York Stock Exchange listing to enhance our efforts with the domestic and foreign investment community. We believe our listing will be of great benefit to our shareholder and to our future plans for expansion."

Dycom provides fiber optic transmission systems and master contract installation services to the telecommunications industry. The company operates through wholly owned subsidiaries. Dycom had sales of $166.7

million for its fiscal year ended July 31, 1990, with earnings of $9.6 million or $1.10 per share. These numbers reflect the 3-for-2 stock split which was effective Aug. 22, 1990.

GREENVILLE, SC (SEPT. 24) PR NEWSWIRE - Multimedia (NASDAQ-NMS: MMED) today announced that its Board of Directors has authorized the purchase of up to 750,000 shares of the outstanding common stock of the Company. The Company said that purchases, when made, will occur in the open market or in privately negotiated transactions at the then prevailing prices. Goldman, Sachs Co. has been designated as agent for the share purchase program.

On June 29, 1990, the Company completed a refinancing which provided it with a $700 million bank facility and a $400 million private placement of unsecured senior notes. This financing provided the Company with additional debt capacity over its current needs of approximately $375 million. Walter E. Bartlett, Chairman and Chief Executive Officer of the Company, stated, "The financing provides Multimedia with flexibility during a time of tight credit and soft business environment. This positions the Company to maximize shareholder value by taking advantage of unique and special business opportunities similar to its pending acquisition of WKYC-TV in Cleveland, as well as providing funds to repurchase the Company's stock from time to time based on market conditions."

Multimedia, Inc. is a diversified media communications company headquartered in Greenville, S.C., which publishes 13 daily and 49 non-daily newspapers, owns and operates four television and eight radio stations and a video production company, operates more than 100 cable television franchises in four states, and produces and syndicates quality television programming, including the Phil Donahue and Sally Jessy Raphael shows.

#90267p7300 09/24/1990 ~PR Newswire

PHILADELPHIA (SEPT. 24) PR NEWSWIRE - Independence Blue Cross, the region's largest healthcare insurer, has purchased Vista Health Plan Inc., a health maintenance organization which serves Bucks, Chester, Delaware, Montgomery and Philadelphia counties.

The announcement was made jointly today by G. Fred DiBona Jr., president and

chief executive officer of Independence Blue Cross, and Nathan C. Kleinberg, president of Vista.

"Our new partnership with Vista adds to the excellence and number of companies within the Independence Blue Cross family and greatly strengthens our ability to continue providing quality healthcare benefits to customers throughout Southeastern Pennsylvania," DiBona said. "We're looking forward to working closely with Vista's extremely talented management group."

"We regard this action as a very positive move for Vista and for our members," Kleinberg stated. "We are excited to be part of the Independence Blue Cross group of plans."

Vista, a for-profit company headquartered in King of Prussia, has become one of the fastest-growing new HMOs in the region. Enrollment, now at 22,400 members, has doubled in just the last 18 months.

Founded in late 1986, Vista currently is offered to 2,200 area companies embracing more than 500,000 employees and their dependents. Annual premium income generated from these firms is more than $20 million.

Vista is the second HMO acquired by Independence Blue Cross in recent years. The other plan is Delaware Valley HMO (DVHMO).

Independence Blue Cross serves approximately 2 million subscribers in the region.

PHILADELPHIA (SEPT. 24) PR NEWSWIRE - 900 Broadcasting Ltd. announced today a new telephone line, "1-900-321-4-USA," which relays voice messages to U.S. troops stationed in the Middle East.

Fifty cents from each call will be donated to the American Red Cross for its ongoing support of service members and their families.

The mission of the American Red Cross in support of Operation Desert Shield is to provide assistance in maintaining emergency communications between U.S. military deployed in the Persian Gulf and their families at home.

This new "1-900-321-4-USA" number allows all Americans to leave messages of support and encouragement on audio cassette tapes to be shipped to Operation Desert Shield.

According to 900 Broadcasting, troops receive almost no news from the outside -- Iraqi radio signals are jamming "Voice of America" broadcasts in Saudi Arabia -- and soldiers are desperate to hear from home.

"1-900-321-4-USA" will be promoted through a national television campaign of one-minute spots which will begin airing Wednesday, Sept. 26.

#90267p7303 09/24/1990 ~PR Newswire

PIRAEUS, GREECE, (SEPT. 24) PR NEWSWIRE - The annual general meeting of Anangel-American Shipholdings Limited ("AASL") (NASDAQ: ASIPY) on Friday, Sept. 21, 1990, unanimously approved the company's annual report and accounts and the proposed final dividend of 40 cents per share, the company announced today.

The final dividend will be paid on Oct. 1, 1990, to shareholders of record date Aug. 31, 1990, and will bring the total dividend for the company's 1990 fiscal year to US$1.25 per share.

At the annual general meeting the chairman, J. A. Angelicoussis, announced that as the company had repurchased some 880,000 of the 1,000,000 shares authorized by the board of directors when its treasury stock program had commenced in February 1990, the board of directors had decided to authorize the repurchase of up to a further 1,000,000 of its issued and outstanding ordinary shares at the discretion of the company's treasurer.

AASL owns and operates a diversified, primarily dry cargo fleet of 18 modern, Japanese built vessels totaling 760,281 deadweight. As announced in June, management have concluded a memorandum of agreement for the sale of one of these vessels, the M.V. "Alpha Flame," a 1982 built Panamax. When concluded the sale will generate a profit of approximately US$7,000,000 for inclusion in the company's 1991 accounts.

DETROIT (SEPT. 24) PR NEWSWIRE - The least expensive model of the completely restyled 1991 Tercel will be priced at $6,488, the same as the 1990 model it replaces, Toyota Motor Sales (TMS), U.S.A., Inc., announced today.

Toyota's 1991 fourth-generation Tercel line, which includes a two- door sedan, two- and four-door deluxe sedan and four-door LE sedan, replaces last year's

three-door hatchback and two-door coupe. The four- door deluxe sedan, which is offered for the first time, starts at $7,898.

"Improvements in style, performance, interior design and ride comfort will make the new Tercel one of the best values in the subcompact market," said Bob McCurry, TMS executive vice president.

The newly designed Tercel weighs less, has a larger trunk and 10 percent more interior space than previous models. It also has a quieter, smoother ride and more power from an improved 1.5-liter single- overhead-cam, fuel-injected multi-valve four-cylinder engine. Tercel's aerodynamic body features a high deck with wedge-shaped rounded styling.

#90267p7305 09/24/1990 ~PR Newswire

DETROIT (SEPT. 24) PR NEWSWIRE - Robert McCurry expects Toyota to sell 140,000 1991 Toyota Tercel subcompact sedans, in spite of market factors that could "turn the green light to yellow."

The executive vice president of Toyota Motor Sales, U.S.A., Inc., told reporters at the Tercel press introduction here that in today's competitive subcompact segment, Tercel signifies "the death of the econobox and the birth of any entry-level sedan with high tech, high mileage and Toyota quality."

The base '91 Tercel's preliminary 33/37 city/highway mileage beats last year's 31/36 EPA rating, McCurry said. The new Tercel's base price remains the same as last year's, at $6,488, making the Tercel two-door sedan the lowest-priced car sold in the United States with a trunk. The Tercel four-door deluxe sedan starts at $7,898, making it the lowest- priced four-door sedan in the United States from a volume Japanese manufacturer.

In addition, McCurry attributed Tercel's high initial sales goals to its uplevel sedan styling, increased interior and cargo space, and increased horsepower and noise insulation.

However, the fourth-generation Tercel faces a congested entry-level segment that has competitors "saddled with value packages and incentives right out of the starting gate," McCurry said.

Toyota has delivered on past promises, McCurry said, including increased U.S. production. Toyota has built more than 714,000 cars in North America, he said, and about 30 percent of the vehicles Toyota sells here are North American-built.

U.S. production will account for more Toyota sales next year, he said. Other promises fulfilled include more dealers, McCurry said, especially in the Midwest. Toyota has added 64 more Toyota dealers, of which one-third are in the Midwest.

Toyota's total car share, including Lexus Division, is 9.2 percent through August, McCurry said, up from 6.8 percent for the first eight months of last year. August, Toyota's best month ever, saw record Toyota Division car sales of 90,739, of which a record 41,798 were domestically produced. Camry, which is built in Georgetown, Ky., was the top-selling car in the United States in August for the first time.

Market uncertainties over the Iran/Kuwait conflict could further aggravate the current industry downturn, he said.

HOUSTON (SEPT. 24) PR NEWSWIRE - Tescorp, Inc. (NASDAQ: TESCC) today announced its acquisition of substantially all of the assets of Electro-Technical Laboratories, Inc. ("ETL"), a Houston-based manufacturer of geophones and geophone cases. ETL's sales for the most recent twelve months were about $600,000. Customers outside the geophysical industry generated most of these revenues, purchasing equipment for commercial and military applications.

"Although a relatively small factor in the geophysical geophone business, ETL is an important acquisition for Tescorp," stated Tescorp President C. Robert Bunch. "ETL gives us a toehold in an important segment of the business in which we currently do not compete. We believe that we can build on ETL's base of commercial and military business by expanding its sales to the geophysical industry."

Tescorp currently manufactures and sells cable and cable connectors to the geophysical industry through its Tescorp Seismic Products division. The company also manufactures and distributes oil and gas production equipment. For the three months ended June 30, 1990, Tescorp's revenues were $6,165,000 and net income was $382,000, or $0.07 per share.

Terms of the transaction were not disclosed.

#90267p7312 09/24/1990 ~PR Newswire

WAYNE, PA (SEPT. 24) PR NEWSWIRE - Telephone communication will no longer present a barrier to people with hearing- and speech-impairments with the opening today of the AT&T (NYSE: T) Pennsylvania Relay Center.

The AT&T-operated center in Wayne will serve as a link between telephone callers and users of telecommunications devices for the deaf (TDDs).

Telephone and TDD users reach the relay center via 800 numbers where their calls are answered by a communications assistant. The communications assistant types the spoken words from the telephone users into text which appears on the screen of a TDD, a typewriter-like machine linked to a telephone line. The TDD user's typed response is then voiced by the communications assistant to the telephone user. In this manner, the conversation between the telephone user and the TDD user is relayed back and forth.

Without relay service, TDD users can communicate by phone only with other TDD users.

The Pennsylvania Public Utility Commission (PUC) approved in May AT&T's application to provide the service. The company was selected to establish and operate the relay center following an extensive bidding process conducted by the Pennsylvania Telephone Association (PTA).

An added relay feature will give deaf or hearing-impaired customers the option of speaking themselves and using the communications assistant only to translate the telephone user's response into typed text. Speech- impaired

customers similarly can use the communications assistant only to voice their typed words.

The AT&T Pennsylvania Relay Center, which employs 64 people, will operate around-the-clock. It is funded through a monthly surcharge on local telephone access lines of 8 cents per line for residential customers and 16 cents per line for businesses.

Calls placed through the relay center will be billed at regular telephone rates, with applicable discounts. Long-distance calls will be billed by the long-distance company designated by the caller. TDD users can reach the relay center by calling toll-free 800-654-5984; telephone users can call 800-654-5988.

AT&T currently operates dual party relay centers in California, New York, Alabama, Illinois and Tennessee.

RESTON, VA (SEPT. 24) PR NEWSWIRE - Lafarge Corporation (NYSE: LAF), one of the leading construction materials companies in North America, today opened a new 6,000-ton cement terminal on Seattle's Duwamish Waterway.

The terminal is the first permanent cement storage facility Lafarge has built in Washington state. Last year the company purchased two terminals in eastern Washington and opened sales offices in Seattle and Spokane.

Built by General Construction Contractors, the Seattle facility has four 1,500-ton, 85-foot-high silos. It features a 140-foot truck scale, automated sampling system and a dock that accepts barges up to 350 feet long.

Lafarge ships cement to the terminal by barge from its waterfront plant in Richmond, British Columbia.

"Our customers are glad to see this terminal up and running," said Gerry Stewart, regional vice president for Lafarge in Seattle. "It means faster loading times for their trucks and better service. It also means Lafarge is here to stay in Seattle; we like the long-term growth prospects here."

Lafarge operates 13 cement plants, six grinding plants and more than 75 terminals with annual cement sales of 12 million short tons. The company also has more than 400 construction materials locations, and is one of the largest suppliers of ready-mix concrete and aggregates in North America. Systech Environmental Corporation, a Lafarge subsidiary, is a leader in co-processing, or converting waste into fuel for cement kilns.

Based in Reston, Lafarge Corporation is a Fortune 500 company with more than 8,500 employees and revenues of $1.5 billion.

PHILADELPHIA (SEPT. 24) PR NEWSWIRE - Fredric K. McCaffrey, a one- time Philadelphia broadcaster who has served for more than a decade in various executive media capacities for state and federal government, has been appointed to the position of director of Media Relations of Independence Blue Cross.

The announcement was made by Richard A. Doran, vice president- Corporate Communications of Independence Blue Cross, the region's largest healthcare insurer.

McCaffrey will be responsible for the company's corporate publicity functions and will report to Doran.

A native of Philadelphia, McCaffrey has served for the last three years as director of Broadcasting for the Conference of the Minority in the United States Senate, where he has directed the operations of a television and radio news bureau active in the production of live programs, video documentaries on various public issues and international news conferences conducted via satellite.

From 1984 to 1987, he served as assistant press secretary to U.S. Sen. John Heinz (R-Pa.) and as press secretary to the Governmental Affairs Committee where he worked closely with U.S. Sen. William Roth (R-Del.).

McCaffrey worked for the Commonwealth of Pennsylvania in the early 1980s as special assistant to the deputy secretary of Labor and Industry and, later, as assistant press secretary of the Pennsylvania Department of Transportation.

He graduated B.A., magna cum laude, in advertising/journalism at Temple's School of Communications and later studied French and international economics at the University of Fribourg in Switzerland.

McCaffrey is married and has two children.

DECATUR, GA (SEPT. 24) PR NEWSWIRE - Darrell D. Pittard, president and chief executive officer of DeKalb Federal Savings Bank and its holding company, Prime Bancshares Inc. (NASDAQ: PMBS), announced the kickoff of a marketing campaign to promote the bank's name change.

Effective Oct. 1, DeKalb Federal Savings Bank will be known as Prime Bank, Federal Savings Bank. The campaign will run through October.

When making the announcement, Pittard mentioned several reasons for undertaking the name change. According to Pittard: "Prime Bank better represents who we are -- a strong financial institution offering first-rate products and services at 21 locations throughout metropolitan Atlanta. We now have more locations outside DeKalb County than within. Additionally, the name links the bank more closely with our publicly traded holding company -- Prime Bancshares Inc."

Prime Bancshares has consolidated total assets of $585 million and a strong capital position of 6 percent. The common stock of Prime Bancshares is traded Over-the-Counter and quoted on the National Association of Securities Dealers Automated Quotation (NASDAQ) System under the symbol "PMBS."

WESTBOROUGH, MA (SEPT. 24) PR NEWSWIRE - New England Electric System (NYSE: NES) (NEES) today reported earnings for the eight months and 12 months ended August 1990 of $1.55 and $2.38 per average share, respectively. This compares to $1.52 and $2.08, respectively, earned in the corresponding periods last year on fewer average shares. Earnings for the first eight months of 1990 were increased by 7 cents per share due to a seasonal rate design implemented by NEES' wholesale generating subsidiary, New England Power Company, in 1989. This seasonal rate design involves higher rates during peak months and lower rates during off-peak months. It was designed not to have a significant impact on earnings over a full year.

NEW ENGLAND ELECTRIC SYSTEM AND SUBSIDIARIES (CONSOLIDATED)

	Eight Months Ended Aug. 31,	
	1990	1989
Operating revenue	$1,222,649,000	$1,085,108,000

MINNEAPOLIS (SEPT. 24) PR NEWSWIRE - E.F. Johnson Company, the Minneapolis-based radio communications unit of Diversified Energies, Inc. (NYSE: DEI), said today that it has received notification that the U.S. Patent and Trademark Office will issue a patent covering power source technology developed by the company that can generate continuous, low-power, electrical energy for more than 25 years.

John D. Somrock, president and chief executive officer of E.F. Johnson, said the power-source technology developed by E.F. Johnson utilizes a unique light-emitting polymer that, when coupled with solar- type cells, generates electricity.

"We have achieved outputs in the microwatt range -- sufficient to energize certain integrated circuits and other low-power electronics," Somrock said, "and the potential exists for greatly increased energy output."

He said potential uses include applications that require the energy of a low-power, long-life battery and freedom from corrosive chemicals. "Its capability to operate at low temperatures makes it uniquely compatible with superconductor technology," Somrock said.

E.F. Johnson's new power source has operated at temperatures ranging from -196 degrees Celsius, the temperature of liquid nitrogen -- to +100 degrees Celsius the temperature of boiling water.

"Our engineers expect that further improvements may enable operation at temperatures as low as -270 degrees Celsius, which approaches absolute zero -- the temperature of outer space," Somrock said.

Because the technology operates without corrosive chemicals traditionally found in electrochemical cells, Somrock said that all indications are that it will safely produce continuous electricity for more than 25 years.

He said that because the company is still in the development process for the technology, commercialization probably won't occur for several years. Additional related patent applications are pending.

E.F. Johnson designs, manufactures and markets conventional, trunked and specialized radio frequency communications products and systems internationally. Its parent company, Diversified Energies, Inc., is traded on the New York Stock Exchange under the symbol: DEI.

LOS ANGELES (SEPT. 24) PR NEWSWIRE - An air fare deal that offers two round-trip flights to Mexican resorts for one air fare paid from Los Angeles or Seattle today was introduced by Mexico Travel Advisors and Mexicana Airlines.

Mexicana provides service to the resorts; Los Cabos at the tip of the Baja California peninsula, Puerto Vallarta and Mazatlan on the Pacific coast, and from Los Angeles only, Cancun in the Caribbean, for five- and eight-day Mexico Travel Advisors packages, each with a choice of hotels. The offer, applicable any day of the week to two passengers traveling together, is in effect through Oct. 31; all travel must be completed by Nov. 7.

From Los Angeles to Mazatlan, the air-inclusive starting price for five days is $388 for the first traveler and $70 for his or her companion; for eight days, it is $427 and $109. Puerto Vallarta packages start at $420 for the

first passenger for five days and $54 for the companion; eight-day Puerto Vallarta packages begin at $432 and $66. Los Cabos packages from Los Angeles are priced from $470 and $98 for five days, from $530 and $158 for eight. Cancun packages begin at $620 and $74 for five days, $662 and $116 for eight.

From Seattle, air-inclusive rates for five-day Mazatlan packages start at $622 for the first passenger and $70 for the companion; eight- day rates begin at $661 and $109. Puerto Vallarta packages are priced from $618 and $54 for five days and $630 and $66 for eight. Los Cabos packages from Seattle start at $684 and $98 for five days and $744 and $158 for eight.

Rates include airport transfers at the resort, hotel room tax and U.S. departure tax in addition to round-trip air fare and accommodations. Air fares are capacity controlled and available only on certain flights. Reservations and additional information can be obtained by phoning Mexico Travel Advisors at 800-876-4MTA, (876-4682).

#90267p7332 09/24/1990 ~PR Newswire

OTTAWA, (SEPT. 24) PR NEWSWIRE - SHL Systemhouse Inc. (NASDAQ: SHKIF) of Ottawa today announced that it has entered into an agreement with Ingres Corporation (NASDAQ: RELY) of Alameda, Calif. which will see Systemhouse become an international center for "porting" Ingres relational database software to different hardware environments.

Every time there is an update or enhancement to the core product, the new version must be "ported" or adapted to run on all those hardware types. Systemhouse will be porting Ingres to existing Unix hardware platforms and to new hardware environments where Ingres is not yet available.

Ingres software currently runs on hardware from all major U.S. and international manufacturers including Digital Equipment, IBM, Hewlett- Packard Sun Microsystems, Bull, NCR, Sequent, Siemens, Pyramid and UNISYS.

James Black, vice president of Strategic Alliances for Ingres, said, "This agreement is unique within our industry and is the first step towards more cooperative efforts between Systemhouse and Ingres. In setting up this software lab, Systemhouse will be a center for expertise in porting our products with a worldwide mandate."

Peter Sandiford, SHL Systemhouse president, said "Today's announcement formalizes our longstanding relationship with Ingres and lays the foundation for an incroacingly beneficial partnership. Our company has enjoyed outstanding results using Ingres software."

Saskatchewan's Justice Automated Information Network (JAIN) has at its core an Ingres database while the recently completed Evaluation and Student Services System (ESS) for the Department of Education features one of the largest Ingres databases in North America.

Additionally, Systemhouse has incorporated Ingres software in a variety of other systems including a yard and vessel management system for NYK Shipping's new Marine Terminal in Los Angeles, the Supreme Court of Canada's case tracking system and the financial and inventory control system for Dallas-based Electra Communications.

Ingres, a publicly held corporation with revenues of $157 million in fiscal 1990, is a world leader in information integration products for complex systems applications.

Systemhouse is one of the largest systems integration firms in North America with 3,000 employees, 18 branches in Canada, the United States and Europe and 1989 revenues of $630 million.

#90267p7333 09/24/1990 ~PR Newswire

ALBUQUERQUE, NM (SEPT. 24) PR NEWSWIRE - Public Service Co. of New Mexico (PNM) (NYSE: PNM) today announced that its board of directors has completed its review of the company's strategic alternatives. From its review, the board has endorsed a strategic business plan to maximize shareholder value and has elected to terminate discussions with the Wheeler Peak group who previously expressed an interest in purchasing the company.

The PNM board of directors instructed management to pursue a strategic plan that will set the company's course for the future. Key elements of the strategic plan include: (1) Pursuit of additional transmission opportunities for both electric and gas operations to enable the company to reach previously untapped markets; (2) Aggressive marketing of the company's excess capacity by fully implementing recently approved economic development rates for new and expanding businesses in the company's service territory; and (3) Pursuit of the sale of certain excess generation facilities.

The company has begun the implementation of this strategic plan and the board of directors authorized management to explore additional opportunities for the company in the areas of off-system power sales, sale of generation facilities, and pursuit of targeted transmission projects.

PNM has been advised in connection with its strategic alternative review by Morgan Stanley & Co. Inc.

Discussions Terminated with Wheeler Peak Capital Group As previously announced PNM received a preliminary expression of interest concerning the possible acquisition of PNM from a group of investors headed by the Wheeler Peak Capital Corp. After certain changes in its initial membership, the group was represented to include Donaldson, Lufkin, Jenrette; Southwestern Public Service Co.; Western Utilities (affiliated with Southern Union Company); and Al Robison, President of Wheeler Peak and former Chief Financial Officer at PNM.

As part of its review of strategic alternatives, PNM pursued this expression of interest and sought during the past seven weeks to negotiate a confidentiality agreement. The intent of the agreement was to allow the Wheeler Peak group access to PNM's confidential and competitive information necessary to pursue their interest. However, the Group was unwilling to adequately shield the information from inappropriate use by its members who might be seeking to compete with PNM for the Albuquerque franchise.

"The city of Albuquerque charter mandates that we bid for the city franchise. In this arena the board feels it would be imprudent to allow inappropriate use of PNM's information by a potential bidder. The Wheeler Peak group was unwilling to provide us this assurance and therefore discussions have been terminated", the board stated.

CONTACT: Frank Craig, 505-848-2366, Michael Temple, 505-848-2210 or Pam Lett, 505-848-4673 all of Public Service Co. of New Mexico.

FORT WASHINGTON, PA (SEPT. 24) PR NEWSWIRE - Regal Communications Corp. (NASDAQ: RCOM) announced today that it has entered into an agreement in principle which is scheduled to close on Oct. 3, 1990, to sell the assets of Lottery Player's Magazine to Samuel W. Valenza Jr., president of Regal, in exchange for the transfer to Regal of 165,000 shares of Regal common stock owned by Valenza.

Regal has also entered into an agreement in principle to purchase from Valenza 1.2 million shares of Regal common stock for $100,000. These shares were issued to Valenza pursuant to a Management Incentive Escrow Agreement and were held in escrow to be released to Valenza based upon the achievement by Regal of certain pre-tax profit objectives. This transaction is scheduled to be closed on Oct. 2, 1990.

Upon consummation of the foregoing transactions, the number of Regal shares outstanding will be reduced from 11,198,243 shares to 9,833,243 shares. Valenza has advised Regal that although the earnings of Regal will be sufficient to result in the release to him of all of the shares, he expressed

his extreme disappointment that the Lottery Player's Magazine, the operation for which he is responsible, has failed to contribute to the earnings of Regal in the current fiscal year. Under the circumstances, Valenza said he believes that it would be unfair to the Regal stockholders if the shares were released to him.

LOS ANGELES (SEPT. 24) PR NEWSWIRE - Syncor International Corp. (NASDAQ: SCOR) today announced record sales and earnings from operations for the first quarter ended Aug. 31, 1990. This is the fifth consecutive quarter of record operating performance.

Sales for the first quarter of fiscal year 1991 rose 18 percent to $36 million up from $30.5 million for the first quarter of fiscal year 1990. The

company's operating income for the first quarter of fiscal year 1991 climbed 77 percent to $1.8 million compared with $1 million for the first quarter of fiscal year 1990. Despite an increase in interest expense associated with the company's new ESOP program, income from operations before extraordinary item for the first quarter of fiscal year 1991 showed a gain of 30 percent or 11 cents per share versus 8 cents per share in fiscal year 1990. In fiscal year 1990, the company achieved earnings that fully utilized the net operating loss carryforward. As a result of the extraordinary item being eliminated for the current fiscal year, the company's net after tax income remained relatively constant at approximately $1.1 million or 11 cents per share for both years.

Gene McGrevin, Syncor's President and Chief Executive Officer, said, "Syncor's sales gains were the result of both greater market penetration and price increases in several of our major markets. In addition, we continued to see improvements in our profitability due to ongoing cost control measures and the company's focus on profitable, strategic growth."

Outlook McGrevin said,"Syncor has achieved impressive growth in earnings over the last five quarters. Looking at the remainder of the year, we believe our growth rate will continue to be strong. However, there will be variations due to the traditional decline in hospitalization and related diagnostic testing during the holidays.

"Syncor also expects to continue to increase its operating expenses during the coming year," McGrevin said. "Recruiting of personnel will continue for additional pharmacists plus the expansion of sales and marketing staffs. We believe this is an important investment in Syncor's future. Our professional staff is the key to the continued success of Syncor. I cannot over-emphasize the critical role that these professionals play, nor our commitment to ensuring that adequate staffing levels will be achieved to meet the company's growth plans.

"In addition, we are continuing to invest in computer systems to better serve our customers and increase operating efficiencies. All these investments will provide support for the future expansion of both the radiopharmacy and home care businesses."

Syncor operates a nationwide network of 84 high tech pharmacy service centers. They prepare and deliver patient specific advanced pharmaceutical products for diagnostic imaging and home infusion therapy to over 5,000 hospitals, clinics, physicians' offices and home-based patients daily. Syncor is the only national pharmacy company that provides this combination of diagnostic and therapy services to the hospital and alternate site markets.

WASHINGTON (SEPT. 24) PR NEWSWIRE - GA/Partners, the consulting unit of the Arthur Andersen Real Estate Services Group (RESG), announced today that it is expanding its national practice. Currently operating in Washington, D.C., Dallas and Houston, GA/Partners will now include two new offices in Atlanta and Los Angeles, with plans for three additional offices within the next six months. As part of this expansion, Gordon Kennedy, Jr., the GA/Partners managing principal, was named national practice director overseeing operations of one of the nation's largest real estate consulting practices.

"Since its acquisition by the Arthur Andersen Real Estate Services Group, GA/Partners has expanded its practice dramatically. The increased complexity of the real estate industry, requiring advisory services to anticipate and adapt to these changes, has helped to fuel our growth. It also signals our commitment to the burgeoning opportunities in providing economic consulting, real estate counseling and appraisal services," said Kennedy.

William Whitney has been named director of the GA/Partners-Los Angeles practice. Whitney is a former principal and co-founder of Natelson, Levander and Whitney Inc., a real estate, economic and financial consulting firm also of Los Angeles.

Kenneth Bleakly has been named director of the GA/Partners-Atlanta practice. Bleakly is former president of Bleakly Economics Group, a full-service real estate and economic consulting firm based in Vail, Colo. Both office directors bring a combined total of more than four decades in real estate consulting to their new positions.

Acquired by Arthur Andersen & Co. in 1988, GA/Partners has since grown from 80 to 110 employees, and gross fees have increased by more than one-third. During the past year, GA/Partners opened offices in Houston, and named Jim Gaines director of the practice; and in Dallas, and named Deborah Kops director of that practice. Founded in 1962, GA/Partners is an international adviser to major corporations, developers, investors, financial institutions, and government agencies.

Ivan Faggen, RESG worldwide director, said, "Today's constantly evolving real estate industry, with an increasingly international scope, demands full-service advisory capabilities. Our expansion of the GA/Partners practice signals Arthur Andersen's commitment to these growing needs and our ability to provide economic research and feasibility analysis, appraisal and portfolio evaluation, and corporate real estate services."

The Arthur Andersen Real Estate Services Group consists of more than 1,200 professional personnel throughout 243 offices in 54 countries worldwide. The

RESG provides accounting and audit, tax, information systems, appraisal, economic and advisory services to more than 6,000 real estate, hospitality, and corporate real estate clients. In addition to its GA/Partners consulting unit, Arthur Andersen also acquired Berins & Co. in 1989, a national hospitality consulting practice.

WAUKEGAN, IL. (SEPT. 24) PR NEWSWIRE - Outboard Marine Corp. (NYSE: OM) (OMC) today announced that it has acquired certain assets of Topaz Marine Corp. that will allow OMC to build and market the Topaz brand of sport fishing boats. The Topaz boat line will become a division of OMC's Hydra-Sports, Inc., boat subsidiary, OMC said.

The Topaz line includes open sport fishing boats in 32, 37 and 39-foot lengths and convertible sport fishing models in 36 and 40-foot lengths. Hydra-Sports currently markets a line of fishing boats ranging from 16 to 33 feet in length. OMC said it would build Topaz models as well as Hydra-Sports(R) offshore fishing boats in OMC's Swansboro, N.C., boat plant.

"We intend to make Hydra-Sports the leading brand of offshore fishing boats," said OMC president and chief executive officer James C. Chapman. "The acquisition of these Topaz assets will help us achieve our goal by providing our Hydra-Sports subsidiary with the most complete line of offshore sport fishing models available, from small outboard-powered boats up to 40-foot diesel-powered rigs," Chapman said.

Outboard Marine Corp. is a leading international marketer of marine engines, boats, accessories and services.

TAHLEQUAH, OK. (SEPT. 24) PRNEWSWIRE - American Nursery Products Inc. (NASDAQ:ANSY) announced today that the Washington State Supreme Court has issued its decision in American Nursery Products Inc. vs. Indian Wells Orchards, reversing the trial court's award of incidental and consequential damages against the company in the amount of $1,720,000 plus interest, and remanding the case to the trial court for a recalculation of attorney's fees and a determination of contract damages consistent with its opinion. The Supreme Court ruling is final, excepting a 20-day period in which Indian Wells may file a motion for reconsideration. The company has in reserve $900,000

for possible loss on this litigation. When damages and attorneys fees are finally determined on remand, this reserve will be adjusted appropriately.

American Nursery Products Inc. is principally engaged in the business of growing trees, ornamental plants and foliage plants for distribution on a wholesale basis. The company is headquartered in Tahlequah, Okla. and owns and leases nursery farm properties and warehouse facilities in the states of Alabama, Florida, Iowa, Michigan, Ohio, Oklahoma, Oregon and the Republic of Guatemala.

MONTGOMERY, AL (SEPT. 24) PR NEWSWIRE - Blount Inc. (AMEX: BLT) today reported a net loss of $1.2 million ($.10 per share) for the second quarter ended Aug. 31.

This compares to net income of $8.2 million ($.68 per share) during last year's second quarter, which included $6.4 million ($.53 per share) from the resolution of tax matters principally related to foreign tax credits and royalties. Second quarter sales and revenues were $172.9 million compared to $183.2 million last year.

For the six-month period ended Aug. 31, Blount's net income was break-even, compared to net income of $9.3 million ($.78 per share) in the prior fiscal year's six-month period, which again included the $6.4 million ($.53 per share) from the resolution of tax matters. Year-to-date sales and revenues were $343.7 million, compared to $363.0 million in the prior year.

Second quarter sales from Outdoor Products increased to $45.4 million from $40.5 million last year. Operating income was $2.9 million compared to $4.5 million last year. For the six-month period sales increased to $87.2 million compared to $78.0 million last year, and operating income was $6.3 million compared to $7.2 million a year earlier. Current year results include increased expenditures related to new product development and the implementation of new manufacturing systems at the Portland, Ore., operations.

Sales from Industrial and Power Equipment were $22.0 million compared to $22.3 million last year. Operating income was $.9 million compared to $.4 million a year earlier. For the six-month period sales were $46.0 million and operating income was $2.0 million compared to sales of $44.8 million and operating income of $1.6 million a year earlier.

Sales from Sporting Equipment and other operations were $19.5 million compared to $20.8 million for last year's second quarter. Operating income was $1.8 million, down from $2.8 million for last year's second quarter. Six-month

sales were $37.5 million compared to $38.5 million last year, and operating income was $4.0 million compared to $5.0 million in the year-earlier period. Current year results include increased expenditures related to the start-up of manufacturing operations at the company's new site in Lewiston, Idaho.

PHILADELPHIA (SEPT. 24) PR NEWSWIRE - Ronald S. Murray has been appointed vice president and director of Professional Services for Right Associates' Philadelphia Region, headquartered at Two Penn Center Plaza, Suite 610.

He will be responsible for directing the Professional Services staff there as well as working as a consultant to senior level executives. In addition, he will play a key role in the marketing and delivery of the Key Executive Service.

Prior to joining Right Associates, Murray was executive vice president of Atlantic Financial. Before joining Atlantic in 1983, he was a principal in the Management Consulting Division of Arthur Young & Co. He began his career with Bank of Oklahoma in 1974 and also worked for Profit Technologies Corp., a financial services consulting firm. In addition to his broad consulting experience which includes executive and employee development, he brings to the firm his expertise in financial services, business administration and management information systems. While at Arthur Young, he also served on President Reagan's Private Sector Survey on Cost Control (Grace Commission). "His extensive business background and consulting experience will be most beneficial to our clients," said Joseph Smith, senior vice president and managing principal of the Philadelphia Region.

Murray completed the Advanced Management Program at Harvard Business School in 1988, and holds a master's degree from Oklahoma State University and a bachelor's degree from the University of Massachusetts.

Right Associates(R) is headquartered in Philadelphia and has more than 70 offices across the United States and around the world. It is one of the world's leading organizations specializing in outplacement counseling of executives and managers. Outplacement consulting services are designed to assist employers with termination issues and to help the separated employees develop skills and strategies to find new employment.

PITTSBURGH (SEPT. 24) PR NEWSWIRE - Sixteen western Pennsylvania offices of Horizon Financial opened for business today as branches of Union National Bank it was announced.

The offices had been operated under the Horizon name as a division of Union National Bank since the bank acquired them from the Resolution Trust Corp. in May.

Union National sinage has been installed at all Horizon locations to be maintained by the bank. With the addition of the 16 new offices, Union National now operates 71 branches in the Greater Pittsburgh area.

The computer operating system of Horizon was recently upgraded, and all of its banking products were converted to their similar counterparts at Union National. The original Union National branches are scheduled to be linked to this new operating system on Nov. 9. For maximum customer service, former Horizon customers and original Union National customers are urged to continue doing business at their current branches until the operating systems conversion of Union National has been completed.

Union National Bank is one of seven banking subsidiaries of Integra Financial Corp. (NASDAQ: ITGR). The other Integra banks are: First Seneca, First National of Washington, Gallatin National, Keystone National, McDowell National and Pennbank. Integra banks operate 226 offices in 22 counties of western Pennsylvania with combined assets of more than $7 billion.

NEW ORLEANS (SEPT. 24) PR NEWSWIRE - McDermott International, Inc. (NYSE: MDR), announced today that Amoco (U.K.) Exploration Company has awarded its McDermott-ETPM joint venture an important contract for the installation of a 410-kilometer gas pipeline in the British sector of the North Sea. The contract is estimated to have a total value of about 120 million pounds sterling (approximately $225 million).

Known as "CATS" (Central Area Transmission System), the 36-inch diameter pipeline will transport gas initially from the Amoco-operated Everest and Lomond Gas Fields in the Central Graben area, east of Aberdeen, to a terminal to be located on the English coast near Teesside.

Work will involve the coating of the pipe, the laying of the line in water depths up to 134 meters and the completion of the shore approach, including important dredging and civil works. The line will be laid by the semi-submersible lay barge LB 200 belonging to McDermott but at present part

of the McDermott-ETPM joint-venture fleet.

The main offshore work will be carried out between June 1991 and August 1992. This award confirms the position of the McDermott-ETPM joint venture as one of the leading pipeline contractors in the North Sea market for years to come.

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

ST. LOUIS (SEPT. 24) PR NEWSWIRE - The May Department Stores Company Foundation announced that it has contributed $200,000 to two national organizations which assist people with acquired immune deficiency syndrome (AIDS).

The national community AIDS partnership and the Design Industries Foundation for AIDS (DIFFA) each received $100,000 to distribute this year to community-based groups which assist people with AIDS. The $100,000 grants represent the first such grants The May Department Stores Company Foundation intends to make annually.

David C. Farrell, chairman and chief executive officer of The May Department Stores Company, said, "With AIDS affecting increasing numbers of people, we want to offer direct support to help meet basic needs for food, shelter and other assistance. We are very pleased to work with the national community AIDS partnership and DIFFA, both highly respected for their ability to identify and fund projects that help people with AIDS. We are especially pleased to target communities in which May Company operates."

The national community AIDS partnership provides matching grants to support community-based AIDS programs in 19 metropolitan areas of the United States. Based in Washington, the partnership has distributed more than $8.5 million to 371 organizations since its founding in 1988.

DIFFA, whose membership represents all segments of the design industry, raises funds and makes grants to AIDS organizations and projects throughout the United States. Since its founding in 1984, DIFFA has distributed $5 million to more than 230 groups in 29 states.

Through The May Department Stores Company Foundation, May contributes nationwide more than $10 million annually for health, social welfare,

educational, cultural and civic causes.

The May Department Stores Company (NYSE: MA), one of the largest department store companies in the country, operates 300 department stores under such leading names as Lord & Taylor, New York, Foley's, Houston; May Company, California, Los Angeles; Hecht's, Washington, D.C.; Robinson's Los Angeles; Kaufmann's, Pittsburgh; Famous-Barr, St. Louis; Filene's, Boston; May Company, Ohio, Cleveland; G. Fox, Hartford; L.S. Ayres, Indianapolis; May D&F, Denver; and Meier & Frank, Portland, Ore. May Company also operates Volume Shoe Corporation, which has more than 2,800 self-service family shoe stores nationwide.

PALATINE, IL (SEPT. 24) PR NEWSWIRE - Square D Company (NYSE: SQD) announced today that approximately 4,300 union employees at 17 of the company's plants in the United States are continuing to work under contract extensions after failing to ratify a new three-year national labor agreement in voting late yesterday. Square D's total U.S. workforce is almost 14,000.

The previous three-year contract, part of coordinated bargaining that involves five international unions, expired at midnight Sunday, Sept. 23, 1990, and is being extended on a day-to-day basis.

Square D said it is prepared to resume negotiations with the unions' bargaining group at any time. It is expected that the Federal Mediation and Conciliation Service also may become involved in the resumption of negotiations.

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services and had 1989 sales from continuing operations of $1.63 billion.

DECATUR, GA (SEPT. 24) PR NEWSWIRE - DFSoutheastern Inc. (NASDAQ: DFSE), the Decatur, Ga.-based holding company for Decatur Federal Savings and Loan Association, today announced that it will purchase in the open market from time to time up to $2.5 million in market value of its outstanding common stock.

The stock will be purchased at such times and in such amounts as management determines, subject to applicable regulations. Appropriate regulatory approvals have been obtained to commence this repurchase program.

Robert C. McMahan, chairman of the board and chief executive officer, stated: "The current price of the company's common stock does not reflect the true value of the company in the opinion of the board of directors. Our company is strong, but presently trading well-below tangible book value. The board of directors believes that DFSE is a solid investment and that the repurchase of our own stock will enhance the value of the remaining outstanding shares."

At June 30, DFSoutheastern Inc. had consolidated assets of $2.4 billion and deposits of $1.7 billion. Decatur Federal Savings and Loan Association, the wholly owned subsidiary of DFSoutheastern Inc., has 28 branch offices and five Mortgage Loan Offices serving metropolitan Atlanta and north Georgia. Fairfield Financial Services Inc., a wholly owned mortgage subsidiary of Decatur Federal, operates 15 mortgage loan offices in Georgia, Tennessee, North Carolina, South Carolina, Alabama and north Florida.

DFSoutheastern's common stock is traded in the NASDAQ Over-the-Counter Securities Exchange under the symbol "DFSE."

DETROIT (SEPT. 24) PR NEWSWIRE - Gail Warden, president and chief executive officer of the Henry Ford Health System (HFHS), today announced a major reorganization of the management structure of HFHS designed to carry the system into the future.

The new management structure, approved last week by the HFHS Board of Trustees was created in part to improve efficiency and coordination, focus on quality and address HFHS's dual mission of managed care and academic medicine.

Changes include expanding the Office of President to include four senior vice presidents who will manage major operating groups. Those senior vice presidents are:

-- James Walworth, senior vice president, managed care. The new position for Walworth reflects HFHS's commitment to the health care financing arena and to managed care. Walworth is the president of Health Alliance Plan, the nation's sixth-largest health maintenance organization (HMO). He also was recently elected chairman of the Group Health Association of America.

Among the areas reporting to Walworth is Affiliated Health Services, which includes Wyandotte Hospital and Medical Center, Cottage Hospital, HFHS's Rehabilitation Services and Senior Services.

-- Thomas F. McNulty, senior vice president, treasurer. McNulty will continue his role as chief financial officer for HFHS.

A new position, reporting to McNulty, is the Office of Corporate Support Services, led by John "Jack" Fitch, with responsibility for analyzing opportunities for consolidation. Fitch currently is president and chief executive officer of Wyandotte Hospital and Medical Center. A search for his successor will be initiated.

-- Bruce W. Steinhauer, M.D., senior vice president, medical affairs. Dr. Steinhauer formerly held the position of group vice president and chairman of the Henry Ford Medical Group Board of Governors and Medical Affairs. Because of the additional responsibilities created by the growth of the hospital network and the Henry Ford/Mercy Health Network, that position will be split into two. Dr. Steinhauer will assume the role of senior vice president, medical affairs.

Roger Smith, M.D., will take over as group vice president and chairman, Henry Ford Medical Group Board of Directors. Dr. Smith is currently chairman of the Department of Surgery for Henry Ford Hospital and Medical Centers.

-- David W. Benfer, senior vice president, hospital affairs. Benfer, in addition to his current role as Henry Ford Hospital executive vice president, will assume additional responsibility for Urban Health Services and Samaritan Health Center, which HFHS will manage as part of the Henry Ford/Mercy Health Network. A search is underway for a chief executive officer for Samaritan.

"This reorganization will give us an opportunity to combine our activities in urban health care," said Benfer. "It makes a strong statement about our commitment to the community and the people of Detroit."

In addition, Benfer will be focusing attention on the HFHS commitment to an academic medicine strategy.

"I believe our academic medicine strategy will serve as a catalyst for the rebirth of Henry Ford Hospital as the major tertiary care and high-tech medical facility in the Midwest," said Benfer.

Steve Velick, formerly a vice president for the 700-member Henry Ford Medical Group, will assume the role of group vice president of Henry Ford Hospital. Velick will report to Benfer and be in charge of day-to-day activity at Henry Ford Hospital. A search is underway for a successor for Velick.

"The new structure recognizes the growing complexity of the health care

environment," Warden said. "The health care marketplace is changing rapidly. How employers would like to contract with physicians for services is changing. The regulatory situation is changing. We're going to continue to make changes as we respond to this environment."

All appointments will be implemented in October, according to Warden.

#90267p7380 09/24/1990 ~PR Newswire

DENVER (SEPT. 24) PR NEWSWIRE - Congressional Voice Mail Service, a privately owned company located in Denver, announced a new nationwide 900 service today that allows Americans to quickly and easily voice their opinions to the President and Congress.

"Congressional Voice Mail Service is a 24-hour a day service that supplements the traditional letter to your Senator or Representative in Congress," said Theodore Larson, spokesman for Congressional Voice Mail Service. "People's time is at a premium today and change occurs at a dizzying pace. We see

Congressional Voice Mail Service as a way to help the average American become a part of the Democratic Process," he said.

A caller simply dials 900-740-3030. The cost is $2 per minute and is billed on the caller's telephone bill. Using a touchtone phone, the caller can leave messages for any Senator or Representative, the President or Vice-President, and without a touchtone phone the caller can automatically leave a message for the President. Senate and Congressional leadership can be reached directly and all others are accessed using a two letter state abbreviation.

"We recommend that callers prepare their messages ahead of time in order to save money and get their point across," Larson said. "Callers can also get information on the Senate and House agenda for each day so that they can comment on current legislation, and they can leave a name and address to be sent the instructions, further cutting the cost of contacting their representatives."

All messages are delivered by overnight mail on audio cassette so that they can be reviewed multiple times. In the case of the President a communications staff receives all phone and delivered messages. They then tabulate the messages by subject and position just as they do letters received by the President. The President receives a daily summary of incoming communications including mail, phone calls and messages. If he wishes, he may request selected messages to review in person. Callers may also specify that their messages should be private or public and they may choose to listen to what others are saying to the President by calling Tele Inc. headquarters.

DETROIT (SEPT. 24) PR NEWSWIRE - Ford Motor Company (NYSE: F) will usher in the official introduction date of its 1991 cars and trucks on Sept. 27 with a comprehensive buyer-incentive program that will extend through Dec. 11.

Ford's present program -- which offers cash rebates or annual percentage rate (APR) financing through Sept. 26 -- will be modified to include cash allowances of $500 on most of its new 1991 Ford and Mercury models, with the exception of the Ford Bronco ($1,000) and the Ford Explorer, which will not carry an incentive. Customers also will be offered an APR program of 7.9 percent for contracts up to 48 months. Further, the company is offering incentives to dealers on carryover 1990 Ford and Mercury models.

"Reducing the overall complexity of our program and extending its duration will simplify the buying process for our customers," said Robert L. Rewey, vice president -- Ford North American Sales Operations. "Additionally, it will

keep both Ford and its dealers competitive in a difficult and challenging market."

CHICAGO (SEPT. 24) PR NEWSWIRE - Helene Curtis Industries Inc. (NYSE: HC) today announced second quarter net sales from continuing operations of $228.8 million for the quarter ended August 31, a 22 percent increase over the $187.5 million reported the prior year and a record for any quarter in the company's history. The company reported net earnings from continuing operations of $3.5 million, or 38 cents per share, compared with net earnings of $6.6 million, or 71 cents per share, for the prior year's second quarter.

Commenting on the results, Ronald J. Gidwitz, president and chief executive officer, said, "This quarter's record sales keep us ahead of our stated goal of 15-20 percent sales growth for the year. Our consumer business remains strong, led by product introductions in the United States and international markets.

"Gains by our hair care brands and the first-quarter introduction of Degree Antiperspirant/Deodorant continued to drive consumer sales in the United States. The introduction of Salon Selectives brand in Japan remains ahead of budget," Gidwitz continued. "Earnings are down from the prior-year period, as expected, primarily because of costs associated with these product introductions that have contributed to our excellent sales growth. Earnings were also impacted by costs incurred in connection with the launch of Finesse in Germany, which is proceeding at a slower rate than we originally anticipated. The continued growth of our three market-leading hair care brands and the overall promising results from our recent product introductions reinforces our confidence that we will achieve our sales and operating goals for the fiscal year."

Sales and earnings figures for the quarter, year-to-date and prior year have been restated to reflect the disposition of the company's beauty supply distribution business during the second quarter of the current fiscal year. Sales and earnings for this business are being reported as discontinued operations. An after-tax charge to earnings of 15 cents per share was incurred in the second quarter for losses arising from the sale of this business. Net earnings for the second quarter, including discontinued operations, were $2.1 million, or 23 cents per share, compared with $6.6 million, or 71 cents per share, for the prior-year period.

"Helene Curtis' action to sell its beauty supply distribution business reflects a commitment to focusing on our core business -- the marketing of brand name products internationally," said Gidwitz. "In fiscal 1990, this

business accounted for $45 million in sales and an after-tax loss of $600,000, or seven cents per share. Our sales goals for this year took into consideration the possible sale of this operation."

Helene Curtis Industries Inc. is one of the nation's major producers of brand-name personal care products. The company markets its products to consumers through supermarkets, mass merchandisers and drug stores and to beauty salons through distributors across the United States. Helene Curtis products are sold in more than 100 countries across the United States.

BENTON, KY. (SEPT. 24) PR NEWSWIRE - The president and chairman of Sun Up Foods, Inc., (Sun Up), a company publicly traded in the over the counter market, announced today that as a result of its inability to obtain a significant infusion of cash, it was forced to seek protection pursuant to chapter 11 of the U.S. Bankruptcy Code. Sun Up's case was filed in the U.S. Bankruptcy Court for the western district of Kentucky. Management has spent the last two months diligently working on various proposals to avoid bankruptcy or in the alternative to go into the bankruptcy proceedings with a

"Work Out" plan pre-approved by its principal creditors. To date, neither alternative has been completed; however, management is optimistic that with the help of either some of its principal creditors or an outside source whom the company is currently negotiating with, it will be able to emerge from Chapter 11 in due course as a viable competitor in the orange juice industry.

The company plans to hold meetings within the next 30 to 60 days to discuss with its creditors the events which led to the bankruptcy filing and the various alternatives available which would permit it to emerge from the bankruptcy and continue doing business.

LOS ANGELES (SEPT. 24) PR NEWSWIRE - The Bank of California said today it established a new service in which its bankers and carefully selected teams of investment consultants, brokers, and other experts coordinate and direct the portfolios of high-net-worth individuals.

Pam Barker, the bank vice president who heads the new service, said Personal Asset Management is designed for persons wanting highly sophisticated management of their portfolios through the expertise of a broad range of professionals from all investment quarters, including trust and investment management, tax and estate planning, venture capital and property management.

"We track down the sharpest minds in diverse niche markets and assist in setting them up in partnerships. The individual managers are given free rein to apply their expertise but must achieve the specific objectives set forth by our clients," Barker said. Built-in tracking mechanisms follow investment activities and measure results.

This unique approach to investment management has long been the exclusive turf of pension-fund managers because of the size of the portfolios they control. Diversifying portfolios and placing monies under the direct charge of managers who specialize in sophisticated market niches increases the likelihood of investment success.

Personal Asset Management clients typically are entertainers, entrepreneurs who have sold their businesses and inheritors of large estates.

The Bank of California, the first incorporated banking institution in the West also offers clients more traditional investment opportunities through its Trust and Investment Management Group. The sixth-largest bank in the state, the 126-year-old organization has $8.4 billion in assets and operates 50 banking offices in California, Oregon and Washington, and 14 international offices.

#90267p7398 09/24/1990 ~PR Newswire

ASH TOWNSHIP, MICH. (SEPT. 24) PR NEWSWIRE - Robert Bosch Corporation today unveiled its $1.5 million automotive proving ground at a 235-acre site in Monroe County.

Designed for testing Bosch developments in automotive anti-lock braking systems (ABS) and traction control systems (which Bosch calls automatic stability regulation -- ASR), the new proving ground is within a 60-minute drive of each of the Big 3 auto manufacturers' research and development facilities. It is only 40 minutes from Bosch's Automotive Headquarters and Technical Center in Farmington Hills, Mich.

"This facility will help us better serve our customers -- the automakers -- as well as their customers, car buyers, in several ways," according to Leo L. Weber, president of the Bosch Automotive Group. "It will enable us to reduce the development time and enhance the quality and performance of important safety advances such as anti-lock braking systems, traction control and future vehicle stability control systems."

Currently, the test facility features nearly one mile of paved roadway in the shape of a narrow loop, including four sections of test surface, each 300 feet long and 18 feet wide, which can simulate winter road conditions for year-round testing.

Three of these surfaces -- ceramic tile, basalt tile and Jennite- dressed asphalt -- feature built-in sprinklers to simulate the low-coefficient-of-friction conditions that exist on wet, snow-covered or icy roads.

A fourth surface, brushed concrete, has been laid parallel to other surfaces for testing system performance under split conditions -- when a vehicle may have two wheels on dry pavement and two wheels on a slippery patch, for example.

The facility also includes a 20-foot high traction control hill with a 5-10 percent grade on one side and a 15-percent grade on the other. The ASR test hill features 600 feet of road -- some of which is Jennite- treated -- outfitted with a sprinkling system.

According to Dieter Guenther, Bosch vice president of engineering, the facility will be expanded in two phases. Plans call for a service building -- featuring office space, a workshop/lab and a service garage -- and a paved, 4- to 6-inch deep water trough (for testing systems in submerged conditions) to

be added in 1991.

Also, in 1991, a rough road course -- including chatterbumps, potholes, irregular road bumps and Belgian blocks -- and a gravel road will be added.

A vehicle dynamics area, consisting of a large circular road 1,000 feet in diameter used for braking, traction and stability testing during severe cornering on dry pavement, is slated for addition in 1992.

Robert Bosch Corporation, an American company based in Broadview, Ill., is 100-percent owned by Robert Bosch GmbH, headquartered in Stuttgart, West Germany.

DALTON, GA. (SEPT. 24) PR NEWSWIRE - CrownAmerica, Inc. (NASDAQ: CRNA), a major processor of filament yarn for domestic and international carpet manufacturers, said today it will double the size and capacity of its Dalton, Ga., plant by early 1991. At the same time, company officials announced an agreement with Queen Carpet to sell CrownAmerica's Valdosta, Ga., plant, less certain equipment.

Lane Hamilton, president of the 106-year-old textile concern, said the two announcements "reflect the company's commitment to retain existing market share and build toward the long-term growth of its business."

Hamilton said the company will realize improved operating efficiencies at the single expanded plant in Dalton. "This goes hand-in-hand with our ongoing goal to focus on maintaining the highest quality standards that have become a trademark of Texture-Tex products," he said.

Construction is underway on the addition to the Dalton Texture-Tex plant. When completed, the facility will include 110,000 square feet and will house additional processing equipment. Company officials said they will add 35 new employees to the plant, bringing the total to 135.

"Our processing capacity also will be expanded," Hamilton continued, "enabling us to meet the growing demand for polypropylene products." He said completion of construction and equipment installation is expected by next February.

Dean Smith, Jr., a former plant manager of the Dalton operation, has been named general manager of domestic manufacturing of the Texture-Tex division.

Smith has served Texture-Tex in several supervisory and management posts since 1978.

Hamilton said the target closing date for the sale of the Valdosta plant is November 30, 1990.

CrownAmerica, Inc. is engaged chiefly in the processing of filament yarn for the carpet industry through its Texture-Tex subsidiaries. The company presently operates plants in Dalton and Valdosta, Ga., and near Heerlen in The Netherlands. CrownAmerica also operates a warehousing and leasing subsidiary for light manufacturing and storage in Dalton.

BEAVERTON, OR (SEPT. 24) PR NEWSWIRE - PGI (Professional Geophysics Inc.), an international geophysical service company, is using FPS Computing's (NYSE, PSE: FLP) Model 500EA UNIX Supercomputer to aid Soviet oil exploration, FPS announced today. PGI has established a Soviet joint venture company, MDSeis, with the USSR Ministry of Oil and Gas Industry. MDSeis is offering more than 70,000 kilometers of regional seismic data which are being reprocessed at PGI's Houston center. The power of the FPS Model 500EA is well suited to advanced seismic processing techniques that are being applied to the Soviet data.

"We are proud to be a part of the first American oil industry support of the Soviet Union, as mandated by President Bush following the recent Helsinki summit," commented Brad Woods, FPS Computing vice president. "Fifteen years ago, FPS Computing revolutionized the worldwide seismic industry with array processors which gave rise to distributed seismic processing. We are pleased to be expanding our support of the seismic industry with installations of the Model 500EA Supercomputer in the domestic and international markets."

PGI now operates multiple FPS Computing Model 500EA supercomputers as well as FPS attached array processors. "In addition to providing high volume, online advanced seismic processing, the Model 500EA has proven to be an excellent development system," said Bill Rice, vice president of PGI. "PGI and MDSeis are jointly implementing new geophysical techniques, including Migration-Before-Stack, requiring a UNIX supercomputer platform. The compilers, libraries, and software development tools offered on the Model 500EA have appreciably shortened the time to bring these new applications on-line."

FPS Computing has one of the largest installed bases of high-performance computing equipment in the industry. The firm designs, manufactures and markets high-performance computing solutions for scientific, engineering and

technical applications. The FPS Computing product line includes SPARC and proprietary RISC UNIX supercomputers, matrix coprocessors, and vector coprocessors. Founded in 1970 as Floating Point Systems Inc., FPS Computing is headquartered in Beaverton.

LOWELL, MASS. (SEPT. 24) PR NEWSWIRE - Courier Corporation (NASDAQ: CRRC) is pleased to announce that the company has been presented with the prestigious "Ship to Stock" award by Lotus Development Corporation (NASDAQ: LOTS) for consistently achieving the highest standards for quality and delivery in the production of software manuals for Lotus. Courier is the only major printer to have received such an award from Lotus for outstanding service.

James F. Conway III, president of Courier, stated, "We are honored to have received this award from Lotus. It is a testimony to our commitment to offer the highest standards of quality and service in meeting the needs of Lotus and all of our customers."

Rose Moreau, purchasing manager for Lotus' Cambridge, Mass., facility stated, "The Ship-to-Stock certification means we are so confident in Courier's work that materials coming from Courier do not need to be inspected by our quality control people. The work is good enough to go right to the line."

Courier Corporation, headquartered in Lowell, Mass., is an international producer of books, Bibles, reference texts, directories, technical manuals and software documentation. The company operates subsidiaries in Westford and Stoughton, Mass.; Philadelphia, Pa.; and Kendallville, Ind. Its international operations are based outside of London in the United Kingdom.

MELBOURNE, FL (SEPT. 24) PR NEWSWIRE - Opto Mechanik, Inc. (NASDAQ: OPTO), the Melbourne, Fla. based designer and manufacturer of optical and electro-optical fire control systems utilized in aircraft, tanks and other weapon systems, announced today their results of operations for the year ended June 30, 1990.

Revenues for the year ended June 30, 1990 reached a record level $39,173,528, generating net income of $986,033 or $.45 per common share on a weighted

average of 2,186,662 shares outstanding. This is an increase in revenues of 29.5 percent over the year ended June 30, 1989. Revenues reported at June 30, 1989 were $30,255,863, which generated net income of $925,154 or $.43 per common share on a weighted average of 2,159,139 shares outstanding. The net income at June 30, 1990 is inclusive of $330,000, which resulted from adopting accounting standard No. 96, which changed the method of accounting for income taxes.

Revenues for the quarter ended June 30, 1990 increased 41.4 percent to $10,544,987, generating net income of $180,522 or $.08 per common share on a weighted average of 2,189,102 shares outstanding. This compares to the quarter ended June 30, 1989 in which revenues were reported at $7,456,283, which generated net income of $263,992 representing earnings of $.12 per common share on a weighted average of 2,159,139 shares outstanding.

The company also announced that due to unexpected delays on a number of contract awards, the company expects reduced sales and earnings leading to losses for the first six months of fiscal year 1991. If contracts materialize as expected, the company will return to a profitable mode during the third and fourth quarters of fiscal year 1991.

EAST POINT, GA (SEPT. 24) PR NEWSWIRE - James Holt, a veteran food retailer with more than 24 years of experience, has been named a corporate vice president and officer of the Grand Union Company and placed in charge of its Southern region which operates 55 Big Star Food Stores throughout Georgia. Holt succeeds Craig C. Sturken who has resigned from the company to pursue other interests.

Holt joined Big Star Food Stores more than 24 years ago. During the last two decades, he has served in a wide variety of field and supervisory positions, including store positions as well as regional staff management positions. His experience includes service as a district sales manager, produce sales manager meat merchandising manager and, most recently, as administrative vice president for the region which includes stores throughout northern and central Georgia.

In announcing his appointment, Joseph J. McCaig, president and chief executive officer of Grand Union, said "James Holt brings an impressive food retailing background to his new position as regional vice president in charge of our Big Star Food Stores. Together with an excellent management team, he will bring a high degree of leadership and retailing depth to his new duties."

NEW YORK (SEPT. 24) PR NEWSWIRE - Mitchell Kozikowski, president and CEO of the Rowland Company's U.S. operations, has resigned from the firm. Herbert L. Rowland, CEO of Rowland Worldwide Inc. and chairman of the U.S. company, will form an Office of the President to manage the New York operations. He said that he would chair the management group, which will be comprised of the company's four executive vice presidents.

Rowland and Kozikowski said that the parting is amicable and is the result of philosophical business differences relating to future growth of the company in the United States. Kozikowski joined Rowland in June 1988 as president of the New York office, and was named to his current post later that year.

Rowland Worldwide, headquartered in New York, is the world's fifth largest PR company, with 34 offices on five continents. The firm employs more than 750 people and has annualized fee billings in excess of $50 million.

Rowland stated that "Mitch Kozikowski has contributed significantly to the growth and development of the Rowland Company in the U.S. during the past two years. Under his leadership, the New York office has added new clients and instituted a number of new systems in management and staff development. He has also been a valued colleague and member of the Rowland Worldwide executive committee."

Kozikowski added, "I have the highest regard for the staff and clients of Rowland. It has been a rewarding experience to help lead the development of the firm in the U.S. I leave with the knowledge that Rowland is one of the highest quality public relations agencies in the industry, with great prospects for the future."

TROY, MI (SEPT. 24) PR NEWSWIRE - Kmart stores across the country via satellite network will provide a special INVENT AMERICA! workshop called The Great INVENT AMERICA! Think Link to public and private teachers of grades kindergarten through eighth grade.

This workshop will be broadcast to Kmart stores Wednesday, Sept. 26, from 8-10 p.m. Eastern Standard Time. It is free of charge to attending teachers who have reserved their space with their local Kmart store manager.

INVENT AMERICA! is a national education program and student invention competition that is helping millions of children develop the problem-solving skills needed to meet the 20th-century work force. It will host The Great INVENT AMERICA! Think Link which will feature hands- on workshops presented by award-winning educators, INVENT AMERICA! materials and other teaching products and curriculum guides.

The broadcast content will include a panel discussion moderated by Roger Kennedy, director, National Museum of American History, Smithsonian Institution. The panel includes Joe Antonini, Kmart chairman and chief executive officer; I. MacAllister Booth, Polaroid president and chief executive officer; Peter Eio, Lego president; Craig Weatherup, Pepsi-Cola president and chief executive officer, and Ruth Otte, Discovery Channel president.

In addition, The Great Think Link will feature an INVENT AMERICA! workshop, a Polaroid workshop and a Lego workshop. Participating teachers will receive curriculum, cameras, film and Lego starter kits -- all the materials necessary to make the Great INVENT AMERICA! Think Link a hands-on experience for teachers.

"I am pleased that Kmart is able to make this important contribution through our satellite network to our nation's educators," said Joseph E. Antonini, Kmart chairman and chief executive officer. "We salute America's teachers and are committed to helping them prepare our children for the globally competitive work force of the future."

It is anticipated that upward of 50,000 teachers will take advantage of this workshop dedicated to fostering creative and analytical skills in

schoolchildren.

"This one single event will place in the hands of educators the training and materials they need to make an immediate and positive impact on millions of American students," stated J. Morgan Greene, INVENT AMERICA! chairman.

The Great INVENT AMERICA! Think Link is sponsored by Kmart, Polaroid, Lego, Dow Chemical and Pepsi.

Kmart Corporation (NYSE: KM) serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. Kmart, currently operating 2,330 Kmart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse, Inc. and The Sports Authority.

ST. LOUIS (SEPT. 24) PR NEWSWIRE - Ford Motor Company (NYSE: F) said today that it would be exporting 4,000 Aerostars, built at the St. Louis Assembly Plant, during the 1991 model year to Mexico under the terms of that country's recently announced Automotive Decree.

The announcement was made by Henry A. Nickol, general manager, Vehicle Operations, Ford North American Operations, during a ceremony celebrating the production of the 1 millionth Aerostar at the plant. "The Mexican Automotive Decree constitutes a step forward in the internationalization of the Mexican economy and affords the Mexican consumer enhanced product choice," he said.

Ford also plans, in the coming year, to export Lincoln Town Cars from its Wixom Assembly Plant (Wixom, Mich.) and Explorer trucks from its Louisville Assembly Plant (Louisville, Ky.) to Mexico.

Ford Mexico was established in 1925 in Mexico City, and has been a cornerstone in the overall industrialization of the Mexican economy. Ford currently maintains car and truck assembly plants near Mexico City, along with both casting and engine plants, dedicated to production of vehicles for sale within the domestic Mexican market.

Ford additionally has stamping, vehicle assembly, engine and component plants in Mexico, which produces products for both the export and Mexican domestic markets. Ford Mexico has more than 20,000 employees working throughout Mexico.

#90267p7476 09/24/1990 ~PR Newswire

VANCOUVER, B.C. (SEPT. 24) PR NEWSWIRE - Eric V. Friedland, chairman of Fairbanks Gold Ltd., announced today that two additional diamond core drill rigs have been mobilized to the property bringing the total number of rigs to 6 diamond core and one reverse circulation.

Four of the diamond core rigs are being utilized for in-fill reserve drilling on a 100 foot grid to a depth of 500 feet while the reverse circulation rig is being used for further resource expansion along the open-ended sides of the deposit.

The two new core rigs will be used for deep drill testing of potential high grade feeder zones and bonanza structures, as well as for increasing the drill indicated resource below 700 feet.

Drilling over the last six weeks has significantly increased the size of the deposit. A new mineralized zone, located on the south-western extension of the deposit along Monte-Cristo Creek has been discovered. This open-ended zone is rapidly adding tons to the resource base and drilling in this new area will continue on an accelerated basis.

The company will announce an updated resource number once drilling in this new area is complete and anticipates establishing a mineable reserve by the end of the year. Currently, the deposit is approximately 5,000 feet long and averages 2,000 feet wide and remains open at depth and laterally in three directions.

Mining of the 170,000 ton bulk sample has been completed and a representative portion of the excavated material, approximately 42,000 tons, has been crushed and is currently being split and sampled. Completion of the sampling is forecast for the end of the week. Seven tons of sampled material will be sent to Lakefield Metallurgical Laboratories in Ontario for final processing. Strathcona Mineral Services Ltd. of Ontario is overseeing the complete bulk sample process.

General observations of the walls of the bulk sample trench show fracturing and weathering with extensive quartz veining. The ground is rippable and friable even to the bottom of the trench indicating that low cost bulk mining is applicable.

Fairbanks Gold is continuing its discussins with several major mining companies concerning possible participation in the company and its properties.

DEARBORN, MI (SEPT. 24) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is voluntarily recalling 102,800 1988 and 1989 F-series trucks with 7.5-liter engines to inspect a fuel vapor hose that could be kinked, resulting in the release of unacceptable hydrocarbon evaporative emissions levels.

The vapor line is designed to allow fuel vapors to flow from the fuel tank to a carbon canister to help control vehicle evaporative emissions. The problem occurs because some of the trucks were built with a vapor hose that is too long. If the hose is kinked, it can stop the flow of fuel vapors to the carbon canister. Ford's investigation of this concern indicates that 15 percent of these trucks may have kinked vapor hoses.

Dealers will be asked to inspect the hoses and, if necessary, remove a section to prevent the kinking from occurring.

DETROIT (SEPT. 24) PR NEWSWIRE - The following statement may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is voluntarily recalling about 12,000 1987-89 F-150/250 light trucks and Broncos with 4.9-liter engines to assure acceptable emissions levels.

In-use vehicle emissions testing conducted by the California Air Resources Board indicates that hydrocarbon exhaust emissions levels may be too high.

Vehicles involved have a specific engine calibration that was only used on trucks built for sale in California.

Dealers will be asked to install a new electronic engine control processor and reset the ignition timing at no cost to the owner.

SEATTLE (SEPT. 24) PR NEWSWIRE - The following was released today by Boeing Aerospace & Electronics:

Imagine a new spacecraft that could ferry astronauts and equipment to space and back without all the costly and cumbersome launch towers, booster stages, external fuel tanks and other requirements of present-day launch technology. What would such a spacecraft look like? How would it operate?

The Boeing Defense & Space Group plans to answer those questions as part of a $2.4 million, 10-month technology demonstration contract awarded to the group's Aerospace & Electronics division by the Strategic Defense Initiative Organization (SDIO).

Boeing scientists and engineers will evaluate alternative concepts for a Single-Stage-To-Orbit (SSTO) vehicle. The work could lead to the flight of an experimental prototype as early as 1994, with an operational vehicle ready to fly by 1996.

"Our challenge is to apply the latest technologies in materials and rocket engines and recommend a preferred concept for a vehicle capable of launching itself into space, performing its mission, and returning all in one piece," said Vincent A. Caluori, Space Transportation Systems manager for Boeing. "Nearly 20 years of Boeing SSTO investigations have shown us that the concept has great mission potential and utility," Caluori said.

Three approaches to the SSTO challenge will be in competition during the company's initial investigation: Vertical Take-Off and Landing (VTOL), Horizontal Take-Off and Landing (HTOL) and Vertical Take-Off, Horizontal Landing (VTHL). The competition will result in Boeing's selection of a preferred concept for the SSTO vehicle.

The company then will fabricate and test some of the proposed SSTO hardware. At the end of the 10-month contract, Boeing will propose development of a

sub-orbital or orbital test vehicle. Before contracting for a test vehicle, the SDIO will choose from among concepts presented by Boeing, Rockwell, McDonnell Douglas and General Dynamics. All have been awarded similar SSTO contracts.

The SDIO is funding the contracts as part of a government initiative to develop highly operable launch systems which would be less costly and more reliable than current systems. Minimally, the new spacecraft would be able to carry two-to-four astronauts and payload into orbit for several days. The company will carry out its SSTO work at the Boeing Space Center in Kent, Wash. south of Seattle. It will be assisted in the project by three leading propulsion companies: Aerojet, Pratt & Whitney and Rocketdyne.

The SDIO Program Director is U.S. Air Force Col. Pat Ladner. Dr. Dana G. Andrews has been named program manager for Boeing.

DETROIT, (SEPT. 24) PR NEWSWIRE - Great Lakes Gas Transmission Company today announced it will become an open-access transporter effective Nov. 1, 1990.

In accordance with Federal Energy Regulatory Commission regulations authorizing open-access transportation, Great Lakes will hold an open season for customers seeking interruptible transportation service. The open season will begin at 8 a.m. (EDT) on Oct. 8, 1990 and end at 5 p.m. (EDT) Oct. 19, 1990.

John K. Archambault, president and chief executive officer of Great Lakes, said, "Once our planned pipeline expansions are completed, operating as an open-access transporter will enhance our ability to provide timely interruptible service."

To obtain a transportation service package, contact the Great Lakes Market Development Department by telecopy at 313-596-4571 or 313-596-4572. Completed request forms may be telecopied during the open season using the same numbers.

Questions regarding the open season and transportation request process can be directed to 313-596-4556.

Great Lakes Gas Transmission Company is a Detroit-based natural gas pipeline company that transports Canadian natural gas through a 1,300- mile pipeline for delivery to customers in the United States and eastern Canada. It is co-owned by The Coastal Corporation (NYSE: CGP), a Houston-based energy holding company, and TransCanada PipeLines Limited of Calgary, Canada.

CINCINNATI (SEPT. 24) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) and the Fater group of companies today announced an agreement to merge their paper products businesses in Italy, Spain, Portugal and the United Kingdom. Terms of the agreement were not disclosed.

Under the agreement, a new company will be formed in Italy under joint control. This company will include the present Fater businesses making and selling sanitary napkins, baby diapers and adult incontinence products; the Fameccanica machinery company; the Faricerca, Faidata and Fatecnica research companies; and P&G's Pampers baby diaper business. In Spain and Portugal, Ausonia and Lepori businesses will be combined with the Arbora company, which Procter & Gamble jointly controls with the Agrolimen group. In the United Kingdom, the Swaddlers company will be integrated within P&G.

The merger of these businesses assures their future within the increasingly

competitive conditions of the emerging European single market. This agreement means that the companies in the Fater group have the benefit of P&G's worldwide resources, and that these companies' innovative history of delivering products with ever better performance and value will continue.

It also accelerates P&G's entry into the European feminine sanitary napkin and adult incontinence product categories because of Fater's experience and success in these categories. This will benefit consumers in these categories by leading to better products and stronger competition. In Europe, P&G has a relatively small presence in the adult incontinence market, and the company's participation in the sanitary napkin category was previously limited to Greece the Iberian peninsula, and Belgium.

SEATTLE (SEPT. 24) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today announced that under the U.S. Food and Drug Administration's (FDA) treatment investigational new drug (IND) program the company is making available its granulocyte macrophage-colony stimulating factor (GM-CSF) in bone marrow transplant patients suffering graft failure and delay of engraftment to assess safety and efficacy.

A genetically engineered growth factor, GM-CSF represents a new class of drugs being investigated for use in reversing neutropenia, a deficiency of mature white blood cells that destroy viruses and bacteria.

GM-CSF is a cytokine, or immune-system hormone that promotes the growth and differentiation of the white blood cells called granulocytes and macrophages.

The FDA's treatment IND program is designed to make available promising new drugs as early in the development process as possible, to patients suffering life-threatening diseases, for which no comparable or satisfactory alternative drug or other therapies exist.

Immunex is a leading biotechnology firm focused on the research, development, marketing and manufacture of immunological therapeutic products.

#90267p7513 09/24/1990 ~PR Newswire

SAN FRANCISCO (SEPT. 24) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today approved a cleanup plan for the Coalinga Asbestos Mine

Superfund site, Fresno County, Calif. This plan addresses the asbestos contamination in the Johns-Manville mill area, one of three geographically distinct areas that are a part of the Superfund site.

"EPA's preferred cleanup remedy was chosen after a careful study of all the alternatives," said Daniel W. McGovern, regional administrator for U.S. EPA, Region 9. "This decision reflects EPA's continuing commitment to protect public health and environment in the vicinity of this federal Superfund site."

The cleanup decision, embodied in a document called the record of decision, includes plans for controlling the release of asbestos from the mill and restricting access to the area. Measures to control the asbestos consist of: dismantling the mill building and disposing of the debris, constructing a stream diversion to divert water flows away from the asbestos mine tailings pile, grading the mine tailings to reduce the slope of the pile and improve its stability, constructing a concrete spillway at the existing sediment-trapping dam and conducting a pilot study to determine if native vegetation can be grown on the disturbed areas to help minimize erosion. Barriers will be erected around the disturbed areas to discourage access by vehicles and additional asbestos warning signs will be posted throughout the mill area.

The work is estimated to cost $1.9 million and require two years to implement.

The other areas of contamination associated with the Coalinga Mine Superfund site include the ponding basin of the California Aqueduct and an area within the city of Coalinga, Calif.

EPA is proposing no action for the ponding basin because the U.S. Bureau of Reclamation (BOR) and the California Department of Water Resources (DWR) are considering actions to minimize the generation of airborne asbestos-laden dust in that area. EPA will re-evaluate the site in 1992 to determine whether the BOR and DWR decision is protective of human health and the environment. EPA will decide at that time whether further action under the Superfund program is necessary.

In July 1989, EPA approved a cleanup plan for the asbestos contamination within the city of Coalinga. The plan included excavating and consolidating the asbestos-contaminated soil and burying it in an on-site landfill with a impermeable covering. That cleanup is currently underway.

The Coalinga Asbestos Mine was proposed in 1983 and placed in a final status on the National Priorities List (NPL) in 1984. The NPL is EPA's list of the hazardous waste sites potentially posing the greatest long-term threat to health and the environment. EPA identifies and ranks NPL sites according to threats to humans through actual or potential contamination of groundwater, surface water or air.

ARLINGTON (SEPT. 24) PR NEWSWIRE - USLICO Corporation (NYSE: USC) announced the addition of The Trust Company of the Marshall Islands, Inc. and Marshall Islands Maritime & Corporate Administrators, Inc. to its corporate group.

Pursuant to a recent agreement with the Government of the Republic of the Marshall Islands, the Trust Company and Marshall Islands Maritime & Corporate Administrators, Inc. will administer the Marshall Islands' ship registry and non-resident corporate programs.

The Marshall Islands has had a well-run and respected ship registry since the inception of its maritime program in 1988. USLICO is honored to be associated with this prominent Pacific Basin registry and new corporate domicile, the company said. On Sept. 12, 1990, the Marshall Islands' legislature, the Nitijela, upon recommendation of President Amata Kabua, approved the Maritime Act 1990 and the Associations Law 1990 in support of these programs. These new statutes will make the Marshall Islands ship and corporate registries an even more attractive choice to the international shipowners and operators, to the ship finance institutions and to their attorneys.

The Trust Company of the Marshall Islands, Inc. and Marshall Islands Maritime & Corporate Administrators, Inc. are wholly-owned subsidiaries of USLICO Corporation.

Primarily an insurance holding company with $2.6 billion in assets, USLICO Corporation is headquartered in Arlington.

PHILADELPHIA, (SEPT. 24) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) reported today that 1,909 of its workforce of 11,273 employees have elected to retire under the company's Early Retirement Plan.

Those selecting retirement represent 73 percent of the 2,608 employees who were eligible for enhanced retirement benefits.

PE said that to ensure an orderly restructuring of the workforce and to provide time for training of replacements, where necessary, the retirements will take place in stages between Nov. 1, 1990, and Dec. 31, 1992.

The retirement plan was announced in May as part of PE's across-the- board cost reduction program designed to trim $100 million annually in operating expenses.

PE said it expects to record a one-time charge against earnings of approximately $249 million, or 70 cents a share of common stock, in the third quarter of 1990, to reflect costs attributable to the early retirement plan.

PE said it estimated that the salaries and benefits saved by the early retirements will amount to approximately $75 million per year by 1993.

TORONTO (SEPT. 24) PR NEWSWIRE - R.A. Noble, president and CEO of Synergistics Industries Limited, announced today that Synergistics has reorganized its North American operations into two operating companies in order to achieve more efficient utilization of assets and improved ability to respond to North American marketing opportunities.

In Canada, the operations of Rochevert Inc. have been merged with those of Carlew Inc., under the direction of Rehault A. Duteau, president. The five Canadian plants are located in Lindsay and Orangeville, Ontario; St. Remi and Valleyfield, P.Q.; and Calgary, Alberta.

In the United States, the operations of Intamix Corporation of Willis, Texas have been combined with those of Cary Chemicals, Inc. of Farmingdale, N.J. under its president, K.B. Cary. J.J. Hyland has been made Operations Manager of the Willis, Texas plant.

Noble commented that the consolidation of these organizations will facilitate improving the utilization of manufacturing capacity throughout the organization to service customer requirements anywhere in North America. In particular, the company's efforts will be focussed on selling proven product lines throughout North America based on the opportunities presented by the Free Trade Agreement.

Noble further stated that following the completion of its major expansion program, Synergistics now has sufficient manufacturing capacity to double its revenues, while operating from a more responsive and effective organizational base.

Synergistics manufactures a full range of flexible and rigid PVC compounds, thermoplastic elastomers, cross-linkable polyethylenes, and vinyl plasticizers for North American wire & cable, construction, and industrial uses.

#90267p7522 09/24/1990 ~PR Newswire

VANCOUVER, B.C. (SEPT. 24) PR NEWSWIRE - Shephard Insurance Group, Inc. released the text of the statement issued today by its chairman, Graham Ferguson Lacey:

I am pleased to review with you the results of your company for the period of 14 months ended May 31, 1990.

Your company had profits before other items of $179,350 on revenue of $3,442,526, compared with profits of $25,963 for the 12-month period ending March 31, 1989 on revenue of $1,267,038 for the same period. This satisfactory performance was affected adversely by a combination of the write-off of mineral property expenditures, the costs of aborted acquisition possibilities and a write-down to market of quoted securities, resulting in a loss for the period of $178,876.

It is important to note the improvement in the company's balance sheet with shareholders' equity increasing from $2,737,607 at the 31st of March, 1989 to $3,588,985 at the 31st of May, 1990, and group assets growing from $6,165,376 to $10,430,351 during the period under review.

In January we acquired the general insurance brokering book of business of Saunderson Insurance Brokers, Ltd., based in London, England. This book of business represents approximately $200,000 of gross commission. In addition we acquired in April the Herriot Group of companies, also based in England, with gross commission of approximately $1,200,000. This well-managed profitable company will, with Saunderson, contribute significantly to the group's earnings in the current financial year.

It is our target to achieve annualized gross commission income from the United Kingdom of $5,000,000 from our existing operations and pending acquisitions by the 30th of June, 1991.

Shephard Holdings, Ltd., your company's fully owned United Kingdom holding company, and Nycal Corporation, your parent company, have acquired approximately 18.5 percent of IFICO PLC, an insurance brokering company listed on the London International Stock Exchange and whose business is entirely complementary to that of Shephard. Their insurance brokering business has gross commission of approximately $5,500,000 and enjoys good pre-tax profit margins. At the end of May, when our holding was approximately 11 percent, we accepted an unsolicited offer to purchase our holding for a consideration that would have generated a pre-tax profit in excess of $500,000. The

purchaser, however, reneged on the transaction. We have reserved our legal position and increased our holding as the opportunity occurred.

On July 31, 1990, it was announced that Nycal Corporation, a U.S. company based in Washington, D.C., and listed on the national NASDAQ market (SYM: NYCL), had acquired 51 percent of Shephard Insurance Group by an exchange of stock. It was further stated at that time that, subject to obtaining all requisite regulatory approvals both in the U.S. and Canada, it was Nycal's intention to make at least the same offer to all Shephard shareholders. It is anticipated that this offer will be forwarded to shareholders later this fall. I believe that this development will accelerate the continued growth of Shephard.

BURBANK, CALIF. (SEPT. 24) PR NEWSWIRE - Warner Bros. and Jerry Weintraub have concluded a major long-term agreement for Weintraub to produce movies for the studio, it was announced today by Robert A. Daly, Warner chairman of the board and chief executive officer, and by Terry Semel, the company's president and chief operating officer.

Stated Daly and Semel: "Jerry Weintraub is a vital and energetic force in our industry. His creativity as a producer, along with his broad-ranging relationships with key members of our creative community, make us happy to welcome him into the Warner family."

Stated Weintraub: "I am both pleased and proud to have this opportunity to work with Bob and Terry and their fine production team, headed by Mark Canton. I'm also thrilled to be involved with their expert marketing and distribution arms. They are all truly the best at what they do, and I look forward to a long and very successful relationship."

Weintraub -- who produced such movie hits as "Nashville," "Oh, God!," and "Diner," as well as "The Karate Kid" and its two sequels -- will be based at the Warner Bros. Studios, along with a full production staff.

Weintraub also announced that, effective immediately, he is resigning his post as chairman and chief executive officer of Weintraub Entertainment Group.

DUNDEE, MI (SEPT. 24) PR NEWSWIRE - Holnam Inc. (NYSE: HLN) today announced a selling program for stockholders who own fewer than 100 shares of its common stock. The selling program allows eligible Holnam stockholders the opportunity to sell all, but not less than all, of their eligible shares without being charged any brokerage commission. The company estimates that between 25,000 to 50,000 shares of its common stock may be tendered by oddlot shareholders who choose to participate in the program.

Many Holnam, Inc. oddlot holders were originally stockholders of Ideal Basic Industries, Inc. and received their shares as a result of Ideal's merger with Holnam Inc. in March of this year.

The record date for ownership has been set at Aug. 27, 1990. Partial tenders will not be accepted.

The selling program will expire Oct. 22, 1990, unless extended. The manager of the program, Shareholder Communications Corporation, and Holnam Inc. make no recommendation as to whether or not stockholders should participate in the selling program.

Any eligible Holnam stockholders wanting information on the selling program should contact Shareholder Communications Corporation at 1-800- 678-9606.

Holnam is the largest cement producer in North America and a subsidiary of Holderbank Financiere Glaris Ltd., of Switzerland, one of the world's largest cement manufacturers.

#90267p7540 09/24/1990 ~PR Newswire

ERIE, Pa. (SEPT. 24) PR NEWSWIRE - Autoclave Engineers, Inc. (NASDAQ: ACLV) today reported results for the first quarter of fiscal 1991, which ended Aug. 31, 1990.

Net sales for the first quarter were $16,076,000, as compared with $18,414,000

in the prior year. The net loss for the fiscal 1991 first quarter was $650,000 or $0.15 per share, as compared with net income of $1,002,000 or $0.23 per share in the same period a year ago.

James C. Levinson, president and chief executive officer of Autoclave Engineers, commented, "Softness in our first quarter was expected as a result of planned increases in operating expenses, in line with our strategic growth objectives. Our results were further impacted by lower volume and a shift in our mix of business compared to last year's first quarter. Last year's first quarter sales were weighted toward our higher margin product lines."

Levinson continued, "We are confident that all of our companies will record stronger sales and operate profitably in the second quarter. Burton Corblin, our French subsidiary, had very strong order levels in the first quarter, and now has a record backlog in excess of $15,200,000. Unit Instruments operated profitably despite a downturn in the semiconductor industry by implementing cost-cutting measures to offset the softer sales. Incoming orders now are much stronger than earlier in the year."

Autoclave's balance sheet at the end of the quarter remained strong, with working capital of $27,220,000 and term debt of only $4,990,000. Shareholders' equity was $38,138,000 at Aug. 31, 1990, or $9.13 per share, resulting in a debt-to-equity ratio of 13 percent.

Levinson added, "Our solid balance sheet will allow the company to continue to make the capital and operating investments that we need to make to remain competitive, while retaining the flexibility to accelerate our growth objectives through acquisitions."

Levinson concluded, "With general economic conditions uncertain, we are moving aggressively to reduce costs throughout the company. The fundamental strengths of the company and the improvement we expect in all our subsidiaries should produce a fifth consecutive year of profitable results."

Autoclave Engineers, Inc., headquartered in Erie, Pa., with subsidiaries in Erie; Orange, Calif.; and Nogent, France, is a recognized leader in providing high quality engineered products for chemical research and related industrial process markets worldwide.

PITTSBURGH (SEPT. 24) PR NEWSWIRE - Kentucky West Virginia Gas Co., a pipeline subsidiary of Equitable Resources (NYSE: EQT), has filed a settlement that, if approved by the Federal Energy Regulatory Commission (FERC), will

result in $6.6 million of additional revenue for Kentucky West, it was announced today.

The settlement, which is supported by the Kentucky Public Service Commission, acting on behalf of several Kentucky utilities, settles a claim by the Equitable pipeline that it had undercollected for gas it produced and sold to the utilities between 1979 and 1983. The undercollections stemmed from the FERC's denial of the pipeline's right to charge market prices for its production during the four-year period. Following several court decisions in Kentucky West's favor, the FERC acknowledged this right and in 1989 granted the pipeline permission to bill customers for the lost revenues plus accumulated interest.

The monies agreed to in the settlement would be recovered by Kentucky West over a period of 10 years.

In all, Kentucky West has filed five customer settlements to date totalling $36.2 million, two of which have been approved by the FERC.

NEW YORK (SEPT. 24) PR NEWSWIRE - General Instrument Corporation announced today it is planning to sell its transportation electronics division. The proposed sale is part of General Instrument's restructuring and debt reduction program subsequent to its acquisition by an investor group led by Forstmann Little & Co. The investment banking firm of Bowles Hollowell Conner & Co. will represent General Instrument Corporation in the sale.

The transportation electronics division is the largest noncaptive manufacturer of automotive electronic displays sold to transportation original equipment manufacturers in North America. Other product lines include comfort, safety and convenience electronics for transportation applications, computer network products, and switch products for military and aerospace applications. Annual sales of the division were approximately $40 million in fiscal year 1990 ending Feb. 28, 1990.

The transportation electronics division currently employs 799 people at facilities in El Paso, Texas and Juarez, Mexico.

General Instrument Corporation is the leading manufacturer of cable television electronics, coaxial cable, and satellite encryption systems.

CAMBRIDGE, MA (SEPT. 24) PR NEWSWIRE - Biogen, Inc. (NASDAQ: BGEN) announced today that the company has been awarded European patent No. 41313 for the production of beta inferferon through recombinant DNA technology. The patent covers recombinant DNA molecules, transformed hosts and methods for producing recombinant beta interferon proteins.

Beta interferon is a naturally occurring biologically active protein produced by human fibroblast cells. Natural beta interferon is being sold in several European countries for various cancer and viral indications. Current clinical data indicate that other potential applications of beta interferon for human health care include hepatitis C, melanoma, brain tumors, lymphoma and multiple sclerosis.

In June 1989, Biogen signed agreements with Asta Pharma AG of West Germany for the clinical development and commercialization of recombinant beta interferon in certain western European countries. Biogen supplies Asta with clinical and commercial material through its West German affiliate, Bioferon. Biogen retains co-marketing rights for the recombinant product and will receive royalties on Asta's sales. In addition, Biogen plans to commercially develop beta interferon for markets in the United States.

Biogen is a leading biotechnology company principally engaged in developing genetically engineered human pharmaceuticals. As a result of its early research, Biogen now derives revenues from five products being sold by its licensees in various countries. Biogen currently directs its research into areas where the company has particular strength -- AIDS, cardiovascular, inflammation and selected cancers.

WILKESBORO, N.C. (SEPT. 24) PR NEWSWIRE - Golden Needles Knitting & Glove Co. a glove manufacturing firm headquartered in Wilkesboro, North Carolina, has purchased Monte Glove Co., a Mississippi-based manufacturer of top-quality leather, hot-mill, brown jersey, and a complete range of cotton industrial gloves. Already the world's largest manufacturer of knitted industrial gloves, Golden Needles entered the cut-and-sewn glove market with the recent purchase of Tom Thumb, a glove manufacturing company with a knitting operation in Wilkesboro and a cut-and-sewn manufacturing plant in Roberta, Georgia. The Monte acquisition will add three manufacturing plants to the company's cut-and-sewn manufacturing operation.

Harold Plemmons, President of Golden Needles, explained that the purchase would allow Golden Needles to offer, through its world-wide network of distributors, a more comprehensive line of hand protection products. Plemmons also announced that the new sales policy at Monte Glove will be to market its products exclusively through industrial glove distributors. "While Golden Needles' line of knitted industrial gloves is extensive," said Plemmons, "a cut-and-sewn leather or fabric glove is a more appropriate choice for some hand protection applications, and Monte will allow us to enter that market with top-of-the-line products."

While Monte products will be sold through Golden Needle's network of distributors, Monte Glove Co. will be operated as an independent manufacturing company. Bob Musser, President, and Jim Tollison, Vice President, will continue to direct the company's product development and manufacturing

activities. Tollison explained that, with Golden Needles handling sales, Monte's staff will be able to focus on expansion, modernization, and the development of new products for the industrial glove market. "Development efforts already are in progress on some exciting new products including a new cut-and-sewn glove made of DuPont's Kevlar aramid," said Tollison. "The glove is earmarked for use around flame and high heat exposure."

Monte Glove Co. was founded in 1909. At that time, the company was based in Indiana. The main manufacturing plant in Maben, Mississippi, was built in 1956, and, in 1973, Monte purchased a leather glove manufacturing facility in Maben and added a third facility in Pheba, Mississippi.

With the acquisition of Monte, Golden Needles has manufacturing plants in Wilkesboro, North Carolina; Roberta, Georgia; Nottinghamshire, England; and Monte's three plants in Maben and Pheba, Mississippi.

SAN JOSE, CALIF. (SEPT. 24) PR NEWSWIRE - Network Peripherals Inc. is one of five companies which today announced formation of an FDDI/STP Core Group to encourage development of Fiber Distributed Data Interface (FDDI) technology over shielded twisted-pair wire.

Network Peripherals Inc. (NPI) is a one-year-old company whose mission is to develop, market and support high-performance connectivity products that enhance the productivity of personal workstation users. The company's immediate focus is on bringing FDDI technology to the workgroup and workstation levels.

The FDDI/STP Core Group, organized by SynOptics Communications Inc., (NASDAQ: SNPX) was formed to accelerate adoption of FDDI technology by making it available on shielded twisted-pair wire, which is lower cost and more widely installed than fiber-optic cable. The Core Group's goal complements NPI's emphasis on making FDDI connectivity available at the level of a personal workstation user.

"FDDI is not just a medium for backbone networks. It is an emerging requirement among users whose data-intensive applications demand high-performance connections between workstations and a host," said Gordon L. Stitt, vice president and co-founder of NPI.

"Making FDDI available on shielded twisted-pair will increase the availability and lower the cost of DDI connections at the desktop level," Stitt added.

NPI's near-term roll in accelerating the adoption of FDDI is to provide a series of single-board network adapter cards for various industry-standard bus architectures. The company's product strategy is to supply a complete range of products that will allow OEMs, system integrators and large end-users to integrate personal worksations into an environment that uses FDDI as an enabling technology for high-performance, multi-vendor networking.

#90267p7560 09/24/1990 ~PR Newswire

CLAREMONT, N.C. (SEPT. 24) PR NEWSWIRE - WSMP, Inc. (NASDAQ: WSMP) reported revenues of $14,376,000 for the second quarter ended August 10, 1990, a decrease from $14,454,000 reported for the second quarter of last year. WSMP has included in the second quarter of the current year a $400,000 pretax charge ($256,000 net of tax benefits) for the estimated costs associated with the closing of eleven unprofitable restaurant units. The net loss for the current year second quarter was $600,000 (including the effect for the restructuring charge) a decline from the net earnings of $129,000 reported for the second quarter of the prior year. Based on 2,086,934 and 2,156,169 weighted average shares in each period respectively, the loss per share was $.29 for the second quarter of this year compared to net earnings per share of $.06 in the same period of last year.

For the six months ended August 10, 1990, the Company reported revenues of $29,244,000 a decrease from $29,469,000 for the same period of the prior year. A net loss of $634,000 was reported for the first six months of the current fiscal year compared to net earnings of $290,000 for the same period of the prior year. Based on 2,077,827 and 2,182,604 weighted average shares in each period respectively, the loss per share was $.31 for the first six months of fiscal 1991 compared to net earnings per share of $.13 in the same period of last year.

The Company recorded the $400,000 reserve for discontinuing businesses to recognize the estimated effects of closing certain restaurant units that have proven to be unresponsive to efforts to reverse their negative financial impact. These units were never more than marginally profitable and current market conditions did not justify their continued operation. The closing and ultimate disposition of these restaurant units is expected to have a long term positive impact by allowing the Company's operational staff to focus on enhancing the profitability of the remaining units.

After the restructuring is completed WSMP will operate 39 restaurants in seven southeastern states, 37 of which are Western Steer Family Steakhouse units. The Company also franchises 119 Western Steer Family Steakhouses in eleven states and 10 Prime Sirloin Steak and Seafood Restaurants in three states. In

addition, WSMP operates ham curing and bakery manufacturing divisions at its corporate location in Claremont, N.C.

INDIANAPOLIS, (SEPT. 24) PR NEWSWIRE - Philip E. Beekman, chairman and chief executive officer of Hook-SupeRx, Inc. (HSI) announced today that Chris Beseler has been promoted to the position of vice president of advertising and sales promotion for both the Hook and SupeRx Divisions of HSI.

Beseler will supervise both divisions' advertising departments and provide the day-to-day, as well as the strategic direction for the departments. "The move will allow us to bring together the traditional advertising strengths of both divisions," Beekman said.

Beseler is a native of Huntington, W. Va. and received his B.S. in advertising from Marshall University. He joined The Kroger Co. in 1969 as a layout artist in their advertising department, and held progressively more responsibile positions with Kroger before joining SupeRx as vice president of advertising in 1986.

Hook-SupeRx, Inc., with headquarters in Cincinnati, operates 1,113 drug stores in 22 states through three operating divisions: Hook in Indianapolis, SupeRx in Cincinnati, and Brooks Drugs, Inc. in Pawtucket, R.I.

LANDOVER, MD. (SEPT. 24) PR NEWSWIRE - Dart Group Corporation (NASDAQ: DARTA) announced that it has agreed to pay $2,700,000 to a profit sharing plan of the company to which it sold its Drug Store Division in 1984 in full settlement of a claim by the Department of Labor.

On June 29, 1984, Dart Group Corporation sold its Drug Store Division to a buying group named Dart Drug Stores, Inc. This buying group was led by its chairman, Alvin F. Towle, formerly president of Gray Drug Fair and formerly a senior officer of People's Drug Stores and now the head of a 146-store drug chain, and its president, Steven Hansbrough, a senior drug store executive. General Electric Credit Corporation also participated in the transaction. The buying group was represented by Smith Barney & Co., as investment bankers, and Shearman & Sterling, as legal counsel.

The purchase contract required Dart Group Corporation to cause its profit sharing plan to transfer the applicable Drug Store Division employee profit sharing plan assets to the buyer's profit sharing plan. The trustees of the seller's profit sharing plan were Warren E. Tydings, Robert M. Haft, Benjamin S. Kovalsky and Charles D. Shipe.

After June 29, 1984, Arent, Fox, Kintner, Plotkin & Kahn, counsel for the seller and its trustees, advised Shearman & Sterling, counsel for the buyer and its trustees, that before any assets of seller's plan would be transferred buyer's plan would have to be a mirror image of seller's plan. Shearman & Sterling provided Arent, Fox, Kintner, Plotkin & Kahn, seller's counsel, with written assurances, including copies of buyer's plan and trust, that a plan was in force which was a mirror image of seller's plan so that no more than 10 percent of the plan's assets could be invested in the stock of buyer's new company. After receiving assurances and the written advice of Arent, Fox, Kintner, Plotkin & Kahn, seller's counsel, the seller's trustees transferred the plan assets to buyer's trustees approximately four months after the sale on Oct. 17, 1984.

In an ongoing lawsuit filed in April 1989, the Department of Labor alleged that Towle and Hansbrough breached their fiduciary duty as buyer's trustees by investing nearly 100 percent of the buyer's plan assets in stock of the new company without any independent valuation and at a price that was more than fair market value. The Department of Labor lawsuit alleges that Towle and Hansbrough caused the buyer's plan, whose beneficiaries were their fellow employees, to purchase securities convertible into buyer's common stock at a price approximately nine times higher than the price paid for such common stock by Towle and Hansbrough personally.

Recently, the Department of Labor indicated its view that Dart Group and its trustees had not adequately investigated what would be done with the plan assets after the transfer to the buyer's plan in 1984. This was an effort by the Department of Labor to hold the seller and its trustees responsible for the alleged wrongful conduct of Towle and Hansbrough, the buyer's trustees. This is an untested theory of law.

Dart Group and its trustees agreed to settle fully the Department of Labor's claim against them, set forth in an amended complaint filed today, because of risks inherent in any litigation and the substantial costs of extensive litigation. The Department of Labor's lawsuit against Hansbrough and Towle is continuing.

CITY OF INDUSTRY, CALIF. (SEPT. 24) PR NEWSWIRE - RMED International Inc. (NASDAQ: RMED) today announced the selection of Brenda Schenk as its new president and chief executive officer. Edward Reiss, chairman of the board, resigned from his position as acting president.

In announcing the appointment, Reiss said that Schenk brings to RMED

International Inc. the background and skills needed to guide the operations of the company during this time in which the company is geared towards bringing a new diaper product to the market. Reiss stated that he was resigning his management position in order to concentrate his time and efforts on the marketing strategy of RMED's new product lines.

Schenk is the president of Brandy Enterprises Ltd., an equipment leasing and manufacturing company. Together, Schenk and Brandy Enterprises own 5.7 percent of the outstanding common shares of RMED International. In addition, Brandy Enterprises owns a 50 percent interest in RMED's patent pending disposable diaper to be marketed by RMED under the name Tushies. Schenk has extensive retail and merchandising experience.

RMED International Inc. markets TenderCare biodegradable chemical-free, disposable diapers direct to the consumer (800-344-6379), through catalogs and in health food stores, baby stores and drug stores throughout the United States and abroad.

MIDLAND, VA. (SEPT. 24) PR NEWSWIRE - Ross Industries, Inc. (NASDAQ: ROSX), a manufacturer of food processing and packaging machinery, reported a net loss for the fourth quarter and fiscal year ended June 30, 1990, of $483,963, or 40 cents a share, and $654,689, or 54 cents a sh1r1/41 spectively, as compared to a net income of $149,584, or 12 cents a share, and $153,811, or 13 cents a share, respectively, for the comparable prior year periods.

The company reported net sales for the year of $6,172,844 as compared with sales of $7,350,183 for 1989. Net sales for the fourth quarter of $1,878,936 were down from the $3,012,808 achieved in the prior year fourth quarter. The sales shortfall in fiscal 1990 was attributed to delayed introduction of new products and loss of an anticipated multiple machine order.

Chairman Henry Ross attributed the downturn in profits to higher costs related

to one-time development and startup costs of new product lines. However, the company's confidence in the new product introductions is supported by a current $4.4 million order backlog, the company's highest ever, as compared to a $1.5 million backlog last year. The backlog comprises primarily of orders for new Horizontal Packaging machines and Boundary Layer Control (BLC) Freezing Tunnels.

ROSS INDUSTRIES, INC.

Fourth quarter ended June 30:	1990	1989
Net sales	$1,878 936	$3,012,808
Net income (loss)	(483,963)	149,584
Earnings (loss) per share	(.40)	.12
Average weighted shares outstanding	1,217,480	1,217,480
Fiscal year ended June 30:		
Net sales	$6,172 844	$7,350,183
Net income (loss)	(654,689)	153,811
Earnings (loss) per share	(.54)	.13

BOCA RATON, FLA. (SEPT. 24) PR NEWSWIRE - First Medical International, Inc. (NASDAQ: HUGE) has executed an agreement in connection with the acquisition of a medical waste disposal company in Lasing, Mich., MedTex International, Inc., for $525,000 in cash and securities. In 1991, over $3 million in sales with a gross profit before taxes of $900,000 are projected by MedTex management. The announcement was made by Roberto Riva, chief executive officer of First

Medical International.

MedTex International has a unique, proprietary medical waste disposal system -- Medwaste -- for sharps medical waste disposal, which includes contaminated needles and syringes. The Medwaste System is used in hospitals, laboratories clinics, doctors and dentists offices. Medwaste economically reduces waste handling and the possibility of accidental infection. It also reduces medical liability by utilizing containers which establish documentation via manifest and receipt that destruction and disposal have been safely and lawfully accomplished.

First Medical International, Inc. (formerly called Humagen) has also recently acquired Cardio Scan, Inc., an established company which specializes in the use of the Holter Monitor system for extensive EKG and EEG testing. The company also has the exclusive right to franchise, own and operate Medical Depot Superstores in the U.S.S.R., Mexico and Panama and a non-exclusive right to franchise, own and operate Medical Depot Superstores anywhere else outside the U.S.

MINNEAPOLIS (SEPT. 24) PR NEWSWIRE - Medtronic, Inc. (NYSE: MDT), announced today that Jack W. Schuler, formerly president and chief operating officer of Abbott Laboratories, has been elected to Medtronic's board of directors.

Winston R. Wallin, Medtronic chairman and chief executive officer, said, "Mr. Schuler brings a depth of healthcare industry experience that will be increasingly valuable as Medtronic works to build worldwide market share in its six businesses. We are fortunate to have his counsel."

Schuler, 50, served in various executive capacities with Abbott during his 17 years with the company. He was elected to its board in 1985 and was president from 1987-89. Schuler was previously employed by Texas Instruments Inc., where he served eight years in France, Germany and Japan.

Schuler is also a member of the boards of Voluntary Hospitals of America Enterprises, Inc.; Lake Forest (Ill.) Hospital; Igen, Inc. and Stericycle, Inc. He serves on the visiting committee of the Harvard University School of Public Health and has been honorary chairman of the auxiliary board of the University of Chicago Cancer Research Foundation. His undergraduate degree in mechanical engineering is from Tufts University and he holds a master's degree from the Stanford University Graduate School of Business Administration. He is a resident of Lake Bluff, Ill.

WASHINGTON (SEPT. 24) PR NEWSWIRE - Mid-Atlantic Toyota issued the following:

The U.S. importer of Toyota automobiles and its American distributor in the mid-Atlantic area reached an agreement resolving all disputes, which included business and constitutional matters.

The U.S. importer, Toyota Motor Sales, U.S.A., Inc. (TMS) of Torrance, Calif., and the Maryland distributor, Mid-Atlantic Toyota (MAT), jointly agreed that MAT is permitted under a 1987 settlement agreement to contact elected representatives concerning certain issues set forth in a June 27 lawsuit MAT filed against TMS. MAT has agreed to dismiss the June 27 lawsuit, and representatives of both companies said all disputes have been amicably resolved.

TMS will assume MAT's distributor operations in Glen Burnie, Md., Oct. 1, and TMS has agreed to dismiss its June 22 lawsuit against MAT in which it sought specific enforcement of its right to begin distribution of Toyota vehicles in the mid-Atlantic region.

MAT currently distributes Toyota vehicles to dealers in Washington, Maryland, Pennsylvania, Delaware, Virginia and West Virginia.

"MAT is happy with the resolution of this dispute. We believe this amicable settlement and the continued cooperation of the parties is in the best interests of both Japan and the United States," said Joseph Burdis Jr., MAT's vice president of corporate affairs.

"TMS is very pleased with the settlement and especially with the opportunity to offer employment to all MAT employees in connection with its new distributor operations in the mid-Atlantic area. TMS has established a new subsidiary, Central Atlantic Toyota Distributors, Inc., to commence operations in the MAT area on Oct. 1," said James Olson, TMS vice president, external affairs.

NEW YORK (SEPT. 24) PR NEWSWIRE - Time Warner Inc. (NYSE: TWX) and United International Holdings, Inc. (UIH) announced today they have agreed to form a 50-50 joint venture to develop and operate cable television systems and provide cable programming services in Hungary. The level of the two companies' proposed investment was not disclosed.

Working with Hungarian operators, Time Warner and UIH seek to expand the country's cable industry, which currently serves an estimated half- million subscribers. Time Warner will supervise the development of programming services, and UIH will supervise the technical upgrading and operation of cable systems.

UIH has been exploring the Hungarian cable market for more than a year and has agreements with local cable systems representing more than 200,000 subscribers there.

Arthur R. Barron, chairman of Time Warner Enterprises, said, "We look forward to embarking on this cooperative venture with United International Holdings. UIH brings years of experience in cable and a well-established presence in Hungary, which will be invaluable in ensuring a quick startup for the project."

Mark Schneider, senior vice-president of UIH and president of UCI, stated, "We are pleased to work with a company with the reputation and resources of Time Warner in order to bring a wealth of new information and entertainment to Hungary. Hungarians want the variety and depth of programming that only cable can offer, and we believe that our joint venture, in combination with local operators, will provide that in a unique and exciting way."

Barron and Schneider added, "The Hungarian cable industry and the local operators have shown tremendous initiative and entrepreneurial spirit in making Hungary the most advanced cable television market in Eastern Europe. Time Warner and UIH anticipate fulfilling the local operators' vision and helping advance the Hungarian cable industry."

Time Warner and UIH have named Nimrod Kovacs acting managing director of the proposed joint venture and Endre Nagypal director of development.

Planning for the joint venture is expected to be completed by early December, and a new program service, along with an aggressive rebuilding plan, is slated for launch in early 1991.

CONTACTS: Marilyn Harris of Time Warner, 212-484-8702, or Mark Schneider or Nimrod Kovacs, of United International Holdings, 303-770-4001

WORCESTER, MASS. (SEPT. 24) PR NEWSWIRE - The board of directors of Norton Company (NYSE: NRT) today announced the election of Michel L. Besson as chairman of the board, president and chief executive officer, succeeding John Nelson who has agreed to resign.

Nelson will serve as a consultant to Norton. Nelson said, "In the last several years, we made some significant strides in building a firm foundation for the future growth and development of Norton. Now, we have achieved a successful merger with Saint-Gobain, a worldwide industrial company that affords Norton the enhanced resources and competitive position to maintain its worldwide leadership market positions and to scale yet greater heights on behalf of our customers, workforce and neighbors. In addition, Norton's continuation as a civic-minded major employer in Worcester and our other communities is assured.

"Jean-Louis Beffa, chairman of Saint-Gobain, and I have concluded that it is in the best interest of the company that I resign my current responsibilities. At the same time, I look forward to my continued role with Norton as a consultant."

Since 1980, Besson, a graduate of Massachusetts Institute of Technology, has served as vice chairman, president and chief executive officer of CertainTeed Corporation (Valley Forge, Pa.), a company of the Saint-Gobain Group.

Saint-Gobain ranks among the top industrial companies in the world. It has annual sales of more than $14 billion. The company has leading positions in flat glass, a variety of fiber glass products, glass containers, a large range of building materials, piping products, and paper and wood products. In recent years, it has become one of the strongest world producers of industrial ceramics. It employs 88,000 people and operates 350 plants in the United States and 20 other countries.

Norton Company is the world's largest manufacturer of abrasives and a leading producer of engineering materials, including advanced ceramics, performance plastics and chemical process products. Norton employs 16,800 people and operates 92 plants in the U.S. and 19 other countries.

TEL AVIV, ISRAEL (SEPT. 24) PR NEWSWIRE - Aryt Optronics Industries Ltd. (NASDAQ: ARYTF) announced that on Sept. 13, 1990, the agreement was completed in which Aryt agreed to make an equity investment of $4 million in Geotek through the acquisition of 2,666,666 Geotek shares at $1.50 per share. As previously announced on July 18, 1990, Geotek had reached an agreement with Istec Industries and Technologies Ltd. (NASDAQ: ISTEF) to acquire 47 percent of the outstanding shares of Aryt from Istec. After the Istec-Geotek transaction is closed, only 53 percent or 1,413,333 shares of the 2,666,666 Geotek shares will be considered as shares outstanding with the remaining 1,253,333 shares treated as treasury stock.

The agreement also stipulates that Aryt will lend Geotek $3 million for a period of six years with interest calculated at the prevailing rate in effect for certificates of deposit. At Aryt's option, the loan can be convertible

into Geotek common stock at $3 per share.

Aryt Optronics Industries Ltd. is a leading independent designer and manufacturer of diamond-turned optical elements, coatings, specialized instrumentation and subsystems for electro-optical systems.

BRANCHBURG, NJ (SEPT. 24) PR NEWSWIRE - Metcalf & Eddy Companies Inc. (NASDAQ: METC), a leading environmental treatment and services company, announced today that its wholly owned subsidiary, Metcalf & Eddy, Inc. (the Company), has filed an action in U.S. District Court in San Juan, Puerto Rico, against the Puerto Rico Aqueduct and Sewer Authority (PRASA). The Company's suit seeks approximately $32 million in payment for goods and services the Company has sold and rendered to PRASA under a contract to rehabilitate PRASA's wastewater treatment system and provide related program management services. The company's contract is related to a consent decree PRASA signed in federal court under which PRASA was given a timetable to come into compliance with the federal Clean Water Act. The suit also claims approximately $20 million in additional damages for anticipated claims by suppliers to the Company with respect to the PRASA contract and violations of good faith and fair dealing under the contract. PRASA has been witholding payments under its contract with the company pending an audit of the contract. The Company believes that it has performed in accordance with the terms of the contract and that, accordingly, substantially all amounts due pursuant to the contract will ultimately be realized.

The Company provides a comprehensive range of services and technologies directed principally at protecting the integrity of our nation's water resources. The Company is an 82 percent owned subsidiary of Air & Water Technologies (AMEX: AWT). Air & Water Technologies Corporation, through its operating units, Research-Cottrell, Inc., Metcalf & Eddy Companies Inc., and Residuals Management Group, provides a broad range of environmental services in the areas of air pollution control, water resource management, and waste by-product disposal and reuse.

GUILDERLAND, NY (SEPT. 24) PR NEWSWIRE - Intermagnetics General Corp. (NASDAQ: INMA) today reported net sales for the first quarter of fiscal year 1991 ended Aug. 26, 1990, amounting to $14,904,000, an increase of 56 percent over the $9,568,000 in the corresponding period a year ago. Net earnings were $404,000, or $.06 per share, 100 percent over the $200,000, or $.03 per share in the first quarter last year.

In announcing the results, Carl H. Rosner, chairman and president, stated, "Revenues and earnings benefited from higher volumes of both MRI magnets for medical diagnostic systems and cryogenic products, in comparison to the first quarter of last year. Manufacturing costs of our internally shielded MRI magnet still remain higher than targeted, which impacted profit margins. I am also pleased with the improvement achieved by our cryogenics product group, which reported the highest quarterly sales since IGC's acquisition of the group in late fiscal 1987."

IGC is a leading manufacturer of superconducting wire and superconducting magnet systems, especially those used in MRI medical diagnostic imaging systems. The company also produces cryogenic equipment, permanent magnet systems and material separation devices.

ATLANTA (SEPT. 24) PR NEWSWIRE - Oxford Industries Inc. (NYSE: OXM), Atlanta-based apparel marketing and manufacturing company, today reported results for the first fiscal quarter ended Aug. 31.

Sales for the quarter were $130,409,000, compared to $146,709,000 in the same quarter last year.

First-quarter net earnings were $1,248,000 compared to last year's earnings of $3,975,000.

Earnings per share were $.14 compared to $.40 in the prior year. Commenting on the results, J. Hicks Lanier, chairman of Oxford, said: "Our sales decline for the quarter was a result of several factors. Shipments to Sears were below last year's level as a consequence of their decision to discontinue the sale of men's tailored suits and sport coats. Shipments to JC Penney were also lower due to their addition of branded menswear products to their merchandise mix."

Lanier continued: "Earnings were negatively affected by the sales decline and the current volatile retail market conditions. We continue to plan conservatively in what we view as a weak and uncertain marketplace."

Discussing the current outlook, Lanier said: "We expect sales and earnings in our second quarter will be in line with our first quarter results. In spite of continuing concerns about general economic conditions, we hope to show improvement in our second fiscal half results."

CHICAGO, (SEPT. 24) PR NEWSWIRE - McCormick Capital, Inc. (NASDAQ: MKOR) today announced approval by Judge Milton I. Shadur, United States District Court for the Northern District of Illinois, Eastern Division, for McCormick Futures Management Inc. to become the general partner and commodity pool operator of the following seven commodity funds: (1) Advanced Portfolio Management Limited Partnership II; (2) Stotler Futures Fund; (3) Stotler Heartland Futures Fund I; (4) Thomson Commodity Partners I; (5) Thomson Commodity Partners II; (6) Thomson Financial Futures Partners I; and (7) Thomson McKinnon Futures Fund.

In a separate proceeding, the bankruptcy court having jurisdiction over three related bankruptcy cases involving Stotler Group Inc. and certain affiliates, entered an order suspending bankruptcy proceedings against Stotler Funds, Inc. so that the transaction could be consummated. The courts acted on motions submitted by Kenneth M. Rosenzweig, special master for Stotler Funds Inc.

Under the terms of the transactions approved by the district court, McCormick Futures Management Inc. will subscribe for units of general partnership and in addition will pay a premium based upon the net asset value of the funds at

closing. The transactions are subject to certain terms and conditions, including approval by the limited partners of the funds. McCormick indicated that it expects the acquisition to be completed prior to the end of the year, but that it may begin acting as clearing broker for the funds in October.

McCormick Capital Inc. is engaged in various aspects of the commodity futures and securities industry. Its subsidiary, McCormick Futures Incorporated, has been a clearing member of the Chicago Board of Trade since 1974. McCormick Futures Management Inc. is a subsidiary of McCormick Futures Incorporated, and currently acts as general partner and commodity pool operator for six publicly held commodity funds with combined net assets of approximately $25 million. Organization and management of futures investment limited partnerships has been an important segment of McCormick's business since 1982.

WICHITA, KAN. (SEPT. 24) PR NEWSWIRE - Kansas Gas and Electric Company (NYSE: KGE) today asked the United States District Court in Kansas City, Mo., to declare the tender offer for KG&E stock by Kansas City Power & Light Company (NYSE: KLT) unlawful and prohibit KCPL from making further false and unlawful communications to KG&E stockholders.

KG&E answered today the KCPL complaint filed in federal court in Kansas City, Mo., July 23, 1990, the same day it initiated its tender offer, asking the court to determine KCPL's actions to be in compliance with certain federal securities laws.

KG&E said today that the KCPL tender offer is unlawful under the Public Utility Holding Company Act of 1935. Section 9 (a) (2) of the Holding Company Act makes it illegal for any person to acquire five percent or more of the voting securities of one public utility without prior approval by the Securities and Exchange Commission if that person already owns five percent or more of the voting securities of another public utility.

Since KCPL has not sought SEC approval or conditioned its offer on obtaining such approval, KG&E believes the offer is illegal and KCPL should be restrained from further unlawful communication with KG&E stockholders.

KG&E also asserts that the request of Heywood Davis for a stockholder list is not proper.

Wilson Cadman, KG&E president and chairman of the board, says the KCPL offer is not only "legally flawed" but subject to a number of conditions, most of which will take months to be met, if indeed they ever can be met.

The KG&E board has advised common stockholders that the KCPL offer is inadequate. They should not tender their stock and those who have tendered shares should withdraw them.

Cadman reports that KG&E is currently negotiating with a third party regarding a transaction that could lead to a combination. The KG&E board has directed management to explore all options to the KCPL offer, including remaining independent.

Cadman pointed out that KG&E has also established a special bulk power marketing group and expects to complete negotiations for the first contract shortly.

#90267p7652 09/24/1990 ~PR Newswire

CHERRYVILLE, N.C. (SEPT. 24) PR NEWSWIRE - The following is a letter to shareholders from Kenneth E. Mayhew, Jr., President and Chief Executive Officer of Carolina Freight Corporation (NYSE: CAO):

Letter to Shareholders:

We are pleased to report record revenue of $171,340,349 for the twelve weeks ended September 8, 1990, an increase of 12.6 percent over third quarter 1989 revenue. Net earnings increased 49.8 percent to $1,612,452 in the third quarter. Earnings per share were $.25 compared with $.16 in the third quarter of 1989. The fiscal year of the Company consists of three 12-week quarters and a 16-week fourth quarter.

Revenue for the first thirty-six weeks of 1990 was $499,162,067, an increase of 8.7 percent over the comparable period of 1989. Year-to-date net earnings were $1,678,076 compared with $4,687,498 for 1989. Earnings per share for the first three quarters were $.25 in 1990 and $.70 in 1989.

Fuel prices have risen substantially as a result of the Middle East conflict. Fortunately, higher fuel costs have been largely offset by a fuel surcharge on freight rates. Partly due to the fuel surcharge, freight rates improved compared with the depressed price level in the third quarter of 1989.

Start-up costs in connection with the restructuring of our linehaul and consolidation terminal (new hub-and-spoke) operations were approximately $300,000 in the third quarter. Health insurance and workers' compensation costs were significantly higher than in the third quarter of 1989 due to escalating national health care costs and more liberal state laws regarding workers' compensation benefits.

Because of two large bankruptcies in the retail industry and numerous smaller bankruptcies among our customers during 1990, we are substantially increasing our provision for bad debts this year. As a result, our bad debt expense was $739,000 higher in the third quarter than in the third quarter of 1989.

The conversion to the new hub-and-spoke operation was completed on June 18 when the $12 million Chicago terminal was opened. With the implementation of the new operations, we have improved freight flows resulting in improved time-in-transit service to our customers. In addition, labor cost ratios have improved.

Kenneth G. Younger, former President and Chief Executive Officer, retired from active employment on August 10, 1990. He is continuing to serve the Company as a consultant and Vice Chairman of the Board of Directors.

Our 12.6 percent revenue growth in the third quarter is a reflection of the superior service that we are providing to our customers and the effectiveness of our marketing program. Not only has the new linehaul/consolidation terminal configuration enabled us to improve time-in-transit service to our customers, but we continue to develop new computer applications that give us an edge in our customer service capabilities.

Now that the new hub-and-spoke operation is completely implemented and functioning smoothly, we are concentrating our efforts on improved productivity and reductions in other costs.

In spite of the negative implications of the Middle East crisis and the uncertain outlook for the U.S. economy, we expect reasonably good operating results in the fourth quarter.

More importantly, we have positioned the Company to be successful over the long term and your management team is dedicated to achieving long-term success.

Sincerely /sig/ Kenneth E. Mayhew, Jr.
President and Chief Executive Officer

#90267t2125 09/24/1990 ~ts

KISHINEV (SEPT. 24) TASS - "THE MINISTRY OF FOREIGN RELATIONS OF THE MOLDOVA SOVIET SOCIALIST REPUBLIC IS THE MAIN INSTRUMENT TO ENSURE THE REPUBLIC'S EMERGENCE ON THE INTERNATIONAL ARENA," THE NEW FOREIGN RELATIONS MINISTER

NIKOLAI TSYU TOLD TASS.

"ACCORDING TO THE PARLIAMENTARY DECLARATION ON MOLDOVA'S SOVEREIGNTY, IT IS TO BECOME AN INDEPENDENT SUBJECT OF INTERNATIONAL RELATIONS. IN VIEW OF THIS, THE MINISTRY IS PROMOTING FROM THE VERY OUTSET DIRECT RELATIONS WITH DIFFERENT COUNTRIES. INTERGOVERNMENTAL AGREEMENTS HAVE ALREADY BEEN CONCLUDED WITH SUCH AFRICAN STATES AS BURKINA FASO, BURUNDI AND BOTSWANA.

"IN THE NEW POLITICAL AND ECONOMIC SITUATION, MOLDOVA MUST HAVE DIRECT RELATIONS NOT ONLY HORIZONTALLY -- WITH SOVEREIGN SUBJECTS OF THE SOVIET FEDERATION OR FUTURE CONFEDERATION, BUT ALSO VERTICALLY - WITH ALL THE NATIONS OF THE WORLD. WE HAVE TO OVERCOME THE NOW EXISTING UNIVERSAL STEREOTYPE IDENTIFYING THE USSR ONLY WITH RUSSIA, THE SITUATION WHEN VERY FEW PEOPLE KNOW ABOUT THE OTHER UNION REPUBLICS.

"A DELEGATION OF OUR MINISTRY RECENTLY RETURNED FROM TURKEY," TSYU SAID. "WE HAD MANY USEFUL MEETINGS WITH THE TURKISH MINISTER FOR INDUSTRY AND COMMERCE, AND ALSO WITH REPRESENTATIVES OF LOCAL BUSINESS CIRCLES.

"AN AGREEMENT WAS REACHED TO SIGN SEVERAL CONTRACTS AFTER A DETAILED DISCUSSION OF THE METHODS AND PRINCIPLES THAT ARE TO UNDERLIE OUR ECONOMIC COOPERATION. THEY PROVIDE FOR THE LAUNCHING OF JOINT VENTURES TO PRODUCE ORIGINAL PACKAGING MATERIALS FOR MOLDOVIAN JUICES AND WINES, WHICH ARE COMPETITIVE ON THE WORLD MARKET. TURKISH BUSINESSMEN ARE ALSO PREPARED TO EXCHANGE WITH US THEIR EXPERIENCE OF GOING OVER TO A FREE MARKET ECONOMY."

"AT PRESENT WE ARE CONSIDERING CONCRETE STEPS TO ESTABLISH MUTUALLY PROFITABLE COOPERATION WITH AMERICA," TSYU SAID. "AN AGREEMENT HAS ALREADY BEEN REACHED TO EXCHANGE STUDENTS AND SPECIALISTS AND ON THE ADVANCED TRAINING OF YOUNG SCIENTISTS IN AMERICAN SCHOOLS. WITH THE HELP OF U.S. FIRMS WE PLAN TO REGEAR A COMPUTER PLANT, NOW UNDER CONSTRUCTION IN MOLDOVA, TO MANUFACTURE MODERN PERSONAL COMPUTERS.

IGOR GVRITISHVILI - TASS

MOSCOW (SEPT. 24) TASS - ONE MONTH BEFORE THE GEORGIAN PARLIAMENTARY ELECTIONS THE CAMPAIGN IN THE REPUBLIC IS MOVING INTO HIGH GEAR.

IN THE RUN-UP TO THE OCTOBER 28 POLL, INEXPERIENCE OF DEMOCRATIC ELECTIONS IS BECOMING INCREASINGLY EVIDENT.

THE SOCIETY OF ST. ELIJAH THE RIGHTEOUS, ONE OF THE MOST RADICAL POLITICAL ORGANISATIONS, HEADED BY ZVIAD GAMSAKHURDIA, ONE OF THE MAIN CONTENDERS FOR THE POST OF A FUTURE LEADER OF THE REPUBLIC, IS PARTICULARLY NOTORIOUS IN THIS RESPECT, ANALYSTS NOTE.

IN TBILISI LAST WEEK, SUPPORTERS OF THIS ORGANISATION ONCE AGAIN ATTACKED THE LOCAL STATE SECURITY COMMITTEE (KGB) BUILDING DEMANDING THE FREEING OF A SOCIETY MEMBER SUSPECTED OF KILLING A MILITIAMAN.

ABOUT 100 MILITANTS BURST INTO THE PREMISES OF THE INVESTIGATION DEPARTMENT OF THE COMMITTEE, SMASHED WINDOWS, FURNITURE AND TELEPHONE SETS WITH METAL RODS, PIPES AND CROW-BARS, AND STOLE DOCUMENTS, VIDEO EQUIPMENT AND PERSONAL BELONGINGS OF STAFF MEMBERS.

THE SOCIETY DEMANDED THE ELIMINATION OF THE GEORGIAN KGB AND THE ESTABLISHMENT OF AN INDEPENDENT NATIONAL SECURITY SERVICE IN THE REPUBLIC.

IN SUMMER THIS YEAR THE SOCIETY OF ST. ELIJAH THE RIGHTEOUS AND A NUMBER OF OTHER POLITICAL PARTIES WHICH ARE PART OF THE ROUNDTABLE COALITION, MADE POLITICAL DEMANDS AND IMMEDIATELY BACKED THEM UP BY SABOTAGING THE TRANSCAUCASIAN RAILWAY. AS A RESULT, RAILWAY TRAFFIC IN THE REPUBLIC WAS AT A STANDSTILL FOR SEVERAL DAYS.

HOWEVER, RADICAL OPPOSITION PARTIES ARE ALSO BUSY SETTLING SCORES BETWEEN THEMSELVES.

IN TBILISI ON SEPTEMBER 20, FOR EXAMPLE, A CONFRONTATION BETWEEN THE ROUNDTABLE COALITION PARTIES AND THE OPPOSING COORDINATION CENTRE BLOC AGAIN LED TO A SHOOT-OUT.

THE DAY BEFORE, UNIDENTIFIED INDIVIDUALS BURNED DOWN THE NATIONAL INDEPENDENCE PARTY HEADQUARTERS. THE PREMISES OF THE LEADERSHIP OF THE NATIONAL DEMOCRATIC PARTY OF GEORGIA WERE SMASHED IN A SIMILAR MANNER ON THE SAME DAY. IN BOTH CASES NO CULPRITS WERE IDENTIFIED.

IN ALL THESE CASES, THE AUTHORITIES OF THE REPUBLIC TOOK A NEUTRAL ATTITUDE AND LIMITED THEMSELVES TO CALLING ON ALL POLITICAL PARTIES AND THE POPULATION TO SHOW MAXIMUM RESTRAINT AND TO TACKLE ALL PROBLEMS THROUGH POLITICAL DIALOGUE.

MOSCOW (SEPT. 24) TASS - COMMENTING ON THE FINNISH GOVERNMENT'S SEPTEMBER 21 DECISION ON SOME PROVISIONS OF THE PARIS PEACE TREATY OF 1947 CONCERNING GERMANY AND INFRINGING UPON FINNISH SOVEREIGNTY, SOVIET FOREIGN MINISTRY SPOKESMAN GENNADY GERASIMOV TOLD A BRIEFING TODAY:

"WE VIEW THE FINNISH SIDE'S POSITION, AS FORMULATED IN THIS DECISION, IN THE SPIRIT OF THE FRIENDLY RELATIONSHIP OF TRUST THAT HAS EXISTED BETWEEN THE USSR AND FINLAND IN LINE WITH THE 1948 TREATY OF FRIENDSHIP, COOPERATION AND MUTUAL ASSISTANCE."

HE NOTED THAT THE SIGNIFICANCE OF THE TREATY WAS REAFFIRMED IN A SPECIAL STATEMENT MADE ON THE SAME DAY BY PRESIDENT MAUNO KOIVISTO.

GERASIMOV SAID THAT THE SOVIET AND FINNISH FOREIGN MINISTRIES ARE NOW DISCUSSING ISSUES COVERED BY THE FINNISH GOVERNMENT'S DECISION.

#90267t2130 09/24/1990 ~ts
MOSCOW (SEPTEMBER 24) TASS - IBRAHIM DAKKAK, CHAIRMAN OF THE PUBLIC ORGANISATION "FORUM OF ARAB THOUGHT" TOLD A NEWS CONFERENCE TODAY THAT THE PALESTINIAN PEOPLE WILL CONTINUE THE STRUGGLE UNTIL IT ACHIEVES ITS GOAL -- THE CREATION OF AN INDEPENDENT STATE.

DAKKAK HEADS A PALESTINIAN DELEGATION FROM ISRAELI-OCCUPIED ARAB TERRITORIES, VISITING THE SOVIET UNION AT THE INVITATION OF THE SOVIET AFRO-ASIAN SOLIDARITY COMMITTEE.

DURING THEIR STAY IN THE USSR, MEMBERS OF THE DELEGATION MET WITH REPRESENTATIVES OF SOVIET PUBLIC ORGANISATIONS, SCIENTIFIC AND EDUCATIONAL ESTABLISHMENTS.

THEY TOLD SOVIET PEOPLE ABOUT THE SITUATION ON OCCUPIED TERRITORIES, THE POSITION OF THE PALESTINIAN PEOPLE AND ITS STRUGGLE FOR FREEDOM. FULL UNDERSTANDING ABOUT THE NEED FOR THE QUEST FOR POLITICAL SOLUTIONS TO TERMINATE ISRAELI OCCUPATION AND TO ENSURE THE PALESTINIAN ARAB PEOPLE'S RIGHT FOR SELF-DETERMINATION AND STATEHOOD WAS EXPRESSED AT THE MEETINGS.

AS REGARDS THE MIDDLE EAST SITUATION, DAKKAK SAID THAT IRAQ'S INVASION OF KUWAIT HAD A NEGATIVE EFFECT ON THE PEACE PROCESS IN THE REGION. HE SAID THAT THE PALESTINIANS ARE AGAINST THE PRESENCE OF U.S. TROOPS IN THE MIDDLE EAST. BUT IF THE UNITED STATES ATTEMPT TO RESOLVE THE IRAQI-KUWAITI PROBLEM, IT COULD ALSO TRY TO RESOLVE THE PALESTINIAN PROBLEM, DAKKAK SAID.

IN CONCLUSION DAKKAK SPOKE HIGHLY OF THE SOVIET UNION'S STAND IN SUPPORTING THE PALESTINIAN PEOPLE'S STRUGGLE FOR INDEPENDENCE.

MOSCOW (SEPT. 24) TASS - DELEGATES TO A COMMUNIST PARTY CONFERENCE IN KAZAN, THE CAPITAL OF THE REPUBLIC OF TATARSTAN IN THE RUSSIAN FEDERATION, PROPOSED TRANSFORMING THE REPUBLICAN COMMUNIST PARTY ORGANIZATION INTO AN COMMUNIST PARTY INDEPENDENT OF THE RUSSIAN COMMUNIST PARTY, THE IZVESTIA NEWSPAPER SAYS TODAY.

THE PROPOSAL WILL NOW BE DISCUSSED IN PRIMARY COMMUNIST PARTY ORGANIZATIONS IN THE REPUBLIC.

THE CONFERENCE LINKED THE HOLDING OF THE NEW PARTY'S FIRST CONGRESS WITH THE CONCLUSION OF NEW UNION AND FEDERAL TREATIES.

IN KEEPING WITH THE TATARSTAN PARLIAMENT'S RESOLUTION PROHIBITING THE HEADS OF STATE BODIES OF POWER FROM OCCUPYING ANY OTHER POSTS, CHAIRMAN OF TATARSTAN'S PARLIAMENT M. SHAIMIYEV RESIGNED FROM THE POST OF THE REPUBLICAN COMMUNIST PARTY LEADER.

THE CONFERENCE ELECTED R. IDIATULLIN, A FORMER SECRETARY OF A DISTRICT PARTY COMMITTEE, TO THE POST.

MOSCOW (SEPT. 24) TASS - SOVIET DEFENCE MINISTER DMITRY YAZOV TODAY MET WITH HIS SWEDISH COUNTERPART ROINE CARLSSON, WHO HAS ARRIVED HERE ON AN OFFICIAL VISIT.

THEY DISCUSSED THE DEVELOPMENT OF COOPERATION BETWEEN THE TWO COUNTRIES, INCLUDING IN THE MILITARY FIELD, IN THE CONTEXT OF EFFORTS TO BUILD A COMMON EUROPEAN HOME AND STRENGTHEN SECURITY AND PEACE, AS WELL AS OTHER ISSUES OF MUTUAL INTEREST.

THE MEETING WAS HELD IN AN ATMOSPHERE OF FRANKNESS AND MUTUAL UNDERSTANDING.

CARLSSON LAID A WREATH AT THE TOMB OF THE UNKNOWN SOLDIER NEAR THE KREMLIN WALL.

#90267t2153 09/24/1990 ~ts
MOSCOW (SEPT 24) TASS - RYZHKOV AND HIS SINGAPOREAN COUNTERPART LEE KUAN YEW, WHO ARRIVED IN MOSCOW ON AN OFFICIAL VISIT ON SUNDAY, BEGAN THEIR TALKS IN THE KREMLIN TODAY.

THEY DISCUSSED WAYS TO BOOST ECONOMIC COOPERATION BETWEEN THE TWO COUNTRIES AND NEW FORMS AND MECHANISMS OF DEVELOPMENT THAT WOULD MEET MODERN REQUIREMENTS.

BOTH SIDES POINTED TO THE IMPORTANCE OF TAPPING THE GREAT POTENTIALS OF THE SOVIET FAR EAST AND OF ITS EARLY INCLUSION IN THE INTERNATIONAL DIVISION OF LABOUR IN THE ASIA-PACIFIC REGION.

THE DISCUSSION OF INTERNATIONAL PROBLEMS SHOWED THAT THE SOVIET UNION AND SINGAPORE HOLD SIMILAR VIEWS AND STANDS ON A WIDE RANGE OF ISSUES.

#90267u0034 09/24/1990 ~United Press International

(SEPT. 24) UPI - The Chicago Bears and New York Giants, who relied on defense to plow to championship seasons, moved to 3-0 Sunday with flashes of the formula that sent them to the 1986 and '87 Super Bowls.

Chicago and New York won at home, as did the Cincinnati Bengals, Los Angeles Raiders and San Francisco 49ers, to leave five undefeated teams in the NFL. Seattle and Indianapolis are the league's only 0-3 teams.

The Bears ground out a 19-16 comeback triumph over the Minnesota Vikings on Kevin Butler's fourth field goal after the defense paved the way with constant pressure on quarterback Wade Wilson.

The Giants blew out the Miami Dolphins 20-3 with such swarming of quarterback Dan Marino that the Dolphins were held to Pete Stoyanovich's 51-yard third-quarter field goal on their only trip into New York territory.

''We couldn't find a way to run,'' Miami Coach Don Shula said. ''Dan had a tough day throwing the ball. We struggled all day. At the half, I was glad it wasn't worse than 10-0.''

Marino completed 14 of 30 passes for 115 yards and two interceptions. He had completed 67 percent of his passes over Miami's first two games.

Wilson entered the game against the Bears with three touchdown passes in each of the first two games, then was 0 for 6 with two interceptions until the Vikings' final drive of the first half. He finished 13 of 28 for 159 yards and was sacked twice.

''It's been a while since we won a big game,'' Butler said. ''Last year just seemed to go downhill and downhill but even when Minnesota scored, there was a feeling on the sidelines, 'We've got a shot.'''

The Bears, who were NFC Central Division champs for five years until Minnesota shoved them aside in 1989, have allowed just 29 total points, including two touchdowns, through three games.

The Giants defense forced three turnovers and for the second straight week, did not give up a touchdown; the Cowboys managed only a kickoff return TD in a 28-7 loss to New York the previous week.

The offense helped by holding the ball for more than 40 minutes for the second straight game to hand Miami its first loss.

Linebacker Lawrence Taylor, who suffered a pulled left hamstring on the final play of the game, recovered a fumble at the Miami 11 after Perry Williams knocked the ball free, to set up Ottis Anderson's second touchdown.

Anderson passed Earl Campbell for eighth in NFL career rushing and finished with with 9,433 yards.

Miami entered the game leading the AFC in rushing and Sammie Smith's 215 yards led the league. The Dolphins finished with 39 yards on 11 carries and Smith was held to nine yards on five carries.

In other games, Cincinnati pounded New England 41-7, San Francisco defeated Atlanta 19-13, the Los Angeles Raiders trounced Pittsburgh 20- 3, Denver edged Seattle 34-31 in overtime, Kansas City downed Green Bay 17-3, Washington held off Dallas 19-15, New Orleans hammered Phoenix 28- 7, San Diego dumped Cleveland 24-14, Philadelphia topped the LA Rams 27- 21, Houston beat Indianapolis 24-10, and Tampa Bay got past Detroit 23- 20.

-- AROUND THE NFL --

Bengals 41, Patriots 7

At Cincinnati, field goal holder Lee Johnson pulled off a trick play by flipping a 4-yard touchdown pass to Rodney Holman and Boomer Esiason fired a pair of touchdown passes against New England. Cincinnati placekicker Jim Breech set an NFL record by scoring in his 152nd straight game, eclipsing the mark of 151 set by Fred Cox of the Minnesota Vikings from 1963 through 1973.

49ers 19, Falcons 13

At San Francisco, Joe Montana threw for 398 yards and two touchdowns and the San Francisco defense throttled Atlanta's ''Red Gun'' offense as the 49ers beat their NFC West rivals. Atlanta, 1-2, has lost 12 straight road games while San Francisco has won 11 straight games dating back to last season. Atlanta rookie back Steve Broussard, who came into the game as the second-leading rusher in the NFC, was carried from the field in the third quarter with a knee injury.

Raiders 20, Steelers 3

At Los Angeles, Marcus Allen broke open a close game with a 1-yard scoring run with 11:03 left and the undefeated Raiders extended Pittsburgh's streak without a touchdown on offense to three games. The Raiders are 8-0 in the Coliseum over two seasons with Art Shell as coach.

Broncos 34, Seahawks 31

At Denver, David Treadwell kicked a 25-yard field goal 9:14 into overtime against Seattle, marking the second straight week he has beaten a division rival on the game's final play. Treadwell, who last week kicked a 22-yarder as time expired against Kansas City, had missed a 49- yard field goal wide right with 43 seconds remaining in regulation. Seattle's Norm Johnson missed a 39-yard field goal also wide right with seven seconds left to send the game into overtime.

Chiefs 17, Packers 3

At Green Bay, Wis., Christian Okoye rushed for 122 yards and a touchdown, and Stan Petry returned an interception for a touchdown, moving Kansas City to 2-1 and the Packers to 1-2. Green Bay's Pro Bowl quarterback Don Majkowski, who reclaimed the starting job from Anthony Dilweg after a contract holdout, completed 19 of 31 passes for 171 yards but threw two interceptions and was sacked seven times.

Redskins 19, Cowboys 15

At Washington, Chip Lohmiller kicked four field goals, including a wind-aided 55-yarder, and Darrell Green scored on an 18-yard interception return against Dallas, 1-2. The victory was tempered when Redskins quarterback Mark Rypien sprained his left knee when defensive tackle Dean Hamel was blocked into him. Last year, the Cowboys' only victory of the season was over the Redskins.

Saints 28, Cardinals 7

At New Orleans, Rueben Mayes rushed for three second-half touchdowns and 99 yards against Phoenix, putting each at 1-2. Mayes scored his first touchdowns since the 12th game of the 1988 season. He missed all of 1989 following Achilles tendon surgery.

Chargers 24, Browns 14

At Cleveland, Billy Joe Tolliver threw two touchdown passes to Anthony Miller and the San Diego defense set up two other scores with turnover recoveries to key San Diego's first victory. The San Diego defense sacked Cleveland quarterback Bernie Kosar three times, including two by Lee Williams, intercepted three of his passes and also recovered a fumble.

Eagles 27, Rams 21

At Anaheim, Calif., Randall Cunningham threw two touchdown passes and engineered a 71-yard drive that consumed the final eight minutes of the game to help Philadelphia win its first game and drop Los Angeles to 1- 2. The Eagles avoided their first 0-3 start since 1986 and limited the Rams' league-leading offense to 35 yards rushing. Philadelphia also received a boost from Keith Jackson, who caught four passes for 77 yards in his first game since ending his 50-day holdout Wednesday.

Oilers 24, Colts 10

At Houston, Warren Moon threw for 308 yards and three touchdowns against winless Indianapolis to give the 1-2 Oilers their first victory under new coach Jack Pardee. Moon also became the Oilers' all-time leading passer with 19,289 yards, surpassing the 19,149 George Blanda accumulated from 1960-66.

Buccaneers 23, Lions 20

At Tampa, Fla., Running back John Harvey took a pass in the flat and scored from three yards out with 4:21 remaining to rally Tampa Bay to their second win over Detroit in three weeks. Harvey and backfield mate Gary Anderson provided critical plays as the Buccaneers, 2-1, scored two fourth-quarter touchdowns. Steve Christie added three field goals for Tampa Bay. Detroit, which played without three defensive starters, fell to 1-2.

The Monday night game features Buffalo at the New York Jets.

#90267u0122 09/24/1990 ~United Press International

(SEPT. 24) UPI - A World Airways jet carrying 111 former hostages arrived in Raleigh, North Carolina, Sunday in what could be the last group of American captives brought out of occupied Kuwait. One Milwaukee resident aboard the craft said he is happy to be back in the United States where people are- in his words- ''NOT dangerous and there is law and order.''

Secretary of State Baker denies a statement by an anonymous State Department official that Washington could have lived with a ''limited invasion'' by Iraq of Kuwait. Baker scoffed at ''twenty-twenty hindsight'' in an interview Sunday denouncing suggestions that the U-S government contributed to Iraqi agression against Kuwait by failing to warn Iraq against the invasion.

Frederik de Klerk was full of promise on his arrival in Washington Sunday, declaring ''the new South Africa is at hand'' and ''the walls of apartheid are coming down.'' De Klerk... the first South African leader to visit the United States since 1945... will meet with congressional leaders before going to the White House. De Klerk will spend two days on Capitol Hill.

Organizers of a candlelight vigil Sunday are urging world leaders to save 50-Million children around the world in the 1990's by making children a priority on their political agendas. Candles were lit around the globe in advance of next week's World Summit for children at the United Nations. U-N officials estimate about 40-thousand children die around the world each day.

A stray bullet was fired in New York Sunday, killing a 12-year-old girl playing with her friends in a Brooklyn courtyard. Police says the child's friends at first thought she was playing, but then saw the blood. The girl was the third youth hit by stray gunfire in the city since Friday... and the sixth child to die from random gunfire in New York since the middle of summer.

-30- 1005
#90267u0207 09/24/1990 ~United Press International
(SEPT. 24) UPI - Around the world... around the clock... U-P-I has the
morning news.

The 160-member United Nations General Assembly meets today in New York City,
with the Persian Gulf crisis as its major focus. U-N Secretary General Perez
de Cuellar says the latest statements out of Iraq are NOT helpful to those who

want peace. Iraq threatens to attack Israel and Saudi Arabian oil fields.

South African President F-W de Klerk offered assurances yesterday that the ''walls of apartheid are coming down.'' He's the first South African leader to visit the United States since 1945. Anti-apartheid demonstrators are expected to protest de Klerk's White House meeting this morning with President Bush.

French police have recovered five paintings stolen from Paris museums this summer, including a Renoir cut from its frame at the Louvre during visiting hours. Police charged a 21-year-old Frenchman with the theft of the five master paintings. Authorities believe he also was responsible for the theft a 1470 portrait taken from a Venice museum last Friday.

The Mexican government says 30 people were killed when heavy rains flooded parts of Chihuahua, 750 miles north of Mexico City. Officials say about 300 homes were destroyed. The worst-hit areas were in the north and southeast sections of Chihuahua City, where dozens of homes and cars were washed away.

The 1991 Old Farmer's Almanac goes on sale today with a forecast that calls for a winter ''cold as the Dickens'' east of the Rockies. The venerable yellow booklet of weather forecasts and observations is in its 199th year of publication. But when it comes to the weather, editor Judson Hale concedes the almanac is NEVER 100 percent accurate.

-30- 1878

#90267u0215 09/24/1990 ~United Press International

(SEPT. 24) UPI - Moslem sources in Lebanon say three people died yesterday in a fresh outbreak of fighting between pro-Syrian Shiite Amal forces and the Iranian-backed Hezbollah group. Sources say three Hezbollah gunmen were killed in exchanges of artillery and rocket fire in battles east of Sidon, 24 miles south of Beirut.

Officials in Thailand say 39 people were killed when a double-decked tour boat with 70 passengers aboard, capsized on a reservoir in northeast Thailand. Officials say most of those killed were medical students. Officials believe the accident likely occurred when the boat's top deck collapsed under the weight of the passengers.

Ailing Mormon Church leader Ezra Taft Benson underwent surgery again yesterday to relieve pressure on his brain. It's the second time in a week Benson has undergone the operation. A church spokesman says Benson is in critical, but stable condition in a Salt Lake City, Utah, hospital.

Legendary race car driver A-J Foyt underwent surgery in Milwaukee for badly fractured legs, injured when he crashed into an embankment during a race yesterday. Doctors say Foyt's vital signs are stable and the four-time Indianapolis-500 winner was alert after the crash at the Road America course.

He is listed in satisfactory condition.

-30- 1446
#90267u0231 09/24/1990 ~United Press International
(SEPT. 24) UPI - In a pennant race, even one as full of stumbling as the one between the Boston Red Sox and the Toronto Blue Jays, a missed opportunity can make all the difference.

The Red Sox got ''a million chances'' against the New York Yankees Sunday and squandered them all; Mookie Wilson got a shot at redemption against the Cleveland Indians and took it, lifting Toronto into sole possession of first place, a game in front of Boston, in the American League East.

Wilson, who muffed a bunt attempt and struck out in the ninth, hit a 1-0 pitch over a drawn-in outfield that scored the winning run in the 10th inning, lifting the Blue Jays to a 5-4 victory over Cleveland.

With the score tied 4-4, Kenny Williams led off the 10th for Toronto by drawing a walk from Colby Ward, 1-3. Williams was sacrificed to second by Carlos Diaz and Ward issued an intentional walk to John Olerud before walking Mark Whiten to load the bases. Wilson then hit a 1-0 pitch over left fielder Stan Jefferson's head to score Williams with the game-winner.

''I made a mistake not getting the bunt down in the ninth, I had a second chance and I was determined to make up for it,'' Wilson said. ''I had a couple of fast runners on the corners, they were playing in, all I had to do was hit the ball hard.''

Jim Acker, 4-4, pitched the 10th inning to pick up the victory.

For the Red Sox, it wasn't just one blown opportunity. Besides the none-out, runner-on-third situation in the eighth inning of their 5-4 loss to the Yankees, they twice failed to deliver a runner from third with one out and another time couldn't score after putting the first two men on.

''We can't dwell on this game,'' said Dwight Evans, who struck out in the eighth. ''We didn't do it today. I feel bad about what happened but I was trying.''

''We had a million chances and we didn't do it,'' Red Sox Manager Joe Morgan said. ''How many more times can I say it?''

With New York ahead 5-3 in the eighth, Ellis Burks walked and scored on Mike Greenwell's triple.

''When I saw the ball go to the wall, I knew if I could get to third it would improve our chances to score,'' Greenwell said.

Eric Plunk then fanned Evans and Mike Marshall, and got Tony Pena on a grounder. Dave Righetti pitched the ninth for his 34th save.

Mike Witt, 5-8, allowed eight hits over seven innings for the win. He yielded three runs, two of them tainted because of shoddy fielding.

Compounding Boston's problems is the pain remaining in Roger Clemens' shoulder. Morgan said his ace right-hander tried to throw again, but stopped.

''There wasn't much sense in throwing more, I guess,'' Morgan said. Clemens refused to comment.

''We play four out of five days without Roger on the hill,'' infielder Jody Reed said. ''We're in position to win the division, and we can't worry about one guy.''

Tom Bolton, 9-5, received the start in place of Clemens Sunday. Of the 10 batters Bolton faced, six reached base and three scored.

Both the Red Sox and Blue Jays have nine games left. Boston plays all but one at home and the Blue Jays finish with nine straight on the road. The two teams meet for three games in Boston Sept. 28-30.

Elsewhere in the American League, Detroit mauled Oakland 6-0, Minnesota topped Texas 6-4, Kansas City cliupped California 4-0, Baltimore nipped Milwaukee 2-1 in 10 innings and Chicago edged Seattle 1-0.

In the National League it was: Pittsburgh 7, St. Louis 2; Philadelphia 2, Montreal 1 in 16 innings; Atlanta 3, Houston 0; Cincinnati 9, San Diego 2; and San Francisco 6, Los Angeles 2.

-- AROUND THE AL --

Tigers 6, Athetics 0

At Oakland, Jack Morris pitched a four-hit shutout and Cecil Fielder belted his 48th homer - a grand slam in the second inning - to power the Tigers. Morris, 13-18, did not allow a hit after the third inning. Mike Moore, 12-14, worked the first four innings for Oakland, giving up eight hits and all six Detroit runs.

Twins 6, Rangers 4

At Minneapolis, rookie Scott Erickson, 7-4, allowed four hits over 7 2-3 innings and Gary Gaetti hit a grand slam for his 200th career home run to guide the Twins. Kirby Puckett and Dan Gladden each went 3-for-4. Rick Aguilera pitched the ninth for his 29th save. The Twins jumped on Charlie

Hough, 12-11, for five hits and a 5-0 lead in the first inning.

Royals 4, Angels 0

At Kansas City, Mo., Steve Farr pitched a five-hit shutout to lead the Royals. Farr, 12-7, allowed only two runners past first in his first complete game and first shutout. Chuck Finley, 18-8, took the loss.

Orioles 2, Brewers 1, 10 innings

At Baltimore, Bob Melvin drove in Bill Ripken with a sacrifice fly in the 10th to give the Orioles their fifth straight victory. Melvin's sacrifice fly made a loser of Ted Higuera, 10-9. Jeff Ballard, 2-10, pitched the 10th in relief of Ben McDonald, who spaced five hits over nine innings.

White Sox 2, Mariners 1

At Seattle, rookie Frank Thomas homered in the eighth to lift the White Sox from a 1-1 tie. Rookie right-hander Alex Fernandez, 5-3, went eight innings and Bobby Thigpen pitched the ninth for his 53rd save. Matt Young, 8-17, allowed eight hits on the way to his club-leading seventh complete game.

ATHENS, Greece (SEPT. 24) UPI - Syria will ''not tolerate'' the presence of U.S.-led foreign forces in the Persian Gulf region once the current crisis abates, Syrian President Hafez Assad said during a trip to Iran.

Iran's official Islamic Republic News Agency also said Assad, a long- time foe of Iraqi President Saddam Hussein, ''urged Iraq to quit Kuwait.''

Syria has sent 4,000 troops to Saudi Arabia and reportedly plans to send more as part of an Arab League force deployed in response to Iraq's Aug. 2 invasion of Kuwait.

But Tehran radio said Assad, who began a three-day visit to Iran Saturday, agreed with the Iranian view that regional disputes should be resolved within the region.

Assad, speaking at a banquet in Tehran, ''made it clear that his country would not tolerate the presence of foreign forces in the region after the end of the current crisis,'' according to the Iranian news agency dispatch monitored in Athens.

The Syrian leader, accompanied by a high-ranking delegation, earlier held a first round of talks with Iranian President Akbar Hashemi- Rafsanjani. The two heads of state held private discussions before beginning formal talks in the presence of other officials.

Assad's visit coincided with the 10th anniversary of the Iraqi invasion of Iran on Sept. 22, 1980.

Syria was Iran's staunchest ally during the gulf war but diplomats, said Damascus is concerned about the growing detente between Tehran and Baghdad

following Saddam's capitulation last month to Iran's war-time demands.

Tehran radio said Assad laid a wreath at the tomb of Iranian leader Ayatollah Ruhollah Khomeini at Behesht Zahra, some 10 miles south of Tehran. He made a pilgrimage Sunday to the shrine of Imam Reza, a Shiite saint, in Mashad.

#90267u0338 09/24/1990 ~United Press International

BANGKOK, Thailand (SEPT. 24) UPI - A double-decker tour boat carrying 70 passengers, mostly medical students, capsized on a reservoir in northeast Thailand, killing 39 people, officials said Monday.

A provincial official in Khon Kaen, 240 miles northeast of Bangkok, said 39 people, including 37 students at public health colleges, were killed in the accident Sunday at the reservoir formed by Ubolrat Dam.

He said the victims included 35 women and four men.

Hospital officials said 38 bodies had been found and divers were searching for the last body.

The provincial official, who asked not to be identified, said investigators believed the accident was caused by the collapse of the boat's top deck under the weight of sight-seeing passengers.

''The top deck was an extension to the boat's original structure. It was unstable and could not bear the weight,'' the official said. ''When the top deck collapsed, it triggered panic and the students went to one side. Then the boat capsized.''

The official said the incident happened only 200 yards from the pier.

He said the boat captain fled the scene and the boat owner has also disappeared.

#90267u0343 09/24/1990 ~United Press International

TOKYO (SEPT. 24) UPI - A bipartisan delegation of Japanese politicians left for communist North Korea Monday on a five-day visit that is expected to lead to informal relations with one of the most isolated countries in Asia.

Traveling on the first direct flight between Tokyo and the North Korean capital of Pyongyang, the delegation, headed by senior Liberal Democrat Shin Kanemaru, carried a private message of reconciliation from Prime Minister Toshiki Kaifu, government officials said.

The message is to be delivered to North Korean President Kim Il-Sung, whose iron rule and philosophy of self-reliance have cut North Korea off from most of the world.

Kanemaru will seek the release of two Japanese seamen who have been held in North Korea since 1983 in retaliation for the defection of a North Korean soldier to Japan.

If successful, he will agree to the setting up of liaison offices in the two countries' capitals, the Foreign Ministry said. The offices would promote trade, which North Korea desperately needs, but would fall short of diplomatic status, a Foreign Ministry spokeman said.

North Korea is the only country in the world with which Japan has no diplomatic relations. Cold War hostilities, combined with Korean bitterness over Japan's harsh colonial rule of their land until the end of World War II, have kept contacts at a minimum.

Hostility deepened in the 1980s, first with the imprisonment of the two seamen and then with the bombing of a South Korean airliner in November 1987. Kim Hyon Hui, a captured North Korean agent, confessed to the bombing.

Japanese were outraged to learn from her confession that she had been trained to pose as a Japanese citizen by a woman kidnapped from Japan.

But even at the worst moments, Japan maintained a back-door channel of communication through the Japan Socialists, the nation's largest opposition party.

Leading Japanese Socialists, professing solidarity with North Korea's ruling Workers' Party, have made numerous trips to Pyongyang - via Beijing.

Despite overtures from the ruling Liberal Democrats in Japan, the door to Pyongyang stayed firmly shut to them until Soviet President Mikhail Gorbachev shocked North Korea's rulers by meeting with South Korean President Roh Tae-woo in June.

The prospect of Seoul establishing relations with Moscow and making headway with Beijing apparently shook Pyongyang into action.

In addition to accepting the Kanemaru mission, it agreed to a series of historic meetings between the prime ministers of the two Koreas, the first of which occurred in Seoul Sept. 5.

In view of the Socialists' intermediary role, the delegation, composed of nearly 90 people, included Socialist Vice Chairman Makoto Tanabe and nine other party members. Several Japanese government bureaucrats were included in the delegation as advisers.

Kaifu's message to Kim is reportedly an apology for Japan's harsh 35- year rule over the Koreans. Kaifu wrote it as head of his party, not prime minister in view of the lack of formal relations between the two countries, a Foreign Ministry spokesman said.

Kim, the only president in North Korea's history, led the fight against Japanese rule during World War II, according to his official biography.

Kaifu made a similar apology to South Korean President Roh Tae-woo during a visit Roh made to Tokyo in May.

At that time, Roh called for helping North Korea to break out of its isolation and for reunification with the South by the end of the century. Kaifu called Roh to brief him on Japan's North Korea initiative a few days before the delegation left, according to the Asahi News Service.

#90267u0358 09/24/1990 ~United Press International

(SEPT. 24) UPI - Record cold weather followed record high temperatures in the South as most of the nation enjoyed clear skies and cool weather Monday on the second day of fall.

The mercury dropped to 58 degrees early Monday in Jacksonville, Fla., breaking the record of 59 degrees set in 1967. The chilly weather came a day after records for warm weather were tied or broken in three Florida cities.

West Palm Beach had 93 degrees Sunday, breaking the record of 92 set last year Fort Myers had a 94 to tie the record set in 1988 and Key West had a 92 to equal the record set in 1987.

Cool, dry Canadian air that moved across much of the eastern half of the nation was responsible for the fall weather, but bright sunshine kept things comfortable even though temperatures peaked only in the 50s across the Northeast.

The Great Plains also enjoyed pleasant but blustery weather with temperatures in Dodge City, Kan., climbing into the 80s, and south to southwest winds moving between 15 and 25 mph.

To the West, fog gave way to clear skies in Washington, where temperatures dipped into the 50s with light winds.

Southern California had morning clouds and west southwest winds at 15 mph, and high temperatures near 80 were expected.

Things quieted down in south Texas Monday, with only scattered light showers

reported in contrast to strong storms that dumped up to 4 inches of rain on the area Sunday, leaving one road under 16 feet of water.

#90267u0371 09/24/1990 ~United Press International

BEIJING (SEPT. 24) UPI - The Cambodian resistance said Monday it has accepted a compromise on the makeup of a national council, opening the way for another step towards a politial settlement of the 11-year-old conflict.

In Bangkok, Thai Foreign Minister Subin Pinkayan told reporters he was optimistic the council, which includes all four battling factions, could reconvene in Bangkok soon, but was awaiting assurances of progress from the government in Phnom Penh.

In statements released in Beijing, Prince Norodom Sihanouk, the overall chief of the three-faction resistance coalition, and resistance leader Son Sann said they had accepted a proposal that the membership of the newly formed national leadership council be increased.

The ''Supreme National Council'' was established under a breakthrough agreement earlier this month between the resistance and the Vietnam- supported government of Prime Minister Hun Sen as the key organization in a United Nations peace settlement framework.

The council, designed to represent Cambodia's national sovereignty under the U.N. plan that includes cease-fire and free elections, originally had six resistance and six government members.

But Phnom Penh balked at the addition of Sihanouk as the council president, saying it would give the resistance an advantage.

Son Sann's statement said the resistance would accept the addition of a seventh Phnom Penh government member, and Sihanouk added his assent.

''We have decided ... to accept that the party of Mr. Hun Sen name a seventh member to the SNC,'' Son Sann said.

In his statement, released by his Beijing residence, Sihanouk praised the compromise as a ''deblockage.''

''Now, the ball is in the camp of Mr. Hun Sen,'' Sihanouk said.

A Cambodian resistance source in Bangkok said Thai foreign ministry officials held a series of meetings Monday with resistance officials to sound out the chances of making progress if the council is reconvened.

''The signs are very good to have another meeting soon,'' Subin said. ''All

four sides are compromising.''

He said Thailand expected word from the Hun Sen government Tuesday to confirm that it agreed to reopen the meeting on the basis of 14 members with Sihanouk as chairman.

Subin said he expected the meeting would be a short one meant to only endorse a joint communique on the composition and leadership of the council.

Foreign Ministry sources said that if all goes well, the meeting could be held late this week or early next week.

The four Cambodian factions are now working to end the more than decade-old guerrilla war in the country that erupted after Vietnam invaded and occupied Cambodia in late 1978.

Son Sann, however, also said ''it would not be useful'' to name a vice president of the council, apparently to avert the realization of a Sihanouk-Hun Sen administration.

To assure the council's success, he said, ''it is necessary to have only a president ... a national leader uncontested and incontestable, recognized by all,'' while the remainder of the council would be ''thirteen ordinary members.''

In another statement Son Sann criticized Hun Sen for a letter to the United Nations, saying the letter showed that Hun Sen was trying to act as prime minister despite the formation of the Council.

The comment was another sign of the suspicions that have plagued efforts to work out a political settlement between the four factions whose animosities go back to the 1960s.

#90267u0379 09/24/1990 ~United Press International

(SEPT. 24) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

BAGHDAD, Iraq - Iraq, admitting for the first time it made a mistake, apologized to France for raiding French diplomatic premises in occupied Kuwait but said the soldiers thought the building belonged to a member of the deposed Kuwaiti ruling family. Baghdad Radio said an Iraqi government spokesman apologized late Sunday for the incident that occurred earlier this month. The raid on the diplomatic grounds prompted France to send more ground forces and jet fighters to the region.

BAGHDAD, Iraq - Iraqi President Saddam Hussein threatened to attack oil fields in Saudi Arabia and other Arab countries if his people are ''strangled'' by the U.N. economic sanctions against his country. It was one of the strongest messages yet from Saddam, whose previous threats to attack Israel and U.S. allies in the Middle East were contingent on being attacked first by Western forces.

UNITED NATIONS - U.N. Secretary-General Javier Perez de Cuellar decried Saddam's threat to attack first saying it was ''not very helpful to those who want a peaceful solution to the problem.'' Perez de Cuellar made the comments as particpants gathered Monday in New York for the General Assembly's 45th session, which was expected to be dominated by the Persian Gulf crisis.

TEHRAN, Iran - President Akbar Hashemi Rafsanjani said Iran, which has condemned Iraq's invasion of Kuwait, is also steadfast in its opposition to the deployment of the U.S.-led multinational military force in the Persian Gulf region, calling it an ''arrogant scheme.''

LOS ANGELES - The Los Angeles Times said Monday the U.S. government learned Saddam drew up the plan to invade Kuwait as early as 1986. The plan envisioned the troops would make only a ''strategic pause'' in Kuwait before continuing south into Saudi Arabia, the newspaper quoted officials as saying.

RALEIGH, N.C. - The State Department in Washington said a plane carrying 111 American hostages landed in North Carolina Sunday night on what appeared to be the last such flight. A spokeswoman said there were believed to be 1,245 Americans still in Kuwait and 320 in Iraq.

ABOARD THE USS MERCY - If diplomacy fails and statecraft turns to war, the battle-broken bodies of American soldiers will mostly end up on two hospital ships now waiting offshore. ''We are planning for a massive number of casualties,'' Capt. Paul D. Barry told reporters who visited the USS Mercy Sunday. ''That is what we are drilling for.'' The Mercy and its sister ship, the USS Comfort, are the world's largest medical trauma centers on land or sea each having 1,000 beds and facilities that more than match most ground institutions.

-30- 2989

#90267u0439 09/24/1990 ~United Press International

(SEPT. 24) UPI - Baghdad Radio says Iraq issued an official apology to France after Iraqi troops stormed French diplomatic quarters in occupied Kuwait. The radio report says that Iraqi soldiers believed the French building was owned by a member of Kuwait's deposed ruling family. The incident two weeks ago and prompted France to send more ground forces and planes to assist U-S-led military efforts in the Persian Gulf.

Iraqi Foreign Minister Tariq Aziz may be having trouble arranging a flight.

Iraq charged yesterday U-S officials refused permission for an Iraqi plane to land in New York City so Aziz can go to today's U-N General Assembly meeting. Bush administration officials say Iraq's ambassador was told last week Aziz would have to take a commercial jet to the United States rather than an Iraqi government plane. .

The Los Angeles Times says Iraqi troops conducted secret exercises for at least two years before invading Kuwait. The report says the military maneuvers and invasion of Kuwait were part of a plan to take Saudi Arabia's eastern oil fields. The newspaper says U-S officials used newly gathered intelligence to learn Iraqi leader Saddam Hussein mapped the strategy as early as 1986.

South African authorities have formally charged black activist Winnie Mandela with assault and kidnapping in the 1989 death of a 14-year-old anti-apartheid activist. Mrs. Mandela was accompanied to the Soweto courtroom by her husband, Nelson, and dozens of supporters. She is among seven defendants accused in the case. A judge set the trial date for next February.

-30- 1743

#90267u0459 09/24/1990 ~United Press International

(SEPT. 24) UPI - Eight New York City youths charged in the slaying of a Utah tourist are scheduled to appear in a Manhattan courtroom today for a bail hearing. The youths are charged with murder, robbery and assault in the death of 22-year-old Brian Watkins. He was stabbed on a subway platform while trying to defend his parents during a mugging. Prosecutors say videotaped confessions made by seven of the youths may be the strongest evidence against them.

Two earthquakes centered offshore rocked Japan early today, but NO damage or injuries are reported. Japanese quake-watchers say the jolts measured six-point-four and five-point-eight on the Richter scale and created small waves that lapped Japan's shores. Officials say the quakes were felt across Japan, but their effects were largely diminished before reaching land.

Officials in Thailand say 39 people died when a double-decker tour boat capsized in a reservoir about 240 miles northeast of Bangkok. Hospital officials say 38 bodies have been recovered and divers are searching for one more. Authorities believe the boat overturned because the top deck could NOT withstand the weight of the passengers. Officials say the accident occured 200 yards from a pier.

New York City police and F-B-I agents are searching for a woman who may have stashed pipe bombs and automatic weapons about one mile from the United Nations. Police say the explosives were found last week in two trunks left in a hallway by an evicted sub-tenant. Reports indicate the woman spoke with an Irish or English accent, giving rise to suspicions she may be linked to an Irish terrorist organization.

-30- 1804

#90267u0531 09/24/1990 ~United Press International

(SEPT. 24) UPI - Rising global oil prices and worries over the Middle East crisis combined to send stock prices broadly lower in light trading trading Monday in Hong Kong, Singapore and Sydney.

In Tokyo, banks, markets, governments offices and most major businesses were closed for the observance of Autumnal Equinox Day.

In Hong Kong, stock prices fell to their lowest level in eight months on the Hong Kong Stock Exchange.

The benchmark Hang Seng Index, which plunged 52.68 points Friday, tumbled 70.09 points or 2.4 percent to 2,861.77.

Among the narrower indexes, financials fell 41.23 points, industrials shed 55.14, utilities tumbled 95.25 and properties nosedived 133.04 points.

Volume remained light as an estimated 575 million shares changed hands, compared with 620 million shares Friday.

Elsewhere in Asia, stock prices plunged in light and featureless trading on the Singapore Stock Exchange.

The Straits Times Industrial Index, which fell 27.99 points Friday, dropped 15.65 points to 1,132.74. The broader-based All Singapore Index fell 5.98 points to 320.25.

An estimated 32.3 million shares changed hands, compared with 39.1 million shares Friday.

In Bangkok, stock prices rebounded slightly in light trading on the Thailand Stock Exchange after falling more than 17 percent last week.

The Stock Exchange of Thailand Index gained 9.16 points to 647.11.

Trading activity improved slightly as 1.6 billion shares changed hands, compared with 1.2 billion on Friday.

Market watchers in Thailand said stocks rebounded in a session dominated mostly by bargin hunters.

In Australia, stocks on the Sydney Sharemarket tumbled to their lowest level in almost two years as a combination of rising Middle East tension and domestic recession fears sapped investor confidence.

The All Ordinaries Index, which lost 18.6 points Friday, fell 14.9 points to

1,413.0.

An estimated 52.9 million shares changed hands, compared with 66.6 million shares Friday.

Declines outpaced advances 178 to 63.

Analysts said prices fell on Middle East worries.

#90267u0551 09/24/1990 ~United Press International

(SEPT. 24) UPI - Trial opens in Cincinnati, Ohio, today to determine if the Contemporary Arts Center violated obscenity laws. The gallery displayed erotic photographs by Robert Mapplethorpe.

NASA managers will review plans today on launching the shuttle Discovery about October 7th. One critical factor may be yesterday's scrubbing of the launch of an Air Force Titan-4 rocket with a classifed satellite aboard.

More than 200 East German prisoners are staging hunger strikes and sit-ins. They demand that after unification with the West October 3rd the harsh sentences imposed by the ousted communists be reviewed.

Cambodian resistance leaders have accepted a compromise on the makeup of a council to work toward peace. Resistance leader Prince Sihanouk is to be chairman and the government will get an additional member.

39 people were killed in northeast Thailand yesterday when a tour boat capsized on a reservoir. 37 victims were medical students. An official says the top deck apparently collapsed because it had too many passengers.

More rain fell yesterday in the northern Mexican city of Chihuahua. Flooding destroyed hundreds of houses. 30 people were killed. A Mexican news agency says three dams overflowed.

Assistant Senate Democratic leader Alan Cranston says he will vote NOT to confirm David Souter for the Supreme Court. Cranston says he is concerned about Souter's views on abortion.

Senate Republican leader Robert Dole says Republicans may agree to higher taxes for the rich. In a broadcast yesterday, Dole offered a compromise if Democrats accept a lower capital gains tax.

French police have recovered five masterpieces stolen this summer from Paris museums. One was a Renoir cut out of a frame during visiting hours at the Louvre. A 21-year-old Frenchman was charged with the thefts.

-30- 1997
#90267u0656 09/24/1990 ~United Press International
(SEPT. 24) UPI - Iran's official news agency quotes Syria's leader as saying U-S-led foreign troops in the Persian Gulf will NOT be tolerated once the crisis eases. Syrian President Hafez Assad is ending a three-day visit to Iran. But Tehran Radio says Assad agrees with Iran's view that regional disputes in the Gulf should be resolved by Arab states.

The presidents of Brazil and France are scheduled to address the U-N General Assembly's 45th session today in New York City. But it is the Persian Gulf crisis that's expected to be the focus of debate among the 160-member states at the world body. The U-N Security Council has already passed resolutions to compel Iraq to withdraw from the oil-rich emirate of Kuwait.

South African President F-W de Klerk is invited to a White House meeting this morning with President Bush. Anti-apartheid activists vow to protest the White House luncheon in de Klerk's honor. de Klerk also plans to meet congressional and business leaders in an effort to ''change the image'' of South Africa as an oppressor.

Black actvist Winnie Mandela appeared a Soweto court near Johannesburg today where she was formally charged with assault and kidnapping in the 1989 death of 14-year-old boy. A trial date was set for next February. Mrs. Mandela remains free on her own recognizance pending trial.

Communist rebels ignored President Aquino's declaration of a cease-fire in the Philippine capital, announcing today that the hostilities will resume in Manila and quake-ravaged ares. The New Peoples Army says the government's truce announcement ''was a mere scheme to divide the revolutionary forces.''

-30- 1803
#90267u0673 09/24/1990 ~United Press International
(SEPT. 24) UPI - A Cincinnati, Ohio, art gallery director is to appear in court this morning to face state obscenity charges for displaying photography by the late artist Robert Mapplethorpe. Gallery director Dennis Barrie is charged with pandering obscenity and child pornography for seven of the 175 photos in the exhibit last spring.

There's a ticker-tape parade in Atlanta today, to honor the group that won the 1996 Summer Olympics for the Georgia capital. Sponsors of the parade imported 100 miles of ticker-tape from a New England company for the event. Officials say it's the first ticker-tape parade in Atlanta history.

Japan's Kyodo News Service says inter-city train service was delayed for about 10 minutes today after two offshore earthquakes shook Japan. NO damage or injures were reported. The quakes measured six-point-four and five-point-eight

on the Richter scale. They were widely felt, but the shocks were mostly diminished before reaching land.

Cool weather gripped parts of the nation on the second day of fall. The mercury fell to 58 degrees this morning in Jacksonville, Florida, breaking a record 59 degrees set in 1959. The chilly weather came one day after records for hot weather were broken or tied in three Florida cities. .

Miami forecasters say the 12th tropical depression of the Atlantic- Caribbean hurricane season is trudging through the Atlantic Ocean. At last report, the storm, with 35-mile-an-hour winds, was about 700 miles west northwest of the Cape Verde Islands. Forecasters say some increase in the storm's forward speed is possible.

(SEPT. 24) UPI - People in 80 nations held vigils at sunset yesterday to show concern for hungry and homeless children. Children in Australia stood on a mountain and made a chain of 40-thousand paper dolls reaching from the top to the base. The vigils were organized to focus attention on the U-N World Summit for Children.It will be the largest gathering of world leaders in history. U-N officials estimate 40-thousand children die every day.

Budget negotiators have one week to agree on cutting the deficit or automatic cuts will be made under Gramm-Rudman balanced budget law. Maryland Governor William Schaefer met with President Bush yesterday and said Bush is optimistic the negotiators will beat the deadline. Senate Republican leader Robert Dole suggests Republicans may accept higher income taxes for the rich, if Democrats agree to cut capital gains taxes.

Iraq says it made a mistake when it invaded the French diplomatic premises in Kuwait two weeks ago. Iraq says its troops thought the building belonged to the ruling family of Kuwait. Baghdad Radio says a government spokesman apologized to France. The raid earlier this month prompted France to send more troops and jet fighters to the Persian Gulf region. Other raids were made on Belgian, Canadian and Dutch diplomatic buildings.

The South had record high temperatures yesterday and record cold readings today. The mercury in Jacksonville, Florida, fell to 58 degrees this morning,

a record low. Yesterday, Florida high records were 93 in West Palm Beach and 92 in Key West. South Texas got up to four inches of rain. 16 feet of water covered one road. Only light showers are reported today.

(SEPT. 24) UPI - A British soldier serving in northern Ireland was shot to death yesterday while he sat in a car with his fiancee. Officials say four masked men fired through the windows of the car. The woman was NOT hurt. Police blame the Irish Republican Army. Also in Ulster, two gunmen burst into a pub and killed one man and critically injured another. Police believe that attack was part of a feud between Protestant para-military groups.

Communist guerrillas in the Philippines have rejected President Corazon Aquino's cease-fire. They say they will resume full hostilities. The communist New Peoples Army has been fighting the Philippine government for 21 years. Its leader says Aquino's announcement of a limited cease-fire is a ploy to divide anti- government forces. He accused her of insincerity, citing last week's violent breaking up of demonstrations.

The Coast Guard arrested 13 people yesterday during a Greenpeace protest against the work of a research ship off southern Oregon. Two protesters from Greenpeace's Rainbow Warrior got aboard the research ship, the Aloha. The Aloha is examining underwater mineral deposits in black sand about two miles west of Gold Beach, Oregon. Residents fear valuable deposits may be found and mining could hurt the area's fishing grounds.

The Navy is strictly enforcing regulations against fraternization between the sexes aboard the U-S-S Mercy, a hospital ship in the Persian Gulf. One-third of the personnel are female, mostly nurses. A public affairs officer said- ''We are trying very hard NOT to be the love boat.'' Although the rules do NOT apply during shore leave, hand-holding is forbidden on ship. The officer said one husband whose wife is on board has asked for official permission to hold her hand.

WAUWATOSA, WIS. (SEPT. 24) UPI - A.J. Foyt, a four-time winner of the Indianapolis 500, was hospitalized in satisfactory condition Monday after surgery for leg injuries suffered in a crash during a race at Road America.

Lynn Thompson, a spokeswoman for the Milwaukee County Medical Complex, said Foyt was expected to be transferred to Methodist Hospital in Indianapolis later Monday.

Foyt, 55, was airlifted to the hospital Sunday in critical but stable

condition. Foyt later was upgraded to serious and then satisfactory condition after 4 1/2 hours of surgery, hospital officials said.

Thompson said Foyt underwent surgery for fractures of his left heel and left knee. He also suffered a dislocated right foot and a fractured toe on his right foot that was repaired with a surgical pin, said Mel Poole, a spokesman for Championship Auto Racing Teams.

Poole said doctors also found a compression fracture of a vertebra in the lower back but he said the injury was not serious and could have been sustained years earlier.

''His words before he went into surgery were, 'Tell them I'll be back,''' said Jon Potter, the executive director of Championship Driver's Association, which represents Foyt and other drivers.

''Knowing the type of injury he has and knowing the way he is, there is no reason for him not to resume a full racing career,'' Potter said.

Jeff Reeck, a spokesman for Road America, said Foyt crashed off turn one past a runoff area into brush. He said there was a small fire that was quickly extinguished.

Reeck said the crash occurred about 1:45 p.m. while Foyt was on Lap 27 during the Texaco/Havoline 200. Other drivers ran a few laps under a yellow flag but the red flag stopped the race at Lap 34 on the 4-mile layout at Elkhart Lake. Michael Andretti later won the race.

Foyt, one of two drivers to win the Indianapolis 500 four times, is the all-time leader in Indy car victories with 67, but has not won this year.

HOUSTON (SEPT. 24) UPI - Two energy surveys Monday showed the domestic rotary rig count dipped by five rigs nationwide last week while the offshore rig count in the Gulf of Mexico rose by one.

Baker Hughes Inc. reported 1,055 rotary rigs working last week compared with 1,060 the previous week and 967 the same week one year ago.

Offshore Data Services said one more rig went to work in the Gulf of Mexico, pushing the utilization rate to 67.5 percent. A total of 143 rigs worked last week out of a fleet of 212.

One rig also went to work in European waters but two others joined the fleet there, dipping the utilization rate to 94.9 percent with 130 rigs working out of a fleet of 137. Offshore activity was unchanged in the rest of the world.

Texas had 354 rigs working last week compared with 349 for the previous week and 306 for the same time one year ago, Baker Hughes reported.

Other relevant rig counts included: Louisiana, 141, 146 and 134; New Mexico, 65, 65 and 33; Oklahoma, 124, 124 and 139; Canada, 112, 117 and 127.

#90267u0852 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - After a two-year lull, violence at women's health and abortion clinics is again climbing and could return to the high rates of the mid-1980s, the National Abortion Federation said Monday.

According to the federation, there have been eight arson or firebombing attacks on clinics so far this year, the most recent a Sept. 12 incident when a man in business suit tried to throw a firebomb through the door of a Planned Parenthood clinic in Worcester, Mass.

Overall, according to federation figures, there have been 44 incidents of anti-abortion violence so far during 1990.

The worst years for violence against clinics were in the mid-1980s, said federation spokeswoman Alice Kirkman, peaking in 1984-85, when the federation recorded 52 arsons and bombings.

In contrast, 1988 was a low point, with only seven such incidents, and most other incidents were minor.

''Since the July 1989 Webster decision and intensified public debate on abortion, we've received more reports of extreme violence,'' Kirkman said. ''We are already approaching the 1989 total of arson and bombings and we still have three months to go in 1990.''

Since 1977, when it first began tracking violence at the clinics providing legal abortions, the federation has recorded 806 incidents, including harassment, assualt, vandalism, death threats and arson.

Nicki Nichols Gamble, president of the federation's board of directors and executive director of the Planned Parenthood League of Massachusetts, speculated the sharp increase in violence ''may be the result of certain anti-abortion individuals venting their frustration about the anti-abortion legislative and electoral defeats of the past year.''

''Or perhaps some are angry about the increasing criminal penalties against Operation Rescue activists who blockade abortion clinics. We just don't know '' Gamble said.

Operation Rescue, which prides itself on its militism in its efforts to invade and shut down clinics, has often been at the center of violent incidents during its sit-ins.

Since it began operating in 1986-87, it has claimed more than 35,000 activists have been arrested for blocking the entrances to clinics.

But financial difficulties - especially heavy fines leveled against the group as well as injunctions in various parts of the country and a racketeering suit it is fighting - forced the group to close its national headquarters in New York.

And while it has never been directly connected to any of the arson attempts, its leader, Randall Terry, has been quoted as saying violence in the name of the cause ''is not necessarily immoral.''

Among the recent incidents cited by NAF, in addition to the Worcester attack were:

-the Sept. 4 arson fire at a Walnut Creek, Calif., clinic that destroyed a third of the facility at an estimated cost of $270,000.

-a July 11 arson fire at a Redding, Calif., clinic. The fire occurred during the well-publicized local trial of anti-abortion activists who had blockaded the facility.

-July 31, at a clinic in Atlanta, a non-toxic but noxious chemical was poured through the air conditioning and ventilation system.

-in May, a Portland, Ore., clinic suffered $15,000 in damages to one of its examination rooms after someone poured gasoline through a window and ignited it.

#90267u0885 09/24/1990 ~United Press International

WELLESLEY, MA (SEPT. 24) UPI - Boston Celtics No. 1 draft pick Dee Brown is considering filing a civil suit against Wellesley police after being mistaken for a bank robbery suspect in the posh Boston suburb.

Brown, 21, was sitting in a car outside a post office in the Wellesley Hills section of the city 10 miles west of Boston Friday afternoon when he was surrounded by police, who ordered him to lie on the ground and held him at gunpoint. Police later apologized for the mistake.

Brown told The Boston Sunday Globe he is considering filing a civil suit against the police department in hopes of preventing a similar mistake from happening again. He said he wonders if the incident was more racially

motivated than a case of mistaken identity.

Alan Margolies, Brown's attorney, said the incident smacked of racism.

''I was looking at the photograph all last night. I couldn't sleep,'' Brown said. ''I kept asking, 'Does this look like me? Does this look like me?' It doesn't.''

''The police had a picture of the guy, a picture of the guy, not a drawing,'' he said. ''Where do you draw the line of it being a racial issue or a mistake?''

''All they had to base this whole thing on was a tall, skinny body and a black face,'' Brown said.

Police Chief John Fritts refused to release the photograph of the robbery suspect and defended the actions of the police department. He said the matter was under investigation and that the department hoped to meet with Brown and his fiancee.

The Wellesley Board of Selectmen and the police chief planned to appear at a public meeting Monday night to discuss the Brown incident. Brown said he would not be able to attend because he has to be in Dallas. However, he said he is eager to hear police explanations about why the mistook him for a bank robbery suspect.

Brown said six or seven police officers forced him to the ground, held him at gunpoint and told him to hold with his hands behind his back while passersby looked on in the post office parking lot.

''I'm trying to ask, 'What's going on? Why?' when they're screaming at me. I was in shock - terrified that it was happening to me,'' said the 6-foot-1-inch point guard from Jacksonville University in Florida.

''I was on the ground and turning my head and looking at people saying, 'There's another guy they got who did something,''' Brown said. ''But it wasn't me - not even close.''

Police said they mistook Brown for a suspect in the robbery of $1,800 from a branch of South Shore Bank on Tuesday. A police spokesman described the incident as ''a matter of misidentification and miscommunication.''

The police account differed slightly from Brown's, with officers saying they told Brown to kneel, a command they said was ''standard procedure'' in such cases.

''I just think they overreacted,'' said Brown's fiancee, Jill Edmonson. ''They didn't need to have seven cops all around us with guns pointing in our faces.''

Brown said he will drop plans to purchase a home in the suburb.

#90267u0894 09/24/1990 ~United Press International

(SEPT. 24) UPI - The Los Angeles Times reports that Iraqi troops conducted secret exercises for at least two years before attacking Kuwait as part of a war plan designed to conquer the oil fields of eastern Saudi Arabia. The report says the U-S government used newly gathered intelligence to learn that Iraqi President Saddam Hussein drew up the plan as early as 1986. The report quotes knowledgeable officials as saying the Iraqi plan envisioned the the troops making a ''strategic pause'' in Kuwait before continuing south into Saudi Arabia. .

Jordan's King Hussein says he fears the world is stumbling toward ''a replay of 1914'' and a war that NO one wants... but cannot stop. The Jordanian monarch, writing in a British newspaper, says he's convinced a political solution to the Persian Gulf crisis could be found if the world community put as much effort toward that end as it is putting into military and economic confrontation. Still, says King Hussein- quote- ''I am stubborn enough to believe there is still a chance to prevent war. I refuse to concede that events cannot be brought under control.''

Demonstrators are expected out in front of the White House today as President Bush holds meeting with South African President de Klerk. The meetings represent the first U-S visit by a South African leader since 1945. The agenda is expected to center on ways of improving relations between the two countries.

A terrorist group headed by Abu Nidal says the four Belgian citizens it has held since 1987 are alive and well following battles earlier this month in a Palestinian refugee camp. Forces loyal to P-L-O Chairman Yasser Arafat crushed the Abu Nidal group after more than 30 hours of fierce battles that claimed at least 68 lives.

ALLENTOWN, PA (SEPT. 24) UPI - A Russian Orthodox priest convicted of drug charges used the trappings of his religion to conceal his illegal activities, a prosecutor said Monday.

The Rev. Jonrobert Deutsch, also known as Father Aleksandr, was convicted Friday in Common Pleas Court in southeastern Pennsylvania of possession of marijuana and cocaine with intent to deliver and conspiracy to sell the drugs.

''It's not a reflection on the church,'' Assistant District Attorney Peter Richards said of the case. ''It's just a reflection on this man, and this man has hidden behind the cross and used the cross to protect himself while conducting illegal acts.''

Deutsch, 37, was arrested along with his private secretary, Michael J. Kimmock of Whitehall Township in June 1989 outside his Copley home. Police found 13 ounces of marijuana and two bags of marijuana in Deutsch's car.

Kimmock, a co-defendant in the case, also was convicted Friday of possession of marijuana and conspiracy.

During the trial, prosecutors tried to portray Deutsch as a man of dubious character who cheated on his taxes and lied about attaining a high religious rank.

Deutsch tried to commit suicide a week after his arrest by injecting air into his bloodstream, and left a note attempting to exonerate Kimmock of any guilt in the case.

Richards said Deutsch was buying drugs while ministering to the Russian Orthodox congregations he served in Reading and Palmerton.

''He went to New York to buy this cocaine wearing his cassock and cross and priestly vestments,'' Richards said. ''How do you stop that?''

Richards said Deutsch apparently believed that he would be safer in the priestly garb if the drug transactions went sour.

Deutsch was suspended from his duties at St. Nicholas Russian Orthodox Church in Reading and St. George Russian Orthodox Church in Palmerton pending the outcome of the trial, Richards said.

He remains free on bond, but may be jailed later this week if he does not raise an additional $40,000 bail required when the judge raised that bond to $100,000 after the conviction, Richards said.

Deutsch, who mortgaged his house to post bond initially, has until Wednesday to raise the additional security, Richards said.

#90267u0991 09/24/1990 ~United Press International

FREETOWN, SIERRA LEONE (SEPT. 24) UPI - Liberian rebel Charles Taylor's plans to stage elections placed a tenuous cease-fire into doubt as the self-proclaimed Liberian president refused Monday even to acknowledge his main rival is alive.

Taylor, leader of the National Patriotic Front of Liberia, said he intends to hold elections for a national assembly Oct. 10. The elected assembly would meet Oct. 15 in the rebel-held town of Ganta.

In an interview with the British Broadcasting Corp., Taylor repeated his claim of being president of Liberia on the grounds that he controls 90 percent of the country.

Taylor said he would reserve seats on the assembly for followers of the rival rebel leader Prince Johnson, whose forces executed the late president Samuel Doe two weeks ago.

Taylor insisted that Johnson himself would have no role in government, insisting the rival rebel leader is dead.

Johnson is, however, alive, and controls much of the center of Monrovia.

He has been seen often by journalists since the last week of August when Taylor claimed his forces killed Johnson.

Taylor's continuing claims that he is president before an election is held put him on collision course with Johnson, who has repeatedly said that none of the warring factions should assume the presidency until elections are held.

Johnson has not yet commented on Taylor's electoral plans, although his previous statements suggest he will strongly object on the grounds that Taylor is unacceptable to him as a president without having been elected to the position. There also is a great deal of personal animosity between the two men.

Taylor's election plan also undermines the efforts of an interim government made up of exiled Liberians who are awaiting an opportunity to establish an administration in Monrovia. They will be protected by the five-nation West African peacekeeping force assembled by the Economic Community of West African States.

ECOWAS has become increasingly embroiled in the conflict since it arrived in Monrovia Aug. 24. Despite a cease-fire declared by Taylor Saturday, tension between Taylor and ECOWAS is increasing.

The rebel leader said Monday ECOWAS is party to the conflict and should leave. Nigeria and Ghana, whose troops form the largest part of the 4,000-strong peacekeeping force, sent 1,200 troops to Monrovia Sunday.

Members of the interim government met in Freetown Sunday, but refused to say whether they are intending to travel to Monrovia this week, as has been planned.

ECOWAS officials in Freetown said Taylor's intention of holding national assembly elections in three weeks was unrealistic. More than 400,000 people have fled Liberia and thousands of others have been displaced and not registered as voters where they are living, they said.

The cease-fire declared by Taylor was seen by diplomats in Freetown as an attempt by the rebel leader as to improve his image as a democrat. But by declaring elections that few if any of the exiled Liberian opposition parties will be ready to fight, he is being seen as attempting to secure a mandate by taking advantage of his superior postion within much of the country, senior diplomatic sources said.

''Do you really think that Taylor's suggestion is a practical one?'' one diplomat asked.

VIENNA (SEPT. 24) UPI - American Michael Chang made a courageous comeback after being down two sets to win the deciding singles match Monday in the Davis Cup semifinal against Austria.

Chang beat Austrian Horst Skoff, 3-6, 6-7 (4-7), 6-4, 6-4, 6-3, in a match which was resumed at the start of the fourth set after darkness caused a suspension of play Sunday.

The U.S. won the semifinal 3-2 and now meets Australia in the final of the Davis Cup in December.

When the match was restarted, Chang fought off two break chances by Skoff in the second game, and wound up holding with a superb cross-court forehand.

Several service breaks were exchanged by the two players in the fourth set, but it was Chang who emerged triumphant as he evened the match.

Chang, sensing a weakness in Skoff's backhand, was able to capitalize as he

notched repeated winners while Skoff became more flustered. The fifth set was little more than a formality as Chang took command with a break in the opening game.

A crowd of 15,000 Austrians, many absent from work, packed the Prater Stadium to lend a loud level of vocal support. It may have helped, but it was not enough for Skoff, who simply was outplayed by his younger and higher-ranked opponent.

''Michael beat me in the most important match of my career,'' said Skoff. ''I was 100 percent motivated but I was a little nervous today. Actually I think I lost the match yesterday. I should have won the third set and wrapped it up then.

''The court was very slow today and I believe that was worse for me and better for Chang,'' he said.

(SEPT. 24) UPI - Iraq's blitzkrieg invasion of neighboring Kuwait was NO spur of the moment thing. U-S intelligence sources report Saddam Hussein had his army working on secret exercises for at last two years on a plan to sweep through Kuwait on its way to the oil fields of eastern Saudi Arabia. .

France has rejected the weekend apology of Iraq for sending its troops into the residents of the French ambassador in Kuwait 10 days ago. The Paris government said it will be satisfied only when Iraq releases three people taken in the raid as well as all the hostages that Baghdad holds.

Assistant Senate Democratic leader Alan Cranston today became the first senator to announce he'll vote against Judge David Souter for the U-S Supreme Court. In a brief Senate speech, the California senator said- quote- ''I cannot support a nominee who refuses to acknowledge that a woman's right to choose to terminate a pregnancy is a fundamental right.''

The National Abortion Federation says instances of violence against abortion clinics this year are up after a two-year lull. There were seven incidents reported in 1988. In contrast, there have been 44 reports made this year. They include eight firebombing attacks on abortion clinics around the country.

Fall is officially here and the latest edition of the Old Farmer's Almanac predicts the coming winter will be a mean one. The forecasts are based on 11-year sunspot cycles and they predict a winter that will begin early and end late. There will be more cold and more snow than usual east of the Rockies.

(SEPT. 24) UPI - NASA managers are meeting at the Kennedy Space Center today to go over plans to launch the shuttle Discovery around October 7th on a high-priority mission. Officials will be looking at the status of an Air Force Titan Continuing delays could cause problems for Discovery's launch.

The Cincinnati Contemporary Arts Center and its director went on trial today on obscenity charges for displaying photographs by Robert Mapplethorpe. Outside the courthouse, about 100 homosexual activists and censorship opponents marched and chanted, charging the indictment is motivated by homophobia.

In Norfolk, Virginia, a federal judge today ordered deadlocked jurors to try again to reach a verdict in the case of a Christian Broadcasting Network technician accused of interrupting soft-porn movies with religious messages.

The jury had sent the judge a note saying they couldn't decide whether Thomas Haynie was guilty or innocent of satellite piracy charges.

Health and Human Services Secretary Louis Sullivan says the government doesn't need more money to spend, it needs to more wisely spend the money it already has. His comments came during a weekend symposium in Tallahasee, Florida.

#90267u1072 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - Human blood was found on the clothes of a youth who ''admitted he stabbed'' a Utah tennis buff when he tried to defend his parents during a mugging on a subway platform, a prosecutor said Monday.

The alleged ringleader of a gang, Yull Gary Morales, 19, made written and videotaped confessions about the violence in Midtown Manhattan substation Sept. 2, said Assistant District Attorney Thomas Schiels.

''He admitted he stabbed Brian Watkins himself,'' Shiels said.

Some of his seven co-defendants also said Morales wielded the knife that killed Watkins, 22, who traveled to New York City with his family from Provo, Utah, to watch the U.S. Open Tennis Tournament.

The co-defendants also said Morales had the knife out before the robbery and had the weapon in his pants' pocket when he was arrested the following day, Schiels said at the arraignment in state Supreme Court in Manhattan.

Co-defendants also pegged Morales as the organizer of the mugging and said he wanted money to go dancing at Roseland Ballroom, Schiels said.

All eight youths pleaded innocent to second-degree murder, robbery and assault. All were ordered held without bail.

They were slated to return to court on Oct. 3 for a hearing before Justice Edwin Torres.

Outside court, Morales' lawyer, Joel Lutwin, said his client has ''already been convicted in the media'' and will have a tough time getting a fair trial in the highly publicized case.

''This case is going to try to the city of New York because we're going to see if we can get a fair and just trial despite the fact that my client has already been convicted in the media,'' Lutwin said.

If convicted, the suspects would face 25 years to life behind bars.

The death Sept. 2 of Watkins, who was visiting New York City with his family from Provo, Utah, to attend the U.S. Open, drew national attention.

It highlighted the plight of New Yorkers faced with increasing violence, both random and intentional and drew cries from city officials, including Mayor David Dinkins, who asked New Yorkers to reach out and help those being victimized by helping police to track down criminals.

City officials called the tragic attack an exception among visitors, however, pointing to some 20 million tourists who visit the Big Apple each year. The subway system is used by about 3.5 million riders a day.

Brian Watkins was the 18th person killed in the city's subway system this year.

The suspects include Morales, 19, who is called by the street-name ''Rockstar '' Anthony Anderson, 18, Emilo Fernandez, 17, Louis Fernando Montiero, 20, and Jonnie Hincapie, 18, all of Queens, Pascal Carpenter, 18, of Brentwood, N.Y., and Ricardo Nova, 18, and Ricardo Lopez, 18, whose addresses were still being determined.

Detectives said the youths attacked the family to get money to have a good time at Roseland, a dance hall near the midtown Manhattan subway station.

Family members, who identified the youths in line-ups, have returned to New York several times to speak out against the crime. They have promised to see the trial to the end.

One of the eight reputed street-gang members allegedly stabbed the young man in the heart after one attacker hit his mother in the face.

The incident happened on a subway platform after the family had taken a train from a tennis match in Queens.

During the attack, one mugger used a box cutter to slash the pocket of the victim's father, Sherman, 46, and grabbed $200 in a money clip. The victim and his brother, Todd, 25, were pursuing the attackers when Brian Watkins collaped on subway steps.

EAST BERLIN (SEPT. 24) UPI - East Germany formally pulled out of the Warsaw Pact Monday in advance of unification with West Germany next week.

Defense and Disarmament Minister Rainer Eppelmann and the Commander in Chief of the Warsaw Pact troops, Gen. Pyotr Luzhev, signed a document ending the participation of East German troops in the military alliance.

The East German army was the second largest army after the Soviet Union in the Warsaw Pact, which became the military counterpart to the Western allianceduring the Cold War.

East Germany's armed forces were estimated at 170,000 before last fall's ouster of the hardline Communist government, but their numbers dwindled to less that 100,000 in recent months.

About 50,000 East German troops are expected to be included in an all German army, which will have a maximum strength of 370,000 and be part of NATO. West German military officials are already training East German officers in their future duties for a united Germany. The unification date is set for Oct. 3.

The Warsaw Pact was founded in 1955 under the leadership of the Soviet Union following the rearmament of West Germany after World War II. Its military council was always headed by a Soviet commander in chief, who was in charge of all troop action in member states.

Initially, the Warsaw Pact had eight member states - Albania, Bulgaria,

Czechoslovakia, East Germany, Hungary, Poland, Romania and the Soviet Union. But recent improvements in East-West ties have prompted calls for the twoalliances to move away from Cold War doctrine and take on more political roles.

A Warsaw Pact reform commission has recommended that the military structure of the alliance be reduced by eliminating the joint military command system.

Czechoslovakia and Hungary have called for the transition of the Warsaw Pact to a political instrument for disarmament talks and negotiations with its Western counterpart.

#90267u1094 09/24/1990 ~United Press International

CHICAGO (SEPT. 24) UPI - Grain and soybean futures were mostly lower at midmorning Monday on the Chicago Board of Trade.

The lack of widespread frost during the weekend and forecasts for favorable weather this week pressured the grain market.

Early reports indicated very little frost damage during the weekend, and what damage there was apparently had been factored into the market on Friday. Traders said there should be little impact on the corn and soybean crops.

The five-day outlook from the National Weather Service calls for normal temperatures and below-normal rainfall, which would be beneficial for corn and soybeans as they approach maturity.

Corn harvest activity is expected to pick up this week as the crop dries out.

One analyst said that while the strength in foreign currencies may provide underlying support for grain prices, the perfect weather outlook could be the stronger sentiment.

Wheat futures went against the trend, and prices were mixed after one hour of trading. The rally in crude oil futures was supportive, but gains were limited by an increase in wheat seeding in the Great Plains.

The midmorning prices:

Corn Dec 2.25 off 3/4; Mar 2.34 1/4 off 1/2; May 2.40 1/4 off 1 1/4.

Soybeans Nov 6.09 3/4 off 1 3/4; Jan 6.24 1/2 off 1 3/4; Mar 6.38 1/2 off 1; May 6.47 off 1.

Wheat Dec 2.72 1/4 up 2; Mar 2.86 1/2 up 2 1/2; May 2.94 3/4 up 1 1/4.

Oats Dec 1.11 1/4 off 2; Mar 1.22 off 1 3/4; May 1.29 off 2.

#90267u1099 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - From prayers before high school football games in Alabama to state financial aid for parents of private school children in Wisconsin, Americans are testing the confused, uncertain limits of church-state separation.

A new survey released Monday by Americans United for Separation of Church and State, a group favoring strict separation of government and religion, found conflicting attitudes among the public on the volatile issue and a growing number of incidents in which the boundaries transgressed.

''Church-state relations are in turmoil,'' said Robert Maddox, executive director of Americans United. ''The Supreme Court is providing mixed guidance and seems less and less willing to uphold Thomas Jefferson's vision of a wall of separation between church and state.

''As a result, the types of problems we have seen in the states this year will only intensify,'' Maddox added.

The survey found a total of 192 church-state disputes between September 1989 and August 1990, with incidents in all but four states - Alaska, Delaware, Nevada and Wyoming. Last year, the group reported 118 incidents in just 38 states.

New York and California led the list, with 15 reported incidents. Florida followed with with 12, while Minnesota and Pennsylvania had 10 each.

Americans United divided the incidents into four categories: religion in the public schools; state endorsement of religion; public funding of religious organizations; and free exercise disputes.

Issues involving religion in the public schools were the most voluminous and widespread, with 60 incidents in 29 states, often reflecting the nearly 30-year-old drive to restore some form of state- sponosred religious observance to the public schools as well as the more recent effort by elements of the religious right wing to make ''creation science'' a part of the public school curriculum.

The conflict over church-state separation is evident in polls, according to Americans United. For example, when asked by pollsters what they think of separation of church and state, most Americans say the approve of the concept but polls also show consistently high numbers of Americans supporting such ideas as government involvement in school prayer and tax support of religious organizations.

''Clearly,'' the report said, ''many Americans have a poor understanding of the meaning of religious freedom and separation of church and state, and many do not value the freedom guaranteed to them in the First Amendment.

In pointing out the confusion caused by the Supreme Court, the study cited a pair of 1989 rulings in which the court allowed the display of a Jewish menorah and Christmas tree in front of a government building but disallowed a nativity scene creche at another government building just a block away.

Americans United said the ruling ''served only to further cloud the issue'' and it noted a host of disputes, ranging from questions about a cross atop an interfaith chapel at Arizona State University, the display of a menorah in Los Angeles' City Hall and pictures of Jesus in a federally subsidized Salvation Army emergency shelter in New Britain, Conn.

The conservative wing of the drive for educational reform is also having an impact on church-state relations as proponents of ''choice'' in mounting efforts for voucher systems or other plans that would allow parents to use tax money to send their children to private, often religious schools, rather than the public schools.

Americans United counted 44 incidents in 24 states, including California, Colorado, Connecticut, Florida, Illinois, Kansas, Kentucky, Louisiana, Massachusetts, Missouri, Nebraska, Ohio, Oregon, and Washington, involving the ''choice'' drive.

#90267u1101 09/24/1990 ~United Press International

LONDON (SEPT. 24) UPI - Britain's trade deficit fell to $2.04 billion in August, the government reported, bringing relief to markets that had been braced for a mini-''Black Monday'' after an industry survey showed Britain was heading for a recession.

The figure, released Monday by the Central Statistical Office, was the lowest monthly deficit this year, and was sharply lower than the revised July figure of $3.16 billion.

The data was significantly better than expected, and showed the value of exports had risen 4.5 percent since July to $16.05 billion, while the value of imports fell 1.5 percent to $18.15 billion.

''I would guess the overall current account deficit is now on an improving trend, and the complete figure for the whole of 1990 could be something like 15 or 16 billion (pounds),'' ($28.5 billion to $30.4 billion) said Bill Martin chief economist for UBS Phillips and Drew.

The good news pleased both equity and foreign exchange markets, and turned trading screens from a sea of red in the early morning - due to the bad news in the Confederation of British Industry monthly trends report - to showing hopeful areas of blue.

The Financial Times 100 index quickly bounced partway back from its initial downturn to stand at 2015.3, a drop of just 10 points compared with 20 points lower earlier, and the pound was over two cents higher at $1.8805, compared with $1.8575 at the day's open.

The CBI, whose monthly trends report showed British industry tipping into recession, called on Chancellor of the Exchequer John Major to ease the pressure on firms and reduce British interest rates.

But the call was rejected by Major, who said the most important issue at present was to keep inflation down.

''I think it is clear that the economy is slowing down,'' Major told London's Channel 4 in Washington, where he is attending the Group of Seven meeting of major Western industrial nations. Britain is a member of the G-7, along with the United States, Japan, West Germany, France, Italy and Canada.

''Also, it's absolutely necessary for the economy to slow down if we're going to get inflation down. That is the objective of the policy, that is the main prize for all of us to aim at,'' he said.

According to the CBI, confidence among British manufacturers is at its lowest level in eight years, with high U.K. interest rates, currently at 15 percent, squeezing industry.

Of the companies surveyed, 30 percent predicted a fall in their output and said their order books were lower than normal.

''A recession is a situation where output is falling, and our survey has been showing for several months that output is expected to fall and that deceleration has intensified,'' said Andrew Sentance of the CBI.

The CBI report suggested the government should bring interest rates down and stop looking at the present 10.6 percent inflation rate, which shows what has happened in the past, and instead look to the future.

#90267u1120 09/24/1990 ~United Press International

NEW DELHI, INDIA (SEPT. 24) UPI - A university student poured gasoline over his body and set himself ablaze in the capital Monday, the third time in less than a week that a youth has attempted self-immolation to protest a controversial federal job quota program.

The incident came as a key political backer of Prime Minister V.P. Singh issued a blunt warning to the premier, saying the government was turning hope into despair and warning that it would be wrong to presume ''our support would continue forever.''

L.K. Advani, the leader of the Bharatiya Janata Party, has been instrumental in keeping Singh's 10-month-old National Front coalition in power. He could bring down the minority government by withdrawing the BJP's parliamentary support for the premier.

Advani made his remarks during a news conference in Ahmedabad while answering questions about the government's controversial decision to reserve 27 percent of all federal jobs for members of the so-called backward classes.

The government decision to implement the job quota system in August has caused widespread violence across the northern part of the country. Youths clash with police almost daily and stage protests, block streets, hurl stones and damage buses and trains.

A student in New Delhi doused himself Monday with gasoline from his own motorcycle and set himself ablaze in front of a hospital where of youths have been holding a vigil for another university student who attempted self-immolation, police said.

S.S. Chauhan, 24, received burns over 90 percent of his body because students had formed a ring around him and authorities had difficulty breaking through to extinguish the flames, police said.

Rajiv Goswami, who attempted self-immolation Wednesday, received burns on 55 percent of his body before police intervened and smothered the flames.

Chauhan was the third student to attempt self-immolation since Wednesday. The other student set himself ablaze at the same time as Goswami but received only minor burns. In northern Haryana state, a student committed suicide Saturday by eating poison, reportedly to protest the federal quota program.

Also Monday, police fired tear gas and clubbed protesters with batons to disperse demonstrations by students in New Delhi. The youths damaged about 50 public buses while protesting the job quota decision, the Press Trust of India reported.

High-caste youths oppose the job scheme because it will restrict their ability to enter government service. They also claim it will enshrine the caste system in law, increase government inefficiency and fail to improve the social condition of the underprivileged.

Proponents of job reservation say it will give lower-caste citizens, who

represent about 54 percent of India's 830 million people, a better opportunity to obtain government employment, which traditionally has been the domain of the upper castes.

Addressing reporters in Ahmedabad, 488 miles southwest of the capital, Advani warned that the decision to implement the job quota scheme had heightened caste tensions and urged the government to consult other parties about modifying the plan.

''The government has let the people down on various issues and the hopes that had been aroused in 1989 are turning to disillusionment,'' Advani said. ''We are watching the situation very carefully as we had supported the government essentially because the last mandate had been a mandate ... for change.''

''It would be a wrong presumption that our support would continue forever in spite of everything that the government keeps doing,'' he added. ''Our support cannot be taken for granted.''

Asked to compare Singh's government with the administration of former Prime Minister Rajiv Gandhi, Advani quipped: ''In the case of Rajiv Gandhi, it took two years for the cheers to turn into jeers. In the case of the present government, it has taken only nine months.''

''We are in office today because we have struggled for certain causes,'' the prime minister told workers of his Janata Dal Party in an emotional address Sunday in the southeastern city of Madras.

''We are committed to fulfill certain aspirations of the people with the support of friendly parties. It is our duty to fulfill them and not to stick to the office. Government is not our goal,'' the Press Trust of India quoted Singh as saying.

#90267u1166 09/24/1990 ~United Press International

SOWETO, SOUTH AFRICA (SEPT. 24) UPI - Winnie Mandela, wife of black leader Nelson Mandela, was formally charged with assault and kidnapping Monday in connection with a case that involved the death of a 14-year-old boy and led to her demise as the ''mother of the nation.''

Mandela, 56, was not asked to plead during the hour-long hearing in a magistrates court and she remained free on her own recognizance pending the start of the trial before the Rand Supreme Court on Feb. 4, 1991.

Wearing a dark blue suit and white blouse, Mandela was accompanied by her 72-year-old husband, Nelson, and several dozen cheering loyalists when she arrived at the heavily guarded court in the sprawling black city.

More than a dozen uniformed policemen stood inside the courtroom.

Mrs. Mandela appeared calm and unshaken as she left her husband's side in the front row of the gallery and stepped into the dock to face four charges of assault and four of kidnapping, which carries a maximum penalty of death.

Nelson Mandela was stern-faced during the proceedings, occassionally referring to the charge sheet or touching his wife's hand when she sat next to him. The African National Congress leader has vowed to stand by his wife, noting she did the same for him during his 27 years' incarceration.

The ANC Monday noted Mrs. Mandela's court appearance in a brief statement to announce ''there will be no further comment.'' An ANC spokesman said, however, that Mrs. Mandela remained the head of the organization's social welfare department, a post to which she was appointed last month amid some controversy.

Mrs. Mandela will stand trial with two other women, including a 19- year-old who wore a school uniform to the hearing, and five men ranging in age from 17 to 61 years old.

Last week, when the attorney general announced Mrs. Mandela would face charges she said she welcomed the trial as a chance to ''clear my name.''

The case arises from the Dec. 29, 1988 abduction from a Methodist church hostel in Soweto of four youths who were taken to Mrs. mandela's home by members of the Mandela United Soccer Team, which doubled as her personal security guard.

According to state prosecutors, all four youths, including Joseph ''Stompie'' Moeketsi Seipei, were beaten by Mrs. Mandela and the seven other defendants after they were accused of having sexual relations with the white reverend.

Seipei was taken from the house three or four days later and murdered by the former ''Mandela United'' head Jerry Richardson, who was found guilty by a

court last month and sentenced to death.

Of the three other youths, one escaped from the Mandela house on Jan. 7 and two others were released on Jan. 16 during a community uproar over the incident that prompted leading anti-apartheid groups to call for Mrs. Mandela's repudiation.

According to the charge sheet, Mrs. Mandela and the others ''did unlawfully and intentionally assault (Seipei) by hitting him with open hands, clenched fists and a sjambok (whip), also by kicking him, by lifting him up and then dropping him to the floor, by trampling on him and by hitting him on his knees with intent to do grievous bodily harm.''

The prosecution listed 30 witnesses it intended to call, including the three youths who survived the abduction.

State prosecutor Chris van Vuuren sought to have the trial begin Oct. 30 in the ''public interest'' but magistrate T. F. Veldman accepted the arguments of Mrs. Mandela's attorney, Ismail Ayob, that he needed more time to prepare for the trial. He warned his client would suffer ''grave prejudice'' if the trial began next month.

Ayob also said Mrs. Mandela had prior overseas engagements with her husband in October at the long-standing ''invitation of a foreign government.''

Mrs. Mandela had long been known as a fierce anti-apartheid activist before her husband's release this year by President Frederik de Klerk. She was frequently detained by the government and served an eight- year banishment in the remote farming town of Brandfort.

Known as the ''mother of the nation'' for her consistent resistance to minority white rule, Mrs. Mandela's star began to fade in 1986 when she seemed to endorse gruesome ''necklace'' murders where victims were burned to death with gasoline-soaked tires around their necks.

The soccer team, meanwhile, became more troublesome in the community, its members accused in 1988 of molesting a school girl in an incident that prompted an arson attack on the Mandela residence.

#90267u1167 09/24/1990 ~United Press International

(SEPT. 24) UPI - France is calling for Iraq to release three people taken from the French ambassador's residence in Kuwait two weeks ago. And Paris also is calling for the release of all ''unjustly held'' hostages in Iraq. All of this comes as Iraq issues an apology for invading the ambassadorial residence. It is an apology that France rejected even before seeing the official version.

The Soviet Parliament today gave President Gorbachev new powers. Deputies voted 277-41 with 52 abstentions on a law giving Gorbachev authority to begin a transition from 70 years of central planning to a market economy. Earlier today, the Supreme Soviet once again delayed adoption of a specific plan for the transition by ordering that two radically different plans be combined into one workable program by October 15th.

White House news secretary Marlin Fitzwater has again said a presidential veto awaits any attempt to delay the October 1st deadline for Congress to come up with a budget compromise or face automatic budget cuts. And Fitzwater denies that administration support for a cut in capital gains taxes is the major stumbling block on reaching agreement over a new budget.

The first negative vote against the nomination of David Souter to the Supreme Court has been acknowledged on the Senate floor by California Democratic Senator Alan Cranston. The assistant Senate Democratic leader says he will vote against Souter because of concerns over his abortion views. Cranston has an abortion rights bill pending before the Senate.

(SEPT. 24) UPI - In New York, eight youths pleaded innocent today to second-degree murder, robbery and assault charges in the stabbing death of a Utah tennis buff on a subway platform. Prosecutors say blood was found on the clothes of the alleged ringleader of the gang. Assistant District Attorney Thomas Schields says 19-year-old Yull Gary Morales ''admitted he stabbed'' 22-year-old Brian Watkins when Watkins tried to defend his parents during a mugging in the subway September 2nd.

Just who is running Liberia is still an open question. Rebel leader Charles Taylor says he does because his forces control 90 percent of the West African nation. And he says he'll hold national elections October 10th. But Taylor says rival leader Prince Johnson will have NO place in the government because Johnson is dead. That is news to journalists who have seen Johnson in the capital city, Monrovia.

#90267u1174 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - Congressional auditors warned Monday a government agency's plans to sell the assets of failed savings and loans could be marred by fraud and corrpution.

Richard Bowsher, the Comptroller General of the United States, said the Resolution Trust Corp., has yet to develop a plan for its ''highly decentralized'' regional offices to monitor lawyers, accountants and others contracted to work on the deals.

He also said that the RTC is on a General Accounting Office list of federal agencies that present ''the biggest worries in terms of fraud, waste and abuse.''

''RTC has not set up a viable contract administration structure to effectively monitor the executions of its contracts,'' Bowsher reported in testimony to a Senate subcommittee on government affairs.

Citing an investigation by the GAO, he said, ''We found no detailed instructions, procedures or other guidance to help regional personnel monitor the activities of contractors.''

''RTC estimates that about 1,700 RTC employees will be involved in monitoring contract performance, and many of these individuals will be new to RTC and the government,'' he said. ''We believe more specific guidance will be necessary to ensure that contracts are monitored in a consistent and effective manner by RTC's decentralized organization.''

In testimony to the panel, John Adair, inspector general of the RTC agreed his agency's ''necessarily heavy reliance on private sector expertise makes it very susceptible to problems comparable to those encountered by other federal agencies.''

But Bowsher acknowledged that despite this lack of controls, the RTC ''has made progress'' in its effort to carefully dispose of the assets of failed thrifts, from shopping centers to office towers.

Sen. David Pryor, D-Ark., chairman of the subcommittee, also expressed concern over the potential for fraud and corruption, noting that the RTC has asked for $800 million to pay contractor fees in fiscal 1992.

''The RTC is just a little over a year old and faces formidible obstacles in disposing of great quantities of assets,'' Pryor said.

''This makes it crucial for the RTC to have a contracting system which will weed out people or firms who were involved with failed thrifts, prevent contractors from arranging sweetheart deals with their old buddies, and ensure that the contracts are as low-cost and efficient as possible,'' he said.

#90267u1186 09/24/1990 ~United Press International

KHARTOUM, SUDAN (SEPT. 24) UPI - The Organization of African Unity warned Monday the so-called ''donor fatigue syndrome'' is endangering Africa's huge and growing refugee population.

Winding up a three-day session on the problem in the Sudanese capital Khartoum the OAU's 15-nation refugee committee issued a statement saying the refugee crisis ''has reached unmanageable proportions.''

It warned there was ''declining political will on the part of some of the traditional donors ... (resulting in) the tendency of funding life- saving and life-sustaining activities to the detriment of medium- and long-term development projects.''

It said donors from the developed world were tiring of helping refugees just as the problem was reaching a crisis point.

''We call upon the international community to redouble its efforts in providing both material and financial assistance as well as moral support to the OAU and its constituent member states,'' it said.

Africa has nearly three-quarters of the world's refugees and displaced persons according to the U.N. High Commission for Refugees. Estimates show about 6 million people across the continent have refugee status outside their own countries, while an estimated 12 million people are displaced within their own lands.

Most of the refugees are the product of wars, civil wars and resultant famines

in Angola, Chad, Ethiopia, Mozambique, Somalia, Sudan, Uganda and most recently Liberia.

One in five people of Liberia's 2.5 million population has fled the country this year because of the brutal civil war raging there.

The OAU committee headed by Ethiopian Yalmi Tadessa concluded its talks by issuing a six-page ''Khartoum Declaration on Africa's Refugee Crisis,'' intended as a working document for the UNHCR, which meets in emergency session in Geneva next week.

The 51-nation OAU is a cooperative body for mutual African development set up in 1963.

#90267u1203 09/24/1990 ~United Press International

BOSTON (SEPT. 24) UPI - Members of Carol DiMaiti Stuart's family said Monday they are distressed about a network television movie to be aired Tuesday night about her murder, a bizarre case that captured national attention a year ago.

''We are distressed that CBS is broadcasting a made-for-tv movie about Carol's tragic death at this time,'' the family said in a statement.

''It is very disturbing to us that a made-for-tv movie about our daughter and sister's life and death can be made without our consent or participation, and

that such a movie is being broadcast while there is still a sitting grand jury before anyone, even our family, knows the outcome of the criminal investigation.''

Carol DiMaiti Stuart was shot to death Oct. 23 after she and her husband Charles left a hospital birthing class. Her husband, also shot, called the police 911 emergency number over his car phone and later told ambulance attendants a black gunman had done the shooting. His son, born by Caesarean section just before his wife died, also died 17 days later.

Charles Stuart committed suicide Jan. 4 as police sought to arrest him for the slaying.

A movie about the bizarre murder case - ''Good Night, Sweet Wife: A Murder in Boston'' - will have its broadcast premiere Tuesday night.

''This movie sets a dangerous precedent for any innocent individual or family whose life is touched by tragedy to lose all rights to privacy - not simply legitimate news accounts, but to those who utilize the story for entertainment and profit,'' the statement said.

The DiMaiti family urged those who will profit from the production, including advertisers, ''to donate a substantial portion of the proceeds to the Carol DiMaiti Stuart Foundation.''

The foundation was founded by the family to provide scholarships in her memory in an effort to heal racial wounds opened in Boston's Mission Hill neighborhood where the killing took place.

Thirty-three area residents have already been named as recipients of scholarships from the fund.

The DiMaiti family said it understood there would be renewed media interest in the case as its first-year anniversary approaches, but said it hoped the privacy of family members would be respected.

''It has been particularly painful for us to have to endure our grief in the public eye,'' the family said in the statement. ''The broadcast of this movie with the upcoming anniversary of Carol's death and a lack of resolution in the courts makes this time especially difficult for us.''

#90267u1209 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - American troops in Saudi Arabia, fighting to beat the boredom of long, hot desert days, soon may have at least one comfort of home - television.

Plans are being laid to bring news, sports and entertainment shows to troops taking part in Operation Desert Shield, and the U.S. military is ironing out final details with Saudi authorities, said Lt. Col. David MacNamee of the Armed Forces Radio and Television Service.

The programming will be an extension of the non-commercial TV already broadcast to U.S. troops stationed in Germany, South Korea and the Philippines he said.

''We're trying to get it on as soon as we can,'' MacNamee said. ''As soon as we get the programs and the equipment in and get approval, we'll be up and on the air.''

The most daunting task is moving equipment, especially TV sets, to the Persian Gulf area. A thousand sets are waiting to be shipped from a Sacramento, Calif. depot, MacNamee said.

Also waiting to be airlifted into the Middle East are vans to be used to produce local programming, such as weather reports, or to air information specific to troops in Saudi Arabia, MacNamee said.

Only one van has been shipped to Saudi Arabia so far, he said.

''Physically getting things into the country right now is our biggest interest '' MacNamee said. ''We're waiting our turn in line to get things over there and set them up.''

The first priority was to establish radio broadcasts, which began last week, he said.

''Radio is a lot simpler,'' he said. ''You can hand out thousands of hand-held pocket radios. Televisions are a little more difficult.

''Of course, everyone would like to see the World Series and NFL games on television,'' he added.

Television shows broadcast to U.S. troops in Saudi Arabia will be similar to those going to U.S. armed forces elswhere, despite the deep cultural differences with Saudis on such issues as alcohol consumption and women's rights, he said.

The shows include prime-time situation comedies, ''The Today Show'' and soap operas, he said.

Several American shows already are broadcast on Saudi television, and Armed Forces television does not run the type of 'R-rated' programming such as that shown on some American cable stations, he noted.

''What we produce is the things you see on normal channels at night,'' he said. ''Most of that wouldn't be a significant problem over there.''

Besides, he added, North American and Saudi television sets are not technically compatible, meaning few Saudis would be privy to what is broadcast he said.

Signals for shows viewed by U.S. troops overseas are sent by satellite from facilities in Southern California, MacNamee said.

#90267u1217 09/24/1990 ~United Press International

NEW DELHI, INDIA (SEPT. 24) UPI - From the exotic deserts of Rajasthan to the dense jungles of Assam, mothers with yowling youngsters are lining up at clinics and makeshift camps to immunize their babies to polio, diphtheria and measles.

The youngsters are part of a program to innoculate every child in the country under the age of 12 months by the end of 1990, and Indian health officials say they are racing to meet the goal. India has about 25 million infants under a year of age in its population of 830 million people.

''We will come very close,'' Dr. Sobhan Sarkar, an assistant commissioner in the Indian Health Ministry. ''Maybe we will fall short on the measles and tetanus, but this will be just marginal.''

The immunization program is particularly important in reducing the death rate among newborn children. Indian has one of the world's highest infant mortality rates, 96 per 1,000 births.

The immunization program already has dramatically reduced the polio death rate in India, which still accounts for a large percentage of the world's polio cases. The number of polio cases reported among children from birth to 12 months in 1987 was 28,250, compared with 10,336 in 1989.

Measles cases in the same age group dropped from 233,981 in 1987 to 144,395 in 1989 and diphtheria cases declined from 12,924 to 8,459 in the same period.

''I am a clinician by training, not a public health man,'' Sarkar said. ''But if I can reduce polio cases by just two each day, I've earned my day's bread.''

Implementing the immunization program has not been easy. In a country where only 40 percent of the people can be reached by television, informing parents about the importance of immunization has been a problem.

And Sarkar says communication is the key to the program's success. ''If we build a castle but have no one to use it, what good is it?'' he asked.

Health officials have used graffiti and wall paintings in some areas to communicate their message, but Sarkar said the most effective way to reach parents is to send a person to talk to them, a project that has been undertaken by volunteers.

Another problem faced by health officials has been the delivery of temperature-sensitive vaccines to remote areas of the country where refrigerators are often not available, and even when they are, power failures frequently render them useless.

In India's summer heat, which often rises above 110 degrees Farenheit, the vaccines would quickly spoil without refrigeration, so officials designed a low-tech system to maintain the quality of the vaccines.

''The cold chain is actually very beautifully planned,'' Sarkar said.

Vaccines are distributed to regional storage points where refrigeration and electrical supplies are assured. On vaccination days in remote villages, the vaccines are dispatched in specially made polyeurathane containers packed in ice.

The so-called cold boxes can maintain the vaccines at cool temperatures for three days. The beauty of the system, health officials said, is that it takes into account the uncertainty and inefficiency of Indian life rather than requiring an unrealistic change of habits.

Such planning has helped push the program very near its goal of immunizing all pregnant mothers for tetanus and all children under 12 months of age for measles, diphtheria, polio and other common diseases.

But while the goal is near, authorities say they may still fall short in some areas. As a result, health officials have scheduled three ''mopping-up'' days between now and the end of the year in a bid to reach as many people as possible before the deadline expires.

On those days, volunteers from organizations such as Rotary clubs will identify and bring children from their areas to clinics and makeshift camps around the to have their injections.

But regardless of whether health officials meet their targets, the immunization program has been a success.

''This program to me has become a religion,'' said Sarkar. ''It's really a very solid program and if we can continue the effort we can really have an impact.''

#90267u1241 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - Notre Dame's fantastic finishes aren't impressing those who vote in the United Press International college football ratings.

Two close victories in as many games this season have taken some of the luster off the Golden Dome, with the Irish finishing only two points ahead of No. 2 Florida State in Sunday's balloting by the UPI Board of Coaches.

Notre Dame received 34 of 54 first-place votes from the 59-member board and finished with 746 points. The Seminoles were at the top of 13 ballots and wound up with 744 points.

''We're really not even a top 10 football team at this point,'' Notre Dame Coach Lou Holtz said. ''I've said that all along. I don't worry about any polls or bowls, I just worry about making us a better football team.''

The Irish struggled against Michigan and Michigan State, both times pulling out victories in the final two minutes. Last Saturday against Michigan State, Notre Dame needed two touchdowns in the final quarter for a 20-19 victory. Rodney Culver scored the winning touchdown on a 1- yard run with 34 seconds left.

Meanwhile, Florida State has rolled past East Carolina, Georgia Southern and Tulane, winning by an average margin of 27 points.

''Our opposition has not been like Notre Dame's,'' Florida State Coach Bobby Bowden said. ''(Notre Dame) came back miraculously in both their games. We just beat teams we were favored over and did what the spread said we would do.''

Auburn received four first-place votes to remain third, while No. 4 Brigham Young was at the top of two ballots after its 42-34 victory over San Diego State.

Idle Tennessee moved up one spot to fifth in the wake of Southern Cal's loss to Washington, and No. 6 Nebraska received the final first- place vote in advancing one place.

No. 7 Michigan rebounded three places after a 38-15 victory over UCLA, while No. 8 Virginia and No. 9 Miami exchanged places. Texas A&M broke into the top 10 following a 40-8 triumph over North Texas.

No. 11 Washington advanced five places after its 31-0 whitewashing of Southern Cal, while Ohio State stayed at No. 12. No. 13 Arizona moved up one place and No. 14 Southern Cal took a nine-position fall after being shut out for the first time since 1985.

No. 15 Illinois and No. 16 Colorado advanced two places, and No. 17 Florida dropped two spots despite beating Furman 27-3. No. 18 Clemson moved up one place.

No. 19 Fresno State cracked the top 20 for the first time since 1986, and No. 20 Michigan State advanced three places despite having yet to win.

Mississippi, which upset Arkansas 21-17, broke into the ratings and wound up tied for 21st with the Razorbacks. There also was a tie for 23rd between Arizona State and newcomer Wyoming. No. 25 Iowa also cracked the poll for the first time this season.

Falling out of the ratings were Texas, Oregon and Syracuse.

No. 17 Florida, banned last week by the NCAA from postseason play, remains eligible for the ratings while the school considers whether to appeal the ruling.

#90267u1247 09/24/1990 ~United Press International

HOUSTON (SEPT. 24) UPI - Clarence Brandley has gone from death row to the pulpit.

Brandley, 38, made his public preaching debut Sunday night at his family's Baptist church.

Brandley was released from death row after nine years Jan. 23 on $75,000 bond after the Texas Court of Criminal Appeals reversed his 1980 murder conviction.

''God will answer your prayers but you have to have faith and believe that God will answer those prayers,'' Brandley, 38, said during his sermon at Creston Missionary Baptist Church, where he received a standing ovation. ''You need one more thing, too, and that's patience.''

Before the church service, Brandley told reporters his decision to enter the ministry was made in prison several years ago.

''It was like a vision,'' Brandley said. ''His voice was calling out to me. It happened three nights in a row. That's when I knew that God had a plan for me. He has really blessed me.''

Brandley was convicted of capital murder in the rape and strangulation of Cheryl Dee Fergusen, 16, a manager for the Bellville volleyball team. She was killed while attending a volleyball tournament at Conroe High School where Brandley was a janitor.

In its reversal, the appeals court cited racial discrimination and

intimidation tactics on the part of investigators. Brandley and his supporters always claimed he was innocent although prosecutors insisted they convicted the right man.

No re-trial is planned in Brandley's case but the Supreme Court could choose to review the case next month.

Since his release from prison, Brandley said he returned to school to become an electrician and has been invited to speak in about 25 churches.

He wore a white suit, white shirt and blue striped tie as he faced more than 100 churchgoers Sunday amid the glare of television lights and newspaper camera flashes.

Brandley preached on prayer from Acts 12:5: ''So Peter was kept in prison but earnest prayer for him was made to God by the church.''

-30- 2181

#90267u1261 09/24/1990 ~United Press International

WITH U.S. FORCES IN SAUDI ARABIA (SEPT. 24) UPI - Capt. Cynthia Mosley thinks the battle of the sexes has been resolved without winners or losers in her tent, where men and women soldiers sleep together but still respect privacy and observe strict military rules forbidding intimate relations.

''At the moment we are all sharing it until we get another tent,'' said Mosley 29, of Mobile, Ala., standing inside the billowing camouflaged structure, in which eight men and three women live, work and rest.

''My soldiers, they are close, but we don't have any problems,'' she said, explaining that all are obliged to wear clothes when they sleep on individual cots. ''They conduct themselves in an orderly fashion.''

The army forbids ''fraternization'' between its enlisted personnel because of the possible complications romance could ignite in a war situation, and always tries to keep living quarters segregated.

During a visit Monday to the 24th support battalion, various men and women interviewed said the tricky meld between the sexes had largely been resolved in the forward base, which has 84 women among its 380 personnel employed in providing supplies and logistics for frontline U.S. armored positions.

Male soldiers when approaching tents announced their arrival before entering, and female troopers - dressed in full combat gear and armed with M-16 assault rifles - said their privacy was respected.

The higher proportions of women compared to other units, which if combatant must be strictly male, required the military to have some flexibility should

love blossom.

Romance is forbidden between people in the same unit, and any would- be lovers are obliged to confess to their superiors, who will then if possible, transfer one of the couple to another unit.

''It only becomes a problem if they are in the same rating chain or section,'' explained Sgt. Maj. Steve Carney, who said during his 23 years of service the army had developed from an all-male institution to one that now largely accepts women. ''If the mission permits, I will try and get him or her transferred to another section, but the problem has only arisen once or twice.''

The army frowns on any liasons between the officers and the ranks because it does not wish to see authority undermined.

The base was set in a bleak stretch of desert behind American and Arab lines assembled against Iraqi troops in Kuwait, some 100 miles distant, and several soldiers said the inclusion of a large number of women was not even an issue.

''Romance? Here?,'' asked an incredulous Spec. Saul Urdiales, 24, of San Antonio, Tex. ''You don't have nowhere romantic to go.''

But some men had an evident paternal feeling towards their female comrades, a factor that has concerned analysts who believe men may neglect their duty in life-threatening situations because of natural instincts of protecting women.

''Whenever we do something, we do it together,'' said Urdiales, whose ''buddy '' or assigned partner, is a woman.

''If anything happens, I have to keep her alive,'' he said. ''Before we came, I spoke to her parents, and I told them I would take care of her out here.''

But Urdiales' buddy, Pvt. Michelle Komo, 20, of Fulton, Mass., believed she was more than treated as an equal.

''The guys around here won't let me get lazy,'' said Komo, wearing a kevlar-fortified helmet. ''we do all the same jobs. I fill sandbags, dig holes. Real fun stuff.''

The women soldiers said their main problems had occurred in minimal contacts with Saudi men, who are not used to seeing females in the workplace.

Mosley said Saudi truck drivers had refused to take orders from her when she had been instructed to lead a convoy, and that the U.S. military had bowed to local custom and replaced her with a man.

''That was devastating ... shocking,'' she said. ''(Saudi men) seem to have

realized now that we are here to stay and are getting used to us. But I don't think it will have any major impact on their society.''

-30- 4242

#90267u1265 09/24/1990 ~United Press International

PRINCETON, NJ (SEPT. 24) UPI - Spurred by record tobacco exports, the U.S. tobacco industry recorded a 1990 first-half trade surplus of $2.49 billion, up 28 percent from $1.94 billion a year earlier, the Tobacco Merchants Association said Monday.

By comparison, the country's total merchandise trade deficit for the first six months of 1990 amounted to more than $41.1 billion.

The tobacco surplus was led by product exports valued at $2.19 billion, including shipments of more than 73.7 billion cigarettes valued at $2 billion, the association said. During the period, the United States imported $59 million worth of finished tobacco products.

Belgium and Japan were the leading markets for American-made cigarettes, accounting for 29.4 percent and 28.7 percent, respectively. Other major destinations for U.S. cigarettes include Hong Kong, United Arab Emirates, Saudi Arabia, Singapore, South Korea and Taiwan.

The recent lowering of trade barriers by a number of government-owned and operated monopolies is contributing to a bright outlook for U.S. leaf tobacco farmers, said Thomas C. Slane, the association's vice president of economic programs.

When U.S. cigarettes enter a foreign market, domestic producers are often forced to improve the quality of their products to compete with U.S. brands, he said. This requires them to buy higher quality leaf including U.S. leaf.

''We are just now beginning to see some of the gains which will be made by U.S. leaf tobacco farmers as they broaden their share of the consumers markets in these countries,'' he said.

-30- 1782

#90267u1267 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - Turkish President Turgut Ozal said Monday the embargo against Iraq will almost certainly solve the gulf crisis and that threats of war by Iraqi President Saddam Hussein are rhetoric.

Asked if Turkey would commit its 800,000-man army to military action against Iraq, Ozal, who is in the United States to meet with President Bush on Tuesday said on the Cable News Network ''90 percent to 95 percent of the situation can be solved through embargo.''

He called recent Iraqi war threats an ''exaggeration'' that proves the economic embargo is working. ''The effect of the embargo is working, '' he said. ''Otherwise they don't put out such a (warlike) statement. It's rhetoric.

''In the newspapers they say (Iraq) has so big an army,'' Ozal said. ''And I don't believe it. That they have so many missiles. And gas. And they talk about biological and nuclear (weapons). But I don't believe it. It's too much exaggeration, in my opinion.

''But it may be true. You have to act with caution.

''The war is a dangerous thing,'' he said. ''I accept it as a last resort, if it has to be.''

Ozal denied he is seeking U.S. aid, saying that since a 1985 visit with President Reagan, Turkey has sought ''trade not aid.''

#90267u1279 09/24/1990 ~United Press International

MIAMI (SEPT. 24) UPI - A tropical depression strengthened into Tropical Storm Josephine in the open Atlantic Monday but forecasters predicted it would pose little threat to land.

At noon EDT, Josephine was centered near latitude 19.7 north, longitude 34.2 west, or about 725 miles west-northwest of the Cape Verde Islands.

The storm was drifting north-northwest near 3 mph and forecasters at the National Hurricane Center in Miami predicted it would continue that motion for the next 24 hours. That course would keep it well away from land, with virtually nothing in its path all the way to Greenland.

Josephine was upgraded to a minimal tropical storm at noon Monday when satellite photos indicated its sustained winds had reached 40 mph, just one mph over the tropical storm threshold. Forecasters said little change in strength was likely Monday.

Tropical storm-force winds extended up to 145 miles to the north and 60 miles south of the center.

Josephine is the 10th named storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30.

It grew from a tropical depression, No. 12, that forecasters had been monitoring since late last week.

Another system, tropical depression No. 11, dissipated Sunday east- northeast

of the Leeward Islands.

#90267u1296 09/24/1990 ~United Press International

(SEPT. 24) UPI - Jordan's King Hussein says he'll continue his efforts to keep the hounds of war away from the Mideast. The monarch, writing in the British publication The Guardian, says such a conflict would only create the very instability it is designed to prevent. And he fears the results will only be a replay of 1914 when the world was slowly pulled into the horror that became World War One.

Improvements in relations with South Africa were high on the agenda this morning as President Bush held meetings at the White House with South African President de Klerk. Bush already has said the reforms enacted by de Klerk in the past year have put South Africa on the long road to democratic rule. Relations between the two countries have been less than cordial because of South Africa's official policy of racial separation.

Formal charges of assault and kidnapping have been lodged by South African prosecutors against Winnie Mandela, wife of black leader Nelson Mandela. She was NOT asked to enter any plea during the hour-long court proceedings, and she remains free under her own recognizance. A trial date for Mrs. Mandela has been set for February 4th. The charges concern the 1988 abduction of four black youths. One later died.

East Germany formally pulled out of the Warsaw Pact today. The move comes ahead of unification with West Germany next week. The East German Defense and Disarmament minister and the Commander in Chief of the Warsaw Pact troops signed a document ending the participation of East German troops in the military alliance. The East German army was the second largest in the Warsaw Pact, after the Soviet Union.

SOWETO, SOUTH AFRICA (SEPT. 24) UPI - Residents of Soweto ended a 5-year-old rent and utilities boycott in the nation's largest black township Monday, but a police crackdown on violence threatened to ruin the accord and the prospects of other townships following suit.

Provincial officials, local authorities and civic leaders signed an accord sealing the deal for Soweto's 2 million residents to begin making rent and utility payments again in exchange for having arrears equal to $200 million written off.

The rent boycott, which began in 1985 as a protest over grim living conditions in townships in the industrial belt surrounding Johannesburg and satellite

cities, eventually engulfed 50 townships and as many as 45 are still refusing payments.

In Soweto, following more than a year of negotiations, civic leaders last month agreed to call off the boycott, a decision government officials hoped would convince other townships to do the same after piling up a total debt of more than $778 million.

In a growing sign of the impatience of local authorities in recent weeks, at least three townships have had electricity and water cut.

The Soweto accord showed signs of strain within minutes of its signing. The representative of a key party to the agreement, the Soweto People's Delegation blasted the government's security clampdown.

The military-style security measures were imposed a week ago in Soweto and other townships to crush a wave of urban black violence that has left nearly 800 people dead. Security forces are scheduled to impose a 9 p.m. to 4 a.m. curfew from Tuesday in a move the African National Congress denounced as ''a license to the police to hunt people as if they are game.''

''It must be said that the residents are under threat,'' said SPD delegate leader Patrick Lephonya.

''We are not saying the curfew will definitely destroy this agreement, but it can very easily do so... the residents will decide if they want to resume the boycott as a result.''

Lephonya said the SPD, one of five organizations which signed the accord, ''agrees wholeheartedly with the ANC's sentiments on this issue.'' He noted his group ''can not be regarded as friends with the others just because we have all signed.''

Other signatories are the Transvaal Provincial Administration, and the city councils of Soweto and its satellite towns of Diepmeadow and Dobsonville.

The councils are government-constituted, and are regarded as puppet groups by the SPD and other anti-apartheid bodies.

Other councils of boycotting townships have either not been able to convince residents to pay or have agreed with the strategy.

Township residents claim the services they receive are often not worth the payments required and are sometimes administered by officials insensitive to the needs of poverty-stricken residents.

But Planning and Provincial Affairs Minister Hernus Kriel said last month that regardless of the arguments against payment, the government could no longer

finance utilities hit by the boycott and would stop paying for services provided.

JACKSONVILLE, FL (SEPT. 24) UPI - Florida's attorney general sued five chlorine repackagers and a distributor Monday, claiming they rigged bids in order to charge inflated prices to 117 cities, counties and water authorities.

In a civil anti-trust complaint filed in U.S. District Court, Attorney General Bob Butterworth sought to triple the damages to be determined by a jury, plus civil penalties of $1 million per violation.

He alleged that the companies conspired to rig contract bids on the sale of repackaged chlorine used to treat water, wastewater and swimming pools. Repackaged chlorine is purchased from manufacturers in tank car quantities, then packed in containers for resale.

Butterworth estimated the alleged scheme cost the government entities at least $1 million in overcharges in 1979 and 1980, and from 1983 to 1988.

The antitrust suit was filed against Jones Chemicals Inc. of LeRoy, N.Y.; Harcross Chemicals Inc. of Kansas City, Kan.; Van Waters & Rogers Inc. of Seattle; Allied Universal Corp. of Miami; P.B. & S. Chemical Co. of Henderson, Ky.; and Jeffrey L. Champagne, doing business as Chemicals Inc., of Ozone, Fla.

Butterworth said unidentified co-conspirators may be added to the complaint as the investigation continues.

He said the defendants submitted complementary, non-competitive bids on government contracts as a means of dividing the contracts among themselves. As a result, the governments paid inflated prices on the approximately 20,000 tons of repackaged chlorine they purchased annually, the official said.

Butterworth noted that the price of repackaged chlorine had dropped from $375 a ton to about $140 per ton since the attorney general's investigation began in August 1988.

(SEPT. 24) UPI - A third student in India set himself afire to protest a controversial program that reserves more jobs for lower-caste Indians who have been kept from the positions in the past. The latest incident occurred in front of a New Delhi hospital. The youth suffered burns on 90 percent of his body. High-caste Indian youths have demonstrated against the jobs program, saying the quotas will only keep them from getting the jobs they deserve.

Forecasters at the National Hurricane Center in Miami are keeping their eyes on a tropical storm centered about 725 miles northwest of the Cape Verde Islands. Tropical Storm Josephine is drifting toward the north-northwest at nearly three miles an hour with winds near 40 miles an hour. Forecasters say little change in strength is likely during the next 24 hours.

CAIRO, EGYPT (SEPT. 24) UPI - A group of Egyptian doctors who recently returned from Kuwait said Monday the occupied emirate's health system is in tatters after the Iraqi invasion and reported Iraqi soldiers who self-inflicted wounds to avoid combat.

The six Egyptian doctors also told reporters at a Kuwaiti-organized news conference that some American and British doctors remain in Kuwait but are in hiding, changing their hiding places regularly to avoid capture by Iraqi troops and detention as hostages.

''Most American and British doctors have already left Kuwait following the Iraqi invasion,'' said Dr. Farid Ghezawi, an allergy specialist. ''But a number of Western doctors are still hiding and changing their places on a daily basis.''

One Egyptian doctor at Kuwait's El Addan hospital said he helped treat about 200 Iraqi soldiers, many of whom were suffering from self- inflicted wounds.

''About 200 Iraqi soldiers, including a number of Iraqi Kurds, were admitted to the hospital over a period of three weeks after the invasion,'' said Dr. Mohammed Lutfi.

''A number of these soldiers injured themselves on purpose hoping to be discharged from service,'' Lufti said. ''Most of these Kurds are not trained and some of them were injured as a result of being unable to use the weapons at their disposal.''

Another doctor said Iraqi troops threw terminal patients out of intensive care units and removed new-born babies from incubators, leaving them to die.

''The Iraqi soldiers entered the hospital and removed terminal patients from their wards, even removing new-born babies from incubators and leaving them to die,'' said Dr. Yehia Mohamed Ahmed, who worked as an anaesthetist at Kuwait's El Jahra general hospital.

''Priority is given to the Iraqi soldiers but operations at the hospital have now stopped,'' Ghezawi said. ''Even cancer patients were taken out of the hospital and most of them died as a result.''

''We were working without any guarantees the Iraqi soldiers would not attack us, and some doctors were attacked,'' said Dr. Ibrahim el Siyyad, an Egyptian dermatologist.

''Mentally-retarded children and patients receiving psychiatric treatment at one of the hospitals were deprived of food and handicapped patients were thrown out,'' El Siyyad said. ''Even pregnant Kuwaiti women were not admitted to hospitals to deliver their babies.''

Ahmed said Iraqi troops wanted to use the hospitals as army barracks and transport advanced equipment to Iraq.

''The Iraqis wanted to use the hospital as a barracks and remove advanced medical equipment to Iraq,'' Ahmed told reporters. ''They stole the food of the patients and these people are dying from lack of food, not because of a shortage of medicine.''

#90267u1328 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - As the last American evacuees headed to their homes in the United States, the State Department said Monday that some 1,000 Americans, including 69 with serious medical problems, remain in Iraq and Kuwait against their will.

According to the State Department's count, over 1,900 U.S. citizens and dependents - mainly women and children - were evacuated to the United States by chartered flights. That included 100 on the last planned charter, which arrived in the United States late Sunday.

Left behind, according to the U.S. estimates, are 600 to 700 Americans in Kuwait and another 300 to 350 in Iraq. The total figure includes more than 50 U.S. diplomats, mainly in Baghdad.

The total also includes at least 93 American men known to have been rounded up by Iraqi authorities. One was picked up Saturday by the Iraqis as he tried to board the last evacuation flight in Kuwait. The detainees are now being held at unknown locations, presumably as human shields around potential military and industrial targets in Kuwait and Iraq.

The list also includes 69 men known to have serious medical problems, the State Department said. None of those 69 was allowed to leave, despite protests from the U.S. government. At least one of those 69 people is among the 93 men rounded up by Iraqi authorities, the State Department said.

Most of the remaining American men, according State Department spokeswoman Margaret Tutwiler are in hiding from Iraqi authorities. She refused to say how

many of the approximately 1,000 remaining Americans are males, in order not to give the Iraqi authorities any help in rounding them up. Some of the Americans left behind are known to be women who chose not to leave without their husbands.

At the time of the Iraqi invasion, there were thought to have been about 3,000 Americans in Kuwait and another 580 in Iraq, or a total of about 3,580.

Of those, according to the State Department, 1,900 were evacuated aboard charter flights, with another approximately 1,000 people remaining in Iraq and Kuwait.

Those totals would suggest that almost 700 Americans managed to make their way out of Kuwait via the hazardous overland route to Saudi Arbia, through Iraqi lines.

#90267u1348 09/24/1990 ~United Press International

BEIJING (SEPT. 24) UPI - Freewheeling Asian Games athletes are finding the Chinese penchant for ultra-tight security hard to take.

They are cut off from friends representing other countries in the athletes' village, and without even so much as a glass of wine for solace. Boredom is turning into an epidemic.

''It's a bit like a prison, because there is nothing to do except eat, sleep and prepare for the next training session,'' Hong Kong gymnastics coach Jim Wilson said.

''It's important to be able to relax when you get back to the village. But after you've had something to eat, there is nothing to do.''

The Chinese are particularly proud of the 14 apartment blocks erected in the last three years to lodge the 6,500 participants from 37 nations and territories competing in the first international multi-sports competition hosted by Beijing.

They brag the menus accommodate the dictates of all religions represented, particularly the Moslem faith, and the village leisure complex features video arcades, swimming pools and a water slide.

The Beijing Theatre, located just outside the entrance to serve the village occupants, offers opera, acrobatics and such films as, ''A Bible for Daughters '' ''Me and My Classmates'' and ''The Heavenly Drum.''

Such diversions pale however for those recalling the swinging discos available at the 1988 Seoul Olympics, the stream of daytime entertainers cheering up

losers with unwanted time on their hands, spirits in the rooms and the easy availability of fellow athletes from other countries.

Min Fangda, chief of the Public Order Division in the village, said: ''We have seized hundreds of bottles of wines and liquors, but we did not confiscate them. Instead, we stored them and gave the owners a receipt so they can have them back when they leave.''

He stressed the prohibition against alcohol went along with the ban against inflammables, explosives, weapons, knives and poisons.

Min acknowledged athletes have complained they cannot visit friends from other nations in different parts of the village, which has three living sections all separated from each other by fences and guarded by armed police.

To ensure the inhabitants have sufficient rest, the apartments lack telephones television sets or videocasette recorders.

Athletes have nothing but praise for the sports venues, built at a tab of $530 million.

''The facilities and equipment are brilliant, as good as any top competition in the world,'' Wilson said. ''You can go out of the village, but a lot of the athletes don't particularly want to do that.''

Some have been warned not to venture into Beijing at night. Charouch Arirachakaran, Thailand's chief of mission at the games, urged the team not to leave the village.

''I hope all athletes return immediately after their events are over, '' Charouch said, cautioning against sightseeing and other non-sports related activities.

Charouch said he made the recommendation out of fear the escalating tensions in the Middle East would affect the games. The Olympic Council of Asia voted last week to bar Iraq from the extravaganza because of its invasion of Kuwait and suspended Baghdad's membership in the council.

The toughest security since the lifting of martial law in January is in effect in the city. Anxious to present a harmonious facade in the wake of last year's tumultuous pro-democracy protests, official figures have placed the number of security officers at 30,000.

Not everyone is concerned about inadequate amusement at the village. Swimmers from Lebanon said they are having enough problems adjusting to an Olympic-size pool, 50 meters long.

''We don't have any back home,'' team member Emile Lahoud said. ''All of ours

are too small.''

One of the busiest spots is the village laundry. For athletes like Omar Hakim Khalid of Pakistan, learning to use an automatic washing machine and dryer has provided an unexpected diversion.

Omar, 20, listened intently as the Chinese attendent explained the maneuvers. With 110 washing machines, 30 dryers and ample staff on hand to help with instructions, another cheerful novice commented: ''It's the most popular place in the village.''

#90267u1354 09/24/1990 ~United Press International

DETROIT (SEPT. 24) UPI - A top Toyota Motor Sales U.S.A. executive said Monday the general decline in industry sales and the economy could cause Toyota to do even better in meeting its goal of commanding 10 percent of the U.S. car market by the mid-1990s.

''We had talked about 10 percent by the mid-1990s,'' Bob McCurry, executive vice president of the Toyota Motor Corp. subsidiary, said during a new model preview in Detroit, where Toyota unveiled its first all-new Tercel subcompact car in four years. ''But in a down market we have the opportunity to do better.''

McCurry explained that strong owner loyalty to the Toyota name and high North American production capacity will help it push toward that goal or poossibly even exceed it, although he declined to be more specific.

Toyota's share of the U.S. car market through August stood at 9.2 percent, including 0.6 percent from the Japanese manufacturer's Lexus luxury car division. This is up from a total share of 6.8 percent for the first eight months of 1989, before the Lexus line was introduced.

McCurry said Toyota is still on track to sell 1.5 million vehicles by the mid-1990s, more than 50 percent of which would be built in North America. This compares with 30 percent currently.

But he said that recent reports about Toyota building a second assembly plant in the United States are premature and that a decision on whether to proceed with a second plant is still several months away. ''That has still not been decided, but it has to be done,'' he said.

The Tercel marks Toyota's sixth new model introduction in 18 months, with McCurry saying the new car shows ''low price does not have to rhyme with sacrifice.''

Prices on the 1991 Tercel, to go on sale next month, will begin at $6,488 for

the two-door model, which is unchanged from the 1990 price. A four-door sedan, which replaces the three-door hatchback, will start at $7,898.

Both cars are the result of a four-year program internally named ECD, short for ''Epic making Cost Down'' - an ambitious effort to reduce the cost and weight of the Tercel.

Toyota hopes to sell about 140,000 of the new small cars next year, despite what McCurry called a ''congested'' subcompact market and unfavorable economic conditions. That is up from a sales figure of about 100,000 for the current model.

The new Tercel, slightly larger and more powerful but lighter than the model it replaces, enters a market that includes newly redesigned models like Nissan's Sentra, Ford's Escort and Tracer and the Hyundai Excel - even Toyota's own slightly larger Corolla, which is also offered as a sedan.

But even Toyota, which built its reputation for quality and dependability in small cars before entering other markets, said this segment is most sensitive to negative economic news and higher interest rates.

''The entry-level buyer is the first to go away in a downturn,'' McCurry said.

While the 1991 Tercel is very fuel efficient - its 1.5 liter, 12- valve engine gets between 31 and 37 mpg - McCurry used the preview to reiterate what many carmakers have already said about efforts led by Sen. Richard Bryan, D-Nev., in Washington to raise the corporate average fuel economy to 45 mpg.

''Existing technology cannot meet a 45 mpg standard without substantial downsizing,'' he said, adding that smaller cars would lead to job losses and less of a choice for buyers.

McCurry said Toyota has already used most of the means cited by Bryan to raise fuel efficiency, like front-wheel drive, multi-valve engines, four-speed automatic transaxles and aerodynamic body design.

Toyota instead favors an approach based on vehicle class and size, which would raise minimum federal standards for small cars to a higher level than those for larger cars, said James Olsen, vice president of extrenal affairs for Toyota Motor Sales U.S.A.

On other matters, John Koenig, Toyota's corporate product planning manager, said Toyota Motor Sales is near completion on technical centers near its Torrance, Calif., headquarters and in Ann Arbor, Mich., that will employ about 1,000 engineers and designers to develop cars specifically suited to U.S. tastes.

He also said that Toyota plans to be the first automaker to offer a

driver-side air bag on a minivan meeting existing federal safety standards that currently apply only to cars. Toyota new Previa minivan will get the safety device, but Koenig could not say when.

Chrysler Corp. plans a driver-side air bag in its new minivans by next year, but it will not have the required knee bolsters in the lower dashboard as required under current car-safety standards.

McCurry also seemed to downplay a story in Monday's Automotive News that quoted Lexus boss J. Davis Illingworth as saying the division would ultimately replace Mercedes-Benz because people are realizing they do not have to spend $75,000 for a luxury sedan.

''Lexus will give Mercedes a good race eventually, but not in my lifetime,'' McCurry said, adding the German automaker still has a much higher production capacity and a wider model range than Lexus.

#90267u1364 09/24/1990 ~United Press International

CAPE CANAVERAL, FL (SEPT. 24) UPI - NASA managers huddled at the Kennedy Space Center Monday to review plans to launch the shuttle Discovery around Oct. 7 on an unprecedented mission to fire a European science probe over the poles of the sun.

An official launch date was expected to be announced Tuesday at the conclusion of a two-day ''flight readiness review'' chaired by William Lenoir, NASA's associate administrator for space flight.

The National Aeronautics and Space Administration originally hoped to launch Discovery and its five-man crew on Oct. 5, but the flight is believed to be running about two days behind schedule because of delays launching an Air Force Titan 4 rocket from the nearby Cape Canaveral Air Force Station.

The rocket, possibly carrying a spy satellite to help monitor activities in the Persian Gulf, originally was scheduled for blastoff last Wednesday.

But the flight was repeatedly delayed, sources said, until Sunday when an unknown problem prompted Air Force managers to cancel a predawn launch attempt at the T-minus five-minute mark in the countdown.

Sources who requested anonymity said the Titan 4 was grounded by a propellant leak, but that could not be immediately confirmed.

Other sources said the Titan 4 had to get off the launch pad by Monday or pre-launch processing for Discovery would take priority over the military rocket under an agreement between the Air Force and NASA.

While NASA has nothing to do with launching Air Force Titan rockets, both agencies share the same military radar tracking and launch communications equipment, which can only support one mission at a time.

The goal of Discovery's flight, only the fourth shuttle mission this year because of fuel leaks that have grounded the shuttles Atlantis and Columbia, is to launch the European-built Ulysses probe on an unprecedented five-year, $750 million voyage over the poles of the sun.

To reach such an orbit, Ulysses, built by the European Space Agency, first must be fired away from the sun to Jupiter, so it can use that planet's titanic gravity for a boost down, out of the plane of the solar system, and back toward Earth's star.

NASA managers are particularly anxious to avoid any major launch delays like those that have plagued the space agency all summer. Because of the positions of Earth and Jupiter, Ulysses must be launched between Oct. 5 and Oct. 23 or the flight will be grounded for 13 months.

If Discovery makes it off the ground Oct. 7, the shuttle Columbia, currently mounted atop launch pad 39A, will be hauled to Discovery's pad two days later for extensive fueling tests to locate the source of an elusive hydrogen leak that has grounded the spaceplane since May 30.

The shuttle Atlantis then will be hauled to pad 39A four days after Discovery's takeoff for launch around Nov. 7 on a classified military mission. If Columbia's leak can be quickly found and fixed, the long- delayed shuttle could be ready for blastoff around Nov. 28 - six months behind schedule.

Engineers have been unable to duplicate any leaks aboard Columbia without first pumping supercold liquid hydrogen fuel through the ship's convoluted plumbing, a hazardous and expensive operation.

Robert Schwinghamer, the NASA engineer in charge of the leak investigation, is considering a plan to chill the fuel lines with dry ice before pumping helium through the system in a bid to pinpoint the leak. Such tests conducted at room temperature have not been successful.

#90267u1371 09/24/1990 ~United Press International

MANILA, PHILIPPINES (SEPT. 24) UPI - Communist guerrillas Monday rejected President Corazon Aquino's declaration of a cease-fire in the capital and areas devastated by a recent earthquake and announced the resumption of full hostilities.

Romulo Kintanar, a leader of the communist New People's Army, said in a statement to news agencies that Aquino's Sept. 12 announcement of a limited

cessation of hostilities was ''a mere scheme to divide the revolutionary forces.''

The leader of the 19,000-strong NPA, which has been waging a 21-year rebellion said ''the only real path to lasting peace is a comprehensive resolution of the fundamental problems underlying the national crisis.''

Kintanar accused Aquino of insincerity and cited the violent dispersal of anti-bases protesters last week during the second round of talks on the 1947 Philippine-U.S. bases agreement expiring next year and the increase of petroleum prices.

''In the face of the goverments insincerity and high-handedness, the NPA has no other recourse but to intensify military operations in those quake-damaged areas and in metro Manila,'' the statement said.

''We cannot allow our people to go defenseless against a government that betrays the people's interests and the cause of peace,'' he said.

The National Democratic Front, which represented the NPA in the short-lived peace talks in 1987, issued a separate statement supporting the resumption of hostilities.

The NPA had issued a call for a truce in areas hit by the July 16 earthquake earlier, but Aquino had ignored it until early this month when a multi-sectoral group proposed a resumption of peace talks as a step toward national reconciliation.

Maj. Gen. Rodolfo Biazon, armed forces deputy chief, said Kintanar's statement showed there are divisions in the rebel movement with one group advocating peace talks.

''Who is the leader?'' said Biazon. ''Is there anyone in the (rebel group) who can issue an order and give assurance that that order will be honored?''

#90267u1391 09/24/1990 ~United Press International

BELGRADE, YUGOSLAVIA (SEPT. 24) UPI - Yugoslavia's only national daily newspaper failed to appear on newsstands Monday for the first time in 45 years because of financial problems, and its editor-in-chief said he was not sure when it would be published again.

Manojlo Vukotic, the top editor of Belgrade-based Borba - Serbo- Croatian for ''Struggle'' - told a news conference the newspaper could not go to press because it is unable to pay outstanding bills to its printers equal to about $1 million.

However, he said Borba would not change its independent status or editorial policies to enhance its circulation and resolve its shortage of funds.

''I cannot tell you whether we are going to reappear tomorrow, nor when Borba will be back on the newsstands,'' said Vukotic.

The staff of 200 people will continue to report for work in hopes the newspaper's printers relent in their refusal to print Borba until their bills are paid, he said.

Borba was until one year ago the official newspaper of Yugoslavia's ruling communist party. But, with the disintegration of the party, the national parliament in April formally assumed sponsorship of Borba, although it failed to provide financial support and exercises no control over editorial policies.

The newspaper was among the first advocates of ending 45 years of communist rule and has been a leading voice of pan-Yugoslav ideals, opposing the rise of nationalism that threatens the survival of the multi-ethnic country of 23 million.

For those reasons, it has been perceived as an important supporter of federal Prime Minister Ante Markovic, who has formed his own pan- Yugoslav party to oppose nationalist parties, which control and finance the leading newspapers of the six republics.

Borba's circulation has been varying between 40,000 to 80,000 copies daily, a substantial increase over 10 years ago. But the rise has failed to cover escalating production costs.

Vukotic blamed the federal government for the newspaper's money problems, saying it has failed to determine the extent of its financial commitments.

''We need to know exactly under which conditions the federal parliament, i.e. the Yugoslav government, wishes to finance Borba. If they want Borba as a Yugoslav daily newspaper, they have to say how much money they can give us,'' Vukotic said.

In emergency contacts over the weekend, the federal government agreed to give Borba about $300,000. But the amount fell far short of the newspaper's outstanding debt to its printers.

In case the federal government does not provide the money it needs, Borba will look for another sponsor, private money or foreign investors, Vukotic said.

#90267u1434 09/24/1990 ~United Press International

UNITED NATIONS (SEPT. 24) UPI - French President Francois Mitterrand urged the

United Nations Monday not to compromise with Iraq for its occupation of Kuwait and proposed a four-point plan to settle the Middle East conflict.

Speaking to the U.N. General Assembly on its first day of annual debate on world crises, Mitterrand reitereated his government's tough policy toward Iraq as the Security Council prepared to tighten its sanctions against the Baghdad government by imposing an air traffic embargo.

The council was scheduled to vote Tuesday afternoon on a resolution asking governments to withdraw landing rights to aircraft flying to and from Iraq or occupied Kuwait, and to forbid airlines from making scheduled or non-scheduled flights to these two countries.

U.N. diplomats said the air embargo would almost certainly be approved because the five permanent members of the council - the Soviet Union, the United States, China, France and Britain - have already agreed on the resolution.

Soviet Foreign Minister Eduard Shevardnadze will preside the meeting of the 15-nation council, the most powerful U.N. body whose decisions are binding on all members. Secretary of State James Baker as well as the French, British and Chinese foreign ministers will participate in the meeting.

The council also will call on governments to detain ships of Iraqi registry entering their ports and which have been used in violation of the sanctions.

''There is no compromise as long as Iraq does not comply with U.N. resolutions and withdraw from Kuwait,'' Mitterrand told the General Assembly.

Mitterrand said U.N. resolutions are ''not negotiable,'' but he said, ''diplomacy might still prevail over confrontation.''

''We are prepared to take a chance for peace,'' Mitterrand said, criticizing Iraqi President Saddam Hussein for not saying one word since his troops swiftly occupied Kuwait Aug. 2, which might give a ''gimmer of hope'' to the international community.

Saddam rejected U.N. resolutions that called on him to withdraw immediately his forces from Kuwait and release tens of thousands of third-country nationals stranded in Iraq or Kuwait. He denounced U.N. trade and arms embargo imposed on his government for ''strangling'' his people.

The four points of Mitterrand's program to settle the Middle East conflict include a U.N.-guararnteed Iraqi withdrawal from Kuwait; the release of all foreign nationals detained as hostages; reconciliation - or ''good neighborliness'' - among countries in the region and arms reduction in a wide region extending from Iran to Morocco.

There was no immediate comment from leaders attending the General Assembly to

the French president's plan.

He said an international conference on the Middle East should be convened to safeguard and implement resolutions on the conflict and act as a ''catalyst'' for peace in the region.

Mitterrand said there are more than 500 French nationals being used by Saddam as human shields and declared that such a practice and the storming of the French embassy in Kuwait City are ''unacceptable.''

Mitterrand and Brazil's President Fernando Collor, who preceded the French president to the podium of the General Assembly hall's 2,000 seats, put the gulf crisis in the forefront of the lenghty debate by warning that any wrong moves by the world could bring war.

The General Assembly is a forum with the attendance of all 160 member countries of the United Nations.

Collor urged governments to comply with U.N. sanctions despite the hardship that the measures would bring to their people. He said Brazil ''ranks among the countries outside the (Middle East) region that have been most adversely affected'' by the sanctions.

#90267u1461 09/24/1990 ~United Press International

DETROIT (SEPT. 24) UPI - The weeklong strike by the Canadian Auto Workers union against Ford Motor of Canada Ltd. caused the automaker nearly 8, 100 units of lost production, Ward's Automotive Reports said Monday.

The weekly statistical publication said Ford's Canadian subsidiary had planned to build 6,240 cars and 1,824 light trucks last week at Canadian plants that include its St. Thomas, Ontario, facility, the sole source for the automaker's large, profitable rear-drive cars.

CAW officials announced Friday a three-year agreement that was ratified by its 12,800 Ford workers on Sunday. Employees returned to their jobs at Ford Canada's nine plants and one parts facility Monday.

Ford executives said previously that a strike by the CAW would take about two weeks to affect its U.S. operations. But Ward's said Ford plants in Illinois, Kentucky and Ohio are idled this week because of a shortage of V-6 engines made at its Windsor, Ontario, plant.

However, Ford spokesman Joel Pitcoff insisted those temporary closings are because of a shortage of dealer orders, not engine shortages from Canada.

Plants idled this week include its Taurus/Sable car plant in Chicago and its

Kentucky Truck plant in Louisville, Ky. Production of Ford's Thunderbird and Cougar cars at Lorain, Ohio, is also down, while its Econoline van plant at Lorain has been cut to one workshift for this week.

Separately, Ford said Monday it will export about 4,000 Aerostar vans built at its St. Louis, Mo., plant, to Mexico during the 1991-model year under terms of that country's recently announced Automotive Decree.

Ford also plans to export Lincoln Town Cars and Ford Explorer sport utility vehicles from its Wixom, Mich., and Louisville, Ky., plants to Mexico, company executives said.

''The Mexican Automotive Decree constitutes a step forward in the internationalization of the Mexican economy and affords the Mexican consumer enhanced product choice,'' said Henry Nickol, general manager of vehicle operations for Ford's North American Operations.

-30- 2271

#90267u1471 09/24/1990 ~United Press International

(SEPT. 24) UPI - Iraq reportedly conducted secret military exercises for at least two years before attacking Kuwait. U-S intelligence sources say there's compelling evidence Iraq's invasion of Kuwait was part of a long-planned operation aimed at gaining control of oil fields in eastern Saudi Arabia.

A London-based Saudi newspaper says Saudi Arabia asked Iraq, Jordan and Yemen to reduce their embassy staff because of apparent espionage. Quoting the report- ''Saudi investigations have revealed they were involved in activities incompatible with their diplomatic status.''

Turkish President Turgut Ozal says the embargo against Iraq will almost certainly resolve the Persian Gulf crisis. Ozal today described Iraq's military threat as an ''exaggeration.'' He said threats of war by Iraqi President Saddam Hussein are rhetoric.

The Soviet Parliament today gave President Gorbachev new powers to begin implementing a transition to a market economy after 70 years of central planning. The resolution gives Gorbachev the ability to issue new decrees on property relations, wages, prices, budget and financial systems.

East Germany officially withdrew from the Warsaw Pact today in preparation for reunification with West Germany next week. The East German army was the second largest in the military alliance, next to the Soviet forces. About 50-thousand East German soldiers will be part of an all-German army.

CINCINNATI (SEPT. 24) UPI - Homosexual activists held a ''sex-in'' outside the county courthouse at noon as an art museum and its director went on trial on obscenity charges for displaying photographs by Robert Mapplethorpe.

The Contemporary Arts Center and director Dennis Barrie were indicted in April on charges of pandering obscenity and child pornography for showing the photographs.

The trial, expected to last 10 days, involves seven of the 175 photos displayed at the gallery last spring. Five photos are of men engaged in homosexual acts and two are of children with their genitals displayed.

Outside the courthouse, protesters marched, chanted and briefly blocked traffic by lying in the street and simulating sex acts ''for everybody's enjoyment and outrage,'' said Scott MacLarty, a member of the Gay and Lesbian March Activists.

''We believe that (the indictments are) motivated by homophobia,'' he said,

explaining the turnout by about 300 homosexuals and others opposed to what they said was censorship.

Cincinnati police Capt. Joe Koch said officers decided against making arrests because ''the crowd moved along.''

Inside the courtroom, the defense was dealt a setback as Municipal Judge David Albanese overruled a motion to have a mistrial declared.

Defense lawyer Louis Sirkin said the prospective jurors had been contaminated by the flavor of questions posed by Prosecutor Frank Prouty, who frequently asked whether the potential jurors agreed or disagreed with laws on child pornography.

Albanese also rejected a defense attempt to have prospective jurors limited to Cincinnati residents, rather than all of Hamilton County. Sirkin argued the ''contemporary community standards'' that should apply in the trial should be those of Cincinnati residents, but Albanese disagreed.

Prouty questioned four men and four women out of a pool of 50 prospective jurors before adjourning for lunch.

Among his questions to the panelists, Prouty asked whether they had ever been to an art gallery, seen Playboy or Penthouse magazines or donated money to arts organizations.

He also repeatedly asked the prospective jurors if they believed a law should be upheld ''whether the law is good or bad.''

Members from more than a dozen homosexual groups joined the protest outside the courthouse. They held a street theater in which they enacted famous works of art that have nudes - such as Michelangelo's ''Creation'' - performing ''Cincinnati versions'' that had the genitals of the nudes covered.

The protesters left the courthouse after the noon hour, marching to Fountain Square and back. Many carried placards and banners.

Carol Lippmann of the AIDS Coalition to Unleash Power accused Hamilton Sheriff Simon Leis and Judge Albanese of ''using the Mapplethorpe trial to demonstrate their hatred of the gay and lesbian community.''

Barrie and the Contemporary Arts Center each face a charge of pandering obscenity for the homosexual pictures and a charge of using a child in nudity-oriented material for the pictures showing juveniles' genitals.

If convicted, both face possible fines: $5,000 on each count for the gallery and $1,000 on each count for the director. Barrie also faces the possibility of being jailed for a maximum of six months on each misdemeanor count.

The defense suffered a setback earlier this month when Albanese ruled the scope of the trial would be limited to the seven photos, rather than on the exhibit as a whole. The bulk of the Mapplethorpe exhibit includes non-controversial still lifes and portraits.

The Mapplethorpe exhibit drew a record 81,003 people in Cincinnati. The show then moved to Boston's Institute for Contemporary Arts, where director David Ross expected a record 100,000 visitors before the show closes Oct. 4.

Mapplethorpe died in Boston March 9, 1989, of AIDS.

HARTFORD, CT (SEPT. 24) UPI - Northeast Utilities would be allowed to recover from customers 60 percent of its $276.5 million investment in the Seabrook nuclear plant under a settlement announced Monday.

The settlement reached by state officials and the utility would result in a one-time increase of between 1.5 percent and 2 percent in electric bills, officials said.

The settlement would allow Northeast to recover through rates $167 million, or 60 percent, of the $276.5 million it spent for its 4.06 percent share of the $6.6 billion New Hampshire nuclear plant.

The $167 million will be included in the rate base for Northeast's Connecticut Light and Power Co. subsidiary as of June 30, the day the Seabrook plant began commercial operation.

The settlement is subject to approval by the state Department of Public Utility Control. Higher rates for CL&P customers would take effect following DPUC action on the company's next rate case.

The 1.5 percent to 2 percent rate increase resulting from the Seabrook costs is expected to be offset by an undetermined amount because of the lower costs of nuclear-generated power, the utility said.

The settlement was reached by Northeast, the state attorney general's office, the consumer counsel's office and the DPUC's prosecutorial division.

''This settlement finally puts the Seabrook controversy behind us,'' said Attorney General Clarine Nardi Riddle. ''The 40 percent write-off of NU's Seabrook investment will save ratepayers a significant amount of money over the life of the generating unit.''

Bernard M. Fox, president and chief operating officer for Northeast, said he

believed the settlement was equitable both for the utility's shareholders and customers.

''This eliminates some of the uncertainty from future rate cases, and should help further stabilize rates for the people we serve,'' Fox said in a statement.

Northeast serves more than 1 million customers in Connecticut through CL&P.

The company also owns Western Massachusetts Electric Co. and Holyoke Water Power in Massachusetts and is in the process of acquiring the Public Service Co. of New Hampshire, the principal investor in the Seabrook plant.

#90267u1497 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - The United States posted a budget deficit of $52.75 billion in August, a huge gain over the August 1989 shortfall of $22.15 billion, the Treasury Department said Monday.

But ''$25 billion of the August deficit reflects a shift of payments normally made in September into August to avoid Labor Day delays'' of military pay, Social Security checks and other payments, the department said.

''This will affect September's results by $25 billion as compared to last year '' the department said.

August's $52.75 billion shortfall is the worst showing since a staggering $53.35 billion in March and follows a shortfall of $25.93 billion in July and a deficit of $11.13 billion in June.

For the fiscal year, which ends Sept. 31, the United States was running a total shortfall of $241.71 billion at the end of last month, the Treasury Department said.

During the same period in the previous fiscal year, the budget deficit stood at $145.80 billion, the department said.

Defense spending in August, following Iraq's invasion of Kuwait Aug. 2, jumped to $27.80 billion from $22 billion in July and $27.01 billion in June.

The Treasury Department said that the federal government has spent $269.23 billion on defense spending in the fiscal year to date vs. $267.13 billion during the last fiscal year.

In other categories in August, the United States spent:

-$2.64 billion on the bailout of the savings and loan industry.

-$41.18 billion on Social Security.
-$18.29 billion on other social services.
-$1.87 billion on education.
-$1.14 billion on the National Aeronautics and Space Administration.

August receipts totaled $78.49 billion vs. outlays of $131.24 billion, with borrowing from the public totaling $47.33 billion and interest payments on the public debt standing at $18.92 billion, the department said.

#90267u1541 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - Americans received a failing grade Monday on a comprehensive test of their consumer knowledge, with the poor and minorities scoring worst on subjects ranging from nutrition to housing to product safety.

The Consumer Federation of America, which sponsored the nationwide test, said consumers averaged just 54 percent correct answers on 249 questions designed to test their knowledge on a broad range of consumer issues.

''The fact that consumers are inadequately prepared to deal with the marketplace costs them billions of dollars a year,'' Stephen Brobeck, executive director of the Federation, said at a news conference announcing the test results. ''It also threatens their health and safety.''

The test, called by the Federation ''the first comprehensive examination of the nation's consumer knowledge,'' centered on six general areas of consumption - banking, housing, insurance, food, product safety and durable goods such as autos and appliances.

Brobeck said the test showed ''particularly glaring deficiences among the young, the poor, the least well-educated and minorities.''

Results showed the best educated in the sampling scored an average 22 percent higher than the least educated. Similarly, there was a 17 percentage point difference between the most and least affluent and a 13 to 15 percentage point difference between whites and minorities. Hispanics scored lowest.

The test scores were generally low on questions concerning housing purchases, checking and savings accounts, food purchases and life insurance. Consumers proved to be most knowledgeable on questions about drugs and housing rental.

For example, only 38 percent knew that a certificate of deposit usually pays higher yields than a money market account, 21 percent the extent to which auto insurance rates vary between companies, 26 percent the decreasing importance of life insurance with age, 25 percent when and how to remove asbestos, 33 percent that real estate agents legally represent the sellers, and 36 percent the basis for food ingredient labeling.

By contrast, 78 percent understand the relation of salt consumption to high blood pressure, 79 percent the cancer risk of inhaling asbestos fibers, and 77 percent how to save gas while driving.

Brobeck said the overall average of 54 percent correct answers was particularly ''appalling'' since random guessing would have yielded a 25 percent correct score on the multiple choice test.

The test was funded by the TRW Foundation and administered by the independent Educational Testing Service to a sample population of 1,139 people earlier this year.

Noting that only a handful of states require consumer education in public schools, Michael Van Buskirk, vice president of TRW Information Systems and Services, said the test ''suggests our educational system is failing.''

Van Buzkirk said he would also give ''a failing grade to public and private efforts'' at consumer education.

Brobeck said the Federation, a coalition of 240 non-profit consumer advocate groups, plans to spearhead a meeting at the White House in January with representatives of government, education and business to determing ways to improve consumer education.

''We have to show that an informed consumer is good for business,'' Brobeck said.

#90267u1545 09/24/1990 ~United Press International

BOSTON (SEPT. 24) UPI - New England Patriots owner Victor Kiam says he does not disapprove of five players' sexual harassment of a woman reporter in the

team's locker room.

''I can't disagree with the players' actions,'' Kiam said in an interview published Mondy in the Boston Herald. ''Your paper's asking for trouble sending a female reporter to cover the team. Why not stand in front of her (naked) if she's an intruder?''

On Sept. 17, Lisa Olson, a sports writer for the Herald, was sitting in the Patriots' locker room at Foxboro Stadium interviewing a player when five others surrounded her while they were naked.

As Olson wrote, the players ''approached me, positioned themselves inches away from my face and dared me to touch their private parts.'' She said that Zeke Mowatt asked her, '''Is this what you want?''' and Olson said this was ''one of his tamer comments.''

Because Olson said she ''did not want to become the story,'' the Herald decided not to publicize the incident. But on Friday, the rival Boston Globe published an article describing what happened.

During the weekend, Kiam, the highly visible president of the Remington Products shaving company, was called by another Herald reporter. Asked about the incident, Kiam is quoted as saying: ''I'm sure (the incident) looms large in Lisa's life but I can't get excited about it. It's a flyspeck in the ocean.

''It isn't (a factor regarding) winning and losing. That's what we're interested in. Anything that takes (the players') eye off the ball should be dismissed out of hand.''

Kiam believes Olson and the Herald were at fault for the situation.

''The players are doing their jobs, and that includes taking a shower. They should be able to walk around naked. Why can't she conduct her interviews out on the field?

''I feel we're caught up in the tempest of the times. Freedom of speech is fine but letting women into a locker room goes beyond that. Players should be able to retain the dignity of the individual. Your paper's at fault here.''

Along with the absence of an apology by Kiam, Olson said none of the players involved had apologized to her. Two other players, Ronnie Lippett and Cedric Jones, apologized to Olson for their teammates' actions and said the five were not representing the team.

The Patriots have a history of such incidents. A female television reporter was harassed by two players in 1988, and two years previous another female sports writer was harassed by a player who wanted her to leave the locker room.

Olson, in her first year covering the Patriots, was assigned to the NHL Boston Bruins last season and said she never had any problems dealing with the players.

The Patriots' situation has also sparked shots between the two Boston newspapers. After the Globe reported the incident, Herald Sports Editor Bob Sales responded in an article, writing: ''The Boston Globe, under the guise of supporting her, chose to write a story about this situation. The Globe, of course, stands to profit from any repercussions that develop as a result of this public disclosure.''

On Sunday, a Globe columnist termed Sales' response: ''one of the more bizarre stories in Boston journalism history'' and described the Herald's decision to try and resolve the situation diplomatically and without publicity as ''weak.''

On Monday a Herald columnist fired back, referring to the Globe writer as a ''stiff,'' ''self-serving ingrate'' and ''cheap-shot artist.'' He also said ''the poor bum's memory has to be receding faster than his hairline.''

#90267u1546 09/24/1990 ~United Press International

SOFIA, BULGARIA (SEPT. 24) UPI - Bulgarian Socialist Party chief Alexander Lilov offered his resignation Friday following demands by liberals for a purge of older leaders linked to the party's totalitarian past.

The surpise announcement on the third day of a party congress in Sofia sparked confusion and speculation over the future of the ruling Socialists, known as the Communist Party before changing their name in April.

Party sources said Lilov was still maneuvering to retain the top post, hours after telling the congress he was resigning and would not seek office in a leadership election scheduled for Monday night. Members of the party's liberal wing predicted a split if Lilov is re-elected.

''We will not play the game of the old guard. If Lilov wins we will not serve on the presidium or on any bodies,'' said George Karasameonov, a delegate from Sofia and a prominent member of a radical reformist faction known as Demos.

Karasameonov said his group would meet Saturday to decide whether to remain in the Socialist party.

Lilov, in offering his resignation, condemned attempts to remove older and more conservative members from the leadership as ''profoundly wrong and dangerous.''

He also declared he had ''nothing to hide and nothing to be ashamed of'' for hisyears of service with the party under former hard-line leader Todor Zhivkov.

His resignation followed a day of open clashes between radical reformers and conservatives over ideological control of the party.

Sunday, Lilov had rebuked liberals as well as Prime Minster Andrei Loukanov for demanding a complete shakeup in the party's leadership.

In his speech Monday, Lilov said the congress should re-elect Loukanov to the party's ruling Supreme Council, ''although he does not belong to the younger generation.''

He proposed that his job be given to Petar Mladenov, the former Communist Party leader who served as president for four months before resigning amid scandal in July.

Leading the attack Sunday against the party's conservative wing was Dragomir Draganov, a prominent liberal who called for the election of a ''young, efficient and active Supreme Council.''

Draganov also urged the dismissal of 100 to 200 party members who held leadership positions under the authoritarian regime of Todor Zhivkov, who was ousted in November.

Another liberal, Velislava Dureva, warned that if the congress held back from adopting needed reforms in hopes of perserving unity it would create a ''Cheops pyramid in which the mummy of a 100-year-old party would be laid.''

Loukanov, in an open challenge to Lilov, told an afternoon session the Bulgarian people ''want new faces.'' To ensure the party's survival, he said, older leaders must yield their positions to younger men and women.

But Lilov dismissed the demands for a purge as a mere powerplay by younger Socialists who coveted the top party posts for themselves.

In a report opening the congress, Lilov warned Saturday against a potentially fatal split, adding, ''We should distance ourselves from the calls for disbanding and setting up a new party in its place.''

Although the BSP won a parliamentary majority in historic multiparty elections in June, public opinion polls and a declining membership show its strength is waning as Bulgaria's economic crisis worsens.

#90267u1566 09/24/1990 ~United Press International

CHICAGO (SEPT. 24) UPI - Union leaders Monday urged United Airlines pilots to express continuing support for an employee buyout of parent UAL Corp. and warned UAL directors and potential raiders that failure of the employee bid

could lead to a strike.

In a letter to pilots, union leaders said UAL Chairman Stephen Wolf is telling board members the employee buyout lacks broad support among workers.

''We are therefore requesting every pilot to inform the UAL board that you - as an individual - continue to support the efforts of your union leaders to make United an employee-owned company,'' the letter said. ''If you oppose these efforts, we wish you to convey that sentiment as well.''

It also said Coniston Partners - a major UAL stockholder and one-time ally of the employee buyout group - may try to force a restructuring to boost the price of UAL stock, which has plummeted $200 a share in the past year.

UAL was off another $8.75 - to $92 - by midafternoon Monday in trading on the New York Stock Exchange.

United Employee Acquistion Corp. - a grouping of the pilots, flight attendants and machinists unions and non-union UAL employee - has until Oct. 9 to win financing for its $4.4 billion, $201 a share buyout of UAL.

The UAL board - still reeling from last fall's collapse of a $6.75 billion, $300 a share employee-led buyout in which Wolf and senior UAL management were minority partners - endorsed the new employee buyout last April.

UAL already has extended the financing deadline once. If financing is not in place by Oct. 9, and the UAL board refuses another extension, the buyout agreement will expire.

But the United pilots union leaders warned the airline will face labor problems if employee buyout efforts are foreclosed.

They noted all three unions - the Airline Pilots Association, the Association of Flight Attendants and the International Association of Machinists - agreed to a moratorium on negotiations while pursuing the employee buyout and are working under interim contracts that have kept United's labor costs lower than those of other airlines.

''We are amply prepared to return to the ... negotiating table if that is your collective desire, or if the prospects for employee ownership cease to exist '' they wrote.

''In the event we abandon the employee ownership initiative, we, as your leaders, are confident in our ability to confront senior management pursuant to the provisions of the Railway Labor Act, up to and including a strike,'' the union letter said.

It was signed by Frederick Dubinsky, chairman of the union's United Master

Executive Council, J. Steve Smith, vice chairman, and Felix Isherwood, secretary-treasurer.

They said the employee buyout group had been ''within days - in some cases hours - of securing the commitments needed'' to complete the buyout last month when Iraq invaded Kuwait.

The invasion has sent fuel prices spiraling, strangled earnings in the airline industry and cast a pall over the campaign to finance the UAL buyout.

WASHINGTON (SEPT. 24) UPI - President Bush and South African President F.W. de klerk held a historic meeting Monday on the ''irreversible'' racial reform in South Africa that Bush said must be rewarded by the United States.

''The time has come to encourage and assist the new South Africa,'' Bush said following a two-hour meeting with de Klerk, the first South African president to visit the United States in nearly a half century.

''You can count on us. We will not turn back, said de Klerk. The South African leader has cut away at his nation's racial segregation system of apartheid since becoming head of the white minority-ruled government one year ago.

Last winter, in one of his most dramatic moves, de Klerk freed black leader Nelson Mandela after nearly three decades of imprisonment. De Klerk also legalized Mandela's African National Congress and opened negotiations with it.

Bush said once remaining elements of apartheid are lifted - including the release of other political prisoners, the lifting of a state of emergency and the opening the political system - U.S. economic sanctions imposed against

South Africa in 1986 would be removed.

''I'll consult fully with Congress,'' Bush said. ''All of our conditions have not yet been made. But let me emphasize that these conditions are clearcut. I don't believe in moving the goal posts.''

De Klerk arrived in Washington Sunday quoting civil rights leader Martin Luther King. He is involved in talks with the ANC on a new constitution that he said would provide democratic rights and ''equal opportunity for all.''

Yet many complain that de Klerk has not moved far or fast enough.

As Bush and de Klerk held their meeting, dozens of demonstrators paraded outside the White House. Among their chants: ''Free South Africa,'' and ''Mandela, Yes; de Klerk, no.''

Randall Robinson, executive director of TransAfrica, a civil rights group, called the White House meeting ''a superficial photo opportunity ... to put a smiling face on a sad and tragic situation.''

''The American public and U.S. policy-makers must be reminded that major pillars of apartheid remain,'' said Robinson, citing laws that prevent blacks from participating in the government and segregate them in packed townships.

''In the last six weeks, South Africa has experienced unprecedented violence in which over 800 people have been killed,'' Robinson added.

He said that ''while some of the fighting is an outgrowth of political rivalry between elements of the ANC and supporters of the Zulu organization Inkatha, there is evidence'' that government security forces instigated some if it.

De Klerk, who has ordered an investigation into such charges, was to complete his three-day visit to the United States Tuesday with a series of meetings with members of Congress and an address to the National Press Club.

The Congressional Black Caucus canceled its scheduled meeting with de Klerk, citing the violence in South Africa and the advice of some civil rights leaders.

De Klerk was initially to visit Washington last spring. But he postponed the trip so it would not conflict with Mandela's own triumphant U.S. tour.

Bush and de Klerk both gave upbeat remarks at the close of their meeting.

The U.S. president said, ''We believe the process of change in South Africa is irreversible and our goal ... is to support the process of change.''

Bush added, ''The end of apartheid can mean the beginning of a greater South

Africa. Then South Africa will become a beloved country.''

De Klerk thanked Bush ''for acknowledging the new reality of South Africa,'' adding, ''and indeed it is irreversible.''

He said, ''We are making progress. But we have a problem of volatility.''

#90267u1600 09/24/1990 ~United Press International

BUREIJ, ISRAELI-OCCUPIED GAZA STRIP (SEPT. 24) UPI - On the edge of the Palestinian refugee camp where an angry Arab mob killed an Israeli soldier, residents said Monday the military intended to demolish scores of homes and shops lining the street where the fatal attack occurred.

Military sources have said buildings belonging to Palestinians involved in the attack would be demolished in accordance with the law, allowing for appeals to Israel's Supreme Court.

But they declined comment on the claims of mass demolition orders, which Palestinian sources said included 21 houses, 10 stores, four garages, a gas station and two offices and workshops.

With the demolition of those buildings, Palestinians said, the main road into the Bureij refugee camp would be widened by 4 yards on either side. It is not clear whether any of those who received the demolition orders or their relatives were directly involved in the fatal attack.

''This is inhuman and mass punishment and does not go along with the democracy and equality that the Israelis talk about,'' said a 24-year- old Bureij resident, who identified himself as Osama and said part of his father's house was scheduled to be demolished. ''It's suppressive action.''

Bureij remained under curfew Monday, four days after Israeli reserve Sgt. Amnon Pomerantz, 46, was stoned and burned to death in his car after he mistakenly turned into the refugee camp. It was the first time Pomerantz was driving to his reserve duty in the Gaza Strip and the entrance to his army base was the next left turn off the main road.

When Pomerantz realized his mistake, he tried to turn around about 400 yards into the camp, came under a hail of stones and hit a donkey cart, injuring two teenagers. The accident fueled the anger of Palestinians, who apparently believed the boys had been killed. The barrage of stones increased and then masked men threw gasoline on the car, setting it on fire with the uniformed soldier inside.

Soldiers on the outskirts of the camp were alerted to the attack only when waves of Palestinians streamed out of Bureij. Because the military normally

rounds up Palestinian men between 16 and 60 after incidents, many male residents fled to relatives and friends living outside Bureij.

The brutal murder, on the first day of the Jewish New Year, sparked widespread outrage among Israelis from across the political spectrum. While some called for even greater attempts to reach a political solution to the Israeli-Palestinian conflict, others sounded words of pessimism.

''The stoning and burning alive of a defenseless driver, not by an organized terrorist group or an individual gone beserk, but by an inflamed, bloodthirsty mob, has rekindled the fear that Arab hatred is so deep and irrational that no modus vivendi between Arab and Jew can be reached,'' The Jerusalem Post wrote in its first editorial on the slaying.

The underground leadership of the 33-month-old Palestinian uprising issued a leaflet Monday in the Gaza Strip calling for a week of violence and confrontations with Israeli soldiers in solidarity with Bureij.

Punishment proposals from Israelis against Bureij residents have ranged from house demolitions to selected deportations or mass expulsions. The high number of demolition orders led not only Palestinians but left-wing Israelis to criticize the moves as too harsh.

''They are going back to collective punishment, meaning not punishing those involved in the slaying but those who happen to live around also would be punished,'' said Dedi Zucker, a Parliament member of the Citizens' Rights Movement. ''I think that this kind of an action (Pomerantz's slaying) deserves a very harsh punishement, but only those who were involved deserve this punishment.

''It's almost a recipe for growing hatred if people who had nothing to do with the lynching would be punished,'' Zucker said. ''It is wrong if Israel is still sticking to these punitive measures (of collective punishment), which above all are ineffective.''

Bureij, where more than 19,000 Palestinians live, remained closed off to the outside world Monday, except for the military and relief workers. Military sentries were posted at entrances off the main road.

Women who remained in Bureij recounted to reporters and U.N. officials tales of Israeli beatings, harassment and threats of rape in efforts by the security forces to round up Palestinian men. The military said no complaints had been filed by Bureij women.

''Last night, they came to our house at 9 p.m.. They were looking for shabab (young Palestinian men) and they asked me about my husband, said a 24-year-old woman, clutching her 9-month-old son. She identified herself only as Asmahan.

The men had fled and when she told the soldiers and internal security officers only women and children were in the house, ''they started beating (the women) separately.'' They also threatened her with rape, she said.

#90267u1603 09/24/1990 ~United Press International

LOS ANGELES (SEPT. 24) UPI - Retail gasoline pump prices have risen more than 20 cents a gallon to the highest prices ever since Iraq's Aug. 2 invasion of Kuwait, an industry analyst said Monday.

Trilby Lundberg, director of the Lundberg Survey, said a check of gasoline prices Friday at more than 13,000 retail outlets showed the weighted average price for a gallon of gasoline - including state and federal taxes - was $1.3835 a gallon.

Lundberg said the 2.91 cent-a-gallon increase over the prior two weeks brought average pump prices to a level exceeding the previous March 1981 high of $1.3782 a-gallon.

She said, ''Nominally $1.3835 a gallon is the highest weighted average'' ever recorded by the Lundberg since the service began surveying gasoline prices in the 1950s.

Prior to the Aug. 2 Iraqi invasion triggering the world oil crisis, the weighted nationwide average for gasoline was 117.71 cents a gallon.

The latest rise brings the total increase since the invasion to 20.64 cents a gallon, or 17.5 percent.

Wholesale prices, however, have risen far more. Unleaded gasoline was being quoted on the New York Mercantile Exchange Monday at $1.06 a gallon - 64.9 percent higher than its price of 64.27 cents a gallon on Aug. 1 prior to the invasion.

But using the December 1980 consumer price index as the basis for comparision, Lundberg said the new $1.3835 price becomes 88 cents a gallon when inflation over the decade is taken into account.

The price increase since Sept. 7 took place despite lower consumption with the end of the summer tourist driving season, Lundberg said.

''In the summer, after July and August, we (drivers) use a lot less gasoline and the prices usually decline,'' said Lundberg.

''That is not happening now. No matter what the consumption levels are, the crude oil price rises continue and are sustained. It is now more than $35 per barrel. It will drive the prices for all petroleum products.''

''The biggest increase was at self-service pumps, which accounts for 80 percent of all sales,'' she said.

Lundberg said the retail price increase between the Aug. 24 and Sept. 7 surveys was 2.3 cents per gallon.

In the latest survey, the price for a gallon of unleaded regular gasoline at self-service pumps was 127.36 cents, compared to 124.28 cents in the Sept. 7 poll.

The prices for other grades at self-service pumps were: 144.05 cents for a gallon of premium unleaded and 125.51 cents per gallon for regular leaded.

At full-service pumps, a gallon of regular unleaded sold for 149.59 cents; premium unleaded was 163.19 cents; and regular leaded sold for 147.83 cents.

#90267u1610 09/24/1990 ~United Press International

CHICAGO (SEPT. 24) UPI - Union leaders Monday urged United Airlines pilots to express continuing support for an employee buyout of parent UAL Corp. and warned UAL directors and potential corporate raiders that failure of the employees' bid could bring a strike.

In a letter to pilots, union leaders said UAL Chairman Stephen Wolf is telling board members the employee buyout lacks broad support among workers.

''We are therefore requesting every pilot to inform the UAL board that you - as an individual - continue to support the efforts of your union leaders to make United an employee-owned company,'' the leaders' letter said. ''If you oppose these efforts, we wish you to convey that sentiment as well.''

The leaders also said Coniston Partners - a major UAL stockholder and one-time ally of the employee buyout group - may try to force a restructuring to boost the price of UAL stock, which has plummeted $200 a share in the past year.

In a sharply lower market, the price of UAL stock was off another $8.75 - to $92 a share - in afternoon trading on the New York Stock Exchange.

United Employee Acquisition Corp. - a grouping of the pilots, flight attendants and machinists unions and non-union UAL employees - has until Oct. 9 to line up financing for a $4.4 billion, $201-a-share buyout of UAL.

The UAL board, still reeling from last fall's collapse of a $6.75 billion, $300-a-share employee-led buyout in which Wolf and senior UAL management wouldhave been minority partners, endorsed the new employee buyout effort last April.

UAL already has extended the financing deadline once. If financing is not in place by Oct. 9 and the UAL board refuses to grant another extension, the latest buyout agreement with the board will expire.

But leaders of the union representing United pilots warned the airline will face labor problems if employee buyout efforts are foreclosed.

They noted all three unions - the Air Line Pilots Association, the Association of Flight Attendants and the International Association of Machinists - agreed to a moratorium on labor negotiations while pursuing the employee buyout and are working under interim contracts that have kept United's labor costs lower than those of other carriers.

''We are amply prepared to return to the the ... negotiating table if that is your collective desire, or if the prospects for employee ownership cease to exist,'' they said.

If the so-called ''Employee Ownership Initiative'' is abandoned, ''we, as your leaders, are confident in our ability to confront senior management pursuant to the provisions of the Railway Labor Act - up to and including a strike,'' the letter said.

It was signed by Frederick Dubinsky, chairman of the unions' United Master Executive Council, and by J. Steve Smith, vice chairman, and Felix Isherwood, secretary-treasurer.

DETROIT (SEPT. 24) UPI - Ford Motor Co. said Monday it will offer customers

$500 cash rebates on most of its 1991 models with their official introduction this Thursday, under a program that expires Dec. 11.

The new rebate amounts are between $250 and $500 less on some car lines than under the current offer, which is due to expire Wednesday. Company spokesman Dave Krupp said the reductions were made because of competitive moves by other automakers.

The new offer applies to most models except the 1991 Mercury Capri and Ford Explorer sport utility vehicle, which carry no customer or dealer incentives, Krupp said. The Ford Bronco sport utility truck gets a $1,000 cash rebate, up from $500 under the current program.

Buyers may also opt for 7.9 percent annual financing on loans up to 48 months long in lieu of the cash rebates.

Ford's current buyer incentives on its 1990 models, which offer $1, 000 rebates on most cars and between $600 and $1,500 on most light trucks, will expire Sept. 27.

After that date, the carmaker will offer cash incentives to dealers instead of customers to sell its remaining 1990 models, Ford said.

#90267u1679 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - Private savings and loans posted a loss of $196 million in the second quarter of the year in the best showing since a weak profit of $10 million in the first quarter of 1989, the government said Monday.

The figures, released by the Office of Thrift Supervision, do not include the results for institutions seized by the United States and operated by the federal Resolution Trust Corp.

''It's very difficult to perdict that the trend of reduced losses in the industry will continue of that the industry as a whole will become profitable this year,'' said Timothy Ryan, the OTS director.

Chief among Ryan's concerns are sliding real estate prices in many parts of the United States, which have been saturated by commercial development, such as shopping malls and office towers.

The second quarter loss of $196 million follows a loss of $374 million in the first quarter of the year - and a record $3.41 billion plunge in the final three months of 1989, the OTS reported.

In the second quarter of 1989, private savings and loans lost $745 million, the agency said.

The performance of the 2,452 private thrifts in the second quarter of 1990, down from 2,694 savings and loans at the end of the second quarter of last year, fall into four categories:

-Group I. ''Well capitalized and profitable:'' The 1,169 healthy institutions in this group - or 48 percent of the total - reported a second quarter profit of $646 million, up from $641 million in the first quarter and $582 million in the second quarter of 1989.

-Group II. ''Meet or expected to meet capital requirements:'' The 674 thrifts in this group - or 27 percent of the total - reported earnings of $31 million in the second quarter of 1989, down from $195 million in the first quarter and $296 million in the second quarter of last year.

-Group III. ''Troubled with poor earnings and low capital:'' The 350 thrifts in this category - 14 percent of the total - reported continuing losses of $153 million in the second quarter vs. losses of $332 million in the first quarter and $217 million in the second quarter of 1989.

-Group IV. ''Expected transfers to the RTC:'' Of the 244 sickest privately owned thrifts - or 10 percent of the total - second quarter losses stood at $720 million, slightly better than $723 million in the first quarter but much worse than $353 million in the second quarter of last year.

Fifteen thrifts recently sold by the government were not included in the latest OTS data, Ryan said.

#90267u1698 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - A week before $105 billion in Gramm-Rudman spending cuts kick in, House Speaker Thomas Foley, said Monday budget negotiators may be close to an ''agreement in principle'' on a $500 billion

deficit cutting plan.

While he stopped short of predicting an end to the impasse that has blocked a budget accord, Foley, D-Wash., told reporters that a scheduled afternoon meeting between the five top congressional leaders and three key administration officials may succeed.

Asked if he expected those meetings to produce the elusive budget pact, Foley said, ''We believe it will lead us to an agreement in principle on all the general areas and categories of the agreement.''

''It might actually take a couple more days to work out the (specific) language, and so on, but that is what we are aiming at,'' Foley said. ''I see what I call progress.''

Foley said recent talks have been ''both broader and deeper'' than before ''and I think we are in a time frame where we all realize we have to come to a conclusion, if it is at all possible to do so, and I still think it is possible.''

Negotiators are working under a rapidly approaching deadline to avoid imposition of $105.7 billion in automatic, across-the-board spending cuts required under the Gramm-Rudman balanced budget law.

Those cuts, split evenly between defense and domestic programs, are scheduled to take place beginning Oct. 1, the start of federal fiscal year 1991.

The cuts are expected to cause massive furloughs of federal workers and huge cutbacks in services ranging from air traffic control to food inspections.

Negotiators met for four hours Sunday night but failed to reach agreement on several unresolved issues, including President Bush's call to cut the capital gains tax.

At the White House Monday, press secretary Marlin Fitzwater denied that Bush's support for cutting capital gains taxes on profits from the sale of assets ''is the major stumbling block'' in reaching a budget agreement, as Democrats claim.

''We still don't have agreement on two or three other areas as well, big areas '' Fitzwater told reporters. ''There are many other issues still outstanding. We are not even close on the spending cut side. In fact, the Democrats have proposed spending increases.

Fitzwater charged that ''Democrats have been able to focus attention on the capital gains provision to the overall detriment of the progress in the negotiations, as far as we are concerned.''

Republicans vented frustration on the House floor at lack of a budget accord.

''The Democrat leadership of this Congress is not merely adamant and incalcitrant, it is also imcompetent, unable to pass a budget, unable to pass appropriations and only willing to allow (automatic spending cuts) to come about,'' said Rep. Bill Frenzel, R-Minn., a budget negotiator.

''We need a budget agreement now. It has to take place in the next 24 hours. And Congress better do it or it's going to stand judged as even more incompetent than its usual low standard.''

To demonstrate their frustration, House Republicans demanded time- consuming roll call votes on a long list of mostly non-controversial bills on Monday's House calendar - bills which often pass on voice votes or lop-sided recorded votes with broad bipartisan backing.

Rep. Robert Walker, R-Pa., one of those demanding roll call votes, said the GOP wanted ''no more business as usual'' in the House withoug a budget agreement.

House Democratic leaders were expected to bring to the floor later this week a temporary spending bill to keep government agencies funded through mid-October at this year's level. Without such legislation, they will run out of money Oct. 1.

But it was unclear whether that bill would delay beyond Oct. 1 imposition of the automatic cuts to give negotiators more time.

Fitzwater said the administration has threatened to veto any bill delaying the Oct. 1 deadline but said ''we will wait to see what the situation is when we get there.''

#90267u1728 09/24/1990 ~United Press International

CAIRO (SEPT. 24) UPI - Four Japanese oil companies have boosted their oil purchases from Saudi Arabia by more than 100,000 barrels a day, apparently to make up for the halt in the flow of Kuwaiti crude after Iraq's invasion, an oil industry newsletter said Monday.

The Nicosia-based Middle East Economic Survey said the Japanese companies Idemitsu, Cosmo, Kyodo Oil and Nippon oil would receive 130, 000 barrels of Saudi crude per day under one-year contracts starting on Oct. 1, to replace previous month-to-month contracts.

MEES said a fifth Japanese company, Mitsubishi Corp., will for the time being continue to operate according to a month-to-month contract under which the company purchases 50,000 barrels of Saudi oil a day.

''The marketing situation of the company does not permit it to commit itself to a higher term volume at present,'' MEES said.

The oil newsletter also said Saudi officials were expecting Japan to increase its contribution to the U.S-led multinational force in the Gulf with manpower as well as cash.

''It's not just a question of money, a contribution in terms of Japanese manpower is also required,'' MEES quoted a senior Saudi official as saying. ''If the Japanese constitution forbids the dispatch of Japanese military forces, then they should contribute personnel for non-combatant roles, such as supply logistics, medical services and helping refugees from Kuwait,'' the Saudi official said.

ALBANY, NY (SEPT. 24) UPI - New York's Republican gubernatorial candidate

Monday proposed training and arming vigilantes to roam the streets of New York City, do battle with street thugs and end ''a killing emergency.''

''This city is in a state of emergency.... We have a killing emergency. When you have an emergency, you need emergency procedures,'' said GOP candidate Pierre Rinfret.

He proposed a six-month experiment in which the state would deputize 100,000 volunteers to halt crime in progress and report those and other crimes to uniformed police.

He said the costs would be minimal and that people with criminal records would not be accepted as vigilantes.

Rinfret made his proposal the same day eight youths pleaded not guilty to second-degree murder of a Utah man who was stabbed to death Sept. 2 as he tried to protect his parents from a mugging in the New York City subway.

The Manhattan ecomomist's proposal also comes one week after his campaign manager and top aides quit and he split with powerful Republican leaders, who he characterized as ''turncoats'' for refusing his demand for $950,000 in campaign funds.

Meanwhile, Conservative Party gubernatorial candidate Herbert London, hoping to capitalize on Rinfret's woes, offered to help the Republicans campaign to retain control of the state Senate and characterized Rinfret as Humpty Dumpty.

''He's fallen off the wall and all the King's horses and all the king's men are not going to put Humpty back together again,'' London said at an Albany news conference Monday.

#90267u1751 09/24/1990 ~United Press International

(SEPT. 24) UPI - From New Zealand westward around the globe to Hawaii, from frozen Antarctica to the tropical heat of the Caribbean, thousands of candles flickered in the twilight, sending a message to the world's leaders from a forgotten constituency: children.

The candlelight vigils Sunday night were organized to focus world attention on the plight of children in advance of this weekend's World Summit for Children that will bring together dozens of presidents, kings and prime ministers at the United Nations headquarters in New York to discuss the problem.

''Never before have so many heads of state gathered, on any issue, much less the needs and well-being of children,'' said Sam Harris, global vigil coordinator in Washington, D.C.. Harris heads a group called RESULTS, which he describes as a grass roots citizens' lobby aimed at creating the political

will to end hunger.

''Never before has there been such a mobilization for the long-term needs of children,'' Harris said. ''There was a mobilization for famine in Ethiopia but not for the long-term needs of children. I think the vigils began to let the public know the problem, some of the solution, and will help to assure that this World Summit for Children will not be a secret summit.''

The vigils, asking governments to provide children with health care, education and an environment free of poverty, began in New Zealand and followed the setting sun westward through more than 80 nations to end in Hawaii. Attendance ranged from a few dozen to thousands at more than 2,600 locations around the globe.

In Britain, an estimated 15,000 people participated in 50 vigils.

Hundreds of children and adults gathered at St. Paul's Cathedral in London Sunday night to urge world leaders to make bold social, political and economic commitments on behalf of children's health, education and welfare.

Forty children holding candles and dressed in colorful ethnic costumes symbolized the tragedy they hoped to end - the deaths of 40,000 children each day, more than half of them from sicknesses like measles and diarrhea that could easily be treated.

Robert Lloyd, who narrated the program, said the preventable deaths could be spared by an expenditure of $2.8 billion worldwide per year. ''That sounds a lot but it is the same that American companies spend on the advertising cigarettes in a year, it is the same that Russians spend on vodka in a month, and it is the same as the world spends on the military every day.''

Tara McDonald, a 14-year-old ambassador for UNICEF, stated the U.K. branch goals for the conference: ''Saving the lives of 50 million children worldwide this this decade, and ensuring their future health, education and opportunity to live a life free of poverty within a sustainable environment.''

In the United States, more than 100,000 people gathered at hundreds of vigil sites from Boston's City Hall Plaza to Kilana Park in Maui, Hawaii.

In St. Paul, where 1,500 children and adults attended the vigil, Luanne Nyberg director of the Children's Defense Fund, said it is time for lawmakers to recognize children's needs.

''We're here to show President Bush and all the politicians in Minnesota who want our vote Nov. 6 that we want children to be their front-and-center agenda their first priority,'' Nyberg said.

The vigil in Kansas City was organized by a high school student, Luci Hooper,

a member of Youth Ending Hunger, an international group.

Economist Sheldon Stahl told the crowd in Kansas City that while fatal plane crashes attract headlines, one child dying of neglect or hunger every two seconds does not make headlines.

Organizers in Washington said that at Kharkov in the Soviet Union more than 30,000 people gathered for the vigil.

In the Philippines, where some 1.3 million children are caught in the vise of abuse, neglect, exploitation, and insurgencies by communist guerrillas and Moslem separatists, President Corazon Aquino lighted the first candle in a vigil that drew 6,000 people at a Manila stadium.

Aquino said the ceremony ''firms up our commitment to put Filipino children in the forefront of our development agenda and to secure their claim on the country's resources, whether in peace or in times of conflict.''

In Australia, Prime Minister Bob Hawke threw away a prepared text as he urged a crowd of 3,000 people in Sydney to continue to pressure governments to spend less on weapons and more on eliminating child poverty.

Children in Australia linked 40,000 paper dolls together from the top of a mountain to its base.

In Denmark, Prime Minister Poul Schluter used the occasion to announce that Denmark had ratified the Convention on the Rights of the Child.

#90267u1796 09/24/1990 ~United Press International
WASHINGTON (SEPT. 24) UPI - Two swing members of the Senate Judiciary Committee said Monday they will vote for the nomination of David Souter to the Supreme Court, a strong indication he will be quickly confirmed despite some opposition.

Sens. Howell Heflin, D-Ala., and Dennis DeConcini, D-Ariz., two moderates who sometimes side with the Republicans, strongly endorsed Souter, a conservative New Hampshire jurist nominated by President Bush to succeed retired Justice William Brennan, the court's leading liberal.

Heflin said Souter will not ''bring a scorched-earth policy'' to the Supreme Court and DeConcini said Souter does not have a ''hidden agenda'' and ''he was not chosen to turn back the clock on the great constitutional principles of our day.''

The votes of Heflin and DeConcini, along with the panel's Republicans, assure Souter of committee approval when it meets Thursday. The Senate could act Friday, enabling Souter to take his seat on the court when the new term begins Monday, but the final vote might be put off until next week.

The Senate's assistant Democratic leader, Alan Cranston of California, announced he will vote against Souter, saying he was concerned about the nominee's views on abortion.

In a brief Senate speech, Cranston said, ''I cannot support a nominee who refuses to acknowledge that a woman's right to choose to terminate a pregnancy is a fundamental right, or that the right of individuals, married or unmarried to use contraceptives to prevent pregnancy is a matter of settled law.''

''I cannot support a nominee who regards these issues as open questions,'' said Cranston, the author of an abortion rights bill pending in the Senate.

Souter, 51, a federal appeals court judge and former member of the New Hampshire Supreme Court, has declined to say how he might vote on cases challenging the landmark 1973 Roe vs. Wade decision, which recognized a

constitutional right for women to seek abortions.

During Judiciary Committee hearings that ended last week, Souter said only that he would come to the court with no preconceived agenda on abortion or on Roe vs. Wade.

Heflin, himself a former state supreme court justice, said those who demanded the nominee state his ''precise views'' on issues were ''wrong.''

DeConcini acknowledged that Souter ''at times refrained from answering questions on controversial areas of the law. I do not challenge his prerogative to draw a reasonable line, but this senator was left satisified with his responses.''

Heflin cited Souter's ''humaneness'' and ''willingness to listen'' and predicted that he would ''respect precedent.'' He added, Souter ''will not bring a scorched-earth policy to the court ... but a sense of perspective.''

DeConcini said that during the hearings it became ''quite evident that Judge Souter did not have a hidden agenda he would impose upon the Supreme Court.''

''Instead, Judge Souter is a proponent of judicial restraint,'' DeConcini said. ''He respects and defers to precedent. He understands the respective powers of the three branches of government. Most importantly, he understands the role of the court in our system and its duty to protect individual liberties.''

WASHINGTON (SEPT. 24) UPI - Treasury Secretary Nicholas Brady, in a letter obtained Monday, warned the government could run out of money by Oct. 4 unless Congress passes final legislation increasing the public dept limit to $3.509 trillion.

''I urge the Congress to act in a timely manner on a debt limit increase in order to avert a default with its adverse consequences on domestic and international confidence and trust in the United States,'' Brady said.

He recommended the action be taken by next Tuesday ''in time for the Treasury to auction securities on Oct. 3 and settle them on Oct. 4.''

Congress already passed temporary legislation increasing the debt limit to

$3.195 trillion, but that ceiling will revert to about $3.123 trillion at midnight Oct. 2 unless a permanent measure is approved.

''Without an increase in the debt limit, all issuance of Treasury securities would cease,'' Brady said in the letter dated Sept. 21 and addressed to Sen. Robert Dole of Kansas, the Senate Republoican leader.

''Our estimates show that the government is likely to run out of cash and default on the government's obligations as easrly as Oct. 4, although this event could occur as late as Oct. 11,'' he said in the letter obtained by reporters.

Brady cited ''two factors that contribute to this unusually high degree of uncertainty'' in the nation's cash reserve:

-The timing of the capital needs of the Resolution Trust Corp., the federal agency charged with selling the assets of failed savings and loan institutions.

-A change in the tax code that affects the timing of employer payments of withheld taxes to the Treasury Department.

Brady said that the increase in the debt limit to $3.509 trillion is about $30 billion higher than projected by the government in its midyear budget review but ''should be sufficient to allow the government to operate'' until the end of fiscal 1991.

#90267u1832 09/24/1990 ~United Press International

(SEPT. 24) UPI - Iraq said Monday it will boycott the U.N. General Assembly session after squabbling with the United States over what type of aircraft would be allowed to transport the Iraqi foreign minister to New York.

''Iraq is boycotting the U.N. General Assembly because the United States has blocked Foreign Minister Tariq Aziz's trip to New York by refusing his plane landing rights,'' Iraq's official Baghdad Radio said.

Aziz had requested he be allowed to fly to New York for the U.N. meetings on an Iraqi government plane.

Earlier Monday, State Department spokeswoman Margaret Tutwiler said in Washington that the decision about whether to allow Aziz to fly to the United Nations aboard an Iraqi government aircraft ''remains under review'' in the U.S. government.

Asked why an Iraqi government airliner would be denied permission to land, Tutwiler said the reasons have to do with the fact that Iraq continues to hold at 93 Americans in detention, has refused to allow American diplomats to leave Iraq, and refuses to allow consular access to those detained.

Tutwiler said Aziz's right to come to the United States is not in dispute, and that it is only his right to use ''the convenience of a government aircraft.''

The official Iraqi News Agency reported that Aziz had sent a letter of protest to U.N. Secretary-General Javier Perez de Cuellar because the United States had denied permission for his plane to land in New York.

The decision to boycott came on the eve of a U.N. Security Council meeting to tighten sanctions against Baghdad with an air traffic embargo.

The State Department said a taped message by Iraqi leader Saddam Hussein was

on its way to the United States and believed to be arriving late Monday when it would be turned over for dissemination to networks.

Egypt's interior minister was quoted in the early Tuesday edition of a Cairo newspaper as saying Iraqi invasion forces had seized 300,000 Kuwaiti passports and that he had alerted Egyptian immigration officials to be on the lookout for Iraqis trying to enter the country using the stolen documents.

The statement by Lt. Gen. Mohamed Abdulhalim Mussa in the semi-official daily Al Ahram coincided with another report which said Egyptian authorities had uncovered an alleged Iraqi-Palestinian plot to carry out acts of terrorism on Egyptian soil.

France rejected an apology from Iraq for its rough treatment of diplomats in occupied Kuwait, as French President Francois Mitterrand told the U.N. General Assembly on the first day of its annual debate not to compromise with Iraq for its occupation of Kuwait and proposed a four-point plan to settle the Middle East conflict.

The Security Council, the more powerful U.N. body, was scheduled to vote Tuesday on a resolution asking governments to withdraw landing rights to aircraft flying to and from Iraq or occupied Kuwait, and to forbid airlines from making scheduled or non-scheduled flights to these two countries.

U.N. diplomats said the air embargo would almost certainly be approved because the five permanent members of the council - the Soviet Union, the United States, China, France and Britain - have agreed on the resolution.

In other developments:

-The Los Angeles Times said the U.S. government used newly gathered intelligence to learn Saddam drew up an ambitious plan for regional dominance as early as 1986. It envisioned the troops would make only a ''strategic pause'' in Kuwait before continuing south into Saudi Arabia, the newspaper quoted officials as saying.

-The London-based Saudi daily Asharq al Awsat reported that Saudi Arabia, citing apparent espionage, asked Iraq and pro-Iraqi Arab states Jordan and Yemen to trim their embassy staffs in the kingdom to one ambassador and four diplomats. A Saudi diplomatic source said the kingdom also was investigating reports Indian military attaches in Saudi Arabia and other gulf states were spying on the U.S.-led multinational build-up and passing information to Iraq.

-The West German government said it will deliver nearly $500 million worth of East German military equipment to the U.S. forces in the Persian Gulf as part of a $2 billion German aid package to support operations and assist countries worst hit by a trade embargo against Iraq.

-Saudi Arabia ordered its embassies around the world to cancel public National Day receptions Monday, at a time when tensions remain high with Iraq and warnings of terrorism attacks against Saudi diplomats have been issued.

-A personality profile of Saddam Hussein suggests he's an aggressive gambler who will launch a surprise attack against someone in mid-to-late October. John Thompson, an analyst with the Toronto-based Mackenzie Institute for the Study of Terrorism, Revolution and Propaganda, also warned nations opposing the Iraqi leader to expect terrorist attacks by those sympathetic to his cause.

MOSCOW (SEPT. 24) UPI - The Soviet Parliament gave President Mikhail Gorbachev new powers Monday to begin a transition from 70 years of central planning to a market economy, but again put off adopting a specific program of reforms.

The resolution on ''additional measures for stabilizing the economic, social and political life of the country'' delegates to Gorbachev the power to issue decrees on management of the economy including property relations, wages, prices, budget and financial systems and strengthening law and order.

Deputies voted 305-36 with 41 abstentions on the resolution to give Gorbachev the new powers ''in accordance with the Constitution of the U.S.S.R.'' until March 31, 1992. They later voted to upgrade the resolution into a law by a tally of 277-41 with 52 abstentions.

But legislators of the Russian Federation headed by Boris Yeltsin on Saturday said any new powers for Gorbachev were ''impermissible,'' pointing to a looming new clash between the two powerful leaders who both favor a market economy.

Nikolai Medvedev, a Russian legislator from Lithuania, said, ''the new powers make Gorbachev an economic czar,'' empowered to issue laws without the lengthy procedural haggling that has marked the lawmaking of the Supreme Soviet, or parliament.

Medvedev blamed the ''low level of political culture of our parliament'' for Gorbachev's seeking the special powers and not any political craftiness or hunger for power by the Soviet President.

Some observers called it a black day for the parliament which began with so much promise two years ago after six decades of being a rubber stamp body of no debates and automatic yes votes for laws formualted by the Communist Party.

The resolution, entitled ''additional measures for stabilizing the economic, social and political life of the country,'' delegates to Gorbachev the power to issue decrees on management of the economy including property relations, wages, prices, budget and financial systems and strengthening law and order.

''The country is in a crisis situation,'' Gorbachev said during the debate on whether Parliament would delegate some of its legislative authority. ''I want this law. I can only add that these powers will be used to carry out these measures with all due responsibility.''

Earlier in Monday's session of the Supreme Soviet, or Parliament, deputies once again delayed adoption of a specific blueprint for the transition to a market economy by ordering that two radically different plans be combined into one workable program to be presented to Parliament Oct. 15.

There seemed to be little hope, however, that a new commission would be able to satisfy either side by combining the two programs - a radical ''500-day'' plan developed by economist Stanislav Shatalin with the support of Gorbachev and Russian leader Boris Yeltsin and the conservative government plan of Premier Nikolai Ryzhkov.

The Shatalin plan calls for immediate moves to privatize property and slash government spending, followed by decontrol of prices and other reforms. The Ryzhkov plan envisages the retention of much central planning and mixed property rights, with price reforms consisting of adjustments in the state-set prices.

There have been efforts to combine the two plans during the last month, but neither side has been satisfied and Yeltsin said the effort was like trying to mate ''a hedgehog with a snake.''

Shatalin, whose two main passions are economics and soccer, used a sports metaphor to express his exasperation when the Supreme Soviet ordered another commission set up to combine the plans.

''It's like I was the coach of Dynamo (soccer club) and I called in my top player and said 'you have to play in such a way that both (the rival team) Spartak and Dynamo win,''' Shatalin told the deputies.

#90267u1885 09/24/1990 ~United Press International

BANGKOK, THAILAND (SEPT. 24) UPI - A collision between a pickup truck and a tanker carrying liquefied natural gas touched off a fiery explosion in downtown Bangkok Monday that killed at least 30 people and seriously injured many others, witnesses and officials said.

''It was like a huge fireball across six lanes of traffic,'' said Richard Rothhaas, an American who saw the fire.

''I saw one man come crawling out, his clothes blasted off, his body burned white,'' Rothhaas said. ''He just lay there saying ''Let me die, let me die.''''

Government television stations said at least 30 people were reported dead with many others injured.

A police official at nearby Phya Thai police station said so far five bodies have been recovered, but others were believed still trapped in the flames.

The official said the fire was apparently set off by a collision between a fuel truck and a pickup truck at a busy intersection in central Bangkok.

The collision was followed by an explosion that spread flames over cars on the road and set fire to nearby buildings.

The accident took place at about 10:00 p.m. when Bangkok streets are still heavy with traffic.

#90267u1892 09/24/1990 ~United Press International

PHILADELPHIA (SEPT. 24) UPI - A Pennsylvania company pleaded guilty Monday to racketeering charges in a scheme that used $1 billion worth of phony defense contracts to defraud investors and banks, including Britain's third-largest defense contractor.

Parent Industries Inc. of Lancaster, Pa., also agreed to pay more than $4.3 million to the federal government to settle the case.

The firm, a holding company owned by James H. Guerin, admitted to participating in the scheme with International Signal and Control, a defense contractor owned by Guerin.

ISC allegedly concocted fake defense contracts, making the contracts look real by moving money through various bank accounts in a practice known as looping, prosecutors said.

''As a result of the fictitious contracts, supported by the looping of funds, ISC's books and records grossly overstated both the company's sales and those receivables,'' Assistant U.S. Attorney Robert Goldman wrote in documents filed Monday.

''It is calculated that Guerin directed the creation of $1 billion in fictitious sales and contracts from 1984 through 1989,'' Goldman wrote.

Guerin has not been charged individually in the case.

ISC and Parent, which controlled ISC's stock, used the phony books to obtain bank loans and inflate the price paid for ISC in 1987 by Ferranti PLC, a British defense contractor.

Parent received $670 million worth of Ferranti stock in the deal, and used the securities as collateral for a $39 million loan.

When the fraud was discovered in 1989, court documents indicate, Ferranti suspended trading on its stock on the London exchange.

The British firm last year wrote off $365 million because of the deal, and the plea memorandum indicates it has been forced to sell off sizeable portions of its assets and enter merger discussions.

Parent had also been charged with money laundering and fraud.

(SEPT. 24) UPI - A group of Egyptian doctors who recently left Kuwait say some Iraqi soldiers are injuring themselves to avoid combat. One of the doctors told reporters in Cairo that he treated about 200 Iraqi troops, many for self-inflicted wounds. .

The State Department says about one-thousand Americans are still being held against their wishes in Iraq and occupied-Kuwait. Officials say those held by Iraq include 69 American citizens with serious medical problems. .

In another Iraqi-related report, Argentina's president says he has fired an adviser who violated an international trade embargo against Baghdad. Argentine medical supplies and food reportedly werre shipped to Iraq through Iran. .

Iraq was also a major topic today at the U-N General Assembly as the world body opened an annual debate on world crisis. French President Mitterrand urged the United Nations NOT to compromise in its stand with Iraq.

The Treasury Department says the United States posted a budget deficit of 52-pointBILLION dollars in August, a huge gain over the August 1989 shortfall of slightly more than 22-BILLION dollars

Witnesses and officials in Thailand say an estimated 20 people were killed and many others injured in downtown Bangkok today when a fuel truck collided with a pickup truck. An American witness says ''it was like a huge fireball.''

Yugoslavia's only national daily newspaper didn't make it to the newsstands today for the first time in 45 years and its editor-in- chief says he's NOT sure when it will be published again. The paper has been dogged by financial problems.

A prosecutor in Allentown, Pennsylvania, today said a Russian Orthodox priest

convicted of drug charges used religion to conceal his illegal activities. The prosecutor said the priest ''has hidden behind the cross.''

-30- 1984

#90267u1907 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - The dollar ended mixed Monday in New York as cross-trading of the West German mark and Japanese yen dominated the market.

The dollar was quoted at 1.5590 German marks, off from 1.5775 Friday, and at 137.50 Japanese yen, up from 136.65.

Trading was dominated by cross-trading as dealers sold yen and bought marks, analysts said.

''Basically it was one of those days where traders were selling yen and buying marks and Swiss francs and British pounds,'' said David Gilmore, foreign exchange analyst for McCarthy, Crisanti & Maffei. ''It was a day where cross rates were the main focus of the market.''

Working strongly against the yen was the surge in the price of oil, seen as destabilizing for Japan, which depends heavily on foreign oil sources, analysts said.

''The net on the day was the dollar ended up strong against the yen and a little weaker against the mark,'' said David Jacques of Barclays Bank PLC.

Sterling also strengthened on the back of oil prices, as well as news the United Kingdom's trade deficit had narrowed, analysts said.

The British pound closed at $1.8810, compared with $1.8435 Friday.

Other New York dollar rates: 1.2975 Swiss francs, off from 1.32; 5.22 French francs, off from 5.2820; and 1,166.50 Italian lire, off from 1, 174.

Rumors of central bank interest in the dollar against the yen also pushed the dollar higher, one analyst said.

Working against the dollar was a lack of concern expressed at the Group of Seven weekend meeting over the weaker U.S. unit, Gilmore said.

''The G7 seems tolerant of an orderly move downward for the dollar,'' Gilmore said.

In Europe, the U.S. dollar closed weaker against the major currencies in thin trading. The favorable U.K. trade figures pushed sterling sharply higher, analysts said.

The closing of the Tokyo market for a national holiday, a dive on Wall Street and uncertainty over the direction of the U.S unit restricted activity for the dollar, dealers said.

Expectations of higher Japanese interest rates also weighed on the dollar, they said.

In London, the pound gained more than three cents against the dollar after U.K. trade figures came in at a greatly reduced deficit of $2.04 billion, compared to $3.16 billion in July.

The pound closed at $1.8825 against $1.8675 at the close Friday.

The dollar closed lower in Frankfurt at 1.5590 German marks from 1.5735, and also was down in Zurich at 1.3040 Swiss francs from 1.3155.

The dollar slipped in Paris, Brussels and Milan, at 5.2340 French francs vs. 5.2880, 32.23 Belgian francs vs. 32.41, and at 1,167.20 Italian lire vs. 1,176.65 Friday.

Japanese markets were closed Monday for a national holiday. Trading will resume Tuesday.

Gold closed higher at $392.50 an ounce from $390 in Zurich, and was higher in London at $396 an ounce from $389.25.

Increases in oil prices following rising tensions in the Gulf prompted short covering and light fresh buying for gold, bullion traders said.

Republic National Bank in New York closed cash gold at $403.00 an ounce, up from $389.75 Friday. The New York Commodity Exchange also settled contract gold at $403.00 an ounce, ahead from $389.40.

Republic closed cash silver at $4.935 an ounce, up from $4.815. Comex silver ended trading at $4.915 an ounce, up from $4.79.

Silver was up in Zurich at $4.81 an ounce from $4.80, and was also higher in London at $4.88 compared to $4.81 Friday.

#90267u1936 09/24/1990 ~United Press International

SEATTLE (SEPT. 24) UPI - Vice President Dan Quayle said Monday if the world can unite against Iraq President Saddam Hussein, Congress should be able to rally behind President Bush to break the current budget impasse.

''The time is running out to get this budget agreement,'' Quayle told a media round table as part of his Western states' swing on behalf of Republican congressional candidates. ''It is not going to be helpful to anyone to have the Graham-Rudman meat ax fall.''

''The president has gone the extra mile. He has put everything on the table that the democratic leadership insisted upon.

''What have we gotten in return. Nothing - not one thing except a lot of talk. It's time to deal ... wrap this up. The American people demand it.''

''If the world can unite against Saddam Hussein, then members of Congress can unite behind President Bush and clear up this mess once and for all.''

Quayle said efforts by Democrats to pass a continuation resolution delaying Graham-Rudman cuts and ''somehow kick this down the road till after the election'' will further stir an ''anti-incumbency feeling that has been developing for a number of months now.''

Quayle also expressed reservations about a proposal by Senate Republican Leader Robert Dole to sever an administration-backed plan to cut the capital gains tax from the deficit reduction package, producing two budget measures to be voted on separately.

The Kansas senator has suggested that Republicans might agree to raise tax rates for the rich if Democrats accept the capital gains tax cut President Bush wants.

''What Sen. Dole is doing is trying to move the process forward. I just hope that this tactical move on his side does not hurt us in our quest to get capital gains,'' Quayle said. ''Capital gains reduction is very important to us.''

''The majority of the Congress support us and the president supports it,'' he said.

If a budget agreement is not reached by Oct. 1, automatic spending cuts would immediately go into effect including furloughs for thousands of federal employees.

Bush sent his vice president to Seattle to attend a fundraising breakfast for GOP challenger Bob Williams, who is trying unseat freshman Rep. Jolene Unsoeld in November's election.

''This race is a top priority for us - one of the closest in the nation,'' Quayle said.

Both candidates plan to spend $1 million or more in the race focused on the Northwest's timber war, which pits environmentalists trying to protect the threatened spotted owl and old-growth forests against those supporting jobs in the logging industry.

Quayle defended the administration's proposal, announced Friday, for curtailing the amount of logging permitted on national forests in the Northwest by nearly 17 percent next year to protect the owl.

The conservation strategy allows the U.S. Forest Service to sell 3.2 billion board feet of timber in Oregon and Washington during the fiscal year that begins Oct. 1.

''We hope that this is final and that Congress doesn't undercut,'' Quayle said.

''It's been a tough decision and one that has been researched. We have attempted to strike a balance.''

Quayle left for Portland, Ore., in the afternoon and will travel later to Los Angeles and New Mexico on behalf of GOP candidates.

NEW YORK (SEPT. 24) UPI - NBC News President Michael Gartner wrote in a memo Monday that as many as 25 employees might be laid off in a reshuffle of the department - but Jane Pauley is not one of them.

Gartner, in San Jose, Calif., at the annual meeting of the Radio and Television News Directors Association, said in a memorandum that the network was examining its schedule, which could result in new programs, changes in existing shows and resulting reassignments. He continued:

''Nevertheless, still others whose skills don't match those needed for the new shows or any other show - perhaps as many as 25 - may be laid off.''

NBC News now employs almost 1,000 people.

The network also announced Monday that Jane Pauley has signed a new five-year contract with NBC News. Her show, ''Real Life with Jane Pauley,'' will return to the schedule in mid-season as a weekly series. It was introduced this summer as a series of five specials.

#90267u1990 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - Stock prices plunged in moderate trading Monday as skyrocketing oil prices and heightened tensions in the Persian Gulf sent the Dow industrials to their lowest levels in over a year.

The Dow Jones industrial average, which lost 5.94 Friday, tumbled 59.41 to 2452.97. The Dow has not closed at these levels since late June and early July of 1989.

A loss of more than 50 points at late morning triggered the exchange's rule curbing program selling. Under the rule, computerized trades in stocks can only be made at a price equal to or higher than the previous trade. Broader

market gauges hit lows for the year. The New York Stock Exchange composite index fell 3.52 to 167.51 and Standard & Poor's 500-stock index slumped 6.73 to 304.59. The price of an average share plunged 61 cents.

Declines pounded advances 1,417-240 among the 1,985 issues crossing the NYSE tape. Volume amounted to 162,210,000 shares, compared with 201, 054,180 shares Friday when volume was inflated by the ''triple-witching hour'' expirations of stock-index futures and options.

The surge in oil prices that has seemed to know no bounds since Iraq invaded Kuwait Aug. 2 sent the Dow to its lowest close since July 3, 1989, when it closed just a notch lower, at 2452.77.

November crude oil futures soared $2.82 to close at $38.25 in New York trading and topped $39 a barrel early in the afternoon after more belligerent talk over the weekend from Iraqi President Saddam Hussein.

On Sunday, Saddam reiterated his threat to attack Israel and oil fields in Saudi Arabia if his country was ''suffocated'' by mounting international efforts to force Iraqi troops out of Kuwait - an indication the U.N. sanctions were beginning to bite.

''We have $38 oil and it went as high as $39,'' noted Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co. ''That was the scenario if we had a shooting war, when this started. But we're there and there's still no war. So what could happen is weighing heavy on people's minds,'' he said.

From a technical standpoint, analysts noted the Dow's plunge, which got under way from the opening, took out the 2483.42 level early on. That figure was significant since it was the previous 52-week closing low for the blue-chip average. Analysts had hoped the Dow would not fall below it and Monday's close caused analysts to fear further selling may be on the way.

Kaminsky said volume, which was only moderate, was a source of concern to him, since it may mean there is more selling to be done.

''I think the healthiest thing would be to wash out with some volume and get it to a level where people will look at values again,'' he said. ''Right now too many things still look overpriced.''

As if the market were not shaken badly enough by oil prices closing in on $40 a barrel, bond yields rose and the prospects for a deficit- cutting accord dimmed.

Treasury bonds were down 18/32 in late trading with yields near their highest levels of the year. And the market's bearish tone was intensified further by the failure thus far of congressional budget negotiators to reach a deficit-cutting accord. White House spokesman Marlin Fitzwater was quoted

Monday as saying an agreement was not even close on several key issues.

''We've got a deficit not being addressed, higher oil, higher inflation and interest rates and a Fed that's probably not going to ease (interest rates),'' Kaminsky said. ''I don't know any reason why people should own stocks now, the risk is much greater than the reward.''

On the trading floor, Chase Manhattan was the most active issue, sinking 1 5/8 to 11 1/8 after news Friday of its massive restructuring, which involves 5,000 job cuts and a planned 50 percent reduction in its dividend.

Boeing followed, tumbling 2 7/8 to 40 3/8 as economically sensitive stocks took it on the chin. Alcoa, whose fortunes also rise and fall with the state of the economy, plunged 3 3/4 to 63 3/4. Some analysts say aluminum prices could drop quickly if the economy weakens further.

Citicorp was third, down 1/2 to 15 1/4 as major banks followed Chase with sharp losses. Chemical Banking slid 1 7/8 to 15 1/8, Bank of New York tumbled 1 7/8 to 18 5/8 and Wells Fargo slumped 1 3/8 to 49 7/8.

Among the other blue chips, AT&T fell 5/8 to 30 3/4, IBM dropped 1 3/4 to 105, General Electric lost 1 1/2 to 54 3/8, American Express sank 1 7/8 to 20 7/8, Merck gave up 2 1/8 to 73 1/2 and Philip Morris fell 7/8 to 43 7/8.

Even the oil issues in the Dow could not buck the market's trend, despite the surge in oil prices. Exxon fell 3/4 to 50 1/2, Texaco fell 1/2 to 63 3/4 and Chevron lost 1/4 to 77 5/8. As for other oil stocks, Amoco fell 3/8 to 58 1/2, Mobil eased 1/8 to 66 7/8 and Amerada Hess slid 7/8 to 54.

Elsewhere, UAL plunged 8 1/2 to 92 1/4, helping push the Dow transports down 34.76 to 841.90, a loss of about 4 percent. United Airlines' pilots union urged its members to write the company's board and express backing for continued employee-buyout efforts. The union warned a strike could result if efforts failed.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 194,231,810 shares, compared with 232,822,500 shares traded in the previous session.

Prices tumbled in active trading on the American Stock Exchange.

The Amex Market Value index skidded 3.17 to 312.84. Declines thumped advances 511-115 among the 807 issues traded. The price of an average share fell 11 cents. Composite volume totaled 15,968,100 shares, compared with 14,176,430 traded Friday.

PaineWebber's call warrants on the Tokyo market's Nikkei index led the Amex issues, surging 1 to 10.

The National Association of Securities Dealers composite index tumbled 10.09 to 352.16.

-30- 6112

#90267u2009 09/24/1990 ~United Press International

(SEPT. 24) UPI - House Speaker Thomas Foley is hopeful budget negotiators are close to an ''agreement in principal'' on a 500-BILLION-dollar deficit reduction plan. The Washington Democrat says an afternoon meeting between White House and congressional negotiators may succeed. The budget dealers are working under deadline, with automatic cuts kicking in next week without an agreement.

A federal jury in Norfolk, Virginia, today convicted a Christian Broadcasting Network technician on satellite-piracy charges for transmitting religious messages that interrupted a soft-porn movie on the Playboy Channel. But Thomas Haynie was found innocent of four other counts related to interrupting another pay-television outlet... called the American Exxxtasy Channel. The incidents occurred September 7th, 1987.

The F-D-A today authorized wider use of an experimental drug that may save bone-marrow recipients from life-threatening infections if the transplants fail. F-D-A officials say about 10 to 20 percent of transplant recipients suffer either outright or delayed rejection of transplanted marrow. The drug produces white blood cells that are essential to fighting infection.

The Environmental Protection Agency says 20 paper mills across the nation are spewing dioxin, increasing the cancer risk for people who eat contaminated fish. The E-P-A says the International Paper Mill at Georgetown, South Carolina, poses the highest risk, where consumption of downstream fish carries a cancer risk of one in 50.

The Federation of Consumers says Americans flunked a comprehensive test of their consumer knowledge. Citing a nationwide test, the federation says American consumers scored low on questions concerning housing purchases, checking and savings accounts, food purchases and life insurance.

Residents of a Palestinian refugee camp where an Israeli soldier was killed last week say the Israeli army plans to demolish many homes and shops near the location of the fatal attack. Israeli military sources have said buildings belonging to Palestinians involved in the attack will be torn down in accordance with the law.

The future of Bulgaria's ruling Socialist Party was thrown into confusion by a surprise announcement today by the party's chief. Alexander Lilov offered to step down following demands by liberals for a purge of older leaders linked to the party's totalitarian past. The party is holding a congress in Sofia.

-30- 2617
#90267u2019 09/24/1990 ~United Press International
HOLLYWOOD (SEPT. 24) UPI - The Mafia drama ''GoodFellas'' shot into first place at the nation's box office in its debut weekend, putting the arm on moviegoers for an impressive $6.37 million haul at 1,070 screens for Warner Bros.

But ''GoodFellas,'' based on the life of reformed mobster Henry Hill and starring Robert De Niro and Ray Liotta, only narrowly outgunned last weekend's No. 1 film, ''Postcards From the Edge,'' which grossed $6.33 million at 1,322 screens.

''Postcards,'' a hard-bitten comedy starring Meryl Streep and Shirley MacLaine and based on actress Carrie Fisher's book, has delivered a first-class gross of $17.2 million in less than two weeks for Columbia.

''GoodFellas'' and ''Postcards,'' which have both received strong reviews, may post some solid fall business for Hollywood. Their chief competition this weekend will come from the opening of Twentieth Century Fox's San Francisco-based thriller, ''Pacific Heights,'' starring Melanie Griffith and Michael Keaton.

''Ghost,'' the year's surprise hit, continued to scare up big numbers, with $5.1 million at 1,766 screens over the weekend to float into the No. 3 spot after a week at No. 2. It was the first time in 11 weeks that the romance-thriller finished below the No. 2 spot.

''Ghost'' has grossed $148.3 million for Paramount and trails only Disney's ''Pretty Woman'' among this year's movies top money-makers. ''Pretty Woman,'' Disney's all-time box-office hit, has drawn in $172.5 million in 28 weeks and was still showing at 693 screens last week.

Columbia's cop action-adventure ''Narrow Margin,'' starring Gene Hackman and Anne Archer, took in a less-than-arresting $3.6 million in its debut weekend at 1,132 screens, but still good enough for fourth place.

Paramount's ''Funny About Love,'' in which Gene Wilder gets involved with three women at once, wooed its way into the No. 5 spot with a lukewarm $3 million debut weekend at 1,213 screens.

MGM/UA's ''Death Warrant,'' with martial arts star Jean-Claude van Damme, kicked up $2.8 million in its second weekend at 1,090 theaters as it fell from third to sixth. It has pulled in $9.2 million in 10 days.

The life-after-death drama ''Flatliners,'' starring Julia Roberts and Kiefer Sutherland, tallied $2.2 million at 1,469 screens as it descended from fifth

to seventh place. Its seven-week total has hit $51.3 million.

''Presumed Innocent,'' Warner's courtroom whoodunit, fell from No. 4 to No. 8 with $2 million over the weekend at 1,285 theaters. The movie, starring Harrison Ford as a prosecutor accused of murder, has grossed a persuasive $78.6 million in nine weeks.

Universal's horror-revenge fantasy ''Darkman,'' which opened in the No. 1 spot four weeks ago, fell to No. 9 with just $1.5 million at 1,236 screens for a 31-day gross of $30.4 million.

''Hardware,'' Miramax's apocalyptic sci-fi thriller, performed adequately with $1.3 million at just 692 screens to round out the top 10 and give it a 10-day gross of $4.3 million.

Paramount's ''The Two Jakes,'' one of the major disappointments of the year, continued to limp along, with a weekend gross of $27,068 at 57 screens. After 45 days, the ''Chinatown'' sequel has grossed a mere $9.95 million.

The top 10, weekend gross, total gross and weeks in release:

1. ''GoodFellas,'' $6.37 million, 1 week.

2. ''Postcards From the Edge,'' $6.33 million, $17.2 million, 2 weeks.

3. ''Ghost,'' $5.1 million, $148.3 million, 11 weeks.

4. ''Narrow Margin,'' $3.6 million, 1 week.

5. ''Funny About Love,'' $3 million, 1 week.

6. ''Death Warrant,'' $2.8 million, $9.2 million, 2 weeks.

7. ''Flatliners,'' $2.2 million, $51.3 million, 7 weeks.

8. ''Presumed Innocent,'' $2 million, $78.6 million, 9 weeks.

9. ''Darkman,'' $1.5 million, $30.4 million, 5 weeks.

10. ''Hardware,'' $1.3 million, $4.3 million, 2 weeks.

#90267u2056 09/24/1990 ~United Press International

NEWARK, N.J. (SEPT. 24) UPI - A federal judge Monday approved a benefit plan for NBA players covering the period between the end of their careers and the time they would begin drawing pensions.

U.S. District Judge Dickinson Debevoise overruled objections by a group of players who argued the plan would reduce the money available for free agents. None of the objectors - who included Magic Johnson, Michael Jordan and Patrick Ewing - attended the hearing.

The judge gave the plan his preliminary blessing in July but gave the objecting players time to seek support.

The pre-pension plan, endorsed by the NBA and the NBA Players Association, is designed to protect players before they become eligible for pensions at age 50. A percentage of each year's receipts are to be set aside for the fund.

Union representatives, including President Isiah Thomas of the Detroit Pistons argued that many basketball players have short careers and are often ill-prepared to find other work at anything like the salaries they were making while playing.

Player representatives approved the plan 26-1 Sept. 10. A player referendum had already endorsed it by a 3-1 margin.

The pre-pension plan was an outgrowth of a suit filed in 1987 in which the union challenged a salary cap and other limits on the movement of players from team to team. That suit was settled during collective bargaining.

#90267u2070 09/24/1990 ~United Press International

(SEPT. 24) UPI-Autumn arrived in the Southeast a day late Monday, chasing away weekend beach weather and cooling five states to record lows, while rain-choked rivers kept roads closed in much of southwest Texas.

While the South was cooler than normal for the second day of autumn, Rapid City, S.D., basked in 89-degree heat, a record high for Sept. 24. Rain and occasional thundershowers were spotted Monday afternoon over southern Florida, western Texas and northern Maine, and from southwest Oregon into northern California.

Just a day after three Florida cities - West Palm Beach, Fort Myers and Key West - sweltered in record temperatures in the low 90s, the early morning low

Monday plunged to 53 in Jacksonville, breaking a 23- year-old record for Sept. 24 by a whopping 6 degrees.

Apalachicola, Daytona Beach and Orlando also broke or tied their daily records with readings in the mid-50s to mid-60s as cool, dry Canadian air that swept the Northeast over the weekend invaded the deep South.

It was even chillier in other Southern states, hitting a record 41 in Birmingham, Ala., 45 in Atlanta, 42 in Greenville, S.C., and 46 in both Monroe and Shreveport, La.

Southwest Texas reported no new heavy rains since Sunday afternoon, but flood warnings remained in effect along the Rio Grande, from Presidio through the Big Bend National Park to Langtry. A crest almost 8 feet over flood stage was expected Tuesday morning at Dryden, Texas.

At least three roads remained closed in Val Verde County, near Comstock, Texas where the Devils River and other waterways were choked over the weekend by as much as 4 inches of rain in 24 hours.

One road in the county had been reported under 16 feet of water on Sunday.

#90267u2085 09/24/1990 ~United Press International

(SEPT. 24) UPI - Crude oil prices surged nearly $3 Monday to more than $40 a barrel for the first time in a decade after Iraq threatened military action against Saudi Arabia and Israel for the tightening U.N. economic sanctions against Iraq.

The price of U.S. unleaded gasoline and home heating oil each rose by nearly 7 cents a gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent shot up $2.80 to $40.40 a barrel.

This is the highest price for crude on world spot markets since November 1980 when crude prices averaged $40.85 a barrel at the start of the eight year Iran-Iraq war, said Cheryl Trench of the Petroleum Industry Research Foundation.

The oil-industry researcher said the all-time high was reached in November 1979 when crude prices averaged $42 a barrel in panic buying triggered by the Iranian revolution and the taking of American hostages.

The U.S. benchmark West Texas Intermediate crude for November delivery ended the day at $38.25 a barrel, up $2.82 over Friday's record close on the New York Mercantile Exchange, which began trading WTI futures contracts in March 1983.

WTI traded as high as $39.20 a barrel during the day's trading on the exchange.

The price of crude on U.S. spot markets was also limited during the 1970s by government price controls, which were not completely lifted until 1981, Trench said.

''(Iraqi President Saddam) Hussein's words were pretty explicit and that caused the market to run,'' said Richard Redoglia, vice president of Merrill Lynch Energy Futures in New York.

''The market has priced itself as if war has started,'' said Michael Hiley of PaineWebber Inc. in New York.

''Not until shots are actually fired are you going to see anyone (take sell positions),'' said Redoglia.

''Saddam threatens and the market moves,'' said Peter Gignoux of Shearson Lehman Hutton Inc.'s London office. ''Here we go again.''

''It's pretty much the one story of Saddam Hussein threatening military action against Saudi Arabia and Israel if the embargo causes pain to his people,'' said Brian Tagler of Shearson's International Energy Desk in New York.

''At these prices we're pretty much in uncharted territory and people are buying out of fear of prices going higher,'' Tagler said.

With the United Nations preparing to vote to add aircraft flights to its embargo on ship cargos, Saddam in a statement broadcast by Iraqi Radio Sunday,

warned, ''America must not go too far and must get out of its mind the idea of pushing events into a military collision.''

The embargo is being used ''in a way that exceeds all humanitarian limits,'' he said.

Saddam added, ''The oil, the areas it is in, and Israel will be transformed into something different from what they are now... The oil areas in Saudi Arabia and in other states of the region, all the oil installations, will be rendered incapable of responding.''

On the Merc, unleaded gasoline for October delivery surged 6.78 cents to $1.0423 a gallon, while October home heating oil soared 6.71 cents to $1.0392 a gallon.

A Merc spokeswoman said gasoline had risen to $1.11 a gallon Aug. 23 of this year and home heating oil's high was $1.15 a gallon reached Dec. 3, 1979.

Merc gasoline prices have now risen 39 cennts, or 62 percent, since the Aug. 2 Iraqi invasion of Kuwait triggered the world oil crisis.

Trilby Lundberg, director of the Lundberg Survey, said a check of retail gasoline prices at more than 13,000 retail outlets showed the weighted average price rose 2.91 cents over the last two weeks to $1.3835 a gallon, exceeding the previous March 1981 high of $1.3782 a- gallon.

The latest rise brings the total increase since the invasion to 20.64 cents a gallon, or 17.5 percent.

Also on the European spot market, United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - soared $2.70 to $33.85 a barrel.

On the U.S. Gulf Coast spot market, prompt delivery WTI was up $2.70 to $39.05 a barrel.

Sun Co., Radnor, Pa.; Marathon Oil Co., the Findlay, Ohio, unit of USX Corp. and Conoco Inc., the Houston subsidiary of Du Pont, raised the posted price they will pay for crude at the wellhead.

Sun's increase was $2.50 to $36.75 a barrel for WTI. The other two raised their postings by $2.75 to a WTI price of $37 a barrel.

Egypt raised its crude oil prices by $3 to $37.30 a barrel for a total monthly increase of $8.50 a barrel, or 29.5 percent, Egypt's Middle East News Agency reported.

(SEPT. 24) UPI - There are indications that Judge David Souter will be confirmed to the Supreme Court. Two swing members of the Senate Judiciary Committee said today they will vote for the nomination of Souter. Democratic Senators Howell Heflin of Alabama and Dennis DeConcini of Arizona say they strongly endorse the New Hampshire jurist nominated by President Bush.

A Czechoslovakian newspaper reports that Prague continues to sell arms and military equipment to Libya, Iran, Ethopia and other countries. Nine months ago, President Vaclav Havel promised to halt the arms sales. The report says despite ''justified reservations'' about the sales, the multi-Million- dollar contracts help keep Czechoslovakia's ailing economy from total collapse.

In Norfolk, Virginia, a federal jury today convicted a Christian Broadcasting Network technician of two satellite-piracy charges. Thomas Haynie was found guilty of transmitting religious messages that interrupted a soft-porn movie on the Playboy Channel. He faces a possible 10-year prison term. Attorneys say the case is the nation's first since Congress made satellite piracy a felony.

A Republican hoping to become New York's governor has a plan for dealing with what he describes as a ''killing emergency.'' Pierre Rinfret wants to train and arm volunteer vigilantes to roam the streets of the Big Apple to battle street thugs. Last week, the G-O-P candidate split with Republican leaders, calling them ''turncoats'' for refusing to donate 950-thousand dollars to his campaign.

#90267u2145 09/24/1990 ~United Press International

FREETOWN, Sierra Leone (SEPT. 24) UPI - Liberian rebel Charles Taylor and his chief rival, Prince Johnson, plan to hold peace talks this week, sources said Monday.

Taylor, leader of the National Patriotic Front of Liberia and self- proclaimed president, will meet Johnson at Freeport on Friday, said the sources close to the West Africa peacekeeping force.

There was no official conformation.

Earlier, Taylor said earlier he intends to hold elections for a national assembly Oct. 10. The elected assembly would meet Oct. 15 in the rebel-held town of Ganta.

In an interview with the British Broadcasting Corp., Taylor repeated his claim of being president of Liberia on the grounds that he controls 90 percent of the country.

Taylor said he would reserve seats on the assembly for followers of rival rebel leader Johnson, whose forces executed the late president Samuel Doe two weeks ago.

But in that interview Taylor insisted that Johnson himself would have no role in government, insisting the rival rebel leader is dead.

Johnson is, however, alive, and controls much of the center of Monrovia.

He has been seen often by journalists since the last week of August when Taylor claimed his forces killed Johnson.

Taylor's continuing claims that he is president before an election is held put him on collision course with Johnson, who has repeatedly said that none of the warring factions should assume the presidency until elections are held.

Johnson has not yet commented on Taylor's electoral plans, although his previous statements suggest he will strongly object on the grounds that Taylor is unacceptable to him as a president without having been elected to the position. There also is a great deal of personal animosity between the two men.

Taylor's election plan also undermines the efforts of an interim government

made up of exiled Liberians who are awaiting an opportunity to establish an administration in Monrovia. They will be protected by peacekeeping forces assembled by the Economic Community of West African States.

ECOWAS has become increasingly embroiled in the conflict since it arrived in Monrovia Aug. 24. Despite a cease-fire declared by Taylor Saturday, tension between Taylor and ECOWAS is increasing.

The rebel leader said Monday ECOWAS is party to the conflict and should leave. Nigeria and Ghana, whose troops form the largest part of the 4,000-strong peacekeeping force, sent 1,200 troops to Monrovia Sunday.

Members of the interim government met in Freetown Sunday, but refused to say whether they are intending to travel to Monrovia this week, as has been planned.

ECOWAS officials in Freetown said Taylor's intention of holding national assembly elections in three weeks was unrealistic. More than 400,000 people have fled Liberia and thousands of others have been displaced and not registered as voters where they are living, they said.

The cease-fire declared by Taylor was seen by diplomats in Freetown as an attempt by the rebel leader as to improve his image as a democrat. But by declaring elections that few if any of the exiled Liberian opposition parties will be ready to fight, he is being seen as attempting to secure a mandate by taking advantage of his superior postion within much of the country, senior diplomatic sources said.

#90267u2154 09/24/1990 ~United Press International

OSHKOSH, WI (SEPT. 24) UPI - Oshkosh Truck Corp.'s $1 billion contract with the U.S. Army will be made official this week, Rep. Les Aspin, D-Wis., said Monday.

Aspin, chairman of the House Armed Services Committee, said the Army would sign the contract this week. Oshkosh Truck announced last week it would lay off about 175 workers later this year.

''This is good job news for the Oshkosh area, particularly in light of recent layoffs at Oshkosh Truck as a result of decline in other Army truck production '' Aspin said.

The Oshkosh company in July was awarded the contract for the Palletized Loading System, and production was scheduled to begin during November 1991. The firm is the principal supplier of heavy military trucks to the U.S. Army.

#90267u2165 09/24/1990 ~United Press International
WASHINGTON (SEPT. 24) UPI - Government investigations of the weight loss industry are shifting from diet aid quacks to ''mainstream'' diet centers with big name programs, used by millions of Americans, coming under new scrutiny.

Richard Kelly, assistant director of consumer protection for the Federal Trade Commission, told a House panel Monday the agency is looking at 14 diet clinics and programs in ''a broad-scale investigation of the diet industry, with major emphasis on diet centers and very low calorie diet programs.''

In testimony prepared for a hearing before a House Small Business subcommittee Kelly emphasized the primary focus of the investigations is not on ''fringe marketers in the weight reduction industry, but on the mainstream companies involved in the promotion and delivery of programs and services to millions of consumers across the country.''

Saying the investigations are ''non-public,'' Kelly declined to name the companies under investigation, but sources familiar with the probe told United Press International it includes the largest, best-known diet centers and programs in the industry.

Included in the investigation, according to the sources, are the eight largest center-based weight loss programs - Weight Watchers, Jenny Craig International The DietCenter, Physicians Weight Loss Centers, Nutri/System, Optifast, Health Management Resources, and Medifast.

The eight represent 75 percent of the center-based market in the diet industry which as a whole rakes in $33 million annually.

''Much of the diet industry is now built on a foundation of false promises and false hopes,''said Rep. Ron Wyden, D-Ore., chairman of the Regulation, Business Opportunities and Energy Subcommittee.

''Before and after photos in ads may picture persons who were never on the diet,'' Wyden said. ''Customers are promised physician-supervised weight loss programs when there's no doctor in the house.''

Kelly told the panel the investigation aims particularly to find ''any false and deceptive claims being made by major marketers of diet services and halt them through negotiated settlements or enforcement actions.''

Kelly said the FTC has already filed court papers charging the multi- state diet center chain Pacific Medical Clinics Management Inc. with fraudulently claiming its amino acid supplements help produce a metabolic change to cause weight loss.

The FTC is also already ''negotiating'' with other major diet centers

''seeking changes in the way the companies involved market their programs,'' Kelly said.

Kelly said he expects the investigations to ''tone down the hype'' in the diet industry and get the message to firms not yet being probed ''that misreprsentations of the safety, efficacy, or price of their diet programs, or of the professional credentials of their staff, will place those marketers at risk of challenge by the commission or state officials.''

#90267u2192 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - The United States on Monday banned an official Iraqi government aircraft carrying the foreign minister to a United Nations session, and Iraq said it would boycott the General Assembly session as a result.

The decision by both governments appeared to dash hopes that there could be any encounter, planned or by chance, that could lead to a diplomatic resolution of the Persian Gulf crisis.

State Department spokesman Richard Boucher said the United States, after reviewing the situation, decided it would not permit Tariq Aziz, Iraq's foreign minister, to arrive in the United States aboard a special government aircraft. He would be given a visa to come aboard a commercial airliner.

But the Iraqi government, in a statement from Baghdad, said Monday it will boycott the U.N. General Assembly session if Aziz can't come on the special government plane, rather than a commcerical flight.

''Iraq is boycotting the U.N. General Assembly because the United States has blocked Foreign Minister Tariq Aziz's trip to New York by refusing his plane landing rights,'' Iraq's official Baghdad Radio said.

Aziz had requested he be allowed to fly to New York for the U.N. meetings on an Iraqi government plane.

The decision, which a State Department official said had been ''under review '' was made late Monday afternoon by Secretary of State James Baker. The move appeared to diminish any chance for a diplomatic solution to the crisis in the gulf.

Asked why an Iraqi government airliner would be denied permission to land when an Iraqair plane would also be owned by the Iraqi government, State Department spokeswoman Margaret Tutwiler said it is because Iraq continues to hold 93 Americans in detention, has refused to allow American diplomats to leave Iraq, and refuses to allow consular access to those detained.

Tutwiler said Aziz's right to come to the United States is not in dispute, and that it is only his right to use ''the convenience of a government aircraft.''

The official Iraqi News Agency reported that Aziz had sent a letter of protest to U.N. Secretary-General Javier Perez de Cuellar because the United States had denied permission for his plane to land in New York.

U.S. officials emphasized that the refusal for the government plane had nothing to do with the permission for Azis to arrive, which was not disputed.

But it had everything to do with sending a message to the Iraqi government that every opportunity was going to be taken to inconvenience a government that was holding Americans at key installations as ''human shields'' to discourage U.S. military action and was preventiving another 1,000 Americans in Kuwait and Iraq from leaving.

#90267u2211 09/24/1990 ~United Press International

MIAMI (SEPT. 24) UPI - A tropical depression strengthened into Tropical Storm Josephine in the open Atlantic Monday, but forecasters said it posed little threat to land.

At 6 p.m. EDT, Josephine was centered near latitude 19.5 north, longitude 34.5 west, or about 600 miles west-northwest of the westernmost Cape Verde Islands off the African coast, National Hurricane Center forecaster Hal Gerrish said.

The storm was nearly stationary, and Gerrish said it likely would remain stalled Monday night before before beginning a gradual northwestward drift Tuesday.

Maximum sustained winds were near 45 mph, and Gerrish said Josephine likely would strengthen by Tuesday. Tropical storm force winds extended as far as 145 miles north and 60 miles south of its center.

Josephine is the 10th named storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30.

It grew from a tropical depression, No. 12, that forecasters had been monitoring since late last week.

Another system, tropical depression No. 11, dissipated Sunday east- northeast of the Leeward Islands.

#90267u2219 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - President Bush and South African President F.W.

de Klerk proclaimed racial reform in South Africa to be ''irreversible'' Monday, but Bush noted he cannot yet move to lift economic sanctions against it.

Bush, following a two-hour meeting with de Klerk, the first South African president to visit the United States in a half century, said specific conditions must still be met, like freeing political prisoners.

''You can count on us. We will not turn back,'' said de Klerk, who has cut away at his nation's racial segregation system of apartheid since becoming head of the white minority-ruled government last year.

Last winter, in his boldest move, de Klerk freed black leader Nelson Mandela, a political prisoner for 27 years, and legalized Mandela's African National Congress. In recent months, de Klerk opened talks with the ANC on a new constitution that would guarantee equal opportunity for all.

Until all the political prisoners are released, however, U.S. trade sanctions against South Africa, imposed in 1986 as punishment for apartheid, will remain.

Assistant Secretary of State for African Affairs Herman Cohen told reporters that de Klerk indicated steps are in progress to release remaining prisoners and the White House read this to mean it would take a few months.

It is unclear, however, when another key requirement to end the sanctions would be met - the lifting of a state of emergency. In remains in effect in the province of Natal, which has been rocked by black-on- black violence in recent months.

Under the law, Bush may ask Congress to lift or modify the trade sanctions if all political prisoners are freed and if any three of four remaining conditions are met.

Cohen said if four of the five conditions are met, Bush ''would move to consult with Congress with the view toward modifying or suspending the sanctions.''

In addition to the ending the state of emergency, only one other condition has not yet been satisfied - repealing the Population Registration Act, which won't happen until a new South African constitution is adopted.

The other two conditions, both met already, were legalization of political parties and the government's entering ''good faith'' negotiations with the ANC.

''We believe the process of change in South Africa is irreversible,'' Bush told reporters after meeting with de Klerk. ''Our goal must be to support the process of change. And, of course, I will consult with Congress on these issues.''

''All of our conditions (for lifting the sanctions) have not yet been made,'' Bush said. ''But let me emphasize that these conditions are clear-cut. I don't believe in moving the goal posts.''

Congress imposed the economic sanctions over President Reagan's veto. Bush, who served as Reagan's vice president and opposed the sanctions, said Monday: ''Clearly, the time has come to encourage and assist the new emerging South Africa.''

De Klerk arrived in Washington Sunday quoting civil rights leader Martin Luther King, and saying a new South Africa is emerging. Yet many complain that de Klerk has not moved far or fast enough.

As Bush and de Klerk held their meeting, dozens of demonstrators paraded outside the White House. Among their chants: ''Free South Africa,'' and ''Mandela, Yes; de Klerk, no.''

Randall Robinson, executive director of TransAfrica, a civil rights group, called the White House meeting ''a superficial photo opportunity ... to put a smiling face on a sad and tragic situation.''

''The American public and U.S. policy-makers must be reminded that major pillars of apartheid remain,'' said Robinson, citing laws that prevent blacks from participating in the government and segregate them in packed townships.

#90267u2227 09/24/1990 ~United Press International

(SEPT. 24) UPI - The State Department says a taped message from Iraqi leader Saddam Hussein is on its way to the United States and is expected to arrive late tonight. And in the latest dispute between Washington and Bahgdad, Iraq is boycotting the U-N General Assembly session because the United States will NOT grand landing rights to an Iraqi government plane. U-S officials say Iraq's foreign minister can take a commercial flight. .

President Bush says Washington is NOT backing down in the stand against Iraq, but that does NOT mean Americans can discriminate against Arab-Americans. Bush today condemned what he terms ''appalling acts of hatred'' in the United States, saying the ''crisis abroad is NO excuse for discrimination at home.''

World stock prices plunged during erratic trading today as oil prices surged upward. Analysts say oil prices continue to rise despite a new estimate showing that OPEC members are pumping enough oil to avoid a worldwide energy shortage, at least until winter. They add that demand for oil is higher than OPEC's output, partly because of panic buying. Extra oil is coming from Saudi Arabia, the United Arab Emirates and Venezuela.

A disappointing day for Pat Robertson and a Christian Broadcasting Network technician. Robertson, the founder of C-N-N, says he is ''disappointed and saddened'' by a federal jury verdict today in Norfolk, Virginia. Thomas Haynie was convicted of two federal satellite- piracy charges for overriding images of scantily clad women with religious messages urging cable viewers to repent.

-30- 1729

#90267u2230 09/24/1990 ~United Press International

CALGARY, Alberta (SEPT. 24) UPI - The president of Conoco Inc. Monday said a 25 cent-a-gallon tax on U.S. gasoline at the pump was needed to help conserve energy, saying the current crisis was more serious than those of the 1970s.

Constantine Nicandros also told the Canadian Energy Research Institute's international conference that the U.S. tax should be raised to 50 cents a gallon over the next five years.

''It seems impossible to encourage people to drive less if gasoline is cheap '' the head of the Houston-based Du Pont subsidary said.

He added, ''Today's situation is more serious than the oil shocks of the past. This time - for the first time - there is a physical shortage of the world's oil-production capacity.''

Alluding to the current and the two oil shocks of the 1970s, he said, ''In less than two decades, we have had three very distinct warnings that clearly showed the value of (conservation) measures. It is time for us to stop ignoring these warnings.''

Even after the increases since Iraq's Aug. 2 invasion of Kuwait, Americans spend less than 3 percent of their income on gasoline, compared to 4.5 percent in 1978, Nicandros said.

#90267u2235 09/24/1990 ~United Press International

(SEPT. 24) UPI - A farm labor union today argued in a Portland, Oregon, courtroom that a current state law banning migrant workers from picketing in the field during harvesting time is UNconstitutional. Union lawyer Gene Mechanic said the law violates free speech by banning picketing during harvest time by anyone who is NOT a ''regular'' employee of the farm. Mechanic noted that most farm workers are migrants and therefore NOT ''regular'' employees.

A U-S official says a crucial agreement to send about 100-thousand tons of food to the southwest African nation of Angola may be too late to help children who are close to starvation. Following a visit to the war-torn nation the director of the U-S Office of Foreign Disaster Assistance says the Angolan government has agreed to a United Nations food relief plan.

Speculation and confusion dominated the third day of a Bulgarian Socialist Party congress in Sofia. Today's proceedings were disrupted when party chief Alexander Lilov offered his resignation and then later indicated that he would fight to keep his job. Liberal party members have called for the ouster of members involved in the party's Stalinist past.

Rescue workers are searching for more victims in a northern Mexican city devastated by torrential rain and flooding that has killed at least 40 people. Officials say 200 others are missing and thousands are homeless after the rains wiped out electricity and telephone service. A state of emergency is still in effect in the area 750 miles northwest of Mexico City.

-30- 1708

#90267u2258 09/24/1990 ~United Press International

WASHINGTON (SEPT. 24) UPI - The Senate voted overwhelmingly Monday to extend additional rights to millions of older workers, passing a compromise bill to bar age discrimination in employee benefit plans.

The bill passed 94-1 - with Sen. James McClure, R-Idaho, the only ''no'' vote - after Sens. Howard Metzenbaum, D-Ohio, and Orrin Hatch, R- Utah, announced a technical compromise intended to allay GOP fears that the measure would threaten voluntary early retirement plans and unfairly burden employers.

In addition, the compromise gave in to a Republican demand to exempt federal workers from the legislation.

The bill overturns a Supreme Court ruling that June Betts, an Ohio public employee who suffers from Alzheimer's disease, was not entitled to disability retirement benefits because she was over 60 and only deserved her standard age-and-service pension.

The 7-2 decision by the court last year said age discrimination laws covered hiring and firing, wages and salaries, other fringe benefits, and terms and conditions of employment, but were silent on employee benefit plans.

Known as the Older Workers Benefits Protection Act, the bill, which still must be considered by the House, would amend the 1967 Age Discrimination in Employment Act in two major areas:

-It makes clear that discrimination on the bases of age in virtually all forms of employee benefits is illegal.

-It ensures that older workers are not coerced or manipulated into waiving their rights to seek legal relief.

Metzenbaum said he regretted some parts of the compromise but called it ''our

only real chance for a law this year'' that would help millions of workers.

''This agreement may be a little like a hippopotamus. Right away, some will say that it is big and ugly,'' Hatch added.

-30- 2001

#90267u2263 09/24/1990 ~United Press International

NEW YORK (SEPT. 24) UPI - Time Warner Inc. and United International Holdings Inc. said Monday they have agreed to form a joint venture to develop and run cable television systems and programming services in Hungary.

The cost of the 50-50 joint venture was not disclosed.

Time Warner plans to supervise development of programming services, while UIH will supervise the technical upgrading and operation of cable systems.

Hungary's cable industry now serves a half million subscribers.

''The Hungarian cable industry and the local operators have shown tremendous initiative and entrepreneurial spirit in making Hungary the most advanced cable television market in Eastern Europe,'' said Arthur Barron, chairman of Time Warner Enterprises, and Mark Schneider, senior vice president of UIH, in a statement.

Planning for the joint venture is expected to be completed by early December, and a new program service is slated for launch early next year, the companies said.

The Denver-based UIH operates cable television systems in Europe and is managing partner of United Communications International, a joint venture with US West.

Time Warner is a media and entertainment conglomerate formed last year with the merger of Time Inc. and Warner Communications Inc.

#90267u2280 09/24/1990 ~United Press International

LOS ANGELES (SEPT. 25) UPI - Italian financier Giancarlo Parretti received a major boost Monday in his efforts to buy MGM/UA Communications Inc. with the completion of the sale of his stake in French holding company Groupe Rivaud to French entrepreneur Vincent Bollore.

Parretti spokesman Craig Parsons did not disclose the price of the deal, which has been reported at $341 million. Rivaud holds stocks in numerous French companies.

Parretti's Pathe Communications has paid $353 million in non- refundable down payments since March toward his $1.3 billion deal to buy MGM/UA, but skepticism remains that he will be able to finance the rest of the transaction for the studio.

The deal for MGM/UA, which is controlled by financier Kirk Kerokorian, has a deadline date of Oct. 23.

Time Warner had agreed to provide Pathe with $650 million toward the purchase price in exchange for distribution rights, but the deal fell apart in June and both sides subsequently sued each other.

Parretti and his partner Florio Fiorini jointly owned about half of the Rivaud Group through sub-holding agreements. Nationalized bank Credit Lyonnais is a major lender for both Parretti and Bollore.

Parretti may next sell off his holdings in British and Dutch cinema chains. Those deals could be worth several hundred million dollars.

#90267u2489 09/24/1990 ~United Press International
(SEPT. 24) UPI - A personality profile of Saddam Hussein paints the Iraqi leader as an aggressive gambler who may launch a surprise attack sometime next month. The Toronto-based Mackenzie Institute for the Study of Terrorism, Revolution and Propaganda also warns nations opposing Iraq to expect terrorist attacks by people backing Baghdad's cause. .

Word today from an industry analyst will NOT come as a great shock to motorists who have been shelling out more cash at the gasoline pumps. The Lundberg survey says gas prices have risen more than 20 cents a gallon since Iraq invaded Kuwait August 2nd. A check of gas prices Friday showed a national average... including taxes... at about one- dollar-38 a gallon. .

A taped message to the American people from Iraq's leader Saddam Hussein should be hitting T-V and radio airwaves soon. The tape is expected to be released for dissemination to U-S media outlets tomorrow.

The Environmental Protection Agency says 20 paper mills nationwide are contaminating fish by discharging dioxin into streams. Dioxin is generated during the chlorine-bleaching process to whiten wood pulp. The E-P-A says dioxin levels found in fish pose high cancer risks to people who eat at least two quarter-pound meals each month of fish caught downstream of the plants.

Residents in the South African township of Soweto today ended a five- year-old rent and utilities boycott in exchange for having about 200- Million dollars of outstanding debt written off. But a police crackdown on violence in the townships surrounding Johannesburg threatens to ruin the accord. As the strike was ending, South African President F-W de Klerk met in Washington with President Bush.

(SEPT. 24) UPI - Christian Broadcasting Network founder Pat Robertson says he hopes a C-B-N technician appeals a federal jury verdict today in Norfolk, Virginia. Thomas Haynie was convicted on two federal satellite-piracy charges for interrupting soft-porn movies with religious messages. The messages were flashed over steamy cable movies and urged readers to repent. .

Jury selection began today in another case involving what people may and may NOT view. The Cincinnati Contemporary Arts Center and its director face obscenity charges for showing a traveling exhibit of photographs by the late Robert Mapplethorpe. The exhibit included photos of homosexual acts and nude children. The collection drew a record 81- thousand people in Cincinnati during a tour across the nation.

Sources say Liberian rebel leader Charles Taylor will meet with his chief rival, Prince Johnson, for peace talks this week. Taylor told the B-B-C he is president of Liberia because he controls 90 percent of the west African nation He also said he intends to hold national assembly elections. Prince Johnson has said Taylor is UNacceptable to him as a president without having been elected to the position.

A panel of scientists says the United States needs to do a better job of collecting and preserving the seeds, plants and tissues that are the base of the nation's agricultural wealth. The panel... part of the National Academy of Sciences... is urging a major overhaul of the National Plant Germ-plasm System. In its report... the panel says- ''The viability of U-S agriculture depends on a flow of enhanced crop varieties.

#90267u2542 09/24/1990 ~United Press International

MANILA, Philippines (SEPT. 25) UPI - The United States wants access to its largest overseas facilities in the Philippines at the expiration of its basing rights, U.S. Ambassador Nicholas Platt said Tuesday.

In an interview with radio station DZRH, Platt said ''quite a lot'' was accomplished in the four days of talks last week on the 1947 treaty on six U.S. facilities expiring on Sept. 16, 1991.

Platt said the discussions, which were adjourned until next month, ''came to a general consensus on the direction'' the two panels wanted to go.

President Corazon Aquino has called for an ''orderly withdrawal'' of the facilities at the end of the U.S. lease.

U.S. special negotiator Richard Armitage said the United States was prepared to scale down its presence but indicated it would need 10 years to do this.

During the talks, the Philippines served notice it would assume ''sovereign control'' of Clark Air Base and four other facilities upon the termination of the treaty. It also said it was willing to consider a U.S. proposal for phasing down U.S. personnel at the Subic Bay Naval Station.

NO decisions were reached last week and further talks will be held.

Elaborating on the U.S. position, Platt said Washington wanted continued access after the phase-down period.

''I think that some of the specific functions that were interested in maintaining access to at the end of the phase-down process are training in a place like Crow Valley and some training areas at Subic, the military air command flight line at Clark, which is essentially a big airlift capability and ship repair facilities at Subic,'' Platt said.

Subic, with 6,200 servicemen, is a repair and logistics center for the 7th Fleet. Clark, manned by 9,200 airmen, is the home of the 13th Air Force. Its Crow Valley training range allows the use of live ammunition during exercises by U.S. and allied countries.

Washington provides the Philippines $481 million annually for use of Clark and Subic, the oldest and largest facilities outside the United States.

The Philippines has announced plans to turn the facilities into industrial parks, maritime and aviation complexes.

LOS ANGELES (SEPT. 25) BUSINESS WIRE - Westwood One Inc. has signed a multiyear group affiliation agreement between Infinity Broadcasting and the company's networks, it was announced Tuesday by Norman Pattiz, chairman and chief executive officer, Westwood One.

The new affiliation pact will include 14 of Infinity's 17 radio outlets -- encompassing eight of the Top 10 major U.S. radio markets -- making it the largest single group affiliation in Westwood One's history.

The Infinity stations involved are: WXRK-FM & WZRC-AM/New York; KROQ-FM/Los Angeles; WBCN-FM/Boston; WJJD-AM & WJMK-FM/Chicago; WYSP-FM/Philadelphia; KOME-FM/San Francisco-San Jose; WOMC-FM/Detroit; WJFK-FM/Washington, WQYK-AM & FM/Tampa, Fla.; and WLIF-AM & FM/Baltimore.

Infinity stations, depending on format, will become affiliates of either the Westwood Mutual Broadcasting System (WMBS), the Westwood NBC Radio Network (WNBC), the Westwood One News & Entertainment Radio Network (WONE) or Westwood One's young adult network, The Source.

The affiliation is another major step in the recently announced reconfiguration of Westwood One's networks and follows significant audience gains in RADAR 41 (the Network Radio ratings service).

The latest RADAR special tabulations indicate that Westwood One's Adult Networks, WMBS, WONE and WNBC, currently rank No. 2, No. 7 and No. 9 respectively among the 16 measured radio networks (a), while the company's Young Adult Network, The Source, ranks No. 1 in RADAR 41(b).

Infinity Braodcasting, based in New York, is the largest independent radio group and is regarded as one of the most successful station operators in the industry.

Westwood One is America's largest producer and distributor of radio programming and the nation's second largest radio network. The company, which is based in Los Angeles, is the parent company of the Mutual Broadcasting System, the NBC Radio Network, The Source, NBC's Talknet and the Westwood One Radio Networks.

REDMOND, WA (SEPT. 25) BUSINESS WIRE - Data I/O Corp. (NASDAQ:DAIO) and Quality Automation, Anaheim, Calif., have entered into a series of options for Data I/O to acquire the assets of Quality Automation.

This acquisition will be consummated over two to three years and includes the exercise of options to purchase new products. The first step, which became effective today, is for Data I/O to assume exclusive worldwide marketing and selling responsibility for all Quality Automation products.

This agreement entails a total consideration, should all options be exercised over the next three years, of approximately $4.0 million.

Quality Automation and Data I/O serve the same end users in manufacturing. The addition of Quality Automation handler-labelers to its product line, thus provides Data I/O an opportunity to generate significant additional sales with relatively little additional selling expense. The two companies also share many sales distributors and representatives around the world.

Quality Automation is a leading manufacturer of automated device handling and labeling equipment for users of programmable integrated circuits in both dual in-line packages (DIP) and surface mount devices (SMD). Quality Automation is the only company to implement pick and place technology for both device handling and labeling of programmable integrated circuits.

Data I/O is the leading manufacturer of logic and memory device programmers for the design and production environments. It also produces design, test and logic synthesis software for programmable integrated cicuits, including programmable logic devices (PLDs) and field programmable gate arrays (FPGAs).

CHICAGO (SEPT. 25) BUSINESS WIRE - Software Products International (SPI) Tuesday announced the immediate availability of the Open Architecture Development System (OADS), a C Language Interface allowing developers to incorporate original features or make modifications to the existing functionality and interface of Open Access III.

Open Access III is a database-oriented multifunction business software solution for small- to medium-size businesses incorporating database management, spreadsheet, word processing, communications and desktop tools.

Included in SPI's Open Architecture Development System is a set of C libraries which provides users with complete access to the internal routines used by Open Access III to control windows, menus, calculations, text editing, data conversion, memory allocation and numerous other general utility operations. Access to these routines are necessary to make customizations to Open Access III modules and applications.

The Language Call Reference Manual provides programmers with a complete description and an example of each function. Further guidelines are provided regarding naming conventions, macros, enumerated types, type definitions and the use of global variables.

With the capabilities of the Open Architecture Development System, users can transparently communicate with external devices and data structures, perform

complex calculations or display a company logo on the screen. These functions can be implemented globally throughout Open Access III, or called from the database, spreadsheet, programmer or compiler.

No other multifunction or integrated software program has its own compiler, run-time system and C language interface. SPI recently announced the availability of the Open Access III Compiler and Run-Time System.

Software Products International, based in San Diego, was founded in 1979 to develop, publish and market business software products for personal computers. The company is privately held with international product revenues exceeding $18 million for fiscal 1989. The company maintains subsidiaries or master distributors in West Germany, Spain, the United Kingdom, France, Sweden, Brazil, Italy, Argentina, Canada, Australia and the USSR.

Internationally, SPI's products are sold through dealers, distributors and national accounts. In the United States, products are sold through a national network of computer resellers and distributors.

LOS ANGELES (SEPT. 25) BUSINESS WIRE - Corporate Data Sciences Inc. (NASDAQ:CODS) (PSE:CDS) Tuesday announced further information regarding its news release of July 12 with respect to ownership of the company and the anticipated involvement of a new investor group.

The company has been advised by Nelson Asset Management (Nelson), which entity beneficially owns approximately 36 percent of the outstanding shares of the company's stock, that it has reached a preliminary agreement to sell approximately one half of its holdings to a Consolidated Packaging Corp. (CPC) management group, led by its president, Michael Carrender.

CDS owns approximately 90 percent of CPC and, as previously announced, will shortly merge with CPC. Nelson informed the company that it expects to conclude such transaction shortly. Nelson also advised the company that, while it awaits finalization of an agreement with Polly Peck PLC, Polly Peck has agreed to extend the due date of its credit facilities with Nelson during such time.

In a related development, the company is continuing negotiations with the industry-related investment group referred to in the July 12 release and,

although no assurances can be given, the company expects it will reach an agreement shortly whereby the industry-related investment group will purchase, for cash, newly issued CDS shares.

The company will announce further information on all of these developments as soon as possible.

BROOMFIELD, CO (AUG. 25) BUSINESS WIRE - McDATA Corp. Tuesday announced the addition of the Model 44R to its LinkMaster 4174 family of establishment controllers.

Dubbed an interconnect controller for its ability to transport and receive SNA messages over Ethernet, the Model 44R attaches directly to an Ethernet LAN and supports 3270 coax terminals and personal computers emulating those terminals.

The LinkMaster 44R is unique in its ability to gain access to an IBM mainframe through a channel-attached Ethernet gateway. The McDATA LinkMaster 6100E, first announced in September 1989, provides this gateway feature. It attaches directly to the IBM mainframe channel and the Ethernet LAN. In addition to acting as an SNA gateway for the Model 44R, the 6100E can provide downstream DEC and UNIX users with access to IBM 3270 applications.

With the optional Local Area Transport (LAT) software, the Model 44R provides attached 3270 coax terminals with access to DEC VAX hosts on the Ethernet LAN. Fully configured, the LinkMaster 44R and 6100E can provide both 3270 and DEC users with access to both 3270 and DEC applications.

For organizations with Ethernet installed, the Model 44R interconnect controller can provide coax-attached terminals and PCs with an economic and high-performance path to 3270 applications. Superior performance is achieved through the 6100E's direct channel connection.

Cartwright estimates that in the United States and Europe, Ethernet wiring outnumbers token ring 2-to-1.

The 44R connects to one or two IBM mainframes via one or two 6100E gateways. It supports up to 160 host sessions on 32 coax terminals (five sessions per terminal). Up to 80 sessions can be LAT sessions, and users can hot-key between SNA and LAT sessions. The LinkMaster 6100E supports up to 140 downstream Model 44R interconnect controllers.

The LinkMaster 4174 Model 44R will be available in October for $11,863; LAT

software costs an additional $3,000. The Model 6100E with an SNA gateway, also available in October, is $26,250.

McDATA Corp. designs, manufactures and markets network communications systems worldwide.

     #90268b0074 09/25/1990 ~Business Wire
SUNNYVALE, CA (SEPT. 25) BUSINESS WIRE - Amdahl Corporation today announced a new release of the company's UNIX operating system with enhanced connectivity capabilities and features that significantly improve security and reliability, two areas historically of concern to large-system users. A new series of front-end processors was also announced that will further enhance connectivity of Amdahl's UNIX systems.

The announcement includes UTS Release 2.1, an advanced version of the company's UNIX operating system that links mainframe computers with workstations, minicomputers and supercomputers.

According to Joseph J. Francesconi, Amdahl's senior vice president of software and communications products, this new offering enhances the customer's investment in Systems Network Architecture (SNA) technology by allowing MVS and UNIX systems to coexist as partners in the same operating environment.

Any user terminal connected to the UTS system can sign on to any MVS and VM system in an SNA network through a channel-to-channel connection. Conversely, any 3270 terminal in an SNA network can sign on to the UTS system.

For additional reliability, the system has a new file system option that provides the data integrity of fully redundant disks without their associated cost. In the event of a disk failure, the system allows transparent recovery of missing data and ensures that end-user system operations are uninterrupted.

The UTS system is able to handle the enormous data storage and management needs of large-scale computing complexes with sustained data transfer rates of 25 megabytes per second and single files of up to six terabytes.

"Amdahl's new UTS release is an important step toward UNIX System V Release 4 (SVR4) compliance," said Francesconi. "We have dramatically expanded the system's internal data structures (a SVR4 requirement) while preserving compatibility for existing programs. UTS 2.1 can now provide users with many of the SVR4 features, such as X windowing System and Berkeley System Distribution Release 4.3 Networking."

UTS Release 2.1 was developed in conjunction with AT&T Bell Laboratories Computing Technology Center. The system fully complies with AT&T's UNIX System V Release 3.1 and is the only standalone UNIX system for System/370 compatible processors.

It can run in native mode on a dedicated Amdahl processor or in a domain on those equipped with the company's Multiple Domain Feature. UTS 2.1 can also operate as a VM/XA guest on any compatible System/370 mainframe.

ANAHEIM, CA (SEPT. 25) BUSINESS WIRE - General Automation Inc. (ASE:GA) announced Tuesday that Paul Morigi, president of Paul Morigi & Co. Inc., a Wall Street stockbrockerage house and member of the American Stock Exchange, has joined its board of directors.

Paul Morigi's appointment follows several years of association with General Automation.

Paul stated, ''I first became involved with GA as an investor around 1974 and I have closely followed the company's progress since that time. I met Len Mackenzie, General Automation's president, in 1980 and have kept close ties with him as GA moved into different areas, particularly in recent years. I am very pleased to be asked to join the board of directors.''

He further commented, ''I believe my role can help the investment community recognize the positive things that have been happening to the company over the last 20 months following the involvement with Sanderson Electronics.

''The current business climate in the computer sector is as difficult as we have seen in the last few years, and for many companies the outlook is difficult, but I am confident that GA's strategy, with complementary businesses worldwide, will support continued positive progress.''

Paul Morigi's appointment follows the recent announcement that Larry Michels, president of the Santa Cruz Operation (SCO), has also joined GA's board of directors.

General Automation Inc. designs and manufactures computer systems for the database-oriented business systems market. Its systems, related applications software, and field service capability are distributed through a multinational network of computer marketing and service support companies in the United States, United Kingdom, Europe, Latin America and the South Pacific/East Asia (SGA).

GA's proprietary GA/Maxial Hotel Property Management system presently operates in 14 countries. Annual revenues of the multinational group are now in excess of $100 million.

#90268b0079 09/25/1990 ~Business Wire

SAN JOSE, CA (SEPT. 25) BUSINESS WIRE - Efforts to help restore the economic vitality of South Bay communities following the October 1989 earthquake contributed to Pacific Western Bank receiving an ''outstanding'' rating under a just completed Community Reinvestment Act (CRA) evaluation by the Federal Reserve Bank of San Francisco.

Pacific Western Bank is one of California's first major banks to receive the ''outstanding'' rating.

In the CRA's evaluation of the bank's efforts to assist earthquake damaged communities, it stated, ''Involvement by the bank and its management with local groups provided the bank with opportunities to lend financial expertise to help address the communities' needs.

''The bank also provided immediate assistance to earthquake victims by offering customers direct cash grants, with a significant portion going to residents in particularly devastated areas.''

Commenting on the bank's evaluation, Phillip R. Boyce, chairman and chief executive officer, said: ''As an independent community bank, we have a responsibility to promote local growth and stability by supporting local development projects, with special attention to the needs of minority and low- and moderate income residents.

''We are pleased that our commitment has been recognized by the Federal Reserve.''

1990 is the first year in which the CRA requires the Federal Reserve to publicly disclose evaluations. Boyce said: ''We support public disclosure of lending policies and activities. And, consumers should benefit as the increased public awareness will encourage banks to expand reinvestment programs in order to maintain and improve their standing in the community.''

The CRA stresses overall responsiveness to a wide variety of community needs and the willingness to provide credit through accessible and attractive services.

The evaluation of Pacific Western Bank cited its strong loan portfolio which includes government-insured, guaranteed or subsidized loan programs for small farms or small businesses (Pacific Western Bank is one of the few Preferred SBA Status Lenders in the area), and financing to develop low- to moderate-income housing and expand the availability of retirement and convalescent housing.

The evaluation concludes that, ''Management has made an explicit and continuing attempt to assure that, through its extensions of credit and other means of community participation, the bank will contribute to the economic vitality and viability of is delineated community.''

''Our strong local ties help us to identify the community's needs. In the future, as these needs change, we will look for new opportunities to enhance our community reinvestment efforts,'' said Boyce.

He continued: ''Our managers participation with community groups frequently lead us to enhance existing services or introduce new ones. As an example, this past year we changed one of our home improvement products to make it more attractive.

''We also sponsor and participate in a number of outreach programs such as SBA informational workshops, community development lunches for private and public representatives, and mailings to local public and private organizations to obtain feedback on the bank's activities and help assess community needs.''

Headquartered in San Jose, Pacific Western Bank is one of two major independent banks in Northern California. The bank has $1.3 billion in assets and operates 28 locations in Santa Clara, Santa Cruz and Monterey counties.

Pacific Western Bank is a subsidiary of Pacific Western Bancshares Inc., a bank holding company also based in San Jose.

#90268b0080 09/25/1990 ~Business Wire

CAMARILLO, Calif. (SEPT. 25) BUSINESS WIRE - California Amplifier Inc. (NASDAQ/NMS:CAMP) Tuesday reported operating results for the second quarter of fiscal 1991.

Sales for the quarter ended Sept. 1, 1990, were $3.7 million, a 32 percent increase compared with sales of $2.8 million for the same period a year earlier. Net earnings for the quarter was $111,000, or 3 cents per share, compared with net earnings of $79,000, or 2 cents per share, for the second quarter of fiscal 1990.

For the six months ended Sept. 1, 1990, sales increased to $7.2 million, up 37 percent from the $5.3 million for the same period a year earlier. Net earnings for the period was $166,000 vs. a net loss of $45,000 for the six months ended Aug. 31, 1989.

Commenting on the second-quarter results, Barry W. Hall, chairman and chief executive officer, said: ''The increase in sales was due to a 75 percent increase in the sale of microwave telecommunications products. This was offset by a decrease of 25 percent of sales of defense-related products. While we are pleased with this increase, we are not satisfied.''

Hall added: ''To continue to grow at our current rate, we must introduce new wireless cable products and more fully develop our foreign markets. During the third and fourth quarters, we should begin to realize sales from these efforts.''

California Amplifier designs, manufactures and markets components and integrated subsystems used in microwave telecommunications. Applications for these products include commercial satellite earth stations, home satellite dishes and wireless cable systems.

#90268b0082 09/25/1990 ~Business Wire

RICHARDSON, TX (SEPT. 25) BUSINESS WIRE - Computer Automation Inc. Tuesday reported that revenues for the fiscal year ended June 30, 1990 were $10,204,000, down from $17,209,000 in the prior year.

A loss on operations of $4,831,000, or $1.95 a share, was incurred for the year, which compares with an operating loss of $3,358,000, or $1.42 a share, in fiscal 1989.

The company also reported that lacking an opportunity to achieve a satisfactory disposition of its automatic test equipment (ATE) business and the decision to continue this activity on a reduced basis, results for fiscal 1990 show a reversal of the loss on disposal of discontinued operations of $2,670,000, or $1.08 a share, reported in fiscal 1989.

The amount represents the costs of personnel and facilities terminations, as well as the estimated additional losses related to the ATE operations in fiscal 1990, had the ATE operation been discontinued. After this reversal, the net loss for fiscal 1990 was $2,161,000, or 87 cents a share, which compares with a net loss of $6,028,000, or $2.54 a share, including the loss on disposal, in fiscal 1989.

George Pratt, the company's chairman and chief executive officer, noted that the company received several proposals during fiscal 1990 regarding the ATE activity but a satisfactory agreement on price and terms could not be achieved. Consequently, the scope of the ATE activity was reduced to a manufacturing and service activity in support of the installations at the existing customer base.

In addition, Pratt stated that the company continues to provide engineering support for the Strider Enhanced Ironman ATE system, which is capable of addressing the vast majority of the functional test requirements as they exist in the market today.

Pratt also said that the ATE operation had been moved to a smaller facility in Irvine, Calif., which should more efficiently house the activity.

Meanwhile, the company disposed of its printed circuit board facility, having sold the capital equipment and transferred the lease prior to the close of the fiscal year, and was attempting to sublease its former headquarters and manufacturing facility in Irvine, as well as vacant offices in New Jersey and Arizona.

William Osmundsen, the company's president, said that although the company has reduced its workforce in the last twelve months by one-half, it has been

fortunate in that the employees necessary to the business have chosen to stay with the company.

He also noted that while cash flow shortages have continued through September, the company's vendors on the whole have been patient and worked with the company during this difficult period. He stated that the company expects that receipts from large orders in hand will provide needed cash flow in the second quarter of fiscal 1991 to alleviate this problem.

Computer Automation Inc. is a manufacturer of high performance automatic test systems for testing electronic circuit boards. The company also manufactures digital minicomputers, microcomputers and facsimile subsystems. Though a wholly owned subsidiary, Talon Technology, the company also manufactures ruggedized PCs for military and industrial uses.

PORTLAND, OR (SEPT. 25) BUSINESS WIRE - Portland General Corp. (NYSE:PGN) has amended its Retirement Savings Plan, a tax-qualified employee benefit plan, to include an employee stock ownership plan (ESOP).

The plans are available to employees of all of Portland General's subsidiaries including Portland General Electric Co. (PGE), its principal subsidiary.

Approximately $36 million of Portland General's common stock will be purchased on the open market over the next six months by the trustee for the ESOP. Funds for the trustee to purchase the stock will be provided primarily from a loan by PGE. The utility anticipates obtaining external funding for the loan through a private placement or public offering of debt.

''This plan enables us to offer our employees a benefit package that is competitive within our industry,'' said Portland General Chief Executive Officer Ken Harrison. ''Since an ESOP generally promotes stock ownership among employees, this gives employees of all Portland General's companies a long term stake in the corporation's success and allows them to participate in its growth and profits.''

Portland General Corp. is listed on the New York and Pacific stock exchanges. It is an energy holding company headquartered in Portland.

LAFAYETTE, CA (SEPT. 25) BUSINESS WIRE - San Francisco radio station KXXX-FM has been sold by Emmis Broadcasting Corp. to Bedford Broadcasting Co. for $18.5 million, the two companies announced in Lafayette Tuesday.

The total cost includes the price of the station, and non-compete and consulting contracts with Emmis Broadcasting.

Both parties are filing an application with the Federal Communications Commission (FCC) to transfer the operating license. The transaction is expected to be completed no later than mid-January 1991.

Known as ''X-100,'' KXXX-FM has been owned by Indianapolis-based Emmis since September 1988. Before then the station was owned by NBC, with the call letters KYUU-FM.

The acquisition is the third in six months for Bedford Broadcasting Co., which is part of the Bedford Group of Companies headquartered in Lafayette. In May, the company bought KSSK-AM and KSSK-FM in Honolulu.

Morgan Stanley acted as Emmis Broadcasting's financial advisor for this transaction. Elliot Evers of San Francisco based Media Venture Partners assisted Bedford Broadcasting Co.

An affiliated company, Bedford Properties, has been active in California for 25 years and now maintains operations in 18 states. The privately held company is active in developing industrial and office parks commercial/retail centers, land development, single-family home construction and multifamily residential development and management.

Bedford Properties' portfolio currently includes more than 13 million square feet of buildings and improved properties, and over 40,000 acres of land.

ANAHEIM, CA (SEPT. 25) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, today announced Real-Time Support Services for Oracle's support customers.

Real-Time Support Services (RTSS) represent the cornerstone of an extensive, company-wide quality program dedicated to excellence in customer support, products and service.

RTSS is based on a state-of-the-art, automated call management system. This system, which was in development over several months with the help of key users, will facilitate immediate access to support experts who are able to provide assistance virtually in real time.

''Oracle's RTSS represents a significant leap forward in service to the customer. It should drastically decrease our backlog and dramatically improve our responsiveness to customers. We believe that it will eventually become the standard model for our industry,'' said Doug Allred, vice president of Oracle Worldwide Support.

Allred added that Oracle faces a particularly complex support challenge. Oracle's products run on more than 80 hardware platforms and support multiple operating systems and applications, creating a matrix of potential support issues faced by no other company. The Customer Controls the Call

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third-largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 92 countries around the world. Oracle is a publicly held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

BROOMFIELD, CO (SEPT. 25) BUSINESS WIRE - McDATA Corp. Tuesday announced that

it has expanded its LinkMaster product offerings and signed two major sales and distribution agreements.

McDATA added the LinkMaster 4174 Model 44R interconnect controller to is core line of 3270-compatible controller products. The Model 44R supports 3270 coax terminals and personal computers emulating those terminals.

It attaches to an Ethernet LAN and provides users with access to an IBM mainframe via a channel-attached gateway. The McDATA LinkMaster 6100E, first announced in September 1989, serves as an SNA gateway for the Model 44R.

With optional Local Area Transport (LAT) software, the Model 44R also provides coax-attached terminals and PCs with access to DEC VAX hosts on the Ethernet.

McDATA introduced two new fiber optic channel extenders, the LinkMaster 5200F-Laser and the LinkMaster 4174F-CX. The 5200F-Laser transmits data with a laser instead of a light emitting diode (LED), increasing the distance that data can be sent over fiber optic cabling from 10 to 40 kilometers.

The 4174F-CX is a product package of two channel extenders plus a local 4174 Model 11L establishment controller providing local response times for coax-attached terminals and personal computers. The Model 4174F-CX is positioned with price/performance advantages for McDATA's original equipment manufacturer (OEM) partners.

McDATA also announced the signing of two major sales and distribution agreements. The first initiates a strategic partnership with Network Solutions, a network consultant and systems integrator company based in Sydney Australia.

The two-year renewable agreement designates Network Solutions as the exclusive Australian distributor of McDATA LinkMaster channel extension and network processor products.

McDATA also renewed an OEM agreement with Harris Adacom of Dallas, who will continue selling the LinkMaster 4174 series of establishment controllers as part of its Challenger product line. Harris Adacom markets the products in the United States, Canada, and Europe and has had an OEM relationship with McDATA since 1984.

McDATA Corp. designs, manufactures and markets network communications systems worldwide.

SAN DIEGO (SEPT. 25) BUSINESS WIRE - British Telecom Inc. (NYSE:BTY) Tuesday announced its new Videocodec VC2100 which offers improved picture quality at lower data rates as well as multi-vendor compatibility.

Announced at the Tele-Communications Association convention from booth 614, the British Telecom Videocodec VC2100 is among the first codecs to comply with the recently announced CCITT H.261 international standard for videoconferencing.

Videoconferencing allows a meeting between groups of people at separate locations, linked by television. Users can see and hear each other simultaneously and can show documents, plans or products to other locations.

Video codecs,the critical components of videoconferencing systems, digitize and compress TV picture signals which are then transmitted over private and public data networks worldwide.

The VC 2100 offers a range of transmissions speeds including 56 Kbps, 1.544 Mbps (T1) and 2.048 Mbps (E1), allowing users to integrate video, voice and data traffic. Full duplex, open sound at wideband frequencies, provides interactive conversation.

Standard features of the new British Telecom video codec, including data rate and operation mode, can easily be changed on-site by using a set of control buttons and an LCD built into the unit, or remotely through an intelligent interface via any RS-232C terminal or personal computer.

The VC 2100 is available with a built-in adapter which connects to ISDN circuits for worldwide dial-up conferencing.

The VC 2100 is priced at $44,500.

British Telecommunications plc., generally known as British Telecom, is a leading world player in telecommunications. It operates one of the largest networks in the world and offers a wider range of international services than any other telecommunications company.

British Telecom has annual revenues of over $20 billion and employs approximately 240,000 staff in 30 countries.

British Telecom Inc., headquartered in New York, and BT Tymnet Inc., based in San Jose, Calif. -- jointly under the direction of Mark Baker, president and chief executive offer -- coordinate the activities of British Telecom in the United States and Canada.

LOS ANGELES (SEPT. 25) BUSINESS WIRE - Two industrial giants in the United States and Korea announced Tuesday that they are teaming to pursue a contract to introduce domestic satellite communications to South Korea.

The partners in the teaming arrangement are the El Segundo-based Space and Communications Group of Hughes Aircraft Co., a unit of GM Hughes Electronics, and Samsung Co. Ltd., the international division of the Samsung Group of Seoul Korea.

In addition, Hughes subsidiary Hughes Network Systems has signed an agreement making Samsung Co. its representative in Korea for sales of ground station equipment for satellite systems.

The South Korean government has announced it wants to establish a domestic satellite system with data, voice and video communications and direct-broadcast television capabilities. A request for proposals is expected in spring of 1991, with a contract awarded in early 1992 and satellite launch scheduled for 1995.

Hughes is the world's leading manufacturer and largest private operator of commercial communications satellites. Hughes' domestic and regional satellites service such Pacific Rim areas as China, Thailand, Japan, Indonesia and Australia. Hughes satellites also provide international service for INTELSAT.

Hughes Network Systems, with headquarters in Germantown, Md., is a world leader in advanced digital telecommunications and a premier provider of interactive very small aperture terminals. Hughes also is a major supplier of defense electronics.

Samsung -- one of the largest Korean conglomerates, including the fields of trade, electronics, telecommunications, heavy industries, precision instruments and chemicals -- considers information systems and aerospace major future businesses. Samsung has more than 200 offices around the world.

BROOMFIELD, CO (SEPT. 25) BUSINESS WIRE - McDATA Corp. has renewed its agreement to provide Harris Adacom Corp. of Dallas with its LinkMaster series of 4174 establishment controllers.

Harris Adacom markets McDATA controllers in the United States, Canada and Europe.

Under the terms of the agreement, Harris Adacom will continue marketing and selling McDATA LinkMaster establishment controllers as part of its Challenger product line. McDATA's business relationship with Harris Adacom began in 1984. The new contract went into effect in July of this year.

Harris Adacom Vice President of Marketing Ed Grace commented, ''We look forward to continuing what has been a mutually beneficial relationship with McDATA.''

McDATA's Director of International Sales John Atkinson agreed saying, ''Our relationship with Harris Adacom has always been rewarding, and we anticipate continued success.''

McDATA's LinkMaster 4174 establishment controller provide IBM 3270 mainframe communications for coax-attached terminals and personal computers. The LinkMaster products are fully compatible with IBM 3270 products. Models are available to support large, medium and small clusters of coax and ASCII devices. Token-Ring LAN gateway and downstream models also are available.

McDATA Corp. designs, manufactures and markets network communications systems worldwide.

ATLANTA (SEPT. 25) BUSINESS WIRE - W. Thomas Johnson, president of CNN, a wholly owned subsidiary of Turner Broadcasting System Inc. (ASE:TBS), has been nominated to join the TBS board of directors, it was announced Tuesday by R.E. Turner, TBS president and chairman of the board.

His election is expected to be effective Sept. 26.

''In a very short time, Tom has become an invaluable member of our management team at TBS,'' said Turner. ''His years of experience in communications and government will be a great resource for the board.''

Johnson joined TBS this past August. Previously, he was chairman of the Los Angeles Times and vice chairman of the Times Mirror Co. He joined the Times

in 1977 as president and chief operating officer, and in 1980, was named publisher and chief executive officer.

Johnson began his career at the Macon, Ga., Telegraph and News. In 1965, he was named a White House Fellow and served as aide to presidential press secretary Bill D. Moyers. He became deputy press secretary in 1967; special assistant to President Lyndon B. Johnson in 1968; and executive assistant to the president in 1969.

In 1971, Johnson was named executive vice president of Texas Broadcasting Corp., the Lyndon Johnson family broadcasting company that included KTBC-TV, Austin. Following the death of former President Johnson and the sale of KTBC-TV to Times Mirror in 1973, Johnson was named editor of the Dallas Times Herald by Times Mirror. Two years later, he became publisher.

Johnson received a journalism degree from the University of Georgia and an MBA from Harvard Business School. He currently serves as chairman of the Stanford Professional Journalism Fellowship Program and chairman of the LBJ Foundation. He also serves on the board of trustees of the Rockefeller Foundation and the board of directors of The Associated Press.

DENVER (SEPT. 25) BUSINESS WIRE - Random Access Inc. (NASDAQ:RNDM), one of the Rocky Mountain Region's fastest-growing microcomputer resellers, Tuesday announced it has closed a secondary offering of securities that raised $1 million in gross proceeds.

In the offering, which was managed by Cohig & Associates of Denver, 500,000 units were sold to the public at $2 per unit. The units consist of two shares of common stock and one common stock purchase warrant exercisable until Dec. 28, 1994, at $2 per warrant.

Proceeds of the offering will be used for the development of four ''Apple Centre'' sales facilities, expansion of the Company's Service Access division, purchase of a minicomputer-based automation system, and development of a memory distribution division.

Upon completion of the offering, Random Access had 5,600,255 shares and 849,450 warrants outstanding. Of the 5.6 million shares outstanding, Bruce Milliken, president and chief executive officer, owns 2,927,334 shares, 2

million of which have been placed in escrow by Milliken under an earnout provision.

Random's units, common stock and warrants trade on the NASDAQ system under the symbols RNDMU, RNDM and RNDMW respectively.

Random's sales have increased dramatically over the past five years, from $278,000 in 1985 to $22 million in 1989. The company has been profitable in each of those years. As a result of its strong revenue growth since 1985, the company was cited by Inc. Magazine as being the 15th fastest growing small public company in the United States. Through nine months of fiscal 1990 Random reported net income of $303,000, or 7 cents per share, on revenue of $24 million.

PHOENIX (SEPT. 25) BUSINESS WIRE - Nix-O-Tine Pharmaceuticals Ltd. (NASDAQ:NIXXF, VSE:NIX.V) announced the appointment of Lee Wahl as senior vice president of sales.

Wahl joins Nix-O-Tine after a 10-year association with SmokEnders, a leader in the smoking cessation industry.

During his association with SmokEnders, he was a trained instructor for their behavioral stop-smoking program. He served as a regional marketing representative, national sales and marketing manager; and as vice president and general manager led SmokEnders to its four most profitable years in their 22-year history. Wahl's background also includes 20 years of sales, management and ownership in commercial radio broadcasting.

''We are proud to have Lee join the Nix-O-Tine team,'' said K. John Harrison, president and chief executive officer. ''Lee has been involved in all phases of the smoking cessation business and adds an important dimension to our growing company.''

Nix-O-Tine owns the patent on a drug for the treatment of the strong craving and other related symptoms of nicotine withdrawal. Since the medical component is not a form of nicotine or a nicotine substitute, smoking is not being replaced with another possible addiction. This drug has a 25-year history of use for other medical disorders.

Wahl stated, ''I am looking forward to the opportunities and challenges offered by Nix-O-Tine. The Nix-O-Tine medical component really excites me. It has long been my belief that a solid behavioral program combined with a credible medical component would make a major impact on smoking cessation. Nix-O-Tine is giving new hope to smokers who have tried to quit before and offers encouragement to all smokers who may be reluctant to take on the tough job of quitting smoking.''

Phoenix-based Nix-O-Tine is a health service company engaged in smoking cessation, weight management and diagnostic testing markets. Nix-O-Tine owns the LungCheck Test which provides early detection of lung disease. It can identify abnormal cells three to five years before cancer can be detected on an x-ray.

SAN DIEGO (SEPT. 25) BUSINESS WIRE - Pacific Bell announced Tuesday completion of a technology test of a system that will allow business customers more control of network management functions.

The initial capabilities will be offered without charge by year's end.

The new system, called Pacific Bell Service Manager, will allow customers to access certain of the company's customer support systems electronically, using common computer terminals. Through Pacific Bell Service Manager, customers will be able to order Pacific Bell services, test certain ones and issue trouble reports.

Pacific Bell Service Manager will provide customers the following capabilities:

- Service Request -- Allows customers to order Pacific Bell services and receive confirmation, cancel or change active orders, check order status and obtain a history of orders.

- Trouble Reporting -- Customers can initiate trouble reports directly into Pacific Bell's maintenance system, perform status checks and access trouble histories.

- Service Testing -- Permits customers to conduct on-line tests of services such as basic business lines, CENTREX, COMMSTAR, 800 Service and multiline hunt groups, and issue trouble reports.

- Access to Other Services -- Links customers with Pacific Bell's Customer Network Reconfiguration service for Advanced Digital Network (ADN), a

private-line data service, and a planned communications management system for CENTREX and CENTREX IS (Integrated Systems), Pacific Bell's Integrated Services Digital Network offering.

Board said the company already is evaluating a variety of other capabilities as potential additions to Pacific Bell Service Manager, such as alarm monitoring, inventory services and traffic information.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified worldwide telecommunications corporation based in San Francisco.

#90268b0176 09/25/1990 ~Business Wire
WASHINGTON (SEPT. 25) BUSINESS WIRE - IDB Aero-Nautical Communications Inc.

(IDB-A), a supplier of mobile communications services via satellite to the aviation and maritime industries, has signed reciprocal transit agreements with both Overseas Tele-Communications Limited (OTC) of Australia and Morsviazsputnik of the Soviet Union to facilitate services to the maritime industry.

IDB-A has also chosen Hughes Network Systems Inc. for the construction of three Inmarsat standard A coast earth stations for maritime communications. The intial maritime services represent the first mobile satellite service offered by IDB-A since the joint venture was formed by IDB Communications Group Inc. (NASDAQ:IDBX) and Teleglobe International (U.S.) Inc. in February 1990.

The agreements with OTC Maritime-Australia and Morsviazsputnik-U.S.S.R. to carry IDB-A's maritime traffic will permit the start of service prior to the completion of IDB-A's permanent facilities in Los Angeles and New York.

The contracts give IDB-A coverage of the Atlantic Ocean region through Morsviazsputnik in Odessa and access to the Pacific Ocean region through OTC in Perth during the interim service period. In addition, the contract with OTC allows IDB-A long-term exclusive access to the Indian Ocean operating region as a permanent addition to the network.

In return, IDB-A will give OTC long-term access to the Western and Eastern Atlantic Ocean operating regions from their teleport facilities in Los Angeles and New York.

Through these agreements, IDB-A now boasts facilities offering global coverage to maritime users. The OTC agreement has positioned IDB-A as the first U.S. provider of maritime communications services to offer satellite coverage of the Indian Ocean region and has provided IDB with a long-term revenue source.

Jon Klein, newly appointed vice president of maritime services at IDB-A, explains, ''These agreements with OTC and the Soviets allow IDB-A to turn service up for our initial maritime customers as soon as Dec. 1, without having to wait for construction of the permanent facilities to be completed.''

Robert Eichberg, IDB-A's new vice president of maritime sales, comments: ''With these agreements in place, IDB-A has become a competitive force in the maritime communications industry. As of Dec. 1, we are a full-service carrier in the truest sense, offering our customers global coverage at rates significantly lower than the competition.''

IDB-A has also initiated separate plans to use Hughes Network Systems Inc. to construct three permanent coastal earth stations. The installations will provide phone, telex, facsimile and data communications services between terrestrial facilities and ships at sea via the Inmarsat satellite system.

Hughes will build dual earth stations in Niles Canyon, Calif., to address the Pacific and Western Atlantic Ocean regions, and one earth station at IDB's teleport facilies in Staten Island, N.Y., to address the Eastern Atlantic Ocean region. IDB is investing $6.5 million in the new installations, which are expected to begin carrying transmissions next summer.

Andrew Worth, president of Hughes Network Systems International, comments: ''Hughes is committed to IDB Aero-Nautical's success in the commercial maritime services industry. The Inmarsat-A system was chosen for its high capacity, reliability and flexibility. We are pleased to have been selected by IDB-A as part of their exciting entry into maritime mobile services.''

In his position, Jon Klein is overseeing the development of IDB Aero-Nautical's maritime services. He joined IDB-A from Comsat where he specialized in marketing maritime communications services internationally. Prior to Comsat, Klein was vice president of maritime operations at Sea-Land, controlling more than sixty vessels around the globe for the largest container-shipping company in the United States.

Robert Eichberg is marketing the ''one-stop shopping'' features of IDB-A's end-to-end mobile satellite communications services. He recently retired as vice president, maritime sales and marketing from Comsat, where he spent 16 years as one of the pioneers in sales of products and services on the Marisat and Inmarsat maritime communications satellite systems.

With a wide background in seismology, oceanography and marine construction, Eichberg is widely regarded as an expert in maritime communications services for the offshore oil, passenger and government industry sectors.

IDB-A announced last June its intention to market mobile telecommunications services to the maritime industry as well as the aviation industry. IDB-A plans to market ship-to-shore satellite communications services to maritime users, including commercial shipping fleets, fishing vessels, oil rigs and tankers and pleasure cruise lines.

This year, the size of the maritime market for U.S. service providers alone is estimated to be approximately $100 million, with over 10,000 ships using the maritime services worldwide.

IDB Communications has accomplished a number of firsts in communications with the Soviet Union, starting in 1987 with the first transmission by a U.S. carrier from inside the Soviet Union. IDB has operated the only full-time satellite link for high-speed digital communications between the United States and the Soviet Union since November 1988.

A new television transmission service, ''Sputnik Express,'' operates on the Soviet Intersputnik satellite system.

Jeffrey Sudikoff, chairman and chief executive officer of IDB comments, ''This agreement with Morsviazsputnik represents the next step in furthering our mutually beneficial relationship with the Soviets, by involving them in the new markets IDB-A is exploring for telecommunications services.''

IDB Aero-Nautical's offices are in Rockville, Md. IDB Communications Group Inc. is a leading supplier of transmission services for radio, television, data and voice communications via satellite and fiber optics.

REDWOOD CITY, CA (SEPT. 25) BUSINESS WIRE - Oracle Corporation (NASDAQ: ORCL), developer and marketer of an integrated family of database tools and applications, today announced first quarter revenues and operating results for the period ending August 31, 1990, the first quarter of its 1991 fiscal year.

For the first quarter of fiscal 1991 ended August 31, 1990, revenues increased 16 percent to $204 million from $175 million in the same period last year. Net income fell to a loss of $36 million from $12 million profit in the first quarter of fiscal 1990. Earnings per share fell to a loss of $0.27 from income of $0.09 in the first quarter of fiscal 1990.

"While we are disappointed with our first quarter results, we expect to return to profitability in our second quarter," said Lawrence Ellison, Oracle's CEO. "The management and organizational changes we have implemented are a necessary part of our transition to a more conventional growth rate." Additional information on the first-quarter results is in the attached schedules.

#90268b0200 09/25/1990 ~Business Wire

SAN DIEGO (SEPT. 25) BUSINESS WIRE - Cipher Data Products Inc. Tuesday

announced that it has adapted its two most advanced nine-track reel-to-reel tape drive systems for use with the full range of Sun Microsystem computers, including Sun's powerful, high-speed, supermicro, SPARC workstation. The

Cipher products now available for connection to Sun's systems are the F880ES (Embedded SCSI) and the M995s. The F880ES drive is the latest generation of the computer industry's best-selling Phase Encoded (PE) tape drive, providing recording densities of 1600 bpi and offering an embedded Small Computer Systems Interface (SCSI).

The addition of the embedded SCSI results in reduced cost and higher reliability, making the drive a cost-effective device for a wide variety of Sun Microsystem applications, including real-time generation of CAD/CAM, CAE, graphics and desktop publishing.

The Cipher M995 system, a low-profile Group Encoded Recording (GCR) drive, offers a choice of ANSI/IBM 1600/6250 recording densities in a compact 8-3/4-inch-high drive. The M995 will improve Sun Microsystem overall performance by saving valuable backup and restore time.

A four-megabyte-per-second transfer rate with the SCSI interface provides fast backup and a 270 mb storage capacity recording at high-density 6250 bpi on one mil. tape minimizes reel changes to further shorten backup time.

In making the product announcement, Cipher President Craig V. Turner said: "Our engineers have incorporated special firmware within both the F880ES and the M995s drives to meet the requirements of all the Sun Systems, especially the SPARC workstation, and we have also added special connectors to make the hardware interface.

"As a result, the F880ES and M995 systems are ideal interchange products for Sun Microsystems allowing graphics to move from station to station or from department to department."

Both of the customized Cipher tape drives are available in rack mount or desktop configurations and are available to end users in the United States from Arrow Electronics Inc., as well as through the Cipher network of regional distributors. Suggested end-user pricing ranges from $4,995 for the F880ES to $9,750 for the M995.

Cipher Data Products Inc. is a leading supplier of removable information storage solutions. Founded in 1968, the company designs, manufactures and markets a broad range of 1/2-inch magnetic tape and cartridge drive systems providing interchange, data backup and storage solutions for a variety of computers.

DENVER (SEPT. 25) BUSINESS WIRE - Public Service Co. of Colorado's board of directors Tuesday named Ralph Sargent III as company treasurer.

He is assuming the new duties from Richard C. Kelly, who will continue as the company's senior vice president of finance and chief financial officer.

As treasurer, Sargent will have executive management responsibility for Public Service Co.'s treasury operations, financial research and analysis and corporate planning.

Sargent joined the company in 1977 and most recently was the executive assistant to the chairman, president and chief executive officer. His previous company positions include serving as assistant to the senior vice president of nuclear operations, as director of organization development and as supervisor of the company's residential marketing efforts.

Sargent has a master's degree in business administration from the University of Colorado at Denver and a bachelor's degree in marketing from the University of Colorado at Boulder.

A native Denverite, his community activities include serving on the board of trustees for the Thorne Ecological Institute, on the advisory committee for the Public Education Coalition, and on the United Way Special Projects Subcommittee for Funds Distribution. Sargent also is a member of the Denver

task force on Early Childhood Education.

SAN DIEGO (SEPT. 25) BUSINESS WIRE - The board of directors of WD-40 Co. (NASDAQ:WDFC) have elected Gerald C. Schleif to the post of president and chief operating officer.

Long-time WD-40 President John S. Barry was elected chairman and will remain chief executive officer.

A member of the company's board of directors, Schleif was previously executive vice president and chief financial officer. He has been with WD-40 for 21 years.

''This action by the board will ensure WD-40 Co. has a continuity of leadership in coming years,'' said Barry.

Schleif began his career with the company in 1969 as marketing manager. He eventually held senior management positions in marketing, both for international and domestic sales.

Before joining WD-40, Schleif headed the marketing services department for the AG products division of Upjohn Co. in Kalamazoo, Mich., for 10 years. Schleif graduated from San Diego State University in 1957 with a bachelor of science degree in chemistry.

San Diego-based WD-40 Co. produces WD-40, the familiar lubricant, penetrant, rust preventative, moisture displacer and cleaner. The versatile product is distributed through home centers, mass merchandise, hardware, automotive, grocery, sporting goods and drug store trade channels throughout the country. WD-40 Co. markets the multipurpose product through 12,000 accounts in more than 100 countries worldwide.

WD-40 is the industry leader with more than $84 million in annual sales. WD-40 is publicly traded.

FRESNO, Calif. (SEPT. 25) BUSINESS WIRE - WestAir Airlines Tuesday said that

it has reached tentative agreement on its initial contract with its pilots, who are represented by the Air Line Pilots' Association (ALPA).

The three year agreement would cover the nearly 900 pilots flying for WestAir and its sister company, NPA Inc.

WestAir Holding Inc. (ASE:WAH), the parent of WestAir and NPA, announced last month that it is merging the two United Express operations.

ALPA has represented the WestAir pilot group as its collective bargaining agent since February 1989, and the NPA group since August 1989.

Both the company and the union said the agreement, ''which equitably addresses workrule and compensation issues,'' is subject to a ratification vote by pilots of both WestAir and NPA.

WestAir, with headquarters in Fresno, operates to 64 cities in 14 states along the East and West Coasts. The company has major hubs at Los Angeles; San Francisco; Portland, Ore.; Seattle; Fresno; Sacramento, Calif.; and Washington D.C.

SAN DIEGO, Calif. (SEPT. 25) BUSINESS WIRE - The ROLM Co. Tuesday reported increasing sales momentum and continued enhancement of its product line with new ISDN developments during a press conference at the Telecommunications Association trade show here.

ROLM, the telecommunications joint venture of IBM and Siemens, said orders during the first half of 1990 increased, a trend that has continued into the third quarter.

L.G. Lesniak, ROLM's senior vice president for sales, reported, ''Year-to-year bookings have increased significantly, and we're experiencing strong year-to-year revenue growth. Orders continue to be robust, and we expect to exceed our third quarter forecast.

''These results demonstrate widespread customer acceptance of the many new products and enhancements we have introduced since ROLM Co. officially came into being Oct. 1, a year ago next week.''

Lesniak noted that: -- ROLM installed the 1000th Model 10 of its 9751 Computerized Branch Exchange (CBX)(a) family on Sept. 14. The 1000th system was installed at MCI Communications' downtown Baltimore sales office just nine months after volume shipments began in December and only three months after

the 500th unit was installed at Cruise International in Norfolk, Va., on June 1.

-- ROLM expects to ship the 2500th PhoneMail (a) Release 4 unit by Oct. 1. Release 4 began shipping July 1, 1989. Nearly every other CBX now shipped includes PhoneMail.

''We will continue delivering on our promise to enhance the 9750 Business Communications System (BCS) and to introduce additional products and applications that answer specific customer needs. Our focus is to provide customers with total systems solutions,'' he said.

Lesniak also reported on quality in the 9751 Model 10 for small and medium-size customers. ''The quality we're experiencing with the Model 10 is unprecedented in the industry,'' he said. ''In its first eight months, the Model 10 has accumulated more than 275 years of operational experience, which equates to more than 2.4 million hours of customer availabilty.''

In addition, Lesniak said ROLM's new Refurbished Equipment Program, announced with Norstan in July, is off to a fast start with results meeting all expectations. Based on July and August performance, ROLM expects that the program will exceed its third quarter forecast.

James Beane, ROLM's director of marketing for desktop products and networking, announced plans for the second phase of ROLM's ISDN strategy.

He said ROLM intends to implement advanced ISDN (Integrated Services Digital Network) applications through a new ISDN interface within the ROLM 9751 CBX system.

The 9751 Primary Rate Interface (PRI) will provide customers with such options as the ability to view key data about a call before answering, or to collect call data for analysis.

In August 1989, ROLM announced the first phase of its ISDN implementation strategy, which consisted of the ROLM 9757 ISDN Adapter for support of ISDN network services, 9751 CBX Release 9005.1 to enhance applications using ANI (Automatic Number Identification), and the ISDN Project Office to assist customers in developing ISDN solutions to meet their business needs.

The company reconfirmed its commitment to meeting customer requirements by developing further ISDN connectivity and meeting ISDN standards as they evolve.

''This is part of ROLM's strategy to provide superior ISDN carrier connectivity through an evolving process for our customers, allowing them to migrate to integrated ISDN solutions,'' said Beane.

ISDN is the emerging set of global standards for digital public and private

telecommunications networks. The protocols and channel structure of ISDN interfaces allow greater speed and efficiency in both voice, data and other digitized communications such as graphics, facsimile or image transmission.

#90268b0305 09/25/1990 ~Business Wire
BREA, CALIF. (SEPT. 26) BUSINESS WIRE - UnionFed Financial Corp. (NYSE:UFF) announced Tuesday that it is revising its previously announced earnings for its fiscal year ended June 30, 1990, and that it now expects to report a significant loss for the year instead of the previously reported earnings of $11.1 million, or $1.53 per share, fully diluted.

The revision of UnionFed's results of operation is due principally to substantial additional provisions for possible losses on loans and real estate which the company expects to establish in connection with current examinations of UnionFed's subsidiary, Union Federal Savings Bank, by the office of Thrift Supervision and the Federal Deposit Insurance Corp.

A spokesperson for the company stated that the additional loss provisions were primarily the result of a further deterioration in real estate markets and a significantly more conservative approach to valuations of real estate and real estate secured loans by the company based in part on more conservative federal regulatory valuation estimates and assumptions.

The company also reported that its annual report of Form 10-K would not be filed with the Securities and Exchange Commission by the normal due date, which is this Friday.

UnioFed Financial is the holding company for Union Federal Savings Bank, a federally chartered savings bank with $2.5 billion in assets and 27 branches in Southern California.

SAN JOSE, CALIF. (SEPT. 25) BUSINESS WIRE - Dataquest President and Chief Executive Officer Manny Fernandez Tuesday announced that H. Glen Haney was named to fill the newly-created position of chief operating officer of Dataquest.

He was also appointed as executive vice president of the company's Technology Division. Haney is responsible for worldwide strategic planning, research, sales, and marketing and reports to Fernandez.

Haney joined Dataquest in June 1989 as executive vice president, sales and marketing. Prior to Dataquest, he was president and chief executive officer of Sterling Networks of San Jose and served as president and chief executive officer of WordStar International of San Rafael.

In addition, he joined Sperry Univac Corp. in 1956 and left in 1983 as senior vice president. He earned a bachelor's of science degree from Notre Dame University and a master's of business administration from Harvard.

Dataquest, founded in 1971, is an international company of The Dun & Bradstreet Corp. It is a leading market intelligence company that provides market research and consulting services to the high technology industry and the venture capital and banking communities. The company currently has seven research offices throughout the world and employs more than 700 persons.

#90268b0613 09/25/1990 ~Business Wire

LAWRENCEVILLE, NJ (SEPT. 25) BUSINESS WIRE - Tuesday, Multi Soft Inc., (NASDAQ: MSOF) announced an agreement with Mellon Bank for the distribution of Multi Soft's INFRONT product line in the Datacenter banking services operation.

INFRONT supports the development of PC-based front-ends for existing host-based applications without requiring any changes to the host programs. This gives a developer tools for remodeling and enhancing the user interface for applications accessed through PCs used as terminals.

Mellon Bank Datacenter functions as a service bureau, providing complete data processing services to client banks. More than 250 financial institutions access Datacenter's mainframe applications. Mellon Bank considered ways to extend the functionality of their services and chose INFRONT's building blocks since they are already so well-accepted and robust.

In addition, since INFRONT can run on low-cost PC workstations like older XT's as well as high-end PS2s, they can offer these extended capabilities to the

broadest range of clients.

According to Ray Ingram, senior vice-president at Multi-Soft, ''The INFRONT solution represents an entire set of products that address Mellon's requirements quite well. This lets them concentrate on using our tools to further enhance services already recognized as the best in the banking industry.''

''Surveys indicate a growing number of financial institutions are using PCs to access online systems. With INFRONT, they enjoy a standardized user interface built to comply with the Common User Access model. INFRONT offers Mellon Datacenter's clients ease of use and enhanced capabilities that will let them leverage their PC investment -- instead of using their PCs as dumb terminals, INFRONT gives them significant added value,'' Ingram added.

Multi Soft Inc. (NASDAQ:MSOF) is a subsidiary of Multi Solutions Inc. (NASDAQ:MULT) and has provided state-of-the-art cooperative processing software and solutions for production operating platforms and communications environments since 1985. For more information on Multi Soft and its products, please contact Gerry Jurrens at Multi Soft 609/896-4100.

#90268b0615 09/25/1990 ~Business Wire

PALO ALTO, CA (SEPT. 25) BUSINESS WIRE - Legato Systems Inc. Tuesday announced that Legato NetWorker is now available for DOS, HP-UX and ULTRIX as well as Solbourne and MIPS systems.

Available since June for Sun systems, NetWorker now allows centralized control of backup and recovery operation for multiple platforms across the network. The company also announced an entry-level product designed especially for organizations with smaller networks.

The announcements underscore NetWorker's usefulness for organziations faced with the difficult and time-consuming task of protecting critical data on all the different platforms on a network.

Legato NetWorker is the first comprehensive software product that allows critical files on both personal computers and UNIX systems to be protected as part of a network-wide backup. Using a Sun system as a backup server, NetWorker now backs up and recovers DOS, HP-UX, DEC ULTRIX, MIPS and Solbourne-based files.

Other backup utlities (such as UNIX's ''rdump'') are operating-system dependent, preventing them from recognizing files from other operating-systems.

NetWorker, on the other hand, allows files from any computer, regardless of its operating systems or filesystem type, to be backed up to and recovered from a Sun server in a format that is operating-system independent.

NetWorker for DOS, for example, is easy-to-use software for the PC. NetWorker for DOS frees personal computer users from the tedious task of backing up files onto floppy disks, while ensuring that all files on the network are protected. Selected PC files are sent for backup via TCP/IP to a NetWorker backup server.

Legato Systems Inc. is a leading-edge supplier of network administration products designed to enhance and simplify network computing. The company's mission is to make administration and sharing of multiple, heterogeneous network resources simple, reliable, consistent, cost-effective and efficient.

Legato delivers quality network administration applications to Fortune 1000 customers in industries including defense, aerospace, manufacturing, petroleum publishing, education and high technology. Legato's products, Prestoserve and Legato NetWorker, are designed to allow organizations to utilize to maximum advantage their significant investment in existing technology, resources and personnel.

SAN RAFAEL, CALIF. (SEPT. 25) BUSINESS WIRE - Island Graphics Corp., the leading developer of UNIX productivity and prepress software, Tuesday announced the opening of its European headquarters, Island Graphics B.V. in the Netherlands.

The company, a wholly owned subsidiary of Island Graphics Corp. of California, is located in Hoofddorp, a rapidly growing high-tech community near Amsterdam's Schiphol Airport. Island Graphics B.V. will support European distributors of the Island Productivity Series, Island's best-selling UNIX-based desktop publishing products.

Island has recently entered distribution agreements with leading UNIX software distributors in France, Germany, Italy and the United Kingdom.

The Island Productivity Series, made up of IslandWrite, IslandPaint and IslandDraw, lets engineers, managers and administrative staff use their UNIX workstations to create a variety of documents, such as illustrated memos, letters, reports and contracts. In addition, the programs are ideal for producing overhead presentations, multi-column newsletters and specification

sheets.

IslandWrite combines full-featured WYSIWYG word processing with desktop publishing. IslandPaint and IslandDraw let users create original art, overhead presentations, organization charts, maps and diagrams. Users can copy graphics from IslandPaint and IslandDraw into IslandWrite. All products print to PostScript laser printers. Pricing, Availability and Support

The Island Productivity Series' list price in European countries is $1395 US, and will be available by year end in French and German versions.

It is currently shipping worldwide for Sun Microsystems workstations with the OPEN LOOK graphical user interface. With the OSF/Motif graphical user interface, it is shipping worldwide for Hewlett-Packard 9000 Series 300 and 400 workstations, and for Apollo personal workstations. Later this year, the Island Productivity Series will be available on most leading UNIX workstations.

Island Graphics offers 30 day support for the Island Productivity Series, optional support and upgrade programs, and an electronic bulletin board for product information.

Headquartered in San Rafael, Island Graphics employs over 140 people, and has sales offices in San Jose, Washington DC and Boston.

TUSTIN, CA (SEPT. 25) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) announced Tuesday it received approval from the U.S. Food and Drug Administration to commence human clinical trials of its new Holmium ''cold'' laser system for removing plaque (fatty deposits) from coronary (heart) arteries as an alternative to bypass surgery and balloon angioplasty at 15 medical centers in the United States.

The company has already begun testing its new laser system in coronary arteries at one medical center in England and expects to expand its overseas study to 10 or more medical centers in other foreign countries.

The new Holmium ''cold'' laser emits extremely rapid, high-energy laser pulses which are transmitted through a catheter containing tiny optical fibers in a catheter.

The catheter is inserted into an artery in the thigh and is advanced through the body's arterial system to the blockage over a guidewire, like a monorail train.

The Holmium laser is able to vaporize the plaque, even hard, calcified deposits, without creating excessive heat. The same ''cold'' laser system is being tested in an FDA-approved clinical trial in peripheral (leg) vessels in the United States.

Howard K. Cooper, president and chief executive officer of Trimedyne, commented: ''Our Holmium 'cold' laser system has produced excellent results in more than 50 patients with totally and partially blocked leg vessels in our ongoing U.S. trial, and we believe these devices are the most advanced products available today to remove blockages from the coronary arteries of the heart. Our clinical investigators include some of the world's most prestigious physicians in cardiology and vascular surgery.''

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for use in surgery and for removing blockages from blood vessels.

MILPITAS, CALIF. (SEPT. 25) BUSINESS WIRE - Logic Modeling Systems Inc. Tuesday announced Amador Designs will develop and distribute simulation models for the industry standard LM-1000 hardware modeling system as part of their consulting and contracting business.

Eric Amador, president of Amador Designs, said: ''Logic Modeling's hardware modeler is clearly the industry standard in hardware modeling, as evidenced by the endorsement and support of all of the popular simulators for the LM-1000.

Hardware modeling solves the simulation model availability problem for system and ASIC designers by allowing the physical VLSI device to be used to model its own behavior during design verification.

Using the actual device as part of the model guarantees completely accurate simulation of all device functions. Over 600 hardware models of complex, standard VLSI devices are currently available, and the LM-1000's advanced capabilities enable designers to create models of proprietary devices, like ASICs, in as little as one day. The LM-1000 hardware modeling system is simulator- and platform-independent.

Logic Modeling sells through OEM relationships with EDA vendors including Cadence, GenRad, IKOS, Mentor Graphics, Racal-Redac, Scientific Calculations, Siemens, Teradyne, Valid, Vantage Analysis Systems, Viewlogic Systems, Zycad Corp. and to companies with proprietary simulators.

Logic Modeling Systems Inc. is a privately held company, with corporate headquarters located at 1520 McCandless Drive, Milpitas, Calif., 95035, 408/957-5200.

Amador Designs is a privately held company located at 1025 Buckland Ave., San Carlos, Calif. 94070, 415/637-9479, fax 415/637-9361.

LOS ANGELES (SEPT. 25) BUSINESS WIRE - RCM TECHNOLOGIES, INC. (NASDAQ Symbol: RCMT, RCMTZ; BSE Symbol: RMT) Tuesday announced that it has formed a new environmental services division called RCM/Verification.

The new division will provide support services to clients involved in Superfund projects, those involving the clean-up of hazardous waste sites, as well as to clients impacted by environmental laws in commercial real estate transactions. The division will also offer consulting services to company's with hazardous waste disposal problems.

RCM/Verification, with offices near Dallas, provides research and investigative services to these projects to identify Potentially Responsible Parties (PRP's) as well as a full line of financial and administrative services to hazardous waste projects.

The Environmental Protection Agency (EPA) has identified 30,000 hazardous waste sites of which approximately 1,300 have been placed on the National Priority List (NPL) for prompt clean-up. EPA has budgeted $8 billion for the clean-up of NPL sites.

Commenting on the announcement, Robert Sackett, chairman of RCM TECHNOLOGIES, INC., stated, ''This new division significantly enhances the growth potential of RCM TECHNOLOGIES, INC. and allows the company to participate in the rapidly expanding, multi-billion dollar environmental services industry. In addition to current and future air quality solutions, RCM is now able to offer its clients services which address pre-existing and existing hazardous waste disposal problems.

RCM TECHNOLOGIES, INC. is involved in the development and marketing of its patented ''System 99'' which is designed to control hazardous emissions from smoke stacks, a major cause of acid rain. RCM also provides professional engineering and technical services for major corporations in aerospace,

chemical and industrial manufacturing since 1968.

PROVO, UT (SEPT. 25) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL), developer of NetWare systems software products, Tuesday announced modifications in its reseller program that respond to customer requests for more specialized support from resellers.

The revised program stratifies resellers within the channel by the markets or customers they serve, and establishes requirements to ensure that resellers have the training and tools to support their customers.

Scheduled to take effect Jan. 1, 1991, the program defines three target markets served by the reseller channel: Platinum resellers focus primarily on large-scale multivendor systems environments within Novell's major accounts; Gold resellers serve departmental workgroups and advanced vertical markets; and Authorized resellers serve small- to medium-sized businesses, primarily focusing on selected vertical markets.

Qualifications for current Platinum, Gold and Authorized levels have been redefined to align each group with its market. Within one year of the program's inception, all resellers must meet new criteria for technical proficiency and customer support, appropriate to each market segment.

Novell Inc. develops NetWare systems-software products that manage and control the sharing of data across a variety of network-computing environments including computer workgroups, departmental networks and business-wide information systems.

SAN DIEGO (SEPT. 25) BUSINESS WIRE - As part on their continuing commitment to the ISDN market, Tekelec (NASDAQ:TKLC) and CMC have signed a joint marketing agreement to promote the development of ISDN products for VMEbus computer systems.

The two companies will jointly market Tekelec's Chameleon 32 ISDN test systems and CMC's ISDN Forerunner Developer's Kit.

CMC created the ISDN Forerunner Developer's Kit to assist OEMs and system integrators in adding ISDN capabilities to VMEbus workstations. The kit includes hardware, software, test suites, training and support.

The test suites, which run on Tekelec's Chameleon 32, are used to validate AT&T PRI compatibility with products developed using CMC's hardware and ISDN PRI software.

Tekelec configured its Chameleon 32 test system with options specifically tailored to run the CMC test suites. CMC will recommend Tekelec's Chameleon 32 system to its Forerunner customers to ensure continued compatibility for any products that they develop.

Under the terms of the marketing agreement, Tekelec and CMC will participate in joint product demonstrations and training, assist each other with customer support and provide each other with sales and promotional literature.

The first joint demonstration will take place at TCA '90, Sept. 25-27 in San Diego. A subsequent demonstration is planned for the upcoming Interop '90 show, held Oct. 10-12 in San Jose.

CMC is a leading supplier of high-performance networking solutions based on the industry standards TCP/IP, OSI, Ethernet, FDDI and ISDN. CMC is a wholly owned subsidiary of Rockwell International Corp., and is a unit of Rockwell Communications Systems (RCS). Rockwell International Corp. is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses. For more information contact: CMC at 805/968-4262, fax: 805/968-6478. CMC is located at 125 Cremona Drive, Santa Barbara, Calif. 93117.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25), transmission services and equipment (T1, Fractional T1, DDS, T3), signalling (SS7) and emerging intelligent network applications.

Its products are marketed worldwide with subsidiaries in Japan and the United Kingdom. Tekelec's common stock is traded over the counter under the symbol 'TKLC' and reported on the NASDAQ National Market System. For more information, contact Tekelec at 1-800-TEKELEC, fax: 818/880-6993. SAN JOSE, CA (SEPT. 25) BUSINESS WIRE - San Jose Unified School District Tuesday announced that it will implement a comprehensive online computer system designed to meet a variety of needs in primary and secondary education, including curriculum development and delivery of administrative services.

The district has awarded Tandem Computers Inc. and Ungermann-Bass a contract, and has approved further funding under an existing purchase agreement with Apple Computer Inc. to provide the system.

''We wanted the most advanced computer system ever developed for public education,'' said James Baughman, superintendent of the school district. ''And what these companies offer together is exactly that.''

The school district will purchase an estimated $10 million in equipment over the course of a five-year period, according to the contracts approved by the district board of education on Sept. 20. Under the terms of the contracts Tandem, Apple and Ungermann-Bass will provide a complete package that includes hardware, software and support.

Tandem's contributions will be two Tandem NonStop VLX transaction processing mainframes, an Integrity S2 system, software for administrative purposes, networking and training for the district. Apple will provide Macintosh workstations for students, teachers and administrators. All of the computers will communicate via an enterprise-wide Ungermann-Bass Access/One network.

The Tandem NonStop VLX system will provide the district's 4,000 employees across 45 sites with an electronic mail system as well as an online database for faculty and classroom scheduling. The database will also contain demographics information, grades and attendance records, and other critical information on the district's 30,000 students.

At both central and school sites, Apple's Macintosh computers will provide a platform for teaching and learning on computers, developing new instructional materials, accessing Tandem's database for instructional and administrative needs, and other uses.

The school district will set up a technical center to provide training and support services. Tandem support personnel and Apple education sales consultants will combine forces to assist in that process.

Teachers, parents and administrators will be able to obtain current information instantly from the Tandem system for various administrative or instructional uses. For example, when one teacher invents an innovative teaching plan for a geometry or history lesson, it could instantly become available through the network to instructors across the city in another school.

#90268b0635 09/25/1990 ~Business Wire

FREMONT, CA (SEPT. 25) BUSINESS WIRE - Joel Levine, 54, an industry veteran with over 30 years of experience in the computer peripherals business, has been appointed as vice president of marketing at SyQuest Technology, Fremont, the industry's leading supplier of removable-cartridge data storage devices and media for personal computers, workstation and on-line storage subsystems.

In his new position, Levine will be responsible for the strategic and product planning for SyQuest's family of cartridge disk drives as well as developing and implementing the company's worldwide marketing activities.

Levine assumes the marketing functions formerly held by SyQuest sales vice president Arnold Cooley. Both Levine and Cooley report to SyQuest president Syed Iftikar.

''SyQuest is growing at 100 percent per year, and this year alone we will ship over 150,000 drives and 700,000 disk cartridges,'' Iftikar said. ''At this pace, the role of marketing in the daily affairs of our company becomes even more significant.

''Joel is a well-rounded data storage industry professional with the expertise we need to support these accelerating growth rates and to increase our business even further. We're glad he has joined us.''

SyQuest commands over 90 percent of the market for removable-cartridge Winchester drives. The company manufactures the SQ555, a 5 1/4-inch removable cartridge drive that provides unlimited data storage capacity at performance levels that match that of fixed disk drives.

The SQ555 is sold directly and through distribution to a wide variety of systems and subsystems houses, and has become a de facto standard in the Apple computer market.

The drive stores 44-Mbytes of data per cartridge, and is an ideal replacement for the fixed disk drives used for system storage in a wide range of desktop personal computers, scientific and engineering workstations, and minicomputer-based multi-user systems.

It allows users to configure systems with higher data storage capacities while at the same time eliminating the need to buy higher capacity fixed disk drives.

It is also ideal for transporting large data bases and programs, while allowing users to remove confidential and sensitive files. The SQ555 incorporates a fully embedded on-board controller based on the industry-standard SCSI standard.

Before joining SyQuest, Levine was president and chief executive officer of Adelphi Associates, a disk drive test equipment manufacturer in Fremont, and vice president of planning and program management at Unisys. He has also held positions with Ampex, IMI and Century Data Systems. Levine is on the board of directors of IDEMA, an organization chartered to help support the growth of the disk drive industry.

SyQuest Technology was founded in 1982, and maintains a 76,000-square-foot headquarters, engineering, and manufacturing facility in Fremont, approximately 30 miles southeast of San Francisco.

The company has a 13,000-square-foot advanced-engineering facility in Colorado and also manufactures drives and cartridges at a 40,000-square-foot plant in Singapore. The company is privately held.

LENEXA, KAN. (SEPT. 25) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) Tuesday announced a major expansion of their product development collaboration with

Nippon Zeon Co. Ltd.

Under the new agreement, Syntro and its wholly owned subsidiary, SyntroVet Inc., will develop a line of novel poultry vaccines incorporating advanced technology derived from both Syntro and Nippon Zeon.

Nippon Zeon will provide full funding for the project over its expected three-year term. Syntro and Nippon Zeon will each have rights to the products which emerge from the collaboration.

The companies will develop vaccines that utilize genetically engineered fowlpox viruses to protect against as many as four different poultry diseases. The first product is expected to be commercially available in mid-1992. The targeted vaccines address growing markets that today are valued at $50 million-$75 million worldwide.

Nippon Zeon, headquartered in Tokyo, is a leading chemical company engaged in the development, manufacturing and sales of synthetic rubber, plastics, specialty chemicals and medical products.

Founded in 1950, the company currently has approximately 3,000 employees and reported net sales of nearly $1 billion in 1989. It operates four manufacturing plants in Japan, one in the United Kingdom, and three in the United States, and has subsidiaries located in White Plains, N.Y., and Rolling Meadows, Ill.

During the past decade, Nippon Zeon has been active in developing and acquiring new technologies in the area of life sciences.

Syntro Corp., founded in 1981, is a Lenexa- and San Diego-based biotechnology company engaged in the development and commercialization of technology in the health sector. SyntroVet was established in 1985 to manufacture and market products resulting from Syntro's research program.

ACTON, MA (SEPT. 25) BUSINESS WIRE - Bechtel Software and Objective Solutions Tuesday announced an agreement which establishes Bechtel Software as the first value-added reseller of Objective Solutions' ORIN software.

ORIN is an applications generator for creating highly portable UNIX, VMS and

DOS applications for relational databases. Bechtel Software plans to sell ORIN separately and with SYNERGY, a family of sophisticated, ORACLE-based project management and control software modules.

The addition of ORIN will allow Bechtel to deliver SYNERGY with a new graphical user interface that can be deployed on multiple windowing environments, including Motif and WDS, ORIN's proprietary environment which supports ReGIS- and character-mode terminals.

''ORIN enhances ORACLE applications with an easy-to-use and friendly applications generator across multiple computer environments and operating systems,'' says John Lucas, Bechtel Software president. ''It adds real value to an existing or new application.''

The integrated SYNERGY/ORIN software, which is expected to be released in 1991 will allow users to take full advantage of SYNERGY's modular design. From within a single ORIN menu, users will be able to access any SYNERGY module. ORIN's multi-tasking capabilities will permit SYNERGY users to view two or more modules on-line, simultaneously.

For example, users will be able to record actual work performed in the Task Tracking module, and immediately see its impact on the project schedule in the Planning and Scheduling module.

The new interface will add richness to SYNERGY as well. User help will be expanded and navigation through the system will be simplified. Users will also be capable of customizing the menu system to suit their personal work style.

According to Peter E. Katsoulas, president of Objective Solutions, ''ORIN and SYNERGY are natural complements to each other. Bechtel's software captures a century of valuable project management experience, and ORIN gives that experience the look and feel of the future.''

ORIN is available now. Prices start at $1,200 for the development version and $300 for the runtime version and increase depending upon hardware configuration.

SYNERGY modules include: Plans and Schedules, Task Tracking, Budget Control, Contract Administration, Overhead Control, Craft Performance, Performance Measurement, Cost and Commitment, Management Reporting, Quantity Tracking, and Operating Plant Work Order and Cost Control. SYNERGY runs under UNIX, VMS and DOS operating systems. Prices start at $6,000 and increase depending upon hardware configuration and the number of modules purchased.

Headquartered in Massachusetts, Bechtel Software is a wholly owned subsidiary of engineering/construction giant Bechtel Corp. Bechtel Software markets, sells and supports integrated, engineering software solutions for plant design and animation, project management and control, electrical component tracking

and expert systems intelligence.

Bechtel Software has both the commitment and the resources to incorporate the latest technological developments into its software applications.

NEW CASTLE, IN (SEPT. 25) BUSINESS WIRE - Ameriana Bancorp (NASDAQ/NMS:ASBI) Tuesday announced that it is commencing a stock repurchase program to acquire up to 10 percent of the company's outstanding common stock, or approximately 190,000 shares.

The program will be dependent upon market conditions and there is no guaranty as to the exact number of shares to be repurchased by the company.

Paul W. Prior, chairman of the board of Ameriana Bancorp, stated that the board of directors has authorized the expenditure of up to $2 million for the repurchase program, which is expected to be completed within one year. Prior explained that the board of directors considers Ameriana's common stock to be an attractive investment, particularly in view of recent market declines.

In addition, the repurchase program is designed to offset potential dilution which could be incurred in connection with the administration of the company's stock option plan.

According to Prior, the repurchases generally would be effected through open market purchases, although he did not rule out the possibility of unsolicited negotiated transactions.

At June 30, 1990, Ameriana Bancorp reported total assets of $275.5 million and shareholders' equity of $36.9 million, or 13.4 percent of total assets.

Ameriana Bancorp, through its wholly owned subsidiary, Ameriana Savings Bank, offers an extensive line of banking services to the east central Indiana area through offices in New Castle, Knightstown, Middletown and Greenfield.

In addition to banking services, Ameriana, through Ameriana Financial Services Inc., has an interest in a life insurance company headquartered in New Orleans owns ThallsAmeriana, a full-service insurance agency in New Castle, and provides a full line of investments and securities products in its brokerage

center.

ROCHESTER, NH (SEPT. 25) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) Tuesday reported record operating results for the second fiscal quarter ended Aug. 31, 1990.

Net sales of $42.4 million represented a 68 percent increase over sales of $25.3 million reported in the second quarter of the preceding fiscal year. International sales were $8.5 million in the second quarter of fiscal year 1991, a 42 percent increase compared to $6.0 million in the second quarter of fiscal year 1990.

Pretax earnings of $13.3 million represented a 46 percent increase over pretax earnings of $9.1 million reported in the comparable quarter of the preceding fiscal year.

Worldwide sales for the first six months of fiscal year 1991 were $77.9 million, a 63 percent increase, compared to $47.9 million in the first six months of the preceding fiscal year.

Net income for the six months ended Aug. 31, 1990, totaled $15.6 million or 59 cents per share, compared to pro forma net income of $10.9 million or 43 cents per share for the comparable six months of the prior fiscal year.

Net income in the second fiscal quarter ended Aug. 31, 1990 totaled $8.5 million or 32 cents per share compared to pro forma net income of $5.8 million or 22 cents per share in the comparable quarter of the preceding fiscal year, and net income of $7.1 million or 27 cents per share in the immediately preceding quarter.

''Support for Cabletron's LAN management strategy continued to grow during the second quarter as customers purchased hardware and software products based on the company's Integrated Network Architecture. We continue to see a growing demand for integrated management solutions through our modular intelligent hub product line and through sophisticated systems solutions products like our Remote LANVIEW/Windows network managment software,'' said S. Robert Levine, Cabletron's president and chief executive officer.

Cabletron Systems Inc., headquartered in Rochester, N.H., develops and manufactures networking products based on its Integrated Network Architecture, a strategy which provides standards-based products and services necessary to build and manage a global, distributed platform of interconnected local area

networks.

IRVINE, CA (SEPT. 25) BUSINESS WIRE - Corollary, the technology leader in the development of multiprocessing products for UNIX-based PCs, Tuesday named the first regional distributor of its multiprocessing systems.

Tempe, Ariz.-based Unizone is a value-added distributor that develops and markets UNIX-based computer systems for use by small and mid-sized companies.

Until now, Corollary's ''smp'' symmetrical multiprocessing products have been marketed only to system manufacturers such as Digital Equipment Corp., Advanced Logic Research and Zenith Data Systems.

The Corollary smp is a board set consisting of 386- and 486-based multiprocessor boards, memory boards and a backplane. Unizone will provide VARs with the components and/or a complete system including packaging, power supplies, peripherals and training.

To make sure end users receive the same quality support traditionally provided by minicomputer vendors, Unizone has developed a Reseller Authorization and Training Program for UNIX PC VARs. According to Glenn Schulke, vice president of marketing at Unizone, training includes a lab for systems integrators and small OEMs who want to integrate the smp board sets into their own private-label system.

Courses are scheduled for Oct. 22 and 23 in Chicago, and Feb. 21-22 in Phoenix. Customized training is also available.

Unizone was founded in 1989 by Manton, former chief operating officer of MicroAge, to market UNIX-based computer systems. In partnership with major hardware and software manufacturers, the company develops complete systems and distributes them to VARs who tailor the product to meet the requirements of individual customers. Unizone markets Corollary's smp products as well as its 8 x 4 serial I/O subsystems.

Corollary develops, manufactures and markets proprietary, high-performance hardware and software products that extend the power of 386- and 486-based PCs running the UNIX operating system by increasing processing capacity via multiprocessor technology and by providing for multiple users. The company developed the multiprocessing version of SCO UNIX, which is marketed by The Santa Cruz Operation as SCO/MPX.

NEW YORK (SEPT. 25) BUSINESS WIRE - EMC Corp. (Hopkinton, Mass.) Tuesday became the first company to unveil a version of 'RAID' (Redundant Arrays of Inexpensive Disks) -- widely believed to represent the next revolution in computer storage technology.

The announcement comes at least eighteen months before IBM's and other storage vendors' anticipated release dates for similar technology.

Called Symmetrix, EMC's 'RAID' will allow mainframe computer users to store and retrieve more information more quickly, reliably and cost-efficiently than ever before. Symmetrix actually expands on the RAID concept by combining disk arrays, controllers and large amounts of cache, resulting in an Integrated Cached Disk Array (ICDA) system. Symmetrix appears to the system as an IBM 3880 or 3990 control unit and emulates 3380 or 3390 storage devices. It also appears totally transparent to the host computer, or Central Processing Unit (CPU).

The company, which initially is offering Symmetrix in North America and Europe expects sales of the product to exceed 300 units, ranging in price from $240,000 to $400,000 in 1991. The company expects sales to increase dramatically in 1992 as the market becomes more knowledgeable about the technology and as the Symmetrix product line expands. The total market for IBM mainframe storage is growing at 25 percent annually.

Initially designed for IBM 370 mainframe computers, such as the IBM 3090 and compatible systems, Symmetrix will be modified in the months ahead to operate with other manufacturers' mainframes -- thereby significantly expanding its market potential.

EMC Corp. is a public company listed on the NYSE. It is the leading supplier of third-party storage products for IBM midrange and mainframe processors. Its principle executives include Richard Egan, chief executive officer and chairman, and Michael Ruettgers, president and chief operating officer.

SAN JOSE, CA (SEPT. 25) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ:DMIC) announced Tuesday a significant expansion of its business in Mexico.

Orders totalling approximately $9 million were received for the supply of 10, 15, 18 and 23 Gigahertz digital microwave radios to AT&T Mexico and four major Cellular Operators, which include: BAJA CELLULAR, CEDETEL, and COMCEL.

''We are pleased with the expansion of our business in Mexico and with the acceptance and continued demand for our products and services. These new orders represent further penetration of the cellular and common carrier markets in developing countries,'' commented William E. Gibson, president and CEO of Digital Microwave Corp.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

Digital Microwave Corp. is traded under the symbol DMIC on the NASDAQ National Market System.

Digital Microwave Corp. is located at 170 Rose Orchard Way, San Jose, Calif. 95134. Telephone: 408/943-0777.

#90268b0660 09/25/1990 ~Business Wire

NEEDHAM, MA (SEPT. 25) BUSINESS WIRE - Cognex Corp. (NASDAQ:CGNX), a leading supplier of machine vision systems, has begun Beta testing of its new product, On-Sight(TM), an easy-to-use and flexible machine vision system, which was introduced earlier this year.

Ten Beta site participants -- from among the electronic, electrical products, automotive subassembly, pharmaceutical, and discrete part manufacturing industries -- will evaluate On-Sight's ability to solve visual tasks. Companies include Delco Electronics, Square D Co., and Anorad Corp.

The On-Sight machine vision system enables manufacturing engineers who have no computer programming or machine vision experience to apply advanced vision technologies to solve on-line gauging, robotic guidance, part inspection, and part tracking problems. Users can configure On-Sight by simply creating a flow chart on the system's high-resolution, color monitor that details the steps the vision system will follow to execute the application. The system derives its powerful processing capabilities from Cognex's VC-1 and VC-2 custom vision chips, and draws on Cognex's large library of grey-scale vision algorithms.

Delco Electronics, Kokomo, Ind., will test On-Sight's performance on a system that inspects buttons and displays on automotive heater and air conditioner units. On-Sight will verify that heater and air conditioner control buttons have the correct icons indicating their functions. It also will inspect digital displays, such as those that indicate fan level and temperature, to ensure that they function properly.

Square D Co., Asheville, N.C., plans to evaluate On-Sight's performance for solving visual tasks in the manufacture of electric products. Tasks targeted for the system include gauging the distance between subassemblies on products, ensuring that all parts are present on products, and verifying that products are labeled with the correct codes.

Anorad Corp., a Hauppauge, N.Y.-based manufacturer of X-Y positioning tables for semiconductor manufacturing equipment, will use On-Sight to simplify analysis of machine vision applications. The On-Sight system will enable engineers to quickly develop and test solutions to various alignment and positioning problems in less time than would be possible using a programmable vision system.

On-Sight will be available for shipment in the first quarter of 1991. Prices range from $25,000 to $38,000.

Cognex Corp. designs, develops, manufactures and markets a family of machine vision systems which are used to replace human vision in a wide range of manufacturing processes. Since its founding in 1981, the company has sold more than 5,000 vision systems worldwide.

NEW YORK (SEPT. 25) BUSINESS WIRE - Bowne & Co. Inc. (ASE:BNE) announced Tuesday that it has reached a definitive agreement to purchase the Packard Insurance Division from Basix.

The Insurance Division, which produces statutory filings for more than 1200 insurance companies throughout the United States, is the leading provider of these services to the insurance industry.

Thomas J. Vos, vice president, marketing of Bowne, said, ''We are pleased that all of the key people who have made this division so successful will be joining us. The printing and data handling resources we can add to this business will enable them to increase their industry lead.''

Ed Wiley, formerly the division's Director of Insurance Services and now General Manager of the new Bowne Insurance Division, added that, ''Bowne's network of offices around the country will enable the division to provide faster and more accurate service for these time-sensitive documents.''

Headquartered in New York with 33 offices in the United States and Canada, as well as affiliates around the world, Bowne & Co. Inc. today handles more of the world's financial printing than any other company.

Bowne serves attorneys, investment bankers, corporate officers and government officials by meeting their document building and communications needs worldwide. These documents include registration statements, proxy materials, prospectus, tax-exempt bond offering circulars, tender offers, private placements, reports to stockholders, and now, insurance company reports.

LONDON (SEPT. 25) BUSINESS WIRE - LASMO plc, the independent oil and gas exploration and production company, announced Monday that the development of the Cohasset and Panuke oilfields located 41 kilometers southwest of Sable Island, offshore Nova Scotia, is to proceed.

LASMO, the Operator, and Nova Scotia Resources (Ventures) Limited (NSRVL), a Crown corporation, each have a 50 percent interest in the project, which received Government approval on September 12th. The decision to proceed follows months of planning which included lengthy discussions with environmental bodies in Nova Scotia and the fishing industry.

Seasonal production from the two fields, which together contain reserves of 35 to 40 million barrels, is expected to commence in 1992 at a planned rate of 30,000 barrels of oil per day. This will be the first commercial petroleum produced offshore Canada.

The development will comprise a platform in each field with production of the very light 50 degree API oil being processed by facilities installed on the Gorilla III jack-up rig, recently contracted from Rowan Companies Inc., before loading offshore into tankers. Prior to conversion to production in late summer 1991, the Gorilla III will drill two exploration wells for LASMO and NSRVL on separate prospects to the northeast of Cohasset.

Chris Greentree, LASMO's Chief Executive, said today that he was delighted with the approval to proceed with the development. The project will bring benefits to both LASMO and Nova Scotia and demonstrates that innovative application of proved technology can enable the economic development of relatively small offshore fields. Nova Scotia Resources (Ventures) Limited is a Crown corporation of the Province of Nova Scotia and holds significant oil and gas interests offshore Nova Scotia.

LASMO plc is a fast-growing, UK-based independent oil company with its main production base in the North Sea. LASMO plc currently produces approximately 85,000 barrels of oil equivalent per day, and has interests in 16 countries worldwide.

LASMO shares trade on London's International Stock Exchange and in the US in ADR form (symbol 3LSMOY on the electronic OTC Bulletin Board). Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU.

TAMPA, FL (SEPT. 25) BUSINESS WIRE - Larry's Ice Cream Inc. announced Tuesday that a Letter of Intent has been signed with Bresler's Industries Inc. of Des Plaines, Ill. for the sale of certain assets.

Included in the sale are Larry's existing franchise agreements, certain company owned stores, the Larry's name, trademarks, ice cream formulas and certain inventories.

The manufacturing facilities and equipment of Larry's Ice Cream Inc. are not included as part of the sale. The sale is contingent upon, amongst other matters, the reaching of a definitive agreement between the two companies and obtaining various consents and approvals.

Bresler's, which currently has more than 300 franchised Bresler's Ice Cream and Yogurt units across the country, will continue to operate the Larry's stores under the Larry's name through a wholly owned subsidiary. According to Bresler's President, David E. Lasky, the two operations will remain separate and distinct.

Larry's management has stated that the proceeds from the sale will be applied to various debts owed by the company to creditors. It is not anticipated that any surplus funds will be available from the sale for distribution to shareholders.

SAN DIEGO (SEPT. 25) BUSINESS WIRE - Increased cooperation among major interests within the telecommunications industry is vital for the United States to capitalize on advanced computing and telecommunications technologies the president of Northern Telecom Inc. (NYSE:NT) said Tuesday.

''We must work together -- manufacturers, telephone companies and major telecommunications users -- to encourage the extension of a fiber optic network throughout America,'' Roy Merrills said in a speech to the annual conference of the Tele-Communications Association.

''Broadband access, transport and switching capabilities in the public as well as private networks will allow us to bring every segment of the economy into our drive for global competitiveness; rural and urban areas, small business and large business ventures, laboratory scientists and garage inventors,'' Merrills said.

''The critical decision is how we can accelerate this deployment, for the benefit of each of our businesses, as well as for the benefits to society as a whole.''

Northern Telecom's vision of the broadband, fiber optic-based network of the future is called FiberWorld. The company announced in October 1989 a $1 billion program of research, development and new product introduction for the S/DMS Family of telecommunications transport, access and switching products; S/DMS TransportNode, S/DMS AccessNode, and S/DMS SuperNode.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

INDIANAPOLIS (SEPT. 25) BUSINESS WIRE - The Somerset Group Inc. (OTC: SOMR) announced Tuesday that a new president has been employed as chief operations officer at TMS Analytical Services Inc., a subsidiary of Somerset.

Thomas Gran, Ph.D., returns to his native Indianapolis from Findlay, Ohio, to administer the newly expanded environmental testing laboratory facilities of TMS.

Gran has 16 years of experience in environmental chemistry, hazardous waste analysis and laboratory management, most recently working six years for a leading environmental remediation firm.

A graduate of Southport High School, he received his B.A. in Chemistry from Wabash College, and his Ph.D. in Analytical Chemistry from Kansas State University. Gran also serves on the Advisory Board to the Hazardous Materials Program at Findlay College, one of the few colleges in the country offering a four-year degree in the environmental field.

Gran's wife, Marcella, who also graduated from Southport High School, is a registered nurse and a patron of the arts. They have a married daughter, Angela, and a son, Aaron, who is a freshman at Ball State.

TMS has recently moved into a larger facility, purchased over $1 million in new state-of-the-art equipment, and expanded its marketing range, progressing from one of the premier dioxin laboratories to a full-service laboratory. The new high resolution mass spectrometry instrument, for use in environmental and contract research and development, has a sensitivity level for part per quadrillion analysis.

TMS, as a participant in the U.S. Environmental Protection Agency's Contract Laboratory Program, has long enjoyed a reputation for 24-hour turnaround capability.

The Somerset Group Inc. is a diversified public holding company which through its divisions and subsidiaries engages in three primary lines of business - banking, construction products and services, and environmental testing.

Through its 23.4 percent investment in First Indiana Corp., whose principal subsidiary is First Indiana Bank, a Federal Savings Bank, the company operates retail banking and real estate mortgage lending centers in strategic metropolitan communities.

The company provides construction products and engineering services through its American Precast Concrete Division, one of the largest manufacturers, marketers and installers of precast/prestressed concrete building components in the Midwest.

The company provides analytical testing services for toxic and hazardous compounds in the environment through its 80 percent owned subsidiary, TMS Analytical Services Inc. TMS is also a participant in the Contract Laboratory Program of the U.S. Environmental Protection Agency.

#90268b0697 09/25/1990 ~Business Wire

SAN DIEGO (SEPT. 25) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday announced plans to integrate support for frame relay into the DPN-100 digital data networking product line.

''Frame relay is an important, emerging, international standard -- one that promises to speed availability of advanced, high-capacity applications on both public and private networks,'' said William Pfeiffer, vice president, data networks, Northern Telecom Inc.

''This ensures that our customers will be able to take advantage of these advanced capabilities as they become available via their DPN-100 data networks '' Pfeiffer said.

The announcement was made in conjunction with the 1990 Tele-Communications Association (TCA) Annual Conference at the San Diego Convention Center.

It follows the introduction earlier this month of a common specification for frame relay connections between customer premises equipment (CPE) and public network switching systems.

DPN-100 frame relay will conform to this interworking specification, based on an agreement between Northern Telecom, Digital Equipment Corp., StrataCom and cisco Systems.

This means, for example, that routers from Digital, cisco, and other companies conforming to this specification will be able to connect to private networks based on Northern Telecom's DPN-100 or StrataCom's IPX, or public networks based on Northern Telecom SuperNode central office switching systems for local and interexchange carriers.

Customer trials, using frame relay for end-to-end virtual private line communications at T1/CEPT1 speeds over a DPN network, are planned for 1991. Trunking between DPN-100 nods via frame relay is anticipated in 1992 as public frame relay services become available.

Last month, Northern Telecom announced frame relay support for its central office switches, with the introduction of DataSPAN wideband communications

capability for the DMS-100 SuperNode and DMS-250 SuperNode digital switching systems.

''Support for this standard will allow our DPN-100 customers to interconnect nodes across frame relay services, such as those to be provided using DataSPAN '' said Pfeiffer.

Frame relay is a new packet switching interface, based on standards developed by the International Consultative Committee for Telephone and Telegraph (CCITT) and the American National Standards Institute (ANSI), which enables cost-effective, high-speed data networking over the public switched network.

LAN interconnect will be important, initial application for DPN-100 frame relay.

''Our customers are looking for cost-effective means to connect their geographically dispersed LANs,'' Pfeiffer said. ''With the comprehensive network management capabilities of DPN-100, LAN interconnect using frame relay is a natural extension of the wide-area data network.''

DPN-100 frame relay will support inter-bridge and inter-router communications in Ethernet and token ring LAN environments using SNA, DECnet, TCP/IP, XNS, IPX and OSI protocols.

DPN-100 frame relay is based on CCITT Recommendation I.122 regarding additional packet mode data services, and on the ANSI T1S1 subcommittee recommendations regarding frame relay transport.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities, and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

NASHVILLE, TN (SEPT. 25) BUSINESS WIRE - Dr. Jerome S. Tannenbaum, president and chief executive officer of REN Corporation-USA (NASDAQ/NMS:RENL), Tuesday announced the opening of a REN Center in Marshall, Texas.

This addition brings to 24 the number of centers owned or managed by REN throughout the Southeast and Southwest.

REN Center - Marshall is a newly developed, 15-station facility which received Medicare certification on Sept. 18, 1990. To date in this calendar year, the company has added nine dialysis facilities.

The new facility in Marshall is REN's second dialysis center in Texas. REN currently operates a unit in Longview, Texas. Frank Cardenas, M.D. and Mary McGee, M.D. will serve as medical directors of REN Center - Marshall.

Commenting on the development in Marshall, Cardenas stated: ''I know from my experience with REN Center - Longview that REN provides the highest quality treatment available to patients with kidney disease. I believe the REN dialysis facility in Marshall will be a significant asset to the medical services in that community.''

Commenting on the development in Marshall, Tannenbaum stated: ''We see Marshall, Texas, as the latest example of the excellent opportunities available to us to expand our centers through development or acquisition. Our

reputation for quality operations is helping us attract and retain the services of top local nephrologists, such as Dr. Cardenas.''

REN Corporation - USA is engaged primarily in providing renal dialysis services to patients suffering from chronic kidney failure. Dialysis services are provided principally at the company's 24 freestanding outpatient REN Centers located in nine states. The company also provides outpatient dialysis services to patients in their homes and inpatient dialysis services through contracts with 20 hospitals.

In addition, the company performs blood, tissue and urine testing services for its REN Centers, as well as for independent physicians and industry, at its three clinical laboratories. The company's common stock is included in the NASDAQ National Market System under the symbol ''RENL.''

SAN DIEGO (SEPT. 25) BUSINESS WIRE - Macintosh computer users will soon be able to make calls from 4th DIMENSION databases via Northern Telecom's (NYSE:NT) Meridian TeleCenter.

By using 4D CallCenter, a new software application, a purchasing agent calling suppliers could, for example, dial by simply choosing names from a database list, keep track of conversations and account activities, and perform a myriad of other functions.

In another example, a student could call a university security station in an emergency situation, and security guards using 4D CallCenter and Meridian TeleCenter could immediately associate the number with the telephone's location so that they could respond quickly.

4D CallCenter, announced at the Tele-Communications Association Annual Conference, is a set of software development tools soon to be available to the more than 3,000 ACIUS developers. 4D CallCenter will allow users of Northern Telecom's Meridian TeleCenter to access hundreds of applications, inbound or outbound, developed on ACIUS' 4th DIMENSION platform. ACIUS' 4th DIMENSION is the best-selling relational database for Macintosh computers.

4D CallCenter, developed by ACIUS of Cupertino, Calif., is the first third-party application available for Meridian TeleCenter, the recently introduced software personal productivity tool that uses the graphic interface of the Apple Macintosh computer to enhance access to the features of Northern Telecom's Meridian 1 business communications systems.

4D CallCenter will be supported by and available from ACIUS by the end of the year. The suggested customer list price is $200. A 4th DIMENSION program or a 4D runtime application is also required. ACIUS is a subsidiary of ACI France, the leading global producer of relational databases for the Macintosh family of computers.

4D CallCenter also requires Meridian TeleCenter, available now from authorized Northern Telecom Meridian 1 communications systems distributors. Its suggested customer list price is $200.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

BALTIMORE, MD (SEPT. 25) BUSINESS WIRE - Polk Audio Inc. ("Polk") (NASDAQ: POLK) and AGI (Electronics) Ltd. ("AGI") jointly announced Tuesday that they have entered into a letter of intent providing for the acquisition by Polk of all the outstanding Ordinary shares of AGI, principally through a share exchange for Polk Audio common shares.

AGI, which is headquartered in Maidstone, Kent, England, is a privately held holding company. Its principal operating subsidiaries are KEF Electronics, a manufacturer of loudspeakers systems, and Boothroyd-Stuart Ltd., a manufacturer of audio electronics sold under the brand name Meridian. Polk is a publicly held manufacturer of loudspeaker systems headquartered in Baltimore.

Spokesmen for both companies expressed their belief that the operating efficiencies realizable from the transaction will positively influence the prospects of both firms. In addition, the transaction will provide Polk with a strong base for future growth in the European Community.

A spokesman noted that "whilst the Polk and KEF brands will certainly retain their separate product philosophies and brand identities in the marketplace, this transaction will synergistically combine the world's best two high quality speaker brands."

The letter of intent anticipates the issuance of Polk Audio common shares to a

majority of current AGI shareholders, plus the retirement of certain classes of AGI securities for cash.

The consummation of the transaction is still subject ot various contingencies, including but not limited to the execution of definitive agreements and approval of both AGI and Polk shareholders.

The parties expect the transaction to be closed during the first quarter of 1991. While the parties plan to move forward as expeditiously as possible, no assurance can be given that the transaction will be consummated, or consummated in the form currently available.

CONTACT: Polk Audio Inc., Baltimore, George M. Klopfer, (301) 358-3600 or AGI Electronics Ltd., Tovil, Maidstone, Kent, Peter D. Gaskarth, 011-0622-672-261.

DALLAS (SEPT. 25) BUSINESS WIRE - SRX, the Dallas-based manufacturer of premium telecommunications systems and related peripherals, Tuesday announced that James Steenbergen has joined the privately-held company as president and chief executive officer.

Joseph Felix has assumed the duties of vice president of sales.

Steenbergen comes to SRX from Optilink, where he had served as chief operating officer since 1988. He also worked for Granger Associates as executive vice president and continued as senior vice president when the company was purchased by DSC Communications in 1984. Steenbergen brings 20 years of communications industry experience, both domestic and international, to SRX.

Joe Felix also joins SRX from Optilink, where as vice president his duties included development of Bell holding companies' key selling teams and product approval. Felix, who has held top management positions at Miniscribe and Granger Associates, will assume responsibility for all SRX sales operations.

Founded in 1983, SRX provides premium telecommincations switching equipment including patented voice and data switching technology to end users worldwide.

CLEVELAND (SEPT. 25) BUSINESS WIRE - Henry G. Piper, president and chief executive officer of Brush Wellman Inc. (NYSE:BW) Tuesday commented on the company's near term outlook.

Piper stated, ''Recent weakness in the U.S. economy, in conjunction with previously disclosed production interruptions at certain government facilities has impacted several of our markets. Third quarter sales will be about eight percent below the third quarter 1989. The weakness is concentrated in markets for some of our traditionally highest margin products. Therefore we expect third quarter earnings to be significantly less than the 22 cents per share earned in the third quarter last year.

''We anticipate some seasonal improvements in the fourth quarter. However, it is clear that second half sales will fall short of the second half 1989 level.'' Concerning the longer term, Piper stated, ''We have a strong balance sheet with low debt and good cash flow, and we are continuing to pursue opportunities for future growth, despite the current weakness in our markets.''

Brush Wellman Inc., with headquarters in Cleveland, is a manufacturer of engineered materials. The company and its subsidiaries supply worldwide markets with beryllium, beryllium alloys, beryllia ceramic, precious metal products, and specialty metal systems.

SHAWNEE, OK (SEPT. 25) BUSINESS WIRE - Barton Industries Inc. (NASDAQ:BART) of Shawnee, Okla., Tuesday announced revenues and profits for the month of

August and the first 11 months of fiscal year 1990.

For the month of August 1990, the company reported profits of $311,292 from revenues of $3,040,548. Year-to-date revenues are $27,790,233 with related profits of $3,336,863. Order intake for the month was strong in all individual operating units, highlighted by the performance of the Integrated Technology Systems Division.

The division received separate orders during the month from two new customers for Pump-Off Plus automation units to be delivered and installed in the last quarter of calendar 1990. These orders are expected to be the start of a long term supplier-customer relationship between the two firms and Barton.

BILLERICA, MA (SEPT. 25) BUSINESS WIRE - Michael Cronin, board chairman of Automatix Inc., announced the appointment of Ofer Gneezy as president and

chief executive officer.

Gneezy has been with Automatix since its inception in 1980 and has served as general manager of Automatix since April of 1990.

Cronin said, ''During the last few years we have been working to transition Automatix from a hardware manufacturer to a software developer for industrial applications. Ofer has been a leader of this transition, as vice president, Software and more recently general manager. His appointment as president and CEO is in recognition of the outstanding work he has done to date and our confidence in his leadership for the future.''

Automatix Inc. provides software products for industry along with OEM robot and control modules including Macintosh compatible industrial computers. Software applications include: Image analysis

- Machine vision inspection, gauging and robot guidance
- Adaptive control
- Cell control

The Cognition Corp. subsidiary develops and markets mechanical CAD and CAE products for:

- Drafting
- Design
- Engineering
- Expert systems for cost and manufacturability guidance

DALLAS (SEPT. 25) BUSINESS WIRE - Holly Corp. (ASE:HOC) Tuesday announced adoption of capital budgets totalling $16 million, which is in addition to the approximately $40 million for the previously announced expansion of the company's New Mexico refining facilities.

Included in the $16 million of capital budgets is $12 million for the company's Navajo Refining Co. in Artesia, N.M., covering expenditures for a sulphur recovery unit at the Artesia refinery, an automated loading rack at the El Paso terminal, a crude oil gathering pipeline, and an increase in ownership of a refined products terminal.

In addition, approximately $4 million to $5 million is expected to be expended in the company's oil and gas exploration program.

As announced, in March 1990, the company has contracted for the construction of a new 12,000 barrel-per-day Continuous Catalyst Regeneration Reformer for the company's Navajo refinery in Artesia. Construction of the reformer, and other planned improvements, are designed to permit expansion of the company's New Mexico refinery capacity from 40,000 barrels per day to 60,000 barrels per day.

The expansion is scheduled to be completed by the summer of 1991 at an estimated cost of approximately $40 million, most of which will be expended during fiscal 1991.

The cost of the above capital expenditures is expected to be financed partially from internally generated funds and partially with borrowings under the company's Revolving Credit Agreement.

Holly Corp., through its affiliates, Navajo Refining Co. and Montana Refining Co., is engaged in the refining of petroleum products.

PROVIDENCE, RI (SEPT. 25) BUSINESS WIRE - The board of directors of Old Stone Corp., a Providence-based $3.8 billion asset diversified financial services

company, Tuesday announced that its board of directors declared a quarterly dividend of 20 cents ($0.20) per common share, payable on Nov. 5, 1990 to shareholders of record as of Oct. 15, 1990.

The corporation also announced that it expects to incur a small loss for the quarter ending Sept. 30, 1990. Non-performing assets are expected to increase only slightly from June 30, 1990 levels.

In commenting on the dividend, Theodore W. Barnes, president and chief executive officer of Old Stone Corp. stated, ''We believe that a $.20 quarterly dividend is consistent with current market realities and with our longer term earnings prospects. We have confidence in the strength and prospects of the corporation and expect to see the benefits of our restructuring program in 1991 and beyond.''

The dividend compares with a previous quarterly dividend of $.39 per share with the reduction responding to a variety of external as well as internal factors. Continued depressed prices for financial services stocks, including Old Stone Corp., has led to unrealistic yields at former dividend levels.

Further, Old Stone wishes to retain capital in anticipation of increased regulatory capital requirements. The company recently announced its intent to explore the sale of all or part of its subsidiary, Old Stone Corp., in order to meet increased minimum capital requirements which become effective at the end of 1990. The corporation's insured entitities currently comply with all regulatory capital requirements.

Old Stone Corp. operates 168 offices in 26 states. It engages in retail, mortgage banking, commercial lending as well as money management and trust services. Its stock is traded on the NASDAQ National Market system (symbol:OSTN).

CHESTNUT HILL, MA (SEPT. 25) BUSINESS WIRE - Designs Inc. (NASDAQ: DESI), operator of specialty retail stores that sell exclusively Levi Strauss & Co. clothing and accessories spoke Tuesday at the Massachusetts Public Co. Forum 1990 held at the World Trade Center in Boston.

At the meeting Designs chief financial officer, Geoffrey M. Holczer, said that sales for the important back-to-school season (four weeks ended Sept. 8, 1990) increased by 50 percent over the same period last year to $14.8 million and

were up 14 percent in comparable stores. Comparable stores are those 59 stores open a full fiscal year.

Holczer also said that the company expects significant improvement in per share earnings for the third quarter of the current fiscal year which will end at the end of October. Last year's third quarter earnings were 10 cents per share.

Stanley Berger, president and chief operating officer spoke about the company's merchandising strategy, the power of the Levi Strauss & Co. brand name and the continued success of the Dockers line as a fast growing component of Designs sales.

Designs Inc.'s 69 traditional stores and 29 outlet stores sell exclusively Levi Strauss & Co. clothing and accessories under the ''Designs exclusively Levi Strauss & Co.'' and ''Specials exclusively Levi Strauss & Co.'' names. The stores are located in enclosed regional shopping malls and outlet parks in 26 states throughout the eastern half of the country.

     #90268b0763 09/25/1990 ~Business Wire

BOCA RATON, FL (SEPT. 25) BUSINESS WIRE - Teletimer International Inc. announced Tuesday that declining housing starts and rising oil prices have necessitated a shift in its marketing efforts with concentration on existing homes rather than new homes.

Teletimer has developed a home energy management service that saves energy and can be controlled remotely by push button telephones. The company also announced that is has resolved a problem with respect to a loan agreement with its Senior Lender.

Robert J. Brown, president of Teletimer, said that Teletimer was able to satisfy a condition of the agreement without restructuring the loan. ''We are able to satisfy the condition utilizing our present cash flow.'' In view of the company's actions, Teletimer's Senior Lender, a subsidiary of Bell Atlantic, has not exercised any of its options under the loan agreement.

According to Anthony Capuano, director of Home Automation of Bell Atlantic, slumping housing starts and rising oil prices required a shift in Teletimer's emphasis to concentrate on energy savings for existing homes.

''We have renegotiated arrangements with Teletimer toward more attractive near-term opportunities,'' Capuano said, pointing out that Iraq's invasion of Kuwait has heightened concern about a lack of energy conservation and the

economic effect of increased residential energy costs.

Bell Atlantic Network Services is a licensee of Teletimer, previously with a license for the Bell Atlantic region, has now expanded its license to the entire United States and its possessions.

Bell Atlantic has rights to deliver signals for the service to subscriber premises, install the customer premise equipment in subscriber's homes, provide maintenance service that may be required, and bill and collect the monthly fees for the service.

The service is provided by subscription for a $10 to $15 per month fee and allows the subscriber to control up to 18 devices within his home; thus allowing control of major energy consuming equipment and allowing conservation of energy and hence, lower energy bills.

Teletimer, meanwhile, is endeavoring to raise equity capital on a private placement basis in order to gear up for large scale production of its equipment required for the Teletimer Energy Savings Service.

NEW YORK (SEPT. 25) BUSINESS WIRE - Dun's Marketing Services, Inc. and Dun & Bradstreet, Inc., subsidiaries of The Dun & Bradstreet Corporation, announced Tuesday that they had filed suit against Gary E. Walter, a former employee, and two Chicago companies, International Business Lists, Inc. and Inter-Direct, Inc., for copyright infringement of the Dun's Market Indentifiers (DMI) database.

The suit arose after a list sold by International Business Lists in July 1990 was found to contain data unique to a 1988 DMI database. The DMI database contains updated information on more than 8.8 million U.S. businesses. The suit was filed in the United States District Court for the Northern District of Illinois and seeks injunctive relief to prevent further infringement, as well as damages.

The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide revenue of $4.3 billion in 1989.

MINNEAPOLIS (SEPT. 25) BUSINESS WIRE - Target Stores, the upscale discount division of Dayton Hudson Corp., invited its leading vendors to a preview opening of its new experimental super store, Target Greatland.

More than 800 vendors met L.A. Lakers basketball star Magic Johnson, race car driver Eddie Cheever, singer Amy Grant, guitarist Chet Atkins and Hispanic entertainer Franco at the event. Phyllis George, television announcer and entrepreneur, served as the evening's hostess.

Jack Fontaine, senior vice president, property development, told the vendors that Target had very aggressive growth plans for the next five years, which call for 300 new stores, many of which are expansions into new markets. ''We envision a 5-year expansion program at a cost in excess of $4.5 billion,'' he said.

''One of the keys to accomplishing such an explosive growth plan is having the right format for every market and real estate location and most importantly, the right partners, like you. With your help and support, we know we will continue to be the nation's upscale discounter,'' Fontaine said.

NEW ORLEANS (SEPT. 25) BUSINESS WIRE - Tidewater Inc. (NYSE: TDW) announced Tuesday that its marine div ision, Tidewater Marine Service Inc., has caused 10 high performance personnel launches to be built for use in its West African fleet, and that its joint venture company, Tidewater Port Jackson Pty. Ltd., has taken delivery of a new 110 foot safety/platform vessel for its Australian fleet.

The company has also added three vessels to its Gulf of Mexico fleet.

Scheduled to arrive in Warri, Nigeria, by the end of September, the 10 personnel launches will service inshore oil production activities for Shell Oil Nigeria on a long-term contract. The launches will be owned and operated by a joint venture between Tidewater and Oilfield Transport Services Ltd., a Nigerian company with a history of providing marine services in Nigeria's inland waters.

The 30 foot, fiberglass vessels, built in Louisiana, are equipped with two Cummins 6BT engines producing 180 horsepower each. The vessels' primary use will be supply and personnel transportation in the Niger River Delta of Nigeria. Each vessel transports up to eight passengers and a crew of three.

The 110 foot KURNAI TIDE, a safety/platform vessel was built by Austral Ships in Australia and is servicing long-term contracts in the Bass Straits Oilfields.

Built of aluminum for reduced weight in the hull, the vessel has enhanced maneuverability that allows travel sideways, as well as fore and aft, using bow thrusters, propellers with variable pitch and flapped rudders. The rudders can move 45 degrees and have a flap on their edges that can then move 90 degrees.

Powered by two MWM V8 diesel engines, the vessel can maintain a speed in excess of 16 knots. It is equipped with a water cannon and has twin booms to spray dispersal fluid in the event of an oil spill. It has accommodations for a crew of seven.

In separate transactions, Tidewater has also acquired two 110 foot aluminum crewboats and one 110 foot utility vessel for its Gulf of Mexico fleet. It is in advance negotiations for the acquisitions of four to five additional crew and utility vessels.

Commenting on the additions to the fleet, Tidewater chairman, president and chief executive John P. Laborde said: ''The building of these unique purpose vessels is our response to a specific customer need as Tidewater fulfills its role as a major service company. Tidewater strives to operate not just one of the largest, but the most versatile fleet in the world today.''

With the addition of these vessels, Tidewater's worldwide fleet now stands at 278 vessels.

Tidewater owns and operates one of the largest fleets of vessels supporting the international offshore oil and gas industry and one of the largest fleets of natural gas and air compressors in the United States. The company also has modest interests in domestic oil and gas operations, real estate and insurance.

MERIDEN, CT (SEPT. 25) BUSINESS WIRE - Cenvest Inc. (NASDAQ:CBCT) Tuesday announced that following the completion of the regulatory examination of Central Bank, Cenvest's largest bank subsidiary, Central Bank has entered into a memorandum of understanding with state and federal regulators to strengthen its lending practices, credit review procedures, liquidity and capital planning.

Cenvest announced further that the banking activities of its Hartford based commercial banking subsidiary, First Central Bank, will be consolidated into Central Bank, subject to regulatory approval, prior to the end of the current fiscal year. The primary purpose of the consolidation is to combine the commercial banking resources and operations of both banks, thereby fostering greater efficiencies and customer convenience while creating a stronger capital base.

In a further action, Cenvest announced it will recognize loan losses of approximately $5,475,000 in the third quarter 1990 and will record a special provision of $5,360,000 to increase the allowance for loan losses. At the quarter ending Sept. 30, 1990 Cenvest's consolidated reserves after recognized losses are anticipated to be in excess of 2 percent total loans, and Cenvest's consolidated primary capital ratio is anticipated to be approximately 8.3 percent. The special provision is in response to continuing weakness in the Connecticut economy, particularly in commercial real estate.

NEW YORK (SEPT. 25) BUSINESS WIRE - The Investment Management Institute (IMI) and the recently formed firm of Mackell & Associates, have concluded arrangements to develop educational programs for trustees and professionals responsible for the administration and management of the assets of jointly-administered multi-employer benefit funds.

The venture pools the resources of IMI, the leading global educational organization in the investment management field with Dr. Thomas J. Mackell Jr. one of the top marketing consultants for investment management and financial institutions which service Taft-Hartley and public sector funds. The first joint program to be held by IMI and Mackell & Associates is scheduled for Dec. 6, 7, and 8 in LaCosta, Calif.

''Mackell & Associates is proud to embark on this exciting partnership which will produce absolutely first-rate educational programs,'' said Mackell. ''We are thrilled to cooperate with the best organization in its field for investment management education.''

''This is our first joint program with Mackell and Associates,'' said Russ Mason, the founder and president of IMI, ''and I look forward to producing an informative, stimulating series of seminars. Tom Mackell is not only an outstanding marketing consultant but a highly respected benefits educator.''

IMI, founded in 1981, has offices in New York and Connecticut, and is currently the leading global educational organization in the investment management field catering to endowment funds, foundations, corporations and public funds. IMI provides domestic and international seminars and forums in securities analysis and leading edge investment management products and strategies.

Mackell & Associates, founded by Dr. Mackell, has offices in New York and California and offers marketing consulting services to institutions which provide investment and other services for pension and benefit funds in the private and public sectors.

IRVINE, CA (SEPT. 25) BUSINESS WIRE - As part of its strategy to become a premier source for affordable add-on memory for Compaq systems users and other popular personal computers, Amkly Systems Inc. Tuesday announced a nationwide distribution agreement with Ingram Micro D Inc.

Amkly, founded last year by Albert C. Wong, one of the three founders of AST Research, offers aggressively priced add-on memory solutions for users of Compaq, Epson, IBM, AST, ALR, and other PCs, many of which come from the factory with the vendors' more expensive proprietary memory modules.

Amkly's AMpac series of boards are designed to be fully compatible with industry-standard Single In-Line Memory Modules (SIMMs) that are widely available through the mail or from distributors at significant cost savings. The user simply adds memory by plugging more SIMMs into the Amkly board. Ingram Micro D is one of the world's largest distributors of microcomputer products.

"This distribution agreement represents an excellent opportunity for our reseller customers to achieve significant sales of memory upgrades to the

Compaq market," said Bruce Martin, vice president of purchasing for the Santa Ana-based Ingram Micro D.

"The fact that Amkly's memory boards are aggressively priced plus the ability of users to fully populate the boards with second-sourced SIMMs translates into a real pricing advantage for users," said Martin, adding that resellers should take note that Albert Wong's "reputation for top-quality engineering is well-deserved."

Amkly Systems is based at 60 Technology Drive, Irvine, 92718; phone (714) 727-0788; fax (714) 727-9521.

CONTACT: Les Goldberg, Les Goldberg Public Relations, 275 Centennial Way, Suite 104, Tustin, Calif. 92680, (714) 730-4774 or (714) 730-1490 (fax).

#90268b0841 09/25/1990 ~Business Wire

TOLEDO, OH (SEPT. 25) BUSINESS WIRE - Dana Corp. announced Tuesday that its wholly-owned subsidiary Diamond Savings & Loan, based in Findlay, Ohio, has increased its loan loss reserves by $10 million primarily in connection with loans relating to commercial real estate development and construction.

In addition, Diamond will spin-off certain loans and real estate development projects to other Dana subsidiaries.

These actions, which follow a routine regulatory examination by the Office of Thrift Supervision and the Federal Deposit Insurance Corp., are being required by bank examiners under stricter examination standards applied since the enactment of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) and are primarily the result of a depressed commercial real estate market.

Management of Dana and Diamond believe that these actions will strengthen Diamond and will cause it to exceed all of the newly increased regulatory capital requirements imposed by FIRREA. Should it become necessary to do so, Dana will, through additional capital infusions or otherwise, assist Diamond in reducing the level of its classified assets in relation to its level of capital plus general valuation allowances over the next twelve months. Such assistance could, under current circumstances, approximate $50 million.

Following these actions, it is believed that Diamond, with over $60 million in capital and $925 million in assets, will be among the best capitalized savings and loan institutions of comparable size in Ohio. This financial strength will enable Diamond to continue providing competitive banking services throughout its middle Ohio market area.

Dana will announce its third quarter financial results on Oct. 18, 1990.

GROUP LED BY FAG FINANCE CORP OWNS 612,593 SHARES (31.00%) OF BARDEN CORP (TICKER: BARD) OF DANBURY, CT.

ANNOUNCEMENT:

This statement is an offer to purchase, dated Sept. 21, 1990, and letter of transmittal, for cash all outstanding shares of common stock of The Barden

Corp. at $66.50 net per share by FAG Finance Corp., a wholly-owned subsidiary of FAG Bearings Corp. The offer is conditioned upon, among other things, there being validly tendered and not withdrawn prior to the expiration at least 66-2/3 percent of the shares outstanding on a fully diluted basis. The offer and withdrawal rights will expire Oct. 19, 1990, unless the offer is extended. On Sept. 15, 1990, representatives of the company met with representatives of the parent to negotiate the final terms of the merger and the stock option agreements and the parent made a proposal to acquire the company for $66.50 per share. On Sept. 16, 1990, the board approved the merger agreement and the stock option agreement. On Sept. 17, 1990, the company, the parent and the purchaser entered into the merger agreement and the sellers and the parent entered into the stock option agreement.

ANNOUNCEMENT:

On Sept. 19, 1990, the previously reported letter of intent in which Insituform of North America Inc. was to purchase the shares of G.WM. Erikson and Robert Erikson expired without consummation. The Eriksons have notified the company that no extensions would be given and negotiations have ceased. On Sept. 6, 1990, the plaintiffs in Merle Thorpe Jr. and Foundation for Middle East Peace v. Cerbco Inc. et al. filed an amended complaint adding INA as a defendant concerning the letter of intent and alleging breaches of fiduciary duty.

PURPOSE:

Letter of intent amendment.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 10

ANNOUNCEMENT:

On Sept. 22, 1990, the buying group advised the special committee of Qume Corp. (TICKER: QUME) that the group intends to proceed with the closing of the merger only if all New Qume's conditions for the merger have been satisfied by Sept. 30, 1990. One of the conditions is that the Taiwan stock market shall not have dropped more than 50 percent from the date of the merger agreement through consummation. Currently the market has dropped 53 percent, and, therefore, the condition has not been met. If the conditions are not met, the group intends to cause New Qume to exercise its right to terminate the agreement. Effective Sept. 11, 1990, the parties to the capitalization agreement entered into an amended agreement.

PURPOSE:

Merger closing.

WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Helmerich & Payne Finance N.V.(TICKER: HP), a wholly-owned subsidiary of Helmerich & Payne Inc., has elected to redeem all outstanding 7 1/2% s ubordinated debentures due in 1995.

This transaction is pursuant to the indenture, as amended, dated Oct. 15, 1980 between Helmerich & Payne Finance, N.V.; Helmerich & Payne Inc., as guarantor; and Manufacturers Hanover Trust Co., as trustee.

The redemption date is Oct. 12, 1990, with the principal amount of outstanding debentures totaling $34.04 million, as of Aug. 31, 1990.

Each $1,000 debenture may be redeemed for $1,005 in cash or may be exchanged for 17.32 shares of Sun Company (TICKER: SUN) and 17.32 shares of Oryx Energy (TICKER: ORX) common stock.

WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Blue Diamond Coal Co.(TICKER: BLDC) on Sept. 7, 1990, with certain of its wholly-owned subsidiaries, sold certain of their assets to Arch Mineral Corp., Arch Holding Co., Ark Land Co. and Arch Coal Sales Co. Inc.

The assets that were sold consist of the underground mining operations and related facilities known as the Scotia Mines, located in Letcher County, Kentucky and Wise County, Virginia.

Also sold were approximately 1,500 acres of leasehold properties in Pike County, Kentucky.

The purchase price for the assets was approximately $30 million in cash, plus the assumption by the Arch Group of approximately $9.3 million in liabilities.

WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Seamen's Corp. announced Sept. 7 that holders of a majority of the company's Class A common stock approved a plan of liquidation and dissolution of Seamen's at a special meeting of stockholders Sept. 6.

The company will cease business operations, while its corporate existence continues for the purpose of liquidating its assets and winding up its business affairs.

-30- 596
#90268c0228 09/25/1990 ~Comtex
WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows BankEast Corp.(TICKER: BENH) announced Sept. 19 that two holders of $13 million in subordinated debentures have accelerated the maturity of this debt.

This action is substantially a demand to pay this debt in full, which BankEast presently is unable to fulfill. BankEast is a New Hampshire-based holding company with $1 billion in assets.

BankEast's chairman and chief executive officer, W.N. DeWitt, stated that if a negotiated resolution to the matter is not forthcoming, the institution may have to seek protection from its creditors.

He stressed that the noteholders' action should have no effect on the conduct of business by BankEast's subsidiaries, BankEast, an FDIC-insured banking subsidiary; BankEast Mortgage Corp.; and BankEast Trust Co.

WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Port City Corp. on Sept. 10, 1990, acquired a 29% limited partnership interest in the Well Draw Gas Plant Partnership LTD exchange for $375,000 and a promissory note in the amount of $100,000.

As a result, the company is entitled to 29% of the partnership's income and loss.

The company believes it may acquire an additional 47% interest in the partnership by acquiring Northcut Energy Inc., a privately-held corporation which currently owns a 47% interest in the partnership.

WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows KeyCorp (TICKER: KEY) signed a definitive merger agreement with Valley Bancorporation (TICKER: VYBN) of Idaho Falls.

Under the terms of the agreement, KeyCorp will issue 559,242 shares of KeyCorp common stock for all of the outstanding shares of Valley Bancorporation's common stock.

Upon completion of the acquisition, which does not constitute an acquisition of a significant subsidiary by KeyCorp, Valley Bancorporation will be merged into Key Bancshares of Idaho Inc., a wholly-owned subsidiary of KeyCorp, and Valley Bank (TICKER: VBVT), whose parent company is Valley Bancorporation, will be merged into Key Bank of Idaho.

As of June 30, 1990, Valley Bancorporation had assets of $227 million.

The proposed acquisition will be accounted for a pooling of interests.

#90268c0234 09/25/1990 ~Comtex
WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Great American Management and Investment Inc.(TICKER: GAMI) distributed the outstanding common stock of Firstate Financial A Savings Bank, a savings and loan association located in Orlando, Florida, to Equity Holdings Limited, an Illinois limited partnership, as a dividend paid in property.

Equity Holdings was owner of approximately 92% of Great American's outstanding common stock as of Aug. 24, 1990.

Concurrent with the divident payment to Equity Holdings, all other common stockholders received a cash dividend equal to $0.8359 per share of common stock.

Great American also received an independent valuation opinion in connection with the distribution of Firstate, which indicated that the value of Firstate was lower than Great American's recorded book value.

Accordingly, Great American wrote down its investment in Firstate by approximately $7.6 million prior to the dividend distribution.

#90268c0239 09/25/1990 ~Comtex
WASHINGTON (SEPT. 25) COMTEX - The 8-K report filed at the SEC shows Walker International Industries Inc.(TICKER: WINT) entered into an agreement and plan of merger with Authorized Distribution Network Inc.(TICKER: ADNI) (ADN) and its subsidiary, RJC Acquisition Corp.

RJC Corp., pursuant to the agreement, acquired all of the issued and outstanding stock of Recticon Corp. from Walker in exchange for 1 million shares of ADN's common stock, through the merger of RJC into and with Recticon.

Walker, which is the payee of a certain subordinated demand promissory note of which Recticon is the maker, dated Sept. 28, 1988, in the principal amount of $100,000 with interest of 10% per year, may put the note to ADN and require ADN to purchase all of the same for additional shares of ADN common stock.

If Walker has not put the note to ADN by such time as ADN shall have completed a public offering of any equity securities, net proceeds of which are not less than $2.5 million, Walker may demand payment of all principal of, and accrued interest, on such note.

ADN is thereby obliged to cause Recticon to pay the principal and interest.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (SEPT. 25) COMTEX - Congress was told today the cleanup of the savings and loan industry constitutes a national emergency requiring decisive action, including the establishment of a thrift "czar."

Postmaster General Anthony Frank outlined a proposal in which a blue ribbon board of private sector individuals from the business world would be appointed to administer all aspects of the thrift crisis, including comprehensive regulation and supervision of the industry, hiring and compensating management setting merger and real estate parameters and holding real estate off the market.

Frank added the board would be subject to annual congressional oversight hearings and name a czar with broad powers to interact with all agencies of government.

The Resolution Trust Corp., which is presently responsible for managing the thrift bailout, is seeking $122 billion to cover losses and provide working capital in fiscal year 1991, which begins Oct. 1. The RTC's problems have been recently compounded by the slowing economy, soft real estate market and the recent cancellation of an auction of hundreds of millions of dollars of real estate assets from failed thrifts.

Frank, former chief executive officer of First Nationwide Savings and Loan of San Francisco, California, said the RTC approach to selling off real estate properties as fast as possible is creating huge losses.

"The enormous losses generated by such a policy can be reduced by investing in and holding property rather than dumping; however, this approach involves risk possible censure, and courageous uncommon judgment," Frank told the Senate Banking Committee.

However, William Glencourse, chairman and chief executive officer of First Federal Savings and Loan of Lenawee County, said it is essential that the government not continue as the largest owner of real estate in the country.

"I believe that two things should be done to change this current scenario," said Glencourse. "Sell as soon as possible the real estate and other assets which the government keeps when it disposes of the deposits of troubled thrift institutions (and) put assets in the hands of private buyers who are required to put up significant private capital."

Lost amid the headlines of hundreds of failed thrifts is the fact that several hundred S&L's, including the above-mentioned thrifts, have remained economically healthy and profitable.

Edmond Shanahan, president and chief executive officer of Bell Federal Savings and Loan Association of Chicago, Illinois, said the secret to profitability is sticking to basics.

"Bell remained strong by remaining in the business we knew -- making home mortgages and by keeping our operating costs down," Shanahan said.

Glencourse believes the present system where all thrifts pay the same deposit insurance premiums unfairly penalizes conservative S&L's and is calling for a system of risk-based premiums.

"Risk-based deposit insurance premiums should be adopted in order to allow those of us operating in the most conservative manner to continue to compete successfully utilizing the lower profit margins obtainable on single family home mortgage loans," Glencourse said.

STAMFORD, CT (SEPT. 26) COMTEX - Kaufmann, Alsberg & Co. Inc., a New York investment company and its affiliates, has settled a legal battle with Kysor Industrial Corp.(TICKER: KZ) that will raise Kaufmann, Alsberg's stake in the Cadillac, Mich., maker of automotive parts, to 12.2 percent or 735,200 common shares.

Under a Sept. 14 agreement, Kaufmann, Alsberg acquired 483,000 shares for $9.15 each or $4.4 million, and agreed to dismiss a lawsuit that it had brought against Kysor Industrial, according to a Securities and Exchange Commission filing.

The settlement also give Kysor Industrial the right of first refusal to buy back 252,200 of the shares over the next 10 years.

Kaufmann, Alsberg is the parent of The Enstar Financial Services Inc., The Enstar Group and American Savings and Loan Assoc.

This 8-k Filing was submitted to the Securities and Exchange Commission on Sept. 25, 1990.

ANNOUNCEMENT:

In mid-Aug. 1990 E.W. Rose III became aware that Lodgistix Inc. was seeking financial or merger partners and was engaged in discussions with Sulcus Computer Corp. On Aug. 24, 1990 E.W. Rose III presented a proposal to Lodgistix Inc. pursuant to which $500,000 would be lent to Lodgistix Inc. on or before Aug. 31, 1990 and up to an additional $1 million would be committed upon satisfaction of certain conditions. The proposal also provided that E.W. Rose III would receive warrants to purchase Lodgistix Inc. common shares and be entitled to board representation. The offer was not accepted by Lodgistix Inc. and has expired. On Aug. 26, 1990 Payne notified Lodgistix Inc. that E.W. Rose III believed that the Sulcus transaction would not be in the best interest of stockholders and that E.W. Rose III continued to have interest in

developing an acceptable proposal. On Aug. 30, 1990 Lodgistix Inc. announced that it had entered into an agreement in principal to merge with Sulcus. On Sept. 21, 1990 E.W. Rose III entered into an agreement under which he will sell 1 million Lodgistix Inc. common shares to Bernie Mantel. E.W. Rose III is still interested in developing a proposal that he feels would be better than the Sulcus transaction.

LATEST TRANSACTION:

On Aug. 23, 1990 E.W. Rose III purchased 1 million shares at $.25 per share.

L. TYNDALL OWNS 4,550,000 SHARES (76.70%) OF EAGLE ENTERTAINMENT INC (TICKER: EEGL) OF MESA, AZ.

ANNOUNCEMENT:

Pursuant to two separate transactions embodied in an agreement and plan of reorganization both dated as of Aug. 30, 1990 and a third transaction embodied in a share exchange agreement dated as of Aug. 30, 1990, control of the company was acquired by Louie Tyndall and LS&M Gas & Oil Co. In the first agreement 3,950,000 shares of the company's series A preferred stock was acquired by each of Louie Tyndall and LS&M Gas & Oil Co. Each share of preferred stock is convertible into one share of common stock and carries one vote per share. The issuance of the series A preferred stock was made in consideration for 100 percent of the issued and outstanding common stock of Family Finance. Pursuant to the second agreement and plan of reorganization, 600,000 shares of the company's series B preferred stock was issued to Louie Tyndall. The series B preferred stock was issued in consideration for, among other things, 100 percent of the issued and outstanding common stock of Tyndall Motor. As a condition subsequent to the consummation of such share exchanges, the company consummated the divestiture of the company subsidiaries pursuant to the company's transfer of 100 percent of the issued and outstanding shares of common stock of company subsidiaries to the company shareholders in exchange for 1,956,299 shares of the company's common stock held by Lawrence Vanger and International Advisory Services, S.A. These shares were held in treasury and are designated to be canceled.

HARARE (SEPT 25) - The central committee of Zimbabwe's ruling Zanu(Pf) party has decided to abandon its aim to introduce a one-party constitution and outlaw political opposition, sources here confirmed Tuesday.

The sources, who asked not to be named, said the decision came after a six-hour meeting Saturday of the 160-member body when President Robert Mugabe found himself in a tiny minority of supporters of the one-party policy.

The move is yet another sign of southern African nations ditching the ideals of the elder generation of politicians, following the dramatic sequence of events in eastern Europe last year.

Zimbabwe's constitution sets out a bill of rights which declares the freedom of citizens to belong to whatever political organisation they choose.

Up to April this year, the 10th anniversry of independence, the clause was protected by a provision that demanded that it could only be changed with the approval of every member of parliament.

After April, however, the protection expired and Mugabe needed only a two-thirds majority to introduce a one-party state and make opposition to his party a crime.

#90268d0060 09/25/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT 25) - The foreign ministers of France and Indonesia met here Tuesday and agreed to begin preparations for reconvening the Paris Conference on Cambodia.

Roland Dumas of France and Ali Alatas of France discussed the latest Cambodian developments on the sidelines of the U.N. General Assembly session.

The two ministers, whose countries co-chair the Paris Conference on Cambodia "consider that the way is now open for the resumption and the conclusion of the Paris International Conference on Cambodia," a joint communique said.

It said the two "co-chairmen agreed to intensify their consultations with a view to reconvening the Paris Conference as soon as possible."

The five permanent members of the U.N. Security Council -- the United States, the Soviet Union, Britain, France and China -- are to meet shortly with representatives of the Supreme National Council (SNC) formed by the four warring Cambodian parties at a meeting in Jakarta earlier this month, the communique said.

There was no word on where this meeting would take place, but analysts said it would probably be in New York.

Monday, Mr. Alatas told the General Assembly that the acceptance by the four Cambodian parties of the peace plan crafted by the U.N. Big Five last month and their formation of the SNC to embody Cambodian sovereignty during the transition to U.N.-monitored elections was a major step forward.

The SNC, on which the Phnom Penh Government and the tripartite Cambodian

resistance -- linking the Khmer Rouge with two non-communist groups -- are equally represented, is to take over Cambodia's U.N. seat.

The four Cambodian parties have also agreed to a major U.N. role in governing Cambodia during the transition to the elections.

The Paris Conference groups the U.N. Big Five, the four Cambodian parties, the six members of the Association of Southeast Asian Nations -- Brunei,

Indonesia, Malaysia, the Philippines, Singapore and Thailand -- Japan and Australia.

It is widely expected to meet in November to ratify a final, global Cambodian settlement.

MILAN (SEPT 25) - Pampers, part of the Procter and Gamble group, and leading Italian nappy maker Fater are to set up a joint company controlling 90 percent of the Italian market, it was announced here Tuesday.

The new operation would also sell its products in Spain, Portugal and Britain.

Pampers and Fater, which makes diapers under the Lines label, are to each hold a 50 percent stake in the new operation, which will have annual turnover of around 1,000 billion lire (870 million dollars).

The new company will combine Procter and Gamble-Italia's nappy, sanitary towel and incontinence pad operations with those of the Finaf group which controls Fater.

TEHERAN (SEPT 25) - An earthquake measuring 5.5 on the Richter scale Tuesday rocked the town of Roudbar in the northwestern Iranian province of Gilan that was devastated by an earthquake in June, the Iranian news agency IRNA reported.

The agency, citing Teheran University's geophysics centre, located the epicentre of the quake at 300 kilometres (180 miles) northwest of the capital. There were no immediate reports of casualties or damage.

Around 40,000 people were killed in Gilan and the Roudbar valley when the June 21 earthquake struck, measuring at least 7.3 on the Richter scale. One million people were left homeless.

-30- 823
#90268d0160 09/25/1990 ~French/German News Agency
ZURICH (SEPT. 25) - The Zurich stock market was in a somber mood again on Tuesday in very light trading, under the influence of Wall Street's poor Monday performance and the weakness of most European exchanges.

The Swiss Performance Index fell by 2.1 percent on the day, shedding 19.3 points to finish at 908.7. The Swiss Bank Corp. indicator finished at 520.4 against 531.5 at the Monday close, and the Credit Suisse index at 490.0 against 500.7.

Secondary issues were particularly weak. In machines, Sig registered stock plunged by 10.53 percent, but Buehrle went against the trend to rise by 2.32 per cent. Mikron (micro-mechanisms) lost 10 percent. In the paper sector, Sihl scored a spectacular jump of 17.65 percent.

Analysts commented that the market downtrend should now come to at least a temporary halt, as some blue chips have reached attractive levels. But they added that the Swiss bourse is sometimes irrational.

-30- 1110
#90268d0280 09/25/1990 ~French/German News Agency
PARIS (SEPT. 25) - The Paris Bourse had another losing session on Tuesday, breaking down through the 1,500-point level on the CAC 40 stock price index in moderately active trading.

The index finished at 1,485.39 points, a 1.16 percent drop in the wake of a loss of 2.66 percent on Monday.

The market opened on Tuesday with a tiny gain of 0.03 percent, but the mood quickly changed for the worse as oil prices rose, even going above the level of 41 dollars a barrel on the spot market before falling back on profit-taking.

Operators said the same scenario has been repeated most days recently on the Bourse, with sell orders coming in in the morning on worries about the Gulf situation, oil prices, and possible recession.

French issues suffered on Tuesday, especially Pinault, which plunged by 18.8 per cent following announcement of absorption of the CFAO by the Pinault Group. That plunge had been expected. Union de Credit pour le Batiment was off by 10.1 percent on the day, and CCMC 9.1 percent.

Mines Pro Salsign managed a 9.6 percent jump, while Conept was up 8.2 and Hutchinson eight percent.

Foreign stocks were also generally lower except for gold mines and mining conglomerates, which benefited from higher gold prices.

The downtrend noted on the bond market on Monday came to an end on Tuesday, as medium- and long-term interest rates were steady to slightly lower.

-30- 1596

#90268d0290 09/25/1990 ~French/German News Agency

BUDAPEST (SEPT 25) - The Soviet Union on Tuesday resumed oil deliveries to Hungary after a one-week gap, the Hungarian news agency MTI said.

The suspension came after Moscow had announced a 30 percent reduction in oil deliveries to Hungary, worsening the energy crisis here.

The Hungarian government on Thursday authorised the purchase of 450,000 tonnes of oil and 35,000 tonnes of petrol on the international market to compensate for the lost Soviet supplies.

It set aside 150 million dollars to pay for this amount, but the rise in Brent crude oil prices to close to 40 dollars a barrel since suggest it would not be enough.

Mineralimpex, tasked by the government with buying the oil on the international market, said that so far it had received only four or five offers worthy of interest.

Speaking in Paris Tuesday Hungarian Prime Minister Joszef Antall said cutbacks in deliveries of Soviet oil at a time of soaring crude prices were going to cost Hungary half a billion dollars.

Mr. Antall, who is on a private visit to France, asked his French counterpart Michel Rocard at a meeting Tuesday for French aid to be stepped up,

notably for construction of a nuclear power plant, a metro for Budapest and the acquisition of Airbus airliners, according to French officials.

Mr. Antall said at a press conference that the Soviet Union has notified Hungary that it will receive only 315,000 tons of oil in October, against 450,000 tons previously expected.

#90268d0340 09/25/1990 ~French/German News Agency

WASHINGTON (SEPT. 25) - Asia as a whole is projected to enjoy continued rapid growth rates, the chairman of the joint annual meetings of the World Bank and International Monetary Fund (IMF) said Tuesday.

Opening the first session of the meetings, attended by 152 finance ministers from around the world, Kenyan Vice President and Finance Minister George

Saitoti said Asia was the only region among the developing countries which was expected to continue enjoying rapid economic growth.

World Bank President Barber Conable said that results were mixed and even in Asia "poverty has proven a stubborn foe."

Mr. Conable said: Three of the world's most populous nations - India, China and Indonesia - have made progress towards reducing poverty.

"Even so, more than one billion people, half of them in South Asia, still live on less than a dollar a day."

But "impressive results" were possible and "new industries have flourished in East Asia" and "the incidence of poverty in Indonesia was reduced from 60 per cent to 20 percent during the 1960's and 1970's."

-30- 1266

#90268d0360 09/25/1990 ~French/German News Agency

BRUSSELS (SEPT 25) - European Economic Community veterinary experts are to hold an emergency meeting to prevent the spread of an epidemic which is ravaging East German herds of cattle, an informed source said here Tuesday.

East German cattle and beef, like all East German products, have been able to freely enter the EEC since August 1.

Some 35 percent of East German catttle, or a million animals, are affected by leucosis, a cancerous tumour which affects cattle but does not endanger human health, according to European experts.

French Agriculture Minister Henri Nallet said during a meeting of EEC agriculture ministers Tuesday that he was concerned over the "state of health of East German herds" and called for a guarantee from the European Commission that East German imports complied with EEC health standards.

Several other countries, including the Netherlands, Portugal, Ireland and Denmark called during the meeting for tighter checks on goods coming from East Germany into the EEC.

Beef prices are already at low levels in the EEC partly due to lower consumption sparked by "mad cow disease," or bovine spongeiform encephalitis (BST), first reported in Britain early this year.

Officials have said there is no evidence that the illness can harm humans but several EEC countries closed their borders to British beef, at least temporarily, as a result of the outbreak.

The leucosis epidemic in East Germany could have serious financial

repercussions for the EEC, experts here said.

The East German farmers, like those in Britain whose cows were found to be suffering BST, will probably have to slaughter their sick animals.

LONDON (SEPT. 25) - Persistent fund selling took copper prices lower on the London Metal Exchange (LME) Tuesday.

Three-months copper fell as low as 1,435 pounds per ton in morning ring trading, from 1,456 on Monday, but recovered from lows to quote at 1,447 pounds per ton on the kerb.

Aluminium was also weaker, quoting at 1,905 dollars per ton on the kerb against 1,900 on the afternoon ring and 1,990 Monday.

Analysts said that the bear trend in copper was now firmly established despite the six-week-old Minero Peru strike, as stocks continue to flow into LME warehouses (LME stocks were up 6,750 tons at 181,550 tons in figures released Tuesday).

Nevertheless the long-term fundamental outlook for aluminium continues strong, they said, given the existing and planned refinery capacity under threat in the Gulf area.

Zinc recovered from Monday's seven-month low, although trading in the metal was thin.

Three-months Special High-Grade zinc was quoted at 1,394 dollars per ton on the kerb against 1,395 on the ring and 1,367 on Monday.

Lisbon (SEPT. 25) - Observers from the United States and the Soviet Union are attending a fourth round of talks aimed at settling the 15-year civil war in the former Portuguese colony of Angola, sources said Tuesday.

The sources, who asked to remain unnamed, said the negotiations between the Angolan government and the U.S.-backed Unita rebels got under way Monday evening at the air force academy in Sintra, 30 kilometres west of the Portuguese capital.

The delegations met again on Tuesday. No details were given.

The sources said the Soviets sent a delegation headed by Vladimir Kazimirov, a

former ambassador to Luanda. The U.S. delegation was said to be led by an official of the U.S. embassy in Lisbon.

Unita and the Mpla, the nationalist organisation that gained control of the country in 1976, last met in August but failed to resolve their differences. The talks have been mediated by Durao Barroso, Portugal's foreign minister.

LONDON (SEPT. 25) - The fourth accused in Britain's Guinness trial, 74-year-old millionaire financier Sir Jack Lyons, was fined three million pounds (5.5 million dollars) here Tuesday for his role in the scandal.

The judge, Justice Denis Henry, said he had decided not to jail the financier only because this would aggravate his poor health. Sir Jack has been suffering from cancer for several years and recently had an operation.

The financier, a personal friend of Prime Minister Margaret Thatcher, was guilty of "dishonesty on a major scale", for which a man in good health would have been jailed for three years, the judge said.

Three men have already been jailed following Britain's most far-reaching share scandal, for illegal manipulation of Guinness shares during the 1986 five billion dollar take-over battle for Scottish whisky maker Distillers.

Former Guinness chairman Ernest Saunders, 54, was jailed for five years last month. Heron International chairman Gerald Ronson, 50, was jailed for a year and fined five million pounds (9.5 million dollars), while stockbroker Anthony Parnes, 45, was jailed for two-and-a-half years.

All three men have appealed.

Justice Henry also decided Tuesday that Mr. Saunders would not, as previously planned, be tried on further charges.

#90268d1020 09/25/1990 ~French/German News Agency

ADDIS ABABA (SEPT 25) - The International Development Association (IDA), the soft-loan affiliate of the World Bank, is to extend a 35-million-dollar loan to Ethiopia to help finance urban development projects in the capital, following an agreement signed here Tuesday.

The project, aimed at the urban poor whose monthly income is below 150 dollars will cover development of residential houses and repair of roads, installation of service infrastructures such electricity, water and sanitation services, the Ethiopian News Agency (ENA) quoted Addis Ababa chief

administrator Gizaq Negussie who signed the agreement as saying.

Mr. Gizaq said that some 50,000 to 58,000 households of the city's estimated 1.5 million population were eligible for assistance through the project but did not specify how many would benefit from the loan agrement.

A 20-million-dollar loan from IDA in 1983 and Ethiopian government contribution of another eight million dollars enabled city authorities to construct nearly 3,200 housing units, mostly for low-income groups, in Addis Ababa's southern suburbs after the project was completed earlier this year.

#90268d1030 09/25/1990 ~French/German News Agency

BAGHDAD (SEPT 25) - An Iraqi spokesman Tuesday said the speech by French President Francois Mitterrand before the United Nations General Assembly was ''non-aggressive.''

The Iraqi news agency Ina quoted the spokesman as saying ''we have detected a non-aggressive tone in Mr. Mitterrand's speech and an attempt to seek a solution to the region's issues.''

Mitterrand called Monday for Iraq's withdrawal from Kuwait and said that could by followed by international efforts to solve regional conflicts, including the Palestinian question and the situation in Lebanon.

What caused resistance among the Iraqi people was the United States' penetration into the region to enforce U.N. resolutions against Iraq, he said.

''Such unique measures were never taken when the U.N voted on similar resolutions concerning similar incidents in the region,'' the spokesman said.

He was apparently referring to Israeli occupation of Arab territories and Israeli action in the Lebanon, observers said.

#90268d1080 09/25/1990 ~French/German News Agency

MONROVIA (SEPT 25) - Rebel leader Charles Taylor on Tuesday threatened to end a two-day ceasefire if a West African peacekeeping force (ECOMOG) in Monrovia sends in troop reinforcements.

"We have always said the ceasefire would only be respected as long as ECOMOG did not reinforce its troops," Mr. Taylor, leader of the National Patriotic Front of Liberia (NPFL) told Agence France-Presse.

"If these soldiers enter Liberian territorial waters, we will end the ceasefire," he added.

Sierra Leonean port officials confirmed Tuesday that a Nigerian landing craft left Freetown late Sunday for Monrovia with 800 Nigerian soldiers on board.

African diplomats in Freetown said two Nigerian war ships -- the NNS Ohue and the NNS Barawu -- and a merchant vessel Majidun left for Monrovia late Monday from Lagos with "a number" of soldiers on board.

ECOMOG force commander Arnold Quainoo of Ghana and his recently-appointed field commander Joshua Dogonyaro of Nigeria were expected to leave for Monrovia by Wednesday with about 500 Ghanaian soldiers still at the Freetown port, diplomats said.

Two Nigerian frigates and a merchant ship were expected to set sail for Monrovia with food for ECOMOG troops and about 80,000 Liberians still in the port and central Monrovia.

The five-nation peacekeeping force, comprising troops from Nigeria, Ghana,

Guinea, the Gambia and Sierra Leone, was sent into Monrovia by the Economic Community of West African States last month to impose a ceasefire in Liberia's bloody nine-month civil war.

The troops were also to install an interim government set up August 30 by Liberian politicians in the Gambian captial, Banjul.

Sources in Abidjan could not confirm the arrival of the ship in the Liberian capital.

Meanwhile, ceasefire talks between the commander of the Liberian presidential guard and the NPFL failed to start as planned Tuesday at the Monrovia city hall.

SAN FERNANDO, PHILIPPINES (SEPT. 25) - Two foreign oil companies are to begin drilling for natural gas on the western Philippine island of Palawan next year President Corazon Aquino said here Tuesday.

The two companies would probably strike the reserves by mid-1991, she added.

She did not name the companies, but said the Dutch oil firm Shell and a U.S. firm had confirmed the deposit of natural gas and oil condensates in the area.

Mrs. Aquino told about 30,000 people in a rally in this town north of Manila that "huge reserves of natural gas" of up to one trillion cubic feet, and 37 million barrels of oil condensates could exist in Palawan. The find would help

the country cope with the Gulf crisis, she added.

The government said earlier that natural gas could be used for power generation or develop into liquified petroleum gas.

The Philippines imported 97.4 per cent of the 72.79 million barrels of oil it consumed in 1989. Oil accounts for more than 60 per cent of the Philippines' energy needs, with hydrolelectric and geothermal or volcanic steam supplying part of the electricity requirements.

The government raised domestic oil prices by 29 per cent over the weekend, sparking scattered protests by transport workers on Monday

JOHANNESBURG (SEPT 25) - Leader of the white-liberal Democratic Party (DP) Zach de Beer said Tuesday his party and the ruling-National Party were discussing an election and parliamentarty pact.

Mr. de Beer told the South African news agency Sapa a formal statement on the issue would be released after President Frederik de Klerk's return from a three-day visit to Washington.

It will address the possibility of the DP and NP forming an alliance against the ultra-right Conservative Party (CP) in future by-elections and in parliament.

Observers believe the move would also aim to prevent the CP from winning a pending by-election in Randburg, adjoining Johannesburg, brought about by the resignation recently of former DP co-leader Wynand Malan in July.

The DP candidate in the by-election Alan Dawson has reportedly been told by the DP hierachy to step down following a deal between Dr. De Beer and the NP's Transvaal leader, Finance Minister Barend du Plessis.

The DP, deprived of its political platform by the government's reforms, voted at its September congress in the Transvaal, however, to seek a place for the party with black leaders at the negotiating table on South Africa's constitutional future.

DAMASCUS (SEPT 25) - Saudi foreign minister Prince Saud al-Faisal arrived here Tuesday from Cairo with a message for President Hafez al-Assad from King Fahd, the Syrian news agency SANA reported.

Prince Saud was greeted on arrival by the Syrian minister of state for foreign affairs, Nasser Kaddour, SANA said. Foreign Minister Farouk al-Shara accompanied Mr. Assad on a visit to Teheran that ended earlier Tuesday.

In Cairo, the prince met Egyptian President Hosni Mubarak and also delivered a message from King Fahd.

Egypt and Syria, as well as Morocco, have deployed troops in Saudi Arabia as part of a U.S.-led multinational force to deter a possible Iraqi attack against the kingdom after the August 2 invasion of Kuwait.

#90268d1530 09/25/1990 ~French/German News Agency

GENEVA (SEPT 25) - The United Nations High Commissioner for Refugees (UNHCR) pledged here Tuesday that the repatriation of Vietnamese boat people would be done with dignity and without force.

Sergio Vieira de Mello, regional head of the commission for Asia and Oceania, said last week's accord in Hanoi between Vietnam, Britain, Hong Kong and the commission represented "some progress".

The agreement allowed for the repatriation of the Vietnamian refugees, even if they did not want to go.

Mr. Vieira de Mello said the accord gave priority to those refugees who volunteered to go home, but also provided for the return of those who, although not volunteering to go home, did not actually resist repatriation.

He said that the commission would ensure that the second group of refugees would be treated "humanely, with dignity and safety" and that he hoped this would result in thousands of Vietnamese refugees agreeing to return home.

There are currently about 55,000 boat-people in Hong Kong refugee camps. But only 9,000 have received political refugee status.

Hong Kong is insisting that most of the others return to Vietnam. But the United States has opposed forced repatriation.

Hong Kong forcibly sent a first group of 51 boat people judged to be economic migrants back to Vietnam in December but was forced to halt the programme following an international furore.

Diplomatic sources say the European Economic Community plans to donate about 130 million dollars to ease the reinsertion of the boat-people back into Vietnamese society.

PRETORIA (SEPT 25) - Electricity supply to Pretoria's two black townships are to be terminated at 4:00 a.m. (0200 GMT) Wednesday, the anti-apartheid United Democratic Front (UDF) said Tuesday night.

The authorities said power was being cut off because residents of the townships had run up huge bills because of a payment boycott.

Such boycotts of electricity bills and payments for other services provided by the authorities have been used for several years as anti-apartheid protests.

Breaking an embargoed statement put out by Pretoria's ruling National Party-controlled city council which was to coincide with the cut-off, UDF publicity secretary Ronnie Mamwepa condemned the act as "an act of bad faith".

He told AFP the city council had taken the decision unilaterally while talks between the authorities and residents' associations of the Attridgeville and Mamelodi townships were still underway.

"This action will exacerbate the problem rather than solve it," he said.

The embargoed city council statement said it had been forced to take the step because the two black town councils had not paid their bills as a result of a politically-inspired payment boycott.

By August 24 the arrears for Attridgeville and Mamelodi had respectively reached 1,7 million rands (646,000 dollars) and 3 million rands (1.14 million dollars), the statement said.

Mr. Mamwepa called on the Pretoria council to desist from its "high-handed" action and "learn from the experiences in Soweto where discussions and debate had brought about a resolution to the problem".

The Soweto rent and services boycott was ended Monday after negotiations resulted in the establishment of the country's first non-racial, democratic

"metropolitan chamber", a local government body.

ACCRA (SEPT 25) - Junior doctors in Ghanaian government hospitals launched a five-day strike Monday to back claims for better pay and working conditions, a spokesman for the doctors said here Tuesday.

He said the doctors would decide whether to continue their work stoppage after five days, depending on whether their demands were met.

The spokesman said the doctors were demanding that proposals submitted to the government by the Ghana Medical Association be adopted. He did not give details.

Only senior doctors were working in government facilities Tuesday, the Ghana News Agency reported.

Health Secretary Nana Akuoko Sarpong has urged the doctors to return to work, saying his "doors were still open" to negotiations.

TEHERAN (SEPT 25) - An Islamic organisation in Iran is to hold a demonstration here Friday to protest the deployment of U.S. troops in Saudi Arabia, the Iranian news agency IRNA reported Tuesday.

The Islamic Propagation Organisation called on other Moslem states to hold similar protests the same day. The demonstration here was to converge on Teheran University before the start of the weekly Moslem prayers.

"Would wolves guard the sheep?" the organisation asked in a statement. "Oh Moslems, is it not time to awake from slumber? Will you bear further insults to your Islamic dignity and plundering of God-given resoures?"

More than 100,000 U.S. troops have been deployed in oil-rich Saudi Arabia, guardian of Islam's holiest places, to defend against a possible Iraqi attack following the August 2 invasion of Kuwait.

-30- 1019

#90268d1630 09/25/1990 ~French/German News Agency

NEW YORK, United Nations (SEPT 25) - Japanese Foreign Minister Taro Nakayama urged Iraq Tuesday to withdraw its troops unconditonally from Kuwait and to allow all foreigners trapped on its territory to leave.

In a speech to the U.N. Genereal Assembly's 45th session here, he said Tokyo "calls upon Iraq to heed the repeated Security Council resolutions and to withdraw promptly and unconditionally from Kuwait."

"The Iraqi measures barring the departure of many Japanese and other foreign nationals in Iraq are intolerable," he added.

The minister was due to spell out his country's stance on the Gulf crisis during a foreign minister-level meeting of the U.N. Security Council later Tuesday which was expected to approve an air embargo against Iraq.

After restating his country's commitment to its war-renouncing constitution and an expanded U.N. role, Mr. Nakayama said Japan is "prepared to cooperate in every possible way within the bounds of its constitution so that the United Nations' collective security mechanism can function effectively."

Mr. Nakayama recalled that Japanese Premier Toshiki Kaifu was seriously considering new legislation to enable Japan to assume greater responsibilities regarding U.N. activities to preserve peace.

Mr. Kaifu was due to meet U.S. President George Bush here Saturday on the sidelines of a summit on the rights of children.

The Japanese premier is to leave New York Monday for an eight-day Middle East tour which will take him to Egypt, Jordan, Turkey, Saudi Arabia and Oman.

Tokyo has pledged to contribute two billion dollars to a Gulf Peace Fund, agreed upon with the six-nation Gulf Cooperation Council (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates).

#90268d2140 09/25/1990 ~French/German News Agency

WASHINGTON (SEPT 25) - President George Bush Tuesday praised Turkey for its role in the Gulf crisis and promised Turkish President Turgut Ozal that his country would be compensated for heavy losses caused by the international embargo against Iraq.

Mr. Bush assured the visiting Turkish leader he would press for easing import quotas on Turkish textiles, with renegotiations beginning in October.

"Turkey wants more trade than aid," said Mr. Ozal.

He said a principal objective of his visit here was to reopen the question of relaxing import quotas on Turkish textiles.

Mr. Bush said he would pressure Congress not to reduce military aid to Turkey and that he would use his influence to press for inclusion of Turkey in the

European Economic Community (EEC).

"Turkey has stood firm and steadfast despite the heavy burden the Iraqi invasion has placed on its own economy," Mr. Bush said during a ceremony in the White House garden under clear, blue skies.

Mr. Bush thanked Mr. Ozal for his "leadership and courage" and said that "from the earliest stages of this struggle, Turkey has been in the forefront of the international condemnation of Iraq."

"In short, Turkey has served as a protector of the peace, rallying to its friends when those friends are imperiled," Mr. Bush said.

Shortly after the United Nations voted to slap the embargo on Baghdad August 6 Turkey closed the pipeline through which Iraq shipped its oil to the Mediterranean.

Mr. Ozal said despite the costs, Ankara would stick by the international embargo because "the economic embargo may be the only hope for achieving this objective."

WASHINGTON (SEPT 25) - Bulgaria and Namibia joined the International Monetary Fund and the World Bank here Tuesday, raising the two institutions' membership to a total of 154 countries.

Belcho Belchev, Bulgarian deputy premier and finance minister, signed the articles of agreement of the Fund and the Bank on behalf of the People's Republic of Bulgaria.

Signing for newly-independent Namibia was the country's finance minister, Otto Herrigel.

The signing ceremonies took place at the U.S. State Department, where the agreements are deposited.

Czechoslovakia joined the two institutions last week after an absence of four decades.

The three new members were welcomed by top officials of the IMF and the World Bank at the opening of their annual meetings Tuesday morning.

MOSCOW (SEPT 26) - Singapore Prime Minister Lee Kuan-Yew, here on a five-day

official visit to the Soviet Union, met with President Mikhail Gorbachev on Tuesday for talks on improving bilateral relations, the Tass news agency said.

Mr. Gorbachev said he felt there were "good prospects" for economic cooperation between the two countries as a result of the contacts Mr. Lee had made in the Soviet Union, Tass reported. He also stressed Moscow's desire to develop relations, according to Tass.

The two leaders also evoked the situtation in the Gulf and agreed on the need for a peaceful solution to the crisis with the help of the United Nations Security Council, Tass said.

Mr. Lee, who last visited Moscow in September 1970, is accompanied by Singapore's first deputy prime minister, minister of state for trade and industry, foreign minister, and law and home affairs minister.

#90268d2450 09/25/1990 ~French/German News Agency
JERUSALEM (SEPT 26) - Palestinian groups linked to Baghdad could set off a wave of terrorist attacks against Western interests if war breaks out with Iraq, according to the University of Tel Aviv's Center for Strategic Studies.

A report released Tuesday by the research center said Iraq could call on the services of two groups in particular: the Fatah-Revolutionary Command led by Abu Nidal and the Palestine Liberation Front (PLF) headed by Abul Abbas.

Abu Nidal's group has moved from Libya to Iraq, according to the report, while the Baghdad-based PLF has always had close relations with the Iraqi regime.

Center researchers Anat Kurtz and David Tal said they believed it was unlikely Baghdad would encourage terrorist actions unless an armed conflict were actually to break out with multinational forces stationed in the Gulf.

But they did not rule out the possibility that terrorist groups backed by Baghdad might strike out at Israeli targets worldwide to provoke an Israel riposte against Iraq, which would then appear as a victim of aggression.

They said there had been a decline in the number of terrorist activities by Palestinian groups worldwide, from 433 incidents in 1988 to 406 last year. They explained the drop, saying, "Palestinian energies have been channeled into the Intifada," or uprising in the Israeli-occupied territories.

-30- 1569
#90268d7850 09/25/1990 ~French/German News Agency
MELBOURNE, AUSTRALIA (SEPT. 25) - Brewing giant Elders IXL Ltd has written off 1.7 billion dollars (1.4 billion U.S.) in investments and losses as part

of a 1.3 billion (1.08 billion U.S.) annual loss reported Tuesday.

The loss after abnormal and extraordinary items was the biggest in Australian corporate history.

It compares to a bottom line profit of 668.6 million dollars (554 million U.S.) last year.

Directors said in a statement that net profit after abnormals but before extraordinaries in the latest year fell 80.3 per cent to 131.9 million (109.3 million U.S.).

The loss far exceeded analysts' worst estimates, and ended a horrific year for the brewing, finance and agribusiness group, which is currently in the throes of restructuring.

Elders directors again restated their intention to refocus the group's operations on its brewing activities, and said while this had led to adverse short-term effects it would eventually be in the best long-term interests of all shareholders.

But analysts said the board's decision not to declare a final dividend and to cancel a planned capital distribution to shareholders would cause headaches for 56 percent shareholder Harlin Holdings Pty Ltd.

Harlin, which recently proposed selling 19.9 percent of its Elders stake to Japanese-based Asahi Breweries Ltd, is solely dependent upon returns from Elders to cover its estimated 3.0 billion dollars (2.49 billion U.S.) of debt.

In the group's most comprehensive profitloss statement so far, Elders directors revealed extraordinary losses totalling 1.67 billion dollars, (1.38 billion U.S.).

This included 491 million dollars (406.9 million U.S.) lost on the sale of a 52.7 percent stake in Elders Resources NZFP Ltd and 206 million (170.7 million U.S.) lost on the sale of its Scottish and Newcastle Breweries PLC stake.

Directors said a planned 5.0 billion dollars (4.14 billion U.S.) global refinancing package being structured with various banks was not required as the company had "appropriate short and long term facilities in place".

But sources confirmed Elders IXL last week successfully negotiated a 1.0 billion (830 billion U.S.) facility with a syndicate of banks led by National Australia Bank Ltd.

While Elders IXL's worldwide brewing division lifted pre-tax profits 10 per cent to 582.9 million, (483 million U.S.) the U.K. operations were affected by high interest rates and "subsidies" paid to the Pubco beer retailing joint

venture.

Elders IXL's Molson Breweries joint venture in Canada lifted volume and retained market leadership, but analysts expected the group to incur further costs from rationalisation.

Problems in the agribusiness division were starkly revealed with a total of 245 million dollars (203 million U.S.) being written down, including 72.5 million dollars (60 million) in losses incurred since March.

But the strongly profitable brewing materials and meat operations helped agribusiness post pre-tax profits of 32.5 million (27 million U.S.) compared with 66.25 million (54.9 million U.S.) last year.

Directors were optimistic about the future profitability of the group, which is expected to be renamed Fosters Brewing Group Ltd in line with its refocussing on brewing operations.

"The strength and acknowledged expertise of the brewing group -- the fourth largest in the world -- will provide sustainable profits with opportunities for steady growth and is expected to yield attractive returns to shareholders over time," they said.

WELLINGTON (SEPT. 25) - Air New Zealand said here Tuesday it would increase its domestic airfares by 10 percent as a result of rising fuel costs sparked by the Gulf crisis.

Airline spokesman Richard Gates said the increases would apply from October 8.

Competitor Ansett has warned it will also lift its fares.

-30- 482

#90268d7930 09/25/1990 ~French/German News Agency

SYDNEY (SEPT. 25) - Australian Airlines chairman Ted Harris said Tuesday that two major foreign investors should each be allowed a 20 percent stake in his soon-to-be-privatised airline.

The buyers would ideally be international airlines, one serving the Pacific and Asia region, and the other the United States or Europe.

"I've had talks with a number of airlines and there has been strong interest," Mr. Harris told a news conference called to comment on the Labor Government's decision to sell the airline.

In a historic move Monday, the Australian Labor Party backed government plans to sell 100 percent of Australian Airlines, 49 percent of Qantas and to open the telecommunications network to private sector competition.

The decision was something of a personal triumph for Mr. Harris, who for almost two years has been urging the government to free the airlines from the restrictive financial rules of public ownership.

Mr. Harris said Australian companies would hold a large slice of the privatised company, employees would own nine percent and the rest would be floated publicly.

He estimated the airline's worth at one billion dollars (830 million U.S.), or 10 times its projected annual profit after tax.

"Whether somebody is prepared to pay one billion dollars I don't know. We have

to put it to the test," he said, adding that the sale was expected to be completed by the end of next year with a listing on the stock exchange.

Mr. Harris is believed to have approached British Airways, United Airlines,

Air New Zealand and Singapore Airlines to invite them to consider investing in his airline if it came on the market.

However, he declined Tuesday to name the airlines which had expressed interest because of concern that it would limit the federal goverment's flexibility in getting a high price.

Two major Australian transport companies, Brambles and Mayne Nickless, are believed to be interested in buying a stake.

Mr. Harris said Australian Airlines needed a cash injection of 300 million dollars (250 million U.S.) to lift its debt-to-equity ratio to 65:35, and those funds should be provided from the sale to foreign interests.

#90268d8110 09/25/1990 ~French/German News Agency

HANOI (SEPT. 25) - Vietnamese authorities have called on the international community to help Vietnamese workers in Iraq who are facing acute food and medical shortages, a foreign ministry spokesman here said Monday.

Vietnam has appealed to "the United Nations, international organisations and capable countries" to supply food and help in repatriating some of the more than 16,000 Vietnamese workers currently in Iraq, the spokesman said.

Priority should be given to "the thousands of women, the sick and those who had completed their contracts," he said, adding the majority of Vietnamese were spread between the Iraqi provinces of Mosul and Basrah and the capital, Baghdad.

"There is a serious shortage of food and medicine and they are in urgent need of aid," the spokesman said, adding Hanoi was expecting an international response to its appeal.

Vietnam's ambassador to the United Nations, Trinh Xuan Lang, has written a letter to the president of the U.N. Security Council, asking that 500 tonnes of food be sent to Vietnamese nationals in Iraq, diplomatic sources here said.

Mr. Lang's appeal followed an Iraqi announcement that it would cease supplying food to the Vietnamese, effective October 1, the sources said.

In the same letter, the ambassador called on the international community to facilitate the initial repatriation of 5,000 Vietnamese workers from Iraq.

Minister of Employment and Social Affairs Tran Dinh Hoan visited Baghdad in mid-September to discuss the evacuation of Vietnamese from Iraq. But up until now, Vietnamese authorities have failed to announce any evacuation plan, apparently because of financial difficulties.

Hanoi has assumed a cautious position on the Gulf crisis, expressing its concern and its hope for a peaceful solution, without openly condemning Iraq's August 2 invasion of Kuwait.

#90268d8140 09/25/1990 ~French/German News Agency

MANILA (SEPT. 25) - The Philippine stock market hit a four-year low Tuesday, in a downturn sparked by a series of largely domestic factors.

Dealers said the fall came on strike threats form leftwing labor and transport groups over an oil price hike imposed Friday, threats of new attacks by communist insurgents Monday and the bombing of two luxury hotels in the financial district Sunday.

At the Manila Stock Exchange, the composite index lost 38.6 points or 6.4 per cent from Monday's close to 567.11 points while at the smaller Makati Stock Exchange, the composite index fell 42.52 points or 6.9 percent to 570.71 points.

It was the lowest closing in four years, and marked the first time the indices of both exchanges had fallen below the 600-point level since 1987.

Virtually all traded issues either fell or were unchanged with all sectoral averages plunging on both bourses.

DHAKA (SEPT. 25) - Fresh calculations made by Dhaka show that the Gulf crisis will cost Bangladesh 1.8 billion dollars this fiscal year in lost revenues, worker remittances and cash holdings seized by Ira, Vice President Moudud Ahmed said Tuesday.

Ahmed, who heads an emergency management committee set up to deal with the economic impact of the Iraqi occupation of Kuwait, said Bangladesh's staggering economy faces additional burdens of 20 billion bangladeshi taka (500 million dollars) from the crisis.

He told a group of leading businessmen that Bangladeshi expatriates lost about 500 million dollars from deposits in Kuwaiti banks that were plundered by the Iraqi invaders.

The country will lose 600 million dollars in home remittances annually, Ahmed said, urging the businessmen to increase their exports to offset part of the losses.

Iraq has also reportedly stopped payments it owes to the Bangladesh national airlines Biman.

The estimates cited by Ahmed are the highest announced so far by Dhaka, which has asked for writing off of western loans and concessionary oil from Saudi Arabia and the United Arab Emirates. Ahmed said the actual loss figures may go higher.

LONDON (SEPT. 25) - The British Tarmac construction group on Tuesday reported interim profits of 97.8 million pounds (185 million dollars), down 36 per cent from 153.8 million pounds in the first half of 1989.

The result was in line with analysts' forecasts and was achieved on sales of 1.79 billion pounds against 1.51 billion pounds earlier.

Earnings per share fell by 8.4p from 13.2p. An unchanged interim dividend of three pence was announced.

Tarmac chairman Sir Eric Pountain said: "The uncertainties in the housing market and the reducing commercial and industrial building markets will inevitably affect much of the group's United Kingdom business in the short term."

PARIS (SEPT. 25) - The Total oil group on Tuesday reported a fall of 33.35 percent in interim net book profits after minorities of 1.27 billion francs (244 million dollars) compared with 1.90 billion francs one year earlier.

Stock valuations represented a loss of 1.4 billion francs at a time when crude oil prices were falling compared with a positive contribution of 1.7 billion francs during the first half of 1989.

But excluding stock valuations, the profit on the basis of replacement costs was 2.57 billion francs (494 million dollars) compared with 437 million francs in the first half of 1989.

Consolidated sales were 53.12 billion francs against 51.13 billion francs.

Total managing director Serge Churuk said that in future he would favour accounts based on the cost of replacing stocks sold, excluding notional profits and losses on stocks depending on oil prices.

SINGAPORE (SEPT. 25) - The price of fuel oil rose another five U.S. dollars while the price of Dubai crude remained steady Tuesday, the Singapore International Monetary Exchange (SIMEX) said.

Fuel oil for October delivery closed at 167.50 U.S. dollars per ton, a gain of five U.S. dollars from Monday's closing figure of 162.50 dollars.

A rise of 5.20 U.S. dollars from Monday's closing level was noted for the price of fuel oil for November delivery, which closed at 159.70.

At one stage the price for October fuel oil rose as high as 176.00 U.S. dollars per ton before easing to 167.50 at the close.

Dealers attributed the rise to uncertainty in the Gulf, and analysts said it was difficult to predict how far the market would move over the next few days.

The Dubai crude oil market for November deliveries, however, remained steady, closing at the same level as Monday at 31.80 U.S. dollars per barrel, while December deliveries were quoted as 30.55 U.S. dollars a barrel.

BANGKOK (SEPT. 25) - A total of 53 people had died Tuesday from burns sustained when a tanker truck (lorry) carrying liquified gas crashed in down-town Bangkok and exploded into a ball of fire.

About 100 other people were seriously injured in what was Thailand's worst traffic accident on record, officials said.

Officials at the Police Hospital's Institute of Forensic Medicine said they

had yet to identify some of those killed.

Police said they feared the death toll would go higher because many of the injured had third degree burns over their entire bodies.

Among those injured were a Canadian, two West Germans and a Burmese, police and hospital sources said.

The Canadian, 45-year-old dentist Peter Gillies, here on vacation with his Thai wife, was driving a Toyota sedan when the liquified petroleum gas (LPG) tanker exploded after late Monday night. Both were injured and taken to hospital.

The two West Germans were identified by nurses as Martin Guber, 42, and Klaus Stenson, 30. Doctors believe their cars were also stuck in the heavy traffic where the tragedy took place on New Petchaburi Road, in the heart of Bangkok.

A total of 42 cars, blocked at a traffic light or parked on the roadside, were set ablaze after the gas truck swerved, apparently to avoid a pedicab, crashed into buildings and exploded.

BEIJING (SEPT. 25) - China claimed two more gold medals in the women's weightlifting competitions at the 11th Asian Games here Tuesday.

Shi Wen of China snatched 100 kilograms and jerked 125 to win the women's 75-kg category with a total of 225 kilos.

The Chinese weightlifter set new Asian records for the snatch and total lifts. The previous records of 92.5 and 220.5 kilos had been set by Li Changping of China in Sarajevo, Yugoslavia, in June this year.

Chen Shu-Chih of Taiwan, who snatched 90 kilos and jerked 105, came second with 195 kilos.

Kim Gyong-Ae from North Korea finished third with 180 kilograms. She lifted 80 kilos in the snatch and 100 kilos in the jerk.

In the 82.5-kilogram category contest, China's Li Hongling, who holds all three world records in the class, captured the second lifting gold of the day.

The gold medalist snatched 95 kilos and jerked 130 for a total weight of 225.

India's Bharti Singh finished second with 185 kilograms in the four-lifter competition.

Sin Gum-Son of North Korea was third with 180 kilograms.

#90268d8710 09/25/1990 ~French/German News Agency
HARARE (SEPT. 25) - The authorities at Harare's Chikurubi maximum security prison are redressing the grievances of three South African agents condemned to death in 1988 for a raid on an African National Congress ''safe house''.

Philip Conjwayo, Ken Woods and Michael Smith, all former members of the Rhodesian security forces, plan to withdraw their threatened high court action against President Robert Mugabe's government if recent pledges are met to improve death cell conditions, said a spokesman for their lawyers Tuesday.

They were now being allowed to keep their clothes, instead of being stripped naked between four p.m. and seven a.m., and would no longer be kept locked up for over 23 hours a day in windowless cells 4.5 metres (14 feet) by 1.5 metres (five feet), prison officers promised.

Their lawyer said the Zimbabwean attorney general's office had said stringent security had been necessary because of the abortive June 1988 commando raid, aimed at freeing alleged South African agents from Chikurubi prison.

But referring to recently reduced tension between Zimbabwe and South Africa, the authorities had written saying ''new circumstances'' enabled conditions to be relaxed.

The lawyer said he was awaiting a reply to a request to see President Mugabe personally to request an amnesty for Woods, Smith and Conjwayo, and three other convicted South African agents serving long prison sentences -- Odile Harington, 29, Barry Bawden, 32, and former British paratrooper Denis ''Sammy'' Beahan, 42, from Manchester.

GENEVA (SEPT. 25) - The World Health Organization on Tuesday increased its estimate of the number of people who will be infected with the AIDS virus in this decade to 30 million or more.

Previous adults-only estimates predicted that 15 to 20 million people would have the virus by the year 2000.

But Michael Merson, head of WHO's program to fight the Acquired Immune Deficiency Syndrome, said at a press conference on Tuesday, "By the year 2000,

WHO estimates that ten million or more infants and children will have been infected with HIV," the virus that causes AIDS.

"Thus WHO projections of the number of men women and children expected to be infected with HIV by the year 2000 is now 25 to 30 million," he said.

The revised estimate came four days before the opening in New York of a United Nations conference on children.

By the end of this year, 700,000 babies will carry the HIV virus, he said.

"Among children born from infected mothers, 30 per cent will develop HIV infection and a majority will die by the age of five," Dr. Merson said. "Among the 70 per cent who are not infected, many will become orphans."

"WHO expects that paediatric AIDS will be a major global cause of death among infants and children during the 1990s," he said.

In the past decade, there have been 400,000 known cases of AIDS among children 90 per cent of them in subsharan African cities. In the next decade, he said, the mortality rate for children is likely to increase by half, to the point of reversing long trends in African population growth.

"Now, one among four adults in East Africa is infected by HIV virus," Dr. Merson said.

"There are some mothers who are HIV positive who probably develop some antibody, some kind of protein antibody that blocks the transmission of the HIV virus across the placenta," he said.

"If we have a very clear understanding of why the children of theses mothers don't develop HIV, we might have some insight on how to develop a vaccine," he said.

"WHO estimates that a worldwide cumulative total of over 3 million women of childbearing age have been infected with HIV," the American physician added.

#90268d8760 09/25/1990 ~French/German News Agency

LONDON (SEPT. 25) - Market operators are beginning to look to the possibility of further equity sales by the Kuwait Investment Office (KIO), informed market sources said here Tuesday.

The exiled Kuwaiti government's investment arm sold its 10.1 percent stake in British hotel operator Mount Charlotte Investments on Monday, a move which came despite a recent assurance from a KIO official that its substantial worldwide equity investments would not be sold to raise liquidity.

The Mount Charlotte stake sale might not be linked to the Gulf crisis, as the

KIO has previously said it would continue to manage its investments as before.

Earlier this month it took up its entitlement of a 70 million rights issue from Great Western Resources, a London-listed U.S. oil and gas company in which it has a 29.8 percent stakeholding. This move suggests that the Office is not short of cash.

However the high degree of secrecy which has always surrounded the KIO's operations makes analysis of their tactics difficult even for Middle East experts, and the KIO's status as a major customer in the City of London makes people close to its operations unwilling to comment.

Kuwait is thought to control an estimated 70 to 100 billion dollars of assets around the world, including some significant stakes in major Western world companies. Equity investment is thought to cover between 40 and 70 per cent of the KIO's assets.

Earlier this month U.S. Secretary of State James Baker said that Kuwait had undertaken to fund the U.N. military operation in the Gulf and compensate countries hit by the trade embargo on Iraq to the tune of five billion dollars to be handed over before the end of 1990.

The Kuwaiti government in exile also says it needs some 50 to 100 million dollars per month to support exiled Kuwaiti citizens.

ABIDJAN (SEPT. 25) - Ivory Coast, the world's leading cocoa producer, saw production fall 15 percent in the 1989-90 season, the first drop in production since independence in 1960, according to figures released here Tuesday.

"The 1989-90 season ended with production totalling 701,000 tons, a clear 15 percent below the 1988-89 level of 823,000 tons," Rene Amani, who heads the Caisse de Stabilisation (CAISTAB) responsible for handling the country's cocoa export income, said in a statement.

The 122,000 ton drop was "essentially the result of a fall in producer prices " Mr. Amani said.

The price paid to cocoa producers was halved in the 1989-90 season, and buyers often did not meet their debts to farmers.

"Not only is the producer no longer motivated, but cannot even cover his overheads, particularly wage costs" for seasonal workers at harvest time, Mr. Amani said.

Ivory Coast was the world's fourth largest cocoa producer in 1960 with 80,000

tons, but by the 1977-78 season had reached 304,000 tons, making it the world leader, and in 1989 accounted for 35 percent of total world production.

TOKYO (SEPT. 25) - Standard and Poor's Corp., the U.S. financial rating service, has lowered its long-term outlook from stable to negative for Japan's four largest securities firms, the company's office here said Tuesday.

The company said the downward revision for Nomura Securities, Daiwa Securities Nikko Securities and Yamaichi Securities was based on "reduced domestic brokerage and underwriting volumes, a poor trading environment and uncertainty as to the extent and timing of any rebound."

The financial position of the four brokers, however, remained very strong and the lower rating had to be set against their record profits last year, it said.

The revision was also linked to changes in Japan's financial system such as current reforms which will increase competition among brokers, making a return to past profit levels more difficult, it added.

HONG KONG (SEPT. 25) - Scores of Vietnamese boat people joined a hunger strike Tuesday over a new repatriation plan sponsored by the United Nations High Commissioner for Refugees (UNHCR).

"Down With The UNHCR!" was one of the slogans shouted by hungerstrikers at Whitehead camp, the biggest in the British colony.

Gordon Tam, spokesman for the local prison authority, said: "They are carrying banners and refusing to take food provided by the camp staff," said. He put the number of hunger strikers at 61.

Nguyen Chi Dong, a Whitehead inmate contacted by telephone, said: "It is very tense here."

Mr. Dong put the number of hunger strikers at Whitehead at around 200. "There may be many more tomorrow," he said.

"Everybody is very, very worried about the future," he said.

Relief workers were warning that the repatriation plan in question would prompt more protests and riots in local camps, where there had also been a series of suicide attempts -- with a couple proving fatal -- against forced repatriation.

The UNHCR signed a tripartite repatriation pact in Hanoi Saturday with Vietnam and Britain for Vietnamese screened out as non-refugees in Hong Kong.

The new plan, aimed at sending back 1,000 Vietnamese a month from here to Hanoi, created a new category of boat people: those who have not volunteered to be repatriated but do not object to being flown back.

"This is not mandatory repatriation," the UNHCR's local delegate Robert Van Leeuwen said late Monday, acknowledging however that "tension may arise (among inmates) as a result of ... lack of clarity" over the plan.

"These people have the right not to enter the plane at the last moment," added UNHCR's Asian bureau chief Jamshid Anvar.

Mr. Anvar conceded that such returnees could prove "an imaginary category". But while detailed procedures were still being worked out, the UNHCR was hopeful of the new scheme becoming operational by the end of October.

ROME (SEPT. 25) - Italian President Francesco Cossiga stepped into the fray against the mafia Tuesday calling for urgent action to halt mafia infiltration of the administration and the virtual takeover by organized crime of much of southern Italy.

The president's appeal to members of the Italian parliament followed strong calls for action against the mafia by the Vatican in the wake of the murder in Sicily on Friday of a young magistrate, Judge Rosario Livatino.

The killing near the town of Agrigente, sent shock waves through the Italian establishment reviving accusations of mafia involvement in high places.

Judge Livatino's death was the first murder of a magistrate investigating organised crime for two years. Two other people were murdered in Sicily over the past 24 hours, including one in the Agrigente region.

President Cossiga said the "unity of the nation" was being undermined with the institutions giving the impression of being "weakened and even compromised" in some areas.

On several occasions, magistrates and police have warned that whole regions were now virtually or totally out of government control.

Mr. Cossiga said "exceptional measures" were needed to strengthen and coordinate police and judicial action and to put a stop to "mafia infiltration of public services".

He called for "tougher rules" for elections to disqualify candidates suspected of having links to the mafia. In the past, political parties were supposed to weed out such candidates themselves although eight candidates were assassinated during municipal elections earlier this year.

#90268d9100 09/25/1990 ~French/German News Agency

BONN (SEPT. 25) - The West German government presented Tuesday a program to limit the flood of foreign refugees arriving in the country by offering incentives to those willing to return home.

Bonn proposes to extend direct assistance to their countries of origin and pay a reward to foreigners who go back.

West German Interior Minister Wolfgang Schaeuble told newsmen it was planned to put the programme into effect together with the other member countries of the European Community.

The conservative-liberal government is thus reacting to the record number of foreigners heading for West Germany.

According to official figures 120,000 foreigners sought asylum in the country between January and August. By the end of the year, the figure may reach 200,000.

Under the country's basic law, political refugees have a right to political asylum. Conservative Christian Democrats are therefore calling for a constitutional amendment.

Only 3.4 per cent of all applications filed for asylum are granted by the West German authorities.

Schaeuble noted that, apart from refugees from poor countries in Africa, Asia and Latin America, more and more people from the former communist countries in eastern Europe are attracted to West Germany with its high standard of living.

He said if this continued, Western Europe as a whole could expect as many as 400,000 asylum seekers this year. Their chief destinations, apart from West Germany, were Italy, Spain and France.

#90268d9160 09/25/1990 ~French/German News Agency

LONDON (SEPT. 25) - British telecommunications concern STC said Tuesday it was acquiring the telephone-making subsidiary of British Telecommunications (BT), effective in late October.

STC recently ceded its 80-per-cent stake in computer subsidiary International Computers Ltd. to Fujitsu of Japan and the market had been waiting to see what it would do with the 700 million pounds (1.3 billion dollars) it received.

Analysts said however that the BT deal, whose value was not revealed by STC, was an acquisition of limited range and involved a relatively small amount.

BT's telephone-making subsidiary had sales totalling 35 million pounds (66 million dollars) last year, and BT said that this operation was "not an essential part" of its strategy.

STC said it will retain about 700 of the current 900-strong work force of the BT operation.

#90268d9830 09/25/1990 ~French/German News Agency
PARIS (SEPT. 25) - Cigarette smoking can cause impotence, a French doctor has warned here.

According to Dr. Alain Jardin, director of urology at the Kremlin-Bicetre hospital near Paris, "indisputable evidence puts the consumption of tobacco among the causes of impotence in men."

Dr. Jardin said the effects of tobacco on sexuality are most often hidden, chiefly by "dishonest advertising" associating cigarette-smoking with virility.

Results from tests on animals conducted by a San Francisco research team back up the claims of Dr. Jardin.

Other studies cited by Dr. Jardin showed that 81 percent of people who consulted doctors for impotence were smokers and 93 percent of those suffering from imotence over the age of 50 smoked.

Researchers said the libido of smokers between 24 and 40 years of age was lower than that of non-smokers.

According to Dr. Jardin, all treatment for impotence should start by having the patient stop smoking.

#90268d9910 09/25/1990 ~French/German News Agency
KARACHI (SEPT. 25) - Ousted Pakistani premier Benazir Bhutto said here Tuesday she would challenge the jurisdiction of special courts ordering her to stand trial for alleged misuse of power.

Kicking off her party's election campaign, Ms. Bhutto told several mass rallies that the cases against her had been "concocted with malafide intentions to intimidate me and to keep me out of the contest."

Ms. Bhutto is running in elections President Ghulam Ishaq Khan scheduled for October 24 after dismissing her government on August 6 on charges of corruption and abuse of power.

"They want to disqualify me through these false cases because they cannot defeat me politically," Ms. Bhutto told the partisan crowds in her hometown of Karachi in Sindh province. They chanted "Long live Benazir."

A special court in Lahore had issued notices in two cases to Ms. Bhutto ordering her to appear in person on October 2 and 9.

She has been accused of exercising her influence in the allotment of land for a hotel to her first cousin and of favouritism in the awarding of liquifield petroleum distribution rights.

#90268e0006 09/25/1990 ~Latin America New Agency

San Jose (SEPT. 25) EFE - Leftist Salvadoran guerrillas have called for a new constitution, a sweeping overhaul of the country's political and economic structures and the abolition of both the Army and rebel forces in a major new policy statement.

Tirso Canales, spokesman in Costa Rica for the Farabundo Marti National Liberation Front (FMLN) guerrillas, presented the rebel blueprint listing +major changes+ they see as essential for putting an end to El Salvador's decade-old civil war.

"The democratization of El Salvador is the historic task which is absolutely essential for putting an end to the dictatorship of the military and the oligarchy," Canales said.

Released a week after the latest round of United Nations- sponsored peace talks between government and rebel negotiators ended in acrimonious deadlock, the FMLN statement struck a reconciliatory note on the subject of relations with the United States.

It said relations with Washington should be reconstructed on a basis of mutual respect but with El Salvador adopting a policy of strict neutrality, an independent foreign policy and remaining outside all military alliances.

The FMLN repeated the demand made during the peace talks for the Army to be abolished and replaced by a new policing body, and for those of its members accused of human rights crimes to be brought to trial.

The rebels also called for sweeping agricultural reforms, the nationalization of the banking system and foreign trade, along with structural changes aimed at strengthening the electoral process, the judiciary and respect for human rights.

The statement came as Salvadoran President Alfredo Cristiani was in washington attempting to convince the U.S. Congress not to carry out a threatened 50 percent reduction of military aid.

The cutback was ordered if Congress determines that the Salvadoran government has failed to improve its rights performance and did not negotiate with good faith in the peace talks.

#90268e0007 09/25/1990 ~Latin America New Agency

MOSCOW (SEPT. 25) EFE - Soviet President Mikhail Gorbachev put foward a proposal Tuesday to rename his country during a debate in the Supreme Soviet on a union treaty Moscow is hoping to sign with its 15 self-assertive republics.

According to Soviet of Nationalities Chairman Rafik Nishanov, Gorbachev suggested the country could be renamed the "Union of Sovereign Socialist States" once the treaty with the republics were signed.

Nishanov said two other names were also put foward during the opening of the debate in the Supreme Soviet, which is divided into the chambers of the Soviet of Nationalities and the Soviet of the Union.

The Interregional parliamentary group said the country could be renamed the "Union of EuroAsian republics+, while the republic of Kazakh suggested that it be called the +Union of Sovereign Soviet Republics".

Nishanov said the breakaway Baltic republics of Lithuania, Latvia and Estonia had not been taking part in negotiations on the union accord.

The treaty Moscow is hoping to sign with the 15 republics that make up the Union of Soviet Socialist Republics would bind the country together as a loose confederation.

Under the 1977 constitution, the Soviet Union is a federal state comprising 15 constituent republics of equal status. The republics are linked voluntarily and have the right to secede.

Most of the republics have made varying moves towards independence so far this year and the union treaty is seen as an attempt by Gorbachev to prevent a complete disintegration of the Soviet Union.

MADRID (SEPT. 25) EFE - Polish Prime Minister Tadeusz Mazowiecki arrived in Spain Tuesday for a four-day visit during which he was expected to seek support for Poland's hopes to join West European institutions.

Poland has described relations between the two countries as excellent and this has been reflected by the number of high-level official visits between the two countries in the past year.

King Juan Carlos and Queen Sofia went to Warsaw in October and President Wojciech Jaruzelski came to Spain in June.

The two nations exchange regular information on European issues, disarmament, questions related to developments in eastern Europe and the desire of Poland to join West European institutions, diplomatic sources said.

Poland embarked on a wide-reaching reform program on January 1 to transform the former centrally-planned economy into a free market system and regards Spain's transition to democracy as exemplary, the diplomats said.

Mazowiecki will hold talks with Spanish Prime Minister Felipe Gonzalez and lunch with the king during the offici a private visit to Barcelona where he will meet Jordi Pujol, president of the Catalonian regional government and also tour the Olympic stadium.

RABAT (SEPT 25) EFE - Morocco's leading political party Tuesday claimed the Gulf crisis and compliance with United Nations sanctions against Iraq was severely damaging the national economy.

In its Rissalat al-Oumma daily newspaper, the Constitutional Union (UC) party said Morocco was one of the countries hardest hit by the crisis.

Rissalat al-Oumma said compliance with the U.N. sanctions had deprived the country of crucial oil supplies.

Before the crisis broke, Iraq supplied some 60 percent of Morocco's crude oil imports valued at dlrs 400 million.

Rissalat al-Oumma also said that goods destined for export to Iraq worth some dlrs 42 million were now stranded at ports or stockpiled in warehouses.

Iraq is Morocco's third-largest trading partner.

The U.N. embargo was imposed against Baghdad within days of Iraq's August 2 invasion of Kuwait.

Countries hardest hit by compliance with the embargo, such as Turkey, Jordan and Egypt have been promised millions of dollars in compensation by European community nations, Japan and the rich Gulf states in a bid to prevent sanction-breaking.

The UC is the largest party in Morocco's Chamber of Representatives.

#90268e0018 09/25/1990 ~Latin America New Agency

BUENOS AIRES (SEPT 25) EFE - In a fresh denial that it has been violating United Nations trade sanctions against Iraq, Iran insists it never allowed a shipment of Argentine beef to be sent overland to neighboring Iraq, Argentine officials said Tuesday.

The Argentine Foreign Ministry said it has been informed that Iranian authorities "are firmly resolved to comply with the economic embargo" imposed after Iraq invaded neighboring Kuwait last month.

The officials said Iranian Foreign Minister Ali Akbar Velyati personally assured his Argentine counterpart, Domingo Cavallo, that Iran was respecting the sanctions when they met at the inaugural session of the U.N. General Assembly in New York Monday.

Velyati informed Cavallo that his government had arrested 29 Iranian traders accused of trying to smuggle food into Iraq across their common border.

The comment follows the sacking of Alberto Samid, an adviser to Argentine President Carlos Menem, who has admitted that he sent 140 tonnes of beef to Iraq for "humanitarian reasons," but refused to reveal how it reached the buyers.

The meat was reportedly sent by air to Iran earlier this month for transhipment to Iraq despite the government's decision to honor the embargo imposed last month by the United Nations. Menem has ordered Argentine troops and warships to the Gulf to help enforce the embargo.

The Foreign Ministry officials also denied recent press reports that Argentina has come under pressure by the United States to freeze pending grain shipments and the transfer of nuclear technology to Iran.

The reports alleged that Argentina was holding up the shipment of up to 700,000 tonnes of grain to Iran, which last year was the the second largest importer of Argentine grain.

Newspapers reproduced what they said was a memorandum from Argentine diplomats in Washington saying the Bush administration was concerned that Argentine nuclear technolgy exports might be contributing to the proliferation of nuclear arms.

#90268e0022 09/25/1990 ~Latin America New Agency

MADRID (SEPT 25) EFE - The number of foreign visitors to Spain will drop by four percent this year, while the country earns at least eight percent less than expected from its tourism sector, Tourism Minister Jose Barrionuevo predicted Tuesday.

Although in dollar terms tourism-derived earnings will show a one percent rise that works out to a drop of between eight and 10 percent in peseta terms because of the current strength of the Spanish currency, the minister said.

The end-of-year forecast follows a disapppointing summer where the number of foreigners fell 7.1 percent during the key month of August compared to the previous year, bringing to 3.8 percent the downturn over the first eight months of 1990.

Barrionuevo said that while the tendency of prices in Spain to approach levels current elsewhere in the European Community appears inevitable, much remained to be done by way of improving the product.

Tourists have complained that Spain is becoming noisier and dirtier while developers continue to show scant respect for the environment, the minister said.

Short-sighted policies by local and regional authorities were largely to blame for this, along with a failure to respond to the more demanding requirements of a changing market, he added.

Barrionuevo noted that along with boosting quality in the tourism sector, major improvements still have to be made in the country's motorway network, railroads, airports, sea transport and telecommunications systems to win back visitors.

PUERTO BELGRANO, ARGENTINA (SEPT 25) EFE - Under orders from President Carlos Menem, two Argentine warships left Tuesday for the Gulf to join the U.S.-led blockade of Iraq.

The destroyer Almirante Brown and the corvette Spiro, carrying 300 Navy and Army troops, departed from Puerto Belgrano, 750 km south of Buenos Aires.

Defense Minister Humberto Romero said the government "has taken up its responsibilities in the international sphere" as he gave the order for the ships to set off.

He added that the Argentine forces will not participate in war actions without the consent of the parliament.

The main opposition Radical party, as well as many leaders of the ruling Peronist party, have criticized Menem for ordering military forces to the Gulf without prior congressional consent.

Menem replied that its vessels being sent to the Gulf were not an interventionary force, but rather had the mission of "helping guarantee world peace," and thus were not subject to parliamentary approval.

The government also justified the move as a response to the U.N. Security Council's resolutions imposing an embargo against Iraq and approving naval action to enforce it.

The warships, the first to be sent from a Latin American country, are expected to arrive in the Gulf area in 26 days and remain for five months, the government said.

They will join naval forces deployed by the United States, Britain, France and at least 10 other nations.

SALVADOR, BRAZIL (SEPT 25) EFE - The leader of a religious sect faces charges of homicide after at least two people drowned and another 10 went missing during a mass baptism on a Brazilian beach, police reported Tuesday.

Military police recovered the bodies of two young men who drowned during the ceremony Saturday, which was attended by some 10,000 people, according to witnesses.

The 12 were swamped by a giant wave as they waded into the sea for the baptism on the coast near Salvador, 1,200 km northeast of Rio de Janeiro, according to a local politician.

The officiating pastor, Everaldo Amorin of the Universal Church of the Kingdom of God, has been ordered to appear in court Wednesday on homicide charges.

A police spokesman said another of the sect's pastors had been accused of raping a worker at a church in Sao Paulo.

Other members have been accused of attacking a nurse in the northwestern city of Fortaleza for reporting that a sect assistant had tried to rob her.

LONDON (SEPT 25) EFE - The British Foreign Office Tuesday said it has ordered the departure of two of the four diplomats in its Kuwait embassy, which has been sealed off by Iraqi troops for a month.

The order is aimed at conserving food supplies to keep the embassy open as long as possible, a Foreign Office spokesman said.

The first secretary of the embassy's commercial section and its security chief will leave the mission and head for Baghdad in the next few hours, the spokesman added.

Ambassador Michael Weston and consul general Larry Banks will remain in the embassy to provide assistance to the estimated 1,000 Britons still in Kuwait.

For the past month, the embassy has been surrounded by Iraqi troops, who have cut off its electricity and water supplies.

Baghdad ordered all embassies in Kuwait to close by August 24, following its August 2 invasion and subsequent annexation of the emirate.

Several countries have refused to close their missions and some embassies have been surrounded by troops and subjected to cut-offs in utility services.

Troops have prevented the four British diplomats from leaving the building for several weeks, the Foreign Office spokesman said.

Iraqi authorities have detained an unknown number of men from Britain and other Western countries who were in Kuwait and Iraq at the time of the invasion, taking some of them to key military and civil installations in Iraq to prevent an attack by the multinational forces deployed in Saudi Arabia and the Persian Gulf.

CALVIGNAC, FRANCE (SEPT 25) EFE - Six people were killed Tuesday when two light aircraft collided in mid-air over southern France, police said.

The accident occurred when the two aircraft, a Piper PA28 and Socata TB10, hit each other close to the town of Calvignac, some 480 km south of Paris.

All six bodies were recovered, but the nationality of the victims was not disclosed.

Police said the cause of the accident was unknown.

#90268e0040 09/25/1990 ~Latin America New Agency

WASHINGTON (SEPT 25) EFE - International Monetary Fund (IMF) Managing Director Michel Camdessus Tuesday called on the world's richest nations to ride out the economic effects of the Gulf crisis by keeping the lid on inflation, but he was guarded about financial assistance for developing nations unable to cope.

Speaking at the opening of the IMF and World Bank annual meeting, Camdessus emphasized the need to maintain tight monetary policies to +soothe the fears of the markets by giving credible signals of the determination to cut inflation+.

The IMF chief called for international solidarity to increase financial assistance to nations hardest hit by United Nations trade sanctions on Iraq and the doubling of oil prices that resulted from the Iraqi invasion of Kuwait on August 2.

However, Camdessus insisted that he was not proposing making available new funds to subsidize oil prices that hit dlrs 41 Tuesday, the highest figure in 10 years.

Camdessus urged "prudence" in planning any disbursments of IMF funds to nations affected by the Gulf crisis, and emphasized that developing nations could help themselves by expanding their private sectors and reducing the state's role in the economy.

He also said there was an urgent need for worldwide financial resources to fund the cost of German unification, economic reforms in Eastern Europe and the chronic underdevelopment of indebted Third World nations.

Such resources could only come from an increase in savings, which would help bring down world interest rates, stimulate private investment and contribute to the reduction in service charges on the debt of developing nations.

Camdessus said the IMF was "ready for the unexpected," and that if the Gulf

crisis did not deteriorate further the world's industrialized nations and the majority of developing countries could weather the economc storm.

But, at the same Washington meeting, World Bank President Barber Conable painted a more somber picture, warning that unless the crisis was soon resolved, developing nations "with the least ability to pay for imports would be hit especially hard."

Conable added that the World Bank was putting together an emergency support package for Jordan, Egypt and Turkey, states that have lost millions of dollars because of the cut-off in Iraqi oil exports and the U.N. blockade of Iraq.

The World Bank would also assist countries that were required to repatriate thousands of their citizens from Iraq and occupied Kuwait in the wake of the invasion, Conable said.

TOKYO (SEPT. 25) KYODO - OKI ELECTRIC INDUSTRY CO. SAID TUESDAY IT HAS ALIGNED ITSELF WITH FIVE LARGE COMPUTER WORKSTATION MAKERS IN A MOVE TO STANDARDIZE THE 64-BIT I860 MICROPROCESSOR DEVELOPED BY INTEL CORP OF THE UNITED STATES.

THE JAPANESE ELECTRONICS MAKER SAID THE MASS 860 GROUP INCLUDES INTEL CORP., INTERNATIONAL BUSINESS MACHINES CORP., AND ALLIANT COMPUTER SYSTEMS, ALL OF THE U.S., ITALY'S ING. C. OLIVETTI AND C., S.P.A., AND SOUTH KOREA'S SAMSUNG ELECTRONICS CO.

THE SIX COMPANIES WILL ADOPT THE REDUCED INSTRUCTION SET COMPUTING, OR RISC-BASED I860 CHIP AND JOINTLY DEVELOP COMPATIBLE SOFTWARE APPLICATIONS FOR THEIR WORKSTATION PRODUCT LINES TO COMPETE AGAINST SUN MICROSYSTEM CORP.'S WORKSTATIONS, OKI OFFICIALS SAID.

THE I860 MICROPROCESSOR CAN EXECUTE ABOUT 20-28 MILLION INSTRUCTIONS PER SECOND, TWICE THE PERFORMANCE OF 32-BIT DESKTOP WORKSTATIONS, THE OFFICIALS SAID.

SUN MICROSYSTEMS, THE CURRENT LEADER IN THE 32-BIT WORLD WORKSTATION MARKET, HAS BEEN LICENSING IT RISC-BASED CHIP ARCHITECTURE TO COMPANIES WORLDWIDE AND ENCOURAGING SOFTWARE MAKERS TO DEVELOP UNIX-BASED APPLICATIONS FOR ITS PRODUCT LINE.

WORKSTATIONS HAVE ADOPTED THE UNIX OPERATING SYSTEM, DEVELOPED BY AMERICAN TELEPHONE AND TELEGRAPH CO., THAT ALLOWS USERS TO PERFORM MULTITASKING AND MULTINETWORKING OPERATIONS, AND ENABLE POWERFUL GRAPHICS APPLICATIONS.

OKI ELECTRIC WILL BEGIN SHIPMENTS OF ITS I860-BASED OKI WORKSTATION 7300 IN NOVEMBER, THEY SAID.

TOKYO (SEPT. 25) KYODO - THE GULF CRISIS AND THE RESULTING SLUMP IN EQUITY PRICES PUSHED DOWN THE OFF-THE-BOOK VALUE OF ASSETS HELD BY JAPAN'S 154 BANKS DRAMATICALLY BETWEEN MARCH AND AUGUST, BANKING SOURCES SAID TUESDAY.

THE SOURCES SAID FIGURES TALLIED ON A BANK-BY-BANK BASIS SHOW THAT THE OFF-THE-BOOK VALUE OF SUCH ASSETS PLUNGED BY NEARLY 16 TRILLION YEN IN AUGUST FROM MARCH, A DROP EQUAL TO FOUR YEARS WORTH OF THE BANKS' PRETAX PROFITS.

THE SOURCES BLAMED THE CONTRACTION ON THE SAGGING STOCK MARKET, WHICH WAS HIT HARD BY IRAQ'S AUGUST 2 INVASION OF KUWAIT.

PRICES ON THE TOKYO STOCK EXCHANGE HAVE FALLEN SHARPLY SINCE THE END OF MARCH, WITH THE 225-ISSUE NIKKEI STOCK AVERAGE LOSING 13.3 PERCENT OF ITS VALUE AS OF THE END OF AUGUST.

THE SOURCES SAID THE HEAVY LOSSES IN BANK ASSETS WOULD MAKE IT DIFFICULT FOR MANY BANKS TO MEET CAPITAL ADEQUACY STANDARDS SET BY THE BANK FOR INTERNATIONAL SETTLEMENTS (BIS).

THE BIS RULES REQUIRE INTERNATIONALLY OPERATED BANKS TO HAVE CAPITAL EQUIVALENT TO 8 PERCENT OF RISK-WEIGHTED ASSETS BY MARCH 1993. MANY JAPANESE BANKS HAVE FALLEN BELOW THAT LEVEL DUE TO THE NOSEDIVE IN THE TOKYO STOCK MARKET.

TOKYO (SEPT. 25) KYODO - THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) TUESDAY ASKED WHOLESALERS OF LIQUIFIED PETROLEUM GAS TO REPORT COST FLUCTUATIONS TO THE MINISTRY SO THAT IT CAN MONITOR EXPECTED INCREASES IN LPG PRICES, MINISTRY OFFICIALS SAID.

MITI 17 LPG WHOLESALERS AND FOUR INDUSTRY ORGANIZATIONS TO ABSORB THE COST INCREASES BY STREAMLINING THEIR OPERATIONS AS MUCH AS POSSIBLE, AND TO LIMIT PRICE HIKES TO THE MINIMUM NECESSARY.

MITI HAS ALREADY LAUNCHED SIMILAR ''ADMINISTRATIVE GUIDANCE'' TO EP AN EYE ON OIL PRODUCT PRICE RISES STEMMING FROM THE PERSISIS.

THE COST OF IMPORTING LPG IS DETERMINED BASED ON THE EXPORT PRICE SET MONTHLY

BY SAUDI ARABIA, WHICH ALL THE OTHER EXPORTERS FOLLOW, PLUS FREIGHT COSTS.

SAUDI ARABIA'SLPG EXPORT PRICE FOR SEPTEMB SHIPMENT ROSE TO 165 DORS PER TON FROM 100 DOLLAIN AUGUST.

THE SAUDIASET PRICE IS LINKED TO THRICE OF ARABIAN LIGHT CRUDEIL. JAPANESE LPG WHSALERS ARE EXPECTED TO INFORTHEIR CUSTOMERS OF PRICE INEASES FOR OCTOBER SALES, RLECTING THEIR INCREASED COS.

THE WHOLESALERS CNGE THE PRICES OF THEIR PRODUCTS EVERY MONTH, REFLECTINGFLUCTUATIONS IN COSTS.

MITI HAS TOLD THE 17 MAESALERS TO REPORT THE FLUCTUNS IN THEIR COSTS EVERY MONTH TO HELP THE GOVERNMENT MONITOR LPG PRICES, THE OFFICIALS SAID.

TOKYO (SEPT. 25) KYODO - JAPAN'S THREE LONG-TERM CREDIT BANKS DECIDED TUESDAY TO RAISE THEIR LONG-TERM PRIME RATE BY 0.4 PERCENTAGE POINT TO 8.9 PERCENT A YEAR NEXT MONTH FROM THE CURRENT 8.5 PERCENT, BANK OFFICIALS SAID.

THE INCREASE WILL BE THIRD IN AS MANY MONTHS, BRINGING THE PRIME RATE TO ITS HIGHEST POINT SINCE DECEMBER 1982.

THE LONG-TERM PRIME RATE IS A FEE CHARGED ON LOANS OF MORE THAN ONE YEAR TO THE MOST CREDITWORTHY CUSTOMERS.

THE OFFICIALS SAID THE DECISION IS IN RESPONSE TO INCREASING FUND-RAISING COSTS FOR THE INDUSTRIAL BANK OF JAPAN, THE LONG-TERM CREDIT BANK OF JAPAN, AND NIPPON CREDIT BANK.

THESE BANKS CHIEFLY RAISE FUNDS THROUGH FIVE-YEAR DEBENTURES ISSUED MONTHLY. THE PRIME RATE IS SET 0.9 PERCENTAGE POINT ABOVE THE COUPON ON SUCH DEBT,

WHICH IS DETERMINED BY SECONDARY-MARKET YIELDS.

SECONDARY-MARKET YIELDS ON SUCH BANK DEBENTURES HAVE JUMPED RECENTLY IN RESPONSE TO BOND PRICES WHICH HAVE SAGGED SINCE THE PERSIAN GULF CRISIS. BOND YIELDS MOVE IN THE OPPOSITE DIRECTION OF PRICES.

TOKYO (SEPT. 25) KYODO - KOBE STEEL LTD. SAID TUESDAY IT HAS AGREED WITH ALUMINUM CO. OF AMERICA (ALCOA) TO FORM A JOINT VENTURE IN TOKYO TO PRODUCE ALUMINUM SHEET FOR BEVERAGE CANS.

THE TWO COMPANIES ALSO PLAN TO COOPERATE IN PROMOTING THE USE OF ALUMINUM FOR MOTOR VEHICLES TO REDUCE THEIR WEIGHT AND IMPROVE FUEL EFFICIENCY, THE MAJOR JAPANESE STEELMAKER SAID.

THE DEAL WILL GIVE THE PITTSBURGH, PENNSYLVANIA-BASED ALCOA, THE WORLD'S LARGEST ALUMINUM PRODUCER, GREATER ACCESS TO THE FAST GROWING JAPANESE MARKET AND PROVIDE KOBE STEEL WITH STABLE SUPPLY OF ALUMINUM INGOT, KOBE STEEL OFFICIALS SAID.

THE EQUALLY OWNED JOINT VENTURE, KSL ALCOA ALUMINUM CO., IS TO BE ESTABLISHED LATER THIS YEAR. IT WILL BUILD A PLANT CAPABLE OF PRODUCING 180,000 TONS OF ALUMINUM SHEET A YEAR, WITH OPERATION TARGETED TO START IN THE FIRST HALF OF 1993.

THE JOINT VENTURE WILL CONSIDER PRODUCING ALUMINUM SHEET FOR AUTO PARTS IN THE FUTURE, THE OFFICIALS SAID.

TOKYO (SEPT. 25) KYODO - BRISTOL-MYERS SQUIBB CO. SAID TUESDAY IT WILL MERGE ITS FOUR JAPANESE SUBSIDIARIES ON WEDNESDAY.

THE FOUR COMPANIES -- BRISTOL-MYERS K.K., SQUIBB JAPAN INC., BRISTOL-MYERS RESEARCH INSTITUTE K.K., AND ZIMMER JAPAN K.K. -- WILL BE MERGED TO CREATE A NEW COMPANY, BRISTOL-MYERS SQUIBB K.K., IT SAID.

THE NEW COMPANY WILL HAVE ANNUAL SALES OF SOME 55 BILLION YEN. BRISTOL-MYERS SQUIBB, THE WORLD'S SECOND LARGEST PHARMACEUTICAL CONCERN, WAS FORMED LAST OCTOBER AS A RESULT OF A MERGER BETWEEN BRISTOL-MYERS CO. AND SQUIBB CORP.

TOKYO (SEPT. 25) KYODO - JAPAN'S CRUDE STEEL PRODUCTION IN THE

OCTOBER-DECEMBER QUARTER OF THIS YEAR WILL RISE 2.7 PERCENT FROM THE SAME PERIOD A YEAR AGO TO 28.35 MILLION TONS, REFLECTING THE STRONG DOMESTIC ECONOMY, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) PREDICTED TUESDAY.

THE FIGURE MARKS THE FIFTH LARGEST PRODUCTION EVER IN A THIRD QUARTER, AND THE HIGHEST SINCE 1980, MITI OFFICIALS SAID.

THE PROJECTED BRISK PRODUCTION DURING THE COMING THREE MONTHS WAS ATTRIBUTED TO ROBUST DOMESTIC DEMAND FOR STEEL PRODUCTS, SUPPORTED BY A BOOMING CONSTRUCTION INDUSTRY.

THE DOMESTIC CONSUMPTION OF CRUDE STEEL WILL SURGE 3.9 PERCENT TO A RECORD 20.35 MILLION TONS, MITI SAID.

EXPORTS, HOWEVER, WILL DECLINE 10.0 PERCENT BECAUSE OF CONTINUED SLUGGISH SALES TO THE SOVIET UNION.

CRUDE STEEL PRODUCTION FOR THE ENTIRE YEAR WILL RISE 1.7 PERCENT FROM THE PREVIOUS YEAR TO 109.79 MILLION TONS, ALSO THE FIFTH HIGHEST LEVEL IN HISTORY.

THE CONSUMPTION OF CRUDE STEEL IN THE CONSTRUCTION SECTOR WILL PICK UP 5.5 PERCENT FROM A YEAR EARLIER, WHILE THAT IN THE CIVIL ENGINEERING FIELD WILL RISE 3.0 PERCENT.

CONSUMPTION IN THE SHIPBUILDING SECTOR WILL CLIMB 5.2 PERCENT, AND THAT IN THE INDUSTRIAL MACHINERY MANUFACTURING SECTOR WILL BE UP 5.1 PERCENT.

THE AUTO INDUSTRY AND THE ELECTRONICS INDUSTRY WILL POST INCREASES IN CRUDE STEEL CONSUMPTION OF 2.5 PERCENT AND 2.1 PERCENT, RESPECTIVELY, MITI SAID.

-30- 1631

#90268k0104 09/25/1990 ~Japanese News Agency

TOKYO (SEPT. 25) KYODO - THE JAPANESE GOVERNMENT, DETERMINED TO MAINTAIN ITS BAN ON RICE IMPORTS, WILL NOT PRESENT ANY DATA ON HOW THE BAN COULD BE CONVERTED INTO TARIFF-BASED RESTRICTIONS AS REQUIRED IN A REPORT TO BE SUBMITTED TO WORLD FARM TRADE TALKS, GOVERNMENT SOURCES SAID TUESDAY.

SUCH A REPORT IS REQUIRED FOR FARM TRADE NEGOTIATIONS SLATED FOR EARLY OCTOBER IN GENEVA UNDER THE URUGUAY ROUND OF MULTILATERAL TRADE TALKS, AIMED AT DRAFTING NEW RULES ON TRADE IN AGRICULTURE AND 14 OTHER SECTORS OF WORLD COMMERCE. THE TALKS ARE SPONSORED BY THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT).

THE UNITED STATES HAS BEEN PRESSING FOR CONVERSION OF NONTARIFF IMPORT RESTRICTIONS INTO TARIFFS IN A STEP TOWARD REDUCING DOMESTIC FARM SUPPORT.

THE SOURCES SAID JAPAN'S REPORT WILL INSTEAD CONTAIN DATA ON HOW MUCH THE GOVERNMENT SPENDS PROTECTING ITS RICE MARKET UNDER A FORMULA DEVISED BY GATT, THE SOURCES SAID.

THEY DECLINED TO DISCLOSE SPECIFIC FIGURES, BUT THE GATT SECRETARIAT HAS ESTIMATED JAPANESE SPENDING AT 5 TRILLION YEN IN 1986 AND 4 TRILLION YEN IN 1989 WHEN TALLIED UNDER THE MEASURE OF SUPPORT (AMS).

THE AMS USES PRICE SUPPORT MEASURES AND ALL TYPES OF FARM SUBSIDIES IN CALCULATING THE DEGREE OF DOMESTIC PROTECTION OF AGRICULTURE.

OTHER NATIONS INVOLVED IN THE FOUR-YEAR TRADE TALKS WILL ALSO SUBMIT REPORTS ON DOMESTIC PROTECTION OF THEIR AGRICULTURE MARKETS, FOLLOWING AN AGREEMENT REACHED LAST JULY BY THE POLICY-SETTING TRADE NEGOTIATIONS COMMITTEE.

AGRICULTURE HAS PROVED THE THORNIEST ISSUE IN THE URUGUAY ROUND AS THE U.S. AND THE EUROPEAN COMMUNITY (EC) REMAIN WIDELY DIVIDED OVER WAYS TO SLASH EXPORT SUBSIDIES.

JAPAN HAS STRONGLY OPPOSED THE U.S. PROPOSAL FOR CONVERSION OF NONTARIFF IMPORT RESTRICTIONS INTO TARIFFS.

THE GOVERNMENT HAS INSISTED ON MAINTAINING ITS BAN ON RICE IMPORTS TO SECURE SELF-SUFFICIENCY IN THE STAPLE FOOD. RICE IMPORTS ARE VIRTUALLY BANNED AT PRESENT, EXCEPT FOR LIMITED QUANTITIES FOR USE IN PROCESSED FOODS.

#90268k0105 09/25/1990 ~Japanese News Agency

MANILA (SEPT. 25) KYODO - THE TRAVEL RESTRICTIONS ON U.S. MILITARY PERSONNEL AT TWO U.S. BASES AND FOUR AUXILIARY FACILITIES IN THE PHILIPPINES HAVE BEEN PARTIALLY LIFTED BECAUSE OF A REDUCED THREAT FROM COMMUNIST REBELS, U.S. MILITARY AUTHORITIES ANNOUNCED TUESDAY.

LT. COL RONALD RAND, SPOKESMAN OF THE U.S. AIR FORCE, SAID THE REDUCTION OF RESTRICTIONS WOULD TAKE EFFECT AT 9 A.M. WEDNESDAY, WHILE THE U.S. MILITARY-RUN FAR EAST NETWORK SAID THE EASING OF TRAVEL RESTRICTIONS AT THE SUBIC NAVAL BASE TOOK EFFECT AT 4 P.M. TUESDAY.

A FULL TRAVEL BAN WAS IMPOSED ON ALL MILITARY PERSONNEL SHORTLY BEFORE LAST WEEK'S FIRST ROUND OF TALKS ON THE FUTURE OF U.S. BASES IN THE PHILIPPINES BECAUSE OF THE INCREASED DANGER OF ATTACKS BY COMMUNIST REBELS.

RAND SAID SUCH RISKS HAVE ALREADY DECREASED FOLLOWING THE CONCLUSION OF THE TALKS LAST FRIDAY.

UNDER THE PARTIALLY LIFTED BAN, U.S. MILITARY PERSONNEL ARE ALLOWED TO VENTURE TO THE CITY CENTER, ABOUT ONE KILOMETER AWAY FROM THE BASE. THEY HAVE BEEN

ADVISED, HOWEVER, TO AVOID SIDE STREETS AND DARK ALLEYS.

#90268m0001 09/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 25) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT's final revision of the 2nd quarter real U.S. GNP show growth at an anemic 0.4%, revised down from 1.2%. Experts had expected a revision to 1.1%.

Losses in the failing S&L industry were only $196 million in the second quarter, compared to $374 million and $3.41 billion for the two previous quarters. ... LOCKHEED has rejected HAROLD SIMMONS' latest advances to take control of the company.

WHAT'S AHEAD:

THE NATIONAL ASSOCIATION OF BUSINESS ECONOMISTS will release its economic outlook report at 9 a.m. EDT. ... COUNCIL OF ECONOMIC ADVISERS CHAIRMAN MICHAEL BOSKIN will speak at 12:30 p.m. EDT. ... FDIC CHAIRMAN WILLIAM SEIDMAN will testify on deposit insurance before the HOUSE BANKING COMMITTEE at 10 a.m. EDT.

FROM THE BULLS:

"Currently the market is retesting its closing low at 2483 for the second time " says ROBERT WALSH of JENSWOLD KING & ASSOCIATES. "I expect the test to be successful, and from there I'd look for a rally in the Dow to the 2800 to 2900 area." He says if the market tests the lows again, forming a "triple-bottom," then the market could rally to "just over the 3000 area." Walsh says mutual fund cash is high and insiders are buying more than selling. ("Investor's Daily", 9/25)

"I think we're going to have quite a nice fourth-quarter," says JOHN McGINLEY, editor of "Technical Trends." "I've been saying for some time if you can buy the September lows ... you'll pay your Christmas bills." (CNBC "Market Wrap-Up", 9/24)

DENNIS JARRETT of KIDDER, PEABODY points out that 95% of S&P 500 stocks were down in the last month. "Those that hold up better than what's happening in the marketplace, by going down less ... begin to outperform. That's usually the first sign that you might see some favorable activity on the upside." ("Nightly Business Report", 9/24)

FROM THE BEARS:

"You have no earnings, no bond market, no valuation underpinning this market," laments STEVEN EINHORN of GOLDMAN SACHS. He predicts the market will "continue to move lower." DICK EVANS of DOW THEORY FORECASTS agrees, explaining that yesterday the market "sliced through" what he thought were support levels. "The next leg down will be 12% to 15% off its mid-August highs of 2630," says Evans. ("Investor's Daily", 9/25)

"If ... we don't drop another 50 dollars [50 points on the Dow Tuesday], I'd be willing to say we have a very good chance of seeing a six-week rally all the way up into November before they break again," says MICHAEL JENKINS, editor of "Stock Cycles Forecast." "I think the rallies that we're going to see in this bear market phase, if we get rallies, are going to be limited to 200 or 250 points. ... Although I am optimistic that there is a law in here, the alternative is much, much more bearish. If we should break 2400, we could go as low as 2310 before we get a minor bounce, and when we break that we could go right to 1850, which is my primary target. The only question remains: Are we going to get to 1850 next February or March, or are we going to break right through here and keep on going and hit it at the end of October." (CNBC "Market Wrap-Up", 9/24)

"There are no places to hide in a bear market," says RONALD SLOAN, executive vice president at SIEBEL CAPITAL MANAGEMENT INC. "The only way to preserve capital is not to own stocks." (WSJ, 9/25)

"We see the Dow between 2200 and 2300 by the end of the year," says RICKY HARRINGTON, strategist at MARION BASS SECURITIES. ("USA Today", 9/25)

"It's a bear market," says DUDLEY EPPEL of DONALDSON, LUFKIN & JENERETTE. "We have to accept reality." ("The Washington Post", 9/25)

ABBY JOSEPH COHEN of BARCLAYS de ZOETE WEDD calls yesterday's action "a reality check for investors," and says, "I see no reason to buy stock." She sees a weak economy, an unmoving Fed and overvalued equities as the biggest reasons to stay out of the market. ("Investor's Daily", 9/25)

STOCK MARKET:

"I think this could be washout week," says ROBERT STOVALL, president of STOVALL/TWENTY-FIRST ADVISERS, predicting a 50 to 100 point drop in the Dow over the next few days. "I think there is going to be a movement into cash and a movement out of wounded stocks." He believes this will happen because of 3rd quarter window dressing. "It takes a real hero to stand in and buy stock because you don't know where the bottom is. Stocks look cheap but the fear is that they may get cheaper. It's a pretty bad scene out there." He adds, "And with the end of the quarter coming up this Friday, it takes a very

courageous money manager to buy stocks. They all want to go out of the third quarter with big cash positions. That probably means lower lows all week." But Stovall is more optimistic about the balance of the year. "Whenever you had a down September in the past twenty years, three quarters of the time you've had an up fourth quarter. So with this emotionalism taking hold, I think we will see an up fourth quarter with December being above where we are right now." (FNN "Marketwrap", FNN "Focus", 9/24 and NYT, 9/25)

"I think the market has just about discounted everything there is to discount at this point," says STEPHEN LEEB, editor of "Indicator Digest" and "Personal Finance." "Given even a scintilla of good news, anywhere, I think this market could turn. But predicting when we're going to get that good news is a little bit difficult." (CNBC "Market Wrap-Up", 9/24)

"A doom-and-gloom mentality is pervading Wall Street," says LEO GROHOWSKI, head of portfolio management at MARINVEST. "People are looking for the next piece of good news and are coming up with nothing." He adds, "As we approach the end of the third quarter, money managers won't mind showing a bit more cash in their portfolios. In a bull market, money managers are embarrassed to show they're 5% in cash. Now with the market getting killed, a client sees 10% cash and says, 'Is that all?'" (WSJ, 9/25)

The stock market had "a bad day," according to FIRST ALBANY CORP.'s director of investment strategy, HUGH JOHNSON. "It started wrong, the middle was wrong and it ended wrong." Johnson blamed "the whole problem" on the conflict and uncertainty in the Middle East. ("Investor's Daily", 9/25)

"The ongoing problem with debt certainly" is one of the factors that is holding the market down, according to MARSHALL ACUFF of SMITH BARNEY. The lack of confidence about the prospects for a budget agreement also contribute to the negative sentiment. If no agreement is reached , "the markets are going down," says Acuff. (FNN "Marketwrap", 9/24)

"There's a whole list of worries that people are concerned about," says ANDREW RILEY of YAMAICHI INTERNATIONAL (AMERICA) INC. "The first is the price of oil " and how it will effect the world economy, says Riley. With the prospects of war, he says "people are just plain afraid to put their money to work at this instant." (FNN "Marketwrap", 9/24)

"One way or another, all the negative influences today were tied to what is seen as a new escalation of tensions in the Persian Gulf," says KENNETH DUCEY at S.G. WARBURG. ("The Washington Post", 9/25)

"Wall Street isn't going to flinch every time [Iraq] says something, but it is going to flinch every time crude spikes up $3 a barrel," says JON GROVEMAN, president at LADENBURG, THALMANN & CO. ("USA Today", 9/25)

"The pessimism is pretty strong," says RICHARD HOLDEN of ALEX. BROWN & SONS.

High oil prices, the prospects of war and the lack of progress on the budget deficit "all adds up to a pretty ugly picture," according to Holden. He sees no signs of major rally in the near future. (WSJ, 9/25)

STOCK TIPS:

"I bought some stocks today," says ROBERT STOVALL, president of STOVALL/TWENTY-FIRST ADVISERS. On his shopping list: GE, BARNETT BANKS OF FLORIDA, SMITH-KLINE and RTZ, a large British metals company listed on the NYSE. "Also I'd be a buyer of oil and gas stocks," suggests Stovall, saying it's not too late. (FNN "Focus" 9/24)

ANDREW RILEY, of YAMAICHI INTERNATIONAL (AMERICA) INC., says that he is very comfortable with cash at this point believing that the market still needs more time to recover. The runaway freight train has to stop before he hops aboard. Nevertheless, Mr. Riley is a value investor who currently finds that SCOTT PAPER and TOY R US are good bargains. (FNN "Marketwrap", 9/24)

"I like DUETSCHE BANK very much," says LOU EHRENKRANTZ of REICH & COMPANY. The stock is trading around 420, and Ehrenkrantz says, "I think we still have a 1000 points left there." He also recommends FIRST WACHOVIA, a Southern bank which he says has very little real estate exposure. Ehrenkrantz would buy CITICORP, and says the bank doesn't have to cut its dividend. He suggests looking at bank bonds: "Because you can cut your dividend but you know what it means when a bank walks away from its bond?" (FNN "Focus" 9/24)

At the "Plain Talk Investor," editor FRED GORDON is still calling the market's down move a "secondary correction within the context of a bull market." But he admits there could be more downside ahead due to rising oil prices, and advises patience: "There's no rush to buy the market. Time is with [the bulls]." Among his latest recommendations is HOUSE OF FABRICS, which he calls recession resistant. (CNBC "World Business Update", 9/25)

-30- 9863

#90268m0002 09/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 25) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The concluding statement of the G-7 meeting on Saturday stated that exchange rates were "broadly in line with continued adjustment of external imbalances," a sign that the members were content to allow the dollar to slide. While Tokyo markets were closed for a holiday, other Pacific markets were open. "What we're seeing is New Yorkers calling on a Sunday afternoon wanting to sell dollars," says one Auckland dealer. (WSJ, 9/25)

LEE HOSKINS, president of the CLEVELAND FEDERAL RESERVE BANK and a voting member of the Fed's policy-making Open Market Committee, and Fed Governor WAYNE ANGELL oppose any tilt toward easing at the August meeting of the FOMC. Hoskins says he favors a tight policy that would prevent the price level from deviating by more than two percentage points from its base line. "When prices deviate from the base line level, the Fed should act to bring prices back in line." (WSJ, 9/25)

"I thought the selloff in the bond market was overdone before," says SAMUEL KAHAN, chief financial economist at FUJI SECURITIES INC. in Chicago. "But our markets tend to go to extremes in times of uncertainty. The market is worried about war, and that's it. Once the situation in the Middle East stabilizes or is clarified, then the market will start to look at economic fundamentals again." (NYT, 9/25)

"War fears, higher oil prices, the impasse over the federal budget deficit, the Federal Reserve hesitancy to ease, and heavy new supply can push bond yields higher," says PHILIP BRAVERMAN of DKB SECURITIES. "But assuming even a hot war isn't prolonged, the growing certainty of a severe recession makes a cyclical yield decline an eventual certainty." ("Investor's Daily", 9/25)

"Buyers are on the sidelines," says STEVEN SASLOW of CARROLL McENTEE & McGINLEY. He says T-bills have been gaining popularity "because money is seeking a safety net, and the safest instruments are Treasurys." (WSJ, 9/25)

"In order to get some relief from high [bond] yields, you'd need some break on the oil front or the budget situation, both of which are totally unpredictable " says RALPH NORTON, editor of "Muni Bond Fund Report." ("USA Today", 9/25)

THE ECONOMY:

"Recession seems very likely unless something changes very promptly," says ROBERT DEDERICK, chief economist at NORTHERN TRUST CO. in Chicago. An easing of short-term interest rates by the Fed might prevent or cushion a recession, he says. (WSJ, 9/25)

FEDERAL RESERVE CHAIRMAN ALAN GREENSPAN says predicting the economy is becoming more difficult because "the structure of the economy is more like a moving target than a sitting duck. While our forecasting tools have improved considerably over the postwar period, our forecast accuracy has not." The Fed chairman spoke yesterday to the NATIONAL ASSOCIATION OF BUSINESS ECONOMISTS. ("The Washington Post", 9/25)

"The realization is building for some money managers that we are headed for a recession," says RICKY HARRINGTON, director of investment policy at MARION BASS SECURITIES in Charlotte, N.C. (WSJ, 9/25)

"The story's oil again; it's boring but it's oil," says PETER GRENNAN, senior vice president of SHEARSON LEHMAN BROTHERS. "It has been oil, is oil and will be oil. Whether we have a mild recession or something more serious most likely will hinge on the price of oil." (NYT, 9/25)

"I would like to reiterate that Saudi Arabia is maintaining its long- standing policy, which aims at achieving stability in the oil market," says SHEIKH MOHAMMED ABALKHAIL, minister of finance and national economy of Saudi Arabia. "Our oil production has been increased to maximum capacity." He predicted to committees of the INTERNATIONAL MONETARY FUND that the Saudi output eventually will mean a retreat in oil prices as higher production takes hold. ("The Washington Post", 9/25)

RICHARD SCHAEFFER, an oil trader with THE CHICAGO CORP., says the prospect of war in the Middle East means, "nobody feels very secure about selling this market." He says short positions are being covered as he predicts prices of over $40, "within the next day or so." ("Nightly Business Report", 9/24)

"Even without war, and without the destruction of the oilfields, we could reach $40" a barrel for oil in trading today, says ROBERT MURPHY, an energy futures broker at LEHMAN BROTHERS INC. (NYT, 9/25)

SADDAM HUSSEIN's threats to attack Saudi Arabia and Israel if the current sanctions against Iraq are maintained are "being looked at very seriously because it was the first time [he] showed a willingness to possibly be the attacker," says TOM BENTZ, director of trading at UNITED ENERGY. "The action that started on Friday could run its course into the $42-a-barrel area ... and that is without any ... military action." ("Investor's Daily", 9/25)

"This is a panic-filled, emotion-fed, hardly rational [oil] market," says TOM KLOZA of "Oil Price Information Service." "It shows every intention of maintaining that tack for the next month or so." ("USA Today", 9/25)

#90268p7688 09/25/1990 ~PR Newswire

NEW YORK (SEPT. 25) PR NEWSWIRE - Unilever United States Inc. has agreed to acquire on behalf of Crosfield Chemicals the assets of the Katalco hydrotreating catalyst business from ICI Americas Inc., for an undisclosed sum. Crosfield is part of the Unilever Speciality Chemicals Group.

The Katalco business being purchased is located in Chicago and employs 125 people. It develops, manufactures and sells a wide range of catalysts for the petrochemical industry.

The acquisition of this U.S. catalyst business will give Crosfield direct access to the world's single largest catalyst market, will broaden its product portfolio and will further develop Crosfield's position as a worldwide

supplier of speciality catalysts.

Crosfield Chemicals, with total annual sales of some $150 million, is a leading producer of silicates, speciality silicas and catalysts. It has production units in the U.K., Italy, the Netherlands and Brazil and its U.S. operations comprise a silicates and speciality silicas manufacturing facility at Joliet, Ill., and the Cormix construction chemicals business in Dallas.

#90268p7710 09/25/1990 ~PR Newswire

ALAMEDA, CA (SEPT. 25) PR NEWSWIRE - Action Technologies, Inc. announced today an agreement with IBM to jointly study next-generation business automation software applications. The two companies will explore emerging technologies for use in managing business processes throughout organizations.

"Business process management is the next frontier in business automation," said Russell Redenbaugh, chairman, ATI. "It will allow companies to dramatically improve productivity, which will have important consequences in their ability to remain competitive in the world market."

"As a groupware pioneer, we have always understood that communication software that manages business activities must be based on how people work," said Tom White, president. "We believe that our technology provides a unique, fundamental, rigorous, and complete foundation for business process definition and workflow control. Products incorporating ATI's technology will be a tremendous boon for both users and the groupware market."

Action Technologies has developed partnerships with Novell, Inc. Ashton-Tate, CompuServe, British Telecom, DaVinci Systems and many others.

Action Technologies is a privately held company founded in 1983. The company provides network management and communications software for the business users and enabling technologies for the original equipment manufacturer (OEM) markets. The company's first groupware product is The Coordinator Version II, a network management and communications software application that offers individual scheduling and group calendaring features along with electronic mail capabilities. In addition, its message handling software, MHS by Action Technologies, is widely used in store and transfer services and is a standard for application to application communication, either within or between local area networks.

CONTACT: Tom White or Dianne Armer both of Action Technologies, 415-521-6190; or Julie Karbo or Cynthia Stirling both of Regis McKenna, 415-494-2030, for Action Technologies.

#90268p7711 09/25/1990 ~PR Newswire

CHERRYVILLE, NC (SEPT. 24) PR NEWSWIRE - The following is a letter to shareholders from Kenneth E. Mayhew, Jr., President and Chief Executive Officer of Carolina Freight Corporation (NYSE: CAO):

Letter to Shareholders: We are pleased to report record revenue of $171,340,349 for the twelve weeks ended September 8, 1990, an increase of 12.6 percent over third quarter 1989 revenue. Net earnings increased 49.8 percent to $1,612,452 in the third quarter. Earnings per share were $.25 compared with $.16 in the third quarter of 1989. The fiscal year of the Company consists of three 12-week quarters and a 16-week fourth quarter.

Revenue for the first thirty-six weeks of 1990 was $499,162,067, an increase of 8.7 percent over the comparable period of 1989. Year-to-date net earnings were $1,678,076 compared with $4,687,498 for 1989. Earnings per share for the first three quarters were $.25 in 1990 and $.70 in 1989.

Fuel prices have risen substantially as a result of the Middle East conflict. Fortunately, higher fuel costs have been largely offset by a fuel surcharge on freight rates. Partly due to the fuel surcharge, freight rates improved compared with the depressed price level in the third quarter of 1989.

Start-up costs in connection with the restructuring of our linehaul and consolidation terminal (new hub-and-spoke) operations were approximately $300,000 in the third quarter. Health insurance and workers' compensation costs were significantly higher than in the third quarter of 1989 due to escalating national health care costs and more liberal state laws regarding workers' compensation benefits.

Because of two large bankruptcies in the retail industry and numerous smaller bankruptcies among our customers during 1990, we are substantially increasing our provision for bad debts this year. As a result, our bad debt expense was $739,000 higher in the third quarter than in the third quarter of 1989.

Our 12.6 percent revenue growth in the third quarter is a reflection of the superior service that we are providing to our customers and the effectiveness of our marketing program. Not only has the new linehaul/consolidation terminal configuration enabled us to improve time-in-transit service to our customers, but we continue to develop new computer applications that give us an edge in our customer service capabilities.

Sincerely /sig/ Kenneth E. Mayhew, Jr. President and Chief Executive Officer

WICHITA, KN (SEPT. 25) PR NEWSWIRE - Brite Voice Systems Inc. (NASDAQ: BVSI) announced today the settlement of its lawsuit against West Interactive Corp. (formerly 900 Services Inc.) and Gary West. The lawsuit, filed in September 1989, sought collection of approximately $614,000 remaining due under a contract for the sale of a Gateway 5000(TM) System for approximately $1,722,000.

Under the settlement, Brite released its claim for the balance due under the contract and the defendants released their counterclaims for damages. The settlement will result in a pre-tax charge to earnings of approximately $463,000, which will be recognized in the quarter ending Sept. 30, 1990.

In announcing the settlement, Stan Brannan, president and CEO of Brite stated, "Although we believe that our case was strong and the likelihood of prevailing was good, the costs we would have incurred and the management time which would have been required did not justify seeing the lawsuit through to conclusion."

Brite Voice is one of the leading manufacturers of audiotex and interactive voice response equipment in the United States. The company, founded in 1984, sells turn-key products to 800 and 900 service bureaus, broadcast and print media, telephone, hospital, real estate and cellular markets as well as to municipal, county and state governments.

#90268p7719 09/25/1990 ~PR Newswire

UPPER SADDLE RIVER, NJ (SEPT. 25) PR NEWSWIRE - Western Union Corporation (NYSE: WU) has extended the period of its current exchange offer, which had been scheduled to expire at midnight on Sept. 24, to midnight on Tuesday, Oct. 9, 1990.

In the exchange offer, which is a key component of the company's recapitalization plan, Western Union is proposing to issue new notes and common shares in exchange for up to $530 million of its presently outstanding 19-1/4 percent senior secured notes and 16 percent notes. The reclassification of Western Union preferred shares into common shares, which is the other major component of the recapitalization plan, was approved by the company's shareholders on August 16.

Preliminary figures indicate that as of midnight on September 24, $348,092,000 aggregate principal amount of Western Union's 19-1/4 percent notes and $1,409,000 aggregate principal amount of its 16 percent notes had been tendered in the current exchange offer (including securities as to which delivery has been guaranteed).

PHILADELPHIA (SEPT. 25) PR NEWSWIRE - Rohm and Haas Co. (NYSE: ROH) announced today it has reached an agreement with its partners to restructure the TOCIL joint venture in Tokyo, Japan.

When the transaction is completed early next year, the joint venture will become a wholly owned subsidiary of Rohm and Haas.

TOCIL (Tokyo Organic Chemical Industries, Ltd.) manufactures Rohm and Haas agricultural fungicides and water treatment chemicals. It was formed in 1956. Rohm and Haas currently holds a 50-percent interest in the venture. The other partners in the venture are Toagosei Chemical Industry Co. Ltd., Sanyo Trading Co. Ltd., and Japan Organo Co. Ltd.

"TOCIL was our first major step into the Japanese market, and has remained an important part of our business in the Pacific Rim," said William A. Kulik, vice president and director of the Pacific Region. "We are grateful to our partners, who have shared their knowledge of the market and guided our business practices for many years.

"Rohm and Haas continues to value its presence in Japan," continued Kulik. "A significant portion of our future sales will occur in Pacific Rim countries. This restructuring will provide a strong manufacturing base for that growth."

Details of the agreement were not disclosed.

#90268p7729 09/25/1990 ~PR Newswire

BELLEVUE, WASH (Sept. 25) PR NEWSWIRE -- Quality Food Centers Inc. (QFC) (NASDAQ: QFCI) today reported net earnings for the third quarter ended Sept. 8 of $3,925,000, compared with $3,440,000 for the corresponding 1989 quarter. Net earnings per share were 41 cents, compared with 36 cents per share for the third quarter of 1989, after giving effect to the two-for-one stock split effective Sept. 26, 1989. Earnings before the extraordinary charge for the early repayment of debt recorded in the third quarter of 1989 were $4,330,000, or 45 cents per shrare.

Sales for the third quarter were $83.5 million, compared with $85.3 million last year. 1989 third quarter sales were boosted substantially by the area-wide labor dispute that involved most supermarkets in the Seattle/King County area, excluding QFC and a few other independents. The 12-week strike, which began on May 11 and was settled on July 30, 1989, involved approximately six weeks of QFC's 1989 third quarter. However, the strike affected the entire third quarter as well as the beginning of the fourth quarter of 1989.

In commenting on the results, Marc Evanger, vice president and chief financial officer said, "We are very pleased with our 1990 third quarter results. Sales for the third quarter of 1990 were $6 million higher than the second quarter of 1990, our operating margin was 6.8 percent of sales and our net margin was 4.7 percent. The labor dispute substantially impacted 1989 third quarter sales and created significant economies of scale, which produced very strong earnings last year. Accordingly, direct comparison of 1990 third quarter results to 1989 is not indicative of the company's longer-term trends. Third quarter sales and net earnings reflect two-year compound growth rates of 24.8 percent and 51.1 percent, respectively."

For the 36 weeks ended Sept. 8, net earnings were $10,638,000, or $1.10 per share, compared with net earnings of $8,726,000, or 91 cents per share, in the comparable period last year. Earnings before the extraordinary charge for the 36-week period of 1989 were $9,616,000, or $1.00 per share. Sales for the 36-week period of 1990 were $234 million, versus $221 million in the comparable 1989 period.

"We are pleased with our third quarter results as well as our progress on the expansion front," said Dan Kourkoumelis, QFC president and chief operating officer. "Customer response to our new Crossroads store, the newly remodeled Redmond and Factoria stores, and the two stores recently acquired in North Bend and Carnation has been very encouraging. Our Interbay store remodel is well underway and should be complete in November. And, we just broke ground on our new Totem Lake store, which, along with the Westwood Village and Coal Creek stores, is expected to open in 1991." Kourkoumelis continued, "We expect to complete additional remodels in 1991 and continue to pursue other new store locations and acquisition opportunities."

QFC is the largest independent supermarket chain in Seattle/King County. QFC has served this growing area for 35 years and today has 27 stores. In operating its stores, QFC's first priority is satisfying customers' needs by emphasizing superior service, high-quality perishables and convenient store locations.

NEW YORK (SEPT. 25) PR NEWSWIRE - Government representatives from Canada, the U.S. and New York joined together today with executives of Journey's End Corporation to mark the official opening of New York City's first Journey's End Hotel. Conveniently located just off Fifth Avenue at 3 East 40th Street, the newly-built, 189-room, 29-storey mid- Manhattan hotel is the 120th property owned and operated by the Ontario, Canada-based lodging chain.

Following a brief ceremony which included a traditional ribbon cutting and the presentation of Canadian and American flags to hotel General Manager Paula Power-Spirlet by Canadian Consul General Anthony Eyton and U.S. Commerce Department District Director Joel Barkin, Journey's End Corporation Chairman, CEO and co-founder Maurice Rollins declared the property officially open.

Rollins and co-founder Joseph Basch opened the first Journey's End property, a modest, sixty-room motel in suburban Ontario, in 1978. In the twelve years since, the company has experienced remarkable growth and today stands as Canada's largest and fastest growing limited service lodging company, offering travelers a choice of 130 hotels, motels and all-suite properties throughout Canada and the northeastern United States.

The Journey's End Hotel (Manhattan) features a two-storey lobby with a ground floor sitting area and a second floor gallery where guests can enjoy complimentary morning coffee and newspaper, or just unwind after a full day of business or sightseeing. The hotel offers a choice of comfortably appointed accommodations with one or two double beds or one queen-sized bed. All rooms include a well-lit work area, individual climate controls, triple-glazed windows, telephone with extra long cord for ease of mobility, remote control color television with cable service and AM/FM radio, and a roomy private bathroom with tub/shower combination.

Guest room privacy and security is ensured with a state-of-the-art electronic locking system which automatically re-programs the lock after each check-out. Rooms with a queen-sized bed also feature a sitting area with a sofa-bed.

For more information or reservations at Journey's End Hotel (Manhattan) call 212-447-1500 or 1-800-668-4200 toll-free from anywhere in the continental United States or Canada.

WALTHAM, MA (SEPT. 24) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX:

THI) announced today that its TMA/Eberline subsidiary has been selected by the Defense Nuclear Agency as operator of a plutonium cleanup plant approximately 700 miles west southwest of Honolulu, Hawaii, under a three-year contract valued at $4.4 million.

The contract covers the second phase of cleanup on Johnston Island, where approximately 100,000 cubic yards of soil are contaminated with plutonium as a result of nuclear weapon effects testing conducted in 1962. The soil decontamination plant that TMA/Eberline will operate combines standard mining and milling equipment with radiation detection instruments and process controls designed and manufactured by another subsidiary of Thermo Instrument, Eberline Instrument Corporation. Plutonium extracted from the soil will be prepared for disposal at an approved radioactive-waste handling facility.

"Award of this contract indicates the close coordination of our environmental services and monitoring instrument businesses," said Arvin H. Smith, president and chief executive officer of Thermo Instrument. "We believe that adaptions of the technologies that make it possible to remove radioactive particles from otherwise clean soil can play an important role in Defense and Energy Department efforts to restore the environment at sites throughout the United States."

TMA/Eberline is based in Albuquerque, N.M. Eberline Instrument Corporation in headquartered in Santa Fe, N.M.

Thermo Instrument System develops, manufactures and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

NEW YORK (SEPT. 25) PR NEWSWIRE - The Horn & Hardart Company (AMEX: HOR) announced today that its Chairman, Chief Executive Officer and President Donald Schupak, who led a two-year restructuring program that refocused the company's strategy, divested non-core businesses and enhanced its financial strength, has resigned his position as CEO and president.

Schupak has been succeeded as president and chief executive officer by Jack E. Rosenfeld, CEO of the Hanover Companies, the profitable direct marketing concern that is Horn & Hardart's principal business, and a member of the board of directors since 1974.

Rosenfeld, a 20-year veteran of the direct marketing industry, negotiated the sale of Hanover to Horn & Hardart in 1972 and remained as president and chief executive officer of Hanover until 1977. He was recruited back into Hanover in 1988 and has worked closely with Schupak in corporate and operating matters. Rosenfeld was named "Cataloger of the Year" for 1989 by Target Marketing Magazine.

Schupak will remain as chairman of the company for an interim period to ensure a smooth transition. He will also remain a director of the company, and he will act as a consultant for three years.

The Horn & Hardart Company is engaged primarily in the direct marketing business through its wholly owned subsidiary the Hanover Companies.

Based in Weehawken, N.J., the Hanover Companies is the sixth largest specialty mail order marketer in the United States. It currently publishes 22 catalogs in four principal areas: home furnishings; women's fashion; men's fashion; and giftware. In fiscal 1989, the Hanover Companies reported revenues of $382.6 million. The revenue forecast for fiscal 1990 is approximately $500 million.

Horn & Hardart is also engaged in the restaurant business. International King's Table, Inc., acquired in 1988, operates 83 buffet- style restaurants in nine Western states under the name King's Table Buffet. IKT is the largest buffet-style restaurant operator in its market.

Horn & Hardart has recently divested its East Coast restaurant operations, which included Burger King, Arby's and Bojangles restaurants.

Horn & Hardart was founded in 1911. In fiscal 1989 the company reported revenues of $537.7 million.

#90268p7745 09/25/1990 ~PR Newswire

BOCA RATON, FLA. (SEPT. 24) PR NEWSWIRE - First Medical International, Inc. (NASDAQ: HUGE) has executed an agreement in connection with the acquisition of a medical waste disposal company in Lansing, Mich., MedTex International, Inc. for $525,000 in cash and securities. In 1991, over $3 million in sales with a gross profit before taxes of $900,000 are projected by MedTex management. The announcement was made by Roberto Riva, chief executive officer of First Medical International.

MedTex International has a unique, proprietary medical waste disposal system -- Medwaste -- for sharps medical waste disposal, which includes contaminated

needles and syringes. The Medwaste System is used in hospitals, laboratories, clinics, doctors and dentists offices. Medwaste economically reduces waste handling and the possibility of accidental infection. It also reduces medical liability by utilizing containers which establish documentation via manifest and receipt that destruction and disposal have been safely and lawfully accomplished.

First Medical International, Inc. (formerly called Humagen) has also recently acquired Cardio Scan, Inc., an established company which specializes in the use of the Holter Monitor system for extensive EKG and EEG testing. The company also has the exclusive right to franchise, own and operate Medical Depot Superstores in the U.S.S.R., Mexico and Panama and a non-exclusive right to franchise, own and operate Medical Depot Superstores anywhere else outside the U.S.

#90268p7746 09/25/1990 ~PR Newswire

LOS ANGELES (SEPT. 25) PR NEWSWIRE - Mercury Air Group, Inc. (AMEX: MAX) today announced net income of $1,025,000, or $0.48 per share, on revenues of $66,796,000 for fiscal year 1990, ended June 30, 1990. The company reported net income of $293,000, or $.11 per share, and revenues of $65,366,000 for the previous fiscal year.

For the fourth quarter of fiscal year 1990, Mercury Air had revenues of $15,518,000 and net income of $177,000, or $.08 per share, compared with revenues of $16,699,000 and a net loss of $(37,000), or $(.03) per share, for the fourth quarter of the prior year.

The aviation services company noted that net income for fiscal year 1990 was positively influenced by improved overall results from high- margin cargo handling operations. Net income for the previous year was reduced by an after-tax charge of $615,000 for settlement of outstanding litigation.

The company further noted that the increased revenues for fiscal year 1990 included gains from cargo handling as well as fuel delivery operations.

"Our improved financial results -- both for fiscal year 1990 and in each of the past three years -- reflect the success of Mercury Air's corporate restructuring in 1987 to focus exclusively on aviation services," said Seymour Kahn, chairman of Mercury Air Group.

"We are especially pleased by the gains in the company's cargo operations during the year. With rising international demand for our cargo handling services and the planned expansion of our cargo facilities to more than twice the current capacity in early 1991, we expect these operations to continue to

generate improved results in the current fiscal year.

"In addition, the company's fuel service operations are strategically positioned to broaden our reach in serving commercial as well as military markets. We expect all of these trends to result in continued growth for Mercury Air in fiscal 1991," Kahn said.

Mercury Air Group, Inc. is the largest independent fuel supplier at Los Angeles International Airport (LAX), as well as one of the largest domestic contractors providing aviation fueling services to the U.S. military. The company provides fueling, cargo handling, and ground support for commercial, military and general aviation aircraft. These services are handled through Mercury Air's main operations at LAX, five fixed-base operations in California and Nevada, and 14 U.S. military bases, including one in Bermuda.

ATLANTIC CITY, NJ (SEPT. 25) PR NEWSWIRE - Digital Radio Laboratories (DRL), parent company of Digital Planet, has entered into a two-year, $85 million pact with Hitachi Ltd. (NYSE: HIT) and Mitsui Comtek, the trading arm of Mitsui Group, for the manufacture and distribution of DRL's proprietary digital tuners. The agreement to participate in DRL's Digital Planet marks these Japanese giants' entry into a new and revolutionary audio marketplace.

Doug Talley, chairman of DRL and chief executive officer of Digital Planets, comments, "Hitachi's reputation as a maker of high quality electronic equipment is unsurpassed and ensures the excellence of our equipment. Also, our partnership with Hitachi and Mitsui Comtek is particularly rewarding in its endorsement of Digital Planet as the vanguard in this exciting new market."

Digital Planet, set for launch this month in Southern California, is a new digital quality audio service delivered through cable television systems. The tuners, developed by DRL, will be manufactured by Hitachi, the world's ninth largest manufacturer with more than $45 billion in annual gross sales, with the largest portion in electronics equipment. The agreement covers two years of manufacturing the tuners which will be sold to cable operators at a very competitive price.

Teruo Fujii, chief engineer at Hitachi Ltd., explains, "After having carefully reviewed the various technologies put forth, we are convinced that the DRL technology is, by far, the best. We believe that the future holds a marriage of cable and consumer electronics, and we certainly intend to be a major player in that market."

As its part of the alliance, Mitsui Comtek will finance the manufacturing budget of $85 million and will also supervise export of the tuners to the United States and domestic distribution to cable television companies and consumer electronics outlets.

Koichi Suzuki, senior vice president of Mitsui Comtek Corp., says, "We have studied this new market and are convinced that DRL's technology is a clear winner, offering twice the bandwidth compression capability with superior fidelity at lower cost than competing systems. Combined with Digital Planet's marketing and programming expertise, we look forward to a long and profitable relationship."

Digital Planet will offer 91 channels of digital audio programming, including commercial-free music, simulcasts, domestic and international radio stations, and special channels produced by America's leading record companies.

William H. DeLany, president of Digital Planet, concludes, "The element of technical excellence in Digital Planet is married to our commitment to programming excellence. We have assembled the country's top music programming talent, and we already have the support of major record, broadcasting and cable television companies. As in our alliance with Hitachi and Mitsui Comtek, our corporate partnership with creative companies will ensure the long-term success of Digital Planet."

WILMINGTON, DEL. (SEPT. 25) PR NEWSWIRE - Airgas Inc. (NYSE: ARG) today announced the acquisition of Waukegan Welding Supply in Waukegan, Ill., and Algas Supplies in Merced, Calif.

Both companies are distributors of industrial gases and welding supplies. Combined annual sales are approximately $7 million.

Waukegan Welding Supply will operate as part of Great Lakes Airgas. Current management will continue to operate Waukegan's three existing locations.

Algas Supplies will be consolidated with an existing Airgas location in Merced and will operate as part of Sierra Airgas.

Since April 1, 1990, Airgas has acquired nine industrial gas distributors with annual sales of approximately $16 million. More than 50 industrial gas distributors have been acquired since March 31, 1988, with annual sales of more than $200 million.

Currently the Airgas distributor network includes more than 230 locations in 29 states and Canada. Airgas Inc. is the largest independent distributor of industrial, medical and specialty gases in the United States.

LEXINGTON, MA (SEPT. 25) PR NEWSWIRE - Raytheon Company's (NYSE: RTN) Seismograph Service subsidiary has signed a protocol with a Soviet state-run geophysical organization to carry out oil and gas exploration work within the Soviet Union.

Seismograph Service, headquartered in Kent, England, plans to enter a joint venture with Neftegeofizika, the geophysical exploration arm of the Soviet Ministry of Geology.

Under the joint venture Seismograph Service will provide technical supervision seismic recording equipment and data processing capability. Neftegeofizika will provide exploration crews, seismic equipment and local support.

Ian Cheshire, president and CEO of Seismograph Service, said, "The joint venture will offer unique services to international oil companies working in the Soviet Union. This will be the first time the Soviets have gone into a commercial partnership with a western company in the field of geophysical exploration. We are pleased to be in on the ground floor and look forward to a long relationship with Neftegeofizika."

Neftegeofizika has a research institute in Moscow and operates several hundred seismic crews in the Soviet Union, as well as a number of seismic vessels.

Seismograph Service is an international geophysical contractor operating from its main offices in Kent, outside of London, and Houston, Texas.

Raytheon Company is an international, $8.8 billion company, headquartered in Lexington, Mass., active in electronics, aviation, applicances, industry and environmental services, publishing and construction.

#90268p7765 09/25/1990 ~PR Newswire

ROCHESTER, NY (SEPT. 25) PR NEWSWIRE - Beginning Oct. 1, inTeleFeatures will be available to approximately 50,000 Rochester Telephone customers in Pittsford and Perinton whose telephone numbers begin with 223, 248, 377, 381, 383, 385, 388, 398, 425, and 586.

inTeleFeatures are new services designed to give customers more convenience and control over the use of their telephones. The services include: Call Return, Automatic Redial, and Call Tracing By dialing a simple code. Call Return automatically dials the telephone number of the last incoming call regardless of whether or not the call was answered.

Automatic Redial eliminates dialing busy numbers over and over. By dialing a simple code, Automatic Redial will continuously redial busy telephone numbers for up to 30 minutes.

Call Tracing allows customers to take immediate action against annoyance callers. By dialing a simple code after receiving an annoyance call, information about that call is sent directly to Rochester Telephone and an investigation can begin.

Rates for Call Return and Automatic Redial are each $4 per month. Customers purchasing both features will receive a 15 percent discount on each feature. Call Tracing will be made available on an "as needed" basis. The charge for each successful trace will be $1.50.

"This is the first phase of our program to provide inTeleFeatures throughout our six-county territory," said Terry Davenport, residence sales director. "We expect to be able to offer these services to the majority of our customers by the end of 1991." Customers will be officially informed when inTeleFeatures are available in their area by way of direct mail.

CONTACT: Diana Melville of Rochester Telephone, (716) 777-1090.

#90268p7770 09/25/1990 ~PR Newswire

DEARBORN, MI (SEPT. 25) PR NEWSWIRE - The following statements may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is notifying owners of a voluntary safety recall of approximately 14,500 1989-90 Aerostar wagons equipped with optional Quad Captain's chairs to replace latch assemblies in the second-row, right-hand bucket seat.

Ford is concerned that these seats, which are designed to tilt forward to permit easy access to third-row seats, may unlatch during sever frontal impacts.

Ford discovered the condition during a recent simulated barrier severe crash test that resulted in disengagement of the latch mechanism. Ford is not aware of any accident involving a vehicle in use in which the seat has unlatched.

Owners will be notified by mail and asked to return their Aerostar wagons to dealers to have revised latch mechanisms installed at no charge. Of the vehicles affected, 13,146 are located in the United States, 1,357 are in Canada, and 82 are in export locations.

In a second action, Ford is notifying owners of a voluntary safety recall of approximately 18,000 1989-90 L-Series heavy trucks to replace a check valve within the air brake system that may malfunction and not close as intended.

The valve is designed to protect the pressure in a secondary air tank in the unlikely event that pressure in the supply air tank is lost. Under normal operating conditions, a driver would experience no effect on vehicle control, braking or performance due to a non-functional check valve.

However, in an extreme case, after the sounding of a warning buzzer and illumination of a warning light, some trucks involved in the recall could lose front braking capability if pressure is lost from the supply reservoir. In the equally unlikely event that pressure is lost from the primary tank, the truck's emergency brakes would begin to apply automatically. (To date, there are no reports of this condition occurring.)

Owners will be notified by mail and asked to return the vehicles to their dealers to have the work performed at no charge. Of the vehicles affected, 15,247 are located in the United States, 3,103 are in Canada, and 49 are in export locations.

CONTACT: Jim Trainor of Ford, (313) 594-2880.

GREENWICH, CT (SEPT. 25) PR NEWSWIRE - United Parcel Service (UPS), and Yamato Transport Co., Ltd. of Japan have formed Unistar Air Cargo, a joint venture that will serve the growing international trade between the United States and Japan.

The new company is a unique combination of air freight forwarding and integrated air service joining the world's largest package delivery company, UPS, with Japan's largest package delivery company, Yamato.

Service is expected to begin in October and will utilize the UPS worldwide network, including its airline and its newly awarded all-cargo route to Japan.

"The U.S.-Japan trade market will be our primary focus," said Mark Skoda, executive vice president of Unistar. "However, Unistar will transport any size shipment, from lightweight express packages to heavyweight air freight, to anywhere in the world."

All shipments will be tracked from pickup to delivery, with shipment status, speedy customs clearance, and comprehensive delivery and billing information available through a sophisticated transport information network. Delivery options ranging from airport-to-airport to door-to-door will be offered. Logistics engineering support will also be offered to customers seeking to create distribution channels through the world.

Chicago will be headquarters for the U.S. operation, with branch operations in New York, Atlanta, Los Angeles, San Francisco and Anchorage. An additional 15 cities will be added in early 1991. Headquarters for the Japan operation will be in Tokyo.

UPS is a worldwide company serving all 50 U.S. states and more than 180 countries and territories. The company delivered 2.8 billion packages and documents in 1989, and had revenue of more than $12 billion. Yamato, an established international freight forwarder and one of the oldest transportation companies in Japan, had revenue of $2.4 billion in 1989.

#90268p7773 09/25/1990 ~PR Newswire

NEW YORK (SEPT. 25) PR NEWSWIRE - Ortho Pharmaceutical Corporation today announced an exciting advance in the treatment of infertility with its introduction of a new therapy for women whose infertility is caused by a GnRH hormone deficiency.

Bringing new hope to infertile couples, LUTREPULSE(R) (gonadorelin acetate) for Injection is a natural, physiologic approach to ovulation induction. This two-part system is the first new infertility product in more than 20 years.

LUTREPULSE consists of a synthetic hormone, gonadorelin acetate, and a lightweight, programmable intravenous pump which administers the drug to the woman. The pump was specifically designed to administer the hormone intravenously in pulses that mimic the natural release of gonadotropin-releasing hormone (GnRH), approximately every 90 minutes. It is the first pump dedicated exclusively to GnRH treatment.

LUTREPULSE was approved by the Food and Drug Administration under the Orphan Drug Act for women with an endocrine disorder called primary hypothalamic amenorrhea. Women with primary hypothalamic amenorrhea have a dysfunction of the hypothalamus gland and have never ovulated or had a menstrual period. Their infertility stems from a deficiency of gonadotropin-releasing hormone (GnRH).

The development of LUTREPULSE was made possible following extensive research on GnRH. The synthetic hormone was first isolated and identified in the 1970s by two independent researchers, Schally and Guillemin (1). This major scientific achievement was so highly regarded that Schally and Guillemin were awarded the Nobel Prize in Chemistry in 1977 for their work. When the characteristic pulsatile nature of natural GnRH release was understood, the therapeutic potential for synthetic GnRH was discovered.

LUTREPULSE is currently available through infertility specialists nationwide. Consumers can call a special 800 number (1-800-772-HOPE) for more infomation about the infertility specialists that will be offering the LUTREPULSE system.

Ortho, the leader in family planning and health care products for women, is now extending its tradition of helping women to have babies and build families. A wholly owned subsidiary of Johnson & Johnson (NYSE: JNJ), Ortho is headquartered in Raritan, N.J. The company markets products in more than 100 countries around the world and employs more than 2,000 people.

WOODBURY, NY (SEPT. 25) PR NEWSWIRE - Comverse Technology, Inc. (NASDAQ: CMVT) today announced the signing of an agreement between Ascom (its largest continental European distributor) and TS-1 (Telefonica Servicos S.A.), a wholly owned subsidiary of the Spanish PTT.

TS-1 will distribute Comverse's TRILOGUE system (labelled the AMM/Ascom Message Manager) in Spain. The system will be sold exclusively in conjunction with their Ibercom value added services to major companies.

Hans Haslebacher, vice president/head of private networks division of Ascom, stated that, "This is another major step in Ascom's penetration of the European PTTs with the AMM product, adding to the recent major contract with the Deutsche-Bundespost Telekom in Germany. We believe that the fast growing Spanish economy, coupled with Telefonica's major trust to develop value added services, will provide very significant future business.

Kobi Alexander, president and chairman of the board of Comverse stated that, "We are extremely pleased to have our products marketed in Spain by a company of the stature and capability of Telefonica and are very optimistic concerning the future of his new relationship."

Brian Wiltshire, president of Comverse International, added that, "This relationship further underlines the importance of the year-old strategic alliance between Ascom and Comverse. Ascom is also aggressively pursuing the PTTs and other subscriber service providers in France, Germany, Italy, Switzerland, Austria and Belgium which we believe will lead to excellent future prospects."

Comverse, located in Woodbury, develops, manufactures, and markets high performance computer systems for commercial and defense communications applications, including multi-media message management systems under the name of TRILOGUE.

LOUISVILLE, KY (SEPT. 25) PR NEWSWIRE - Manufacturing is under way for a special shipment of KOOL and RICHLAND cigarettes destined for U.S. troops serving in the Middle East. Produced by Brown & Williamson Tobacco Corporation, the cigarettes will be provided free of charge to the military.

"We were prepared to make the commitment as soon as we received the request," said Thomas E. Sandefur, Jr., president and chief operating officer of Brown & Williamson. "We want to offer whatever support we can to the U.S. military forces, and are very pleased to take part in this effort."

The cigarettes will be distributed through military channels to all branches of the U.S. armed services now stationed in Saudi Arabia. Included will be mixed quantities of KOOL Milds, RICHLAND Lights and RICHLAND Full Flavor Kings.

The shipment is expected to depart Brown & Williamson's plant in Macon, Ga., next week for delivery to the 18th Airborne Corps at Fort Bragg, N.C. The product will then enter the military distribution system for handling and transport to the Middle East.

Headquartered in Louisville, Brown & Williamson manufactures cigarettes for customers in the U.S. and export markets worldwide. KOOL is the company's leading brand and a top-selling menthol cigarette. RICHLAND is a popular value-priced offering. Both brands are among the company's top-selling products in military markets.

NEWTON UPPER FALLS, MA (SEPT. 25) PR NEWSWIRE - GZA GeoEnvironmental Technologies, Inc. (NASDAQ: GZEA) announced today that its subsidiary, Environmental Applications, Inc. has acquired 100 percent of the stock of Grover Enterprises, Inc. of Raynham, Mass.

Grover Enterprises was acquired for $1 million of which $750,000 was paid in cash and $250,000 is payable over four years (subject to adjustment for claims if any, and conformity to certain performance criteria).

Grover Enterprises, Inc. is an earthwork and general contracting firm that specializes in environmental remediation services in New England. Environmental Applications, Inc. provides remediation services including design, installation, and operation of treatment systems for contaminant reduction or removal.

According to Environmental Applications management, the acquisition is expected to enhance the company's cost-competitive position for environmental remediation contracts, allowing the company to effectively compete for larger projects and capture margins previously given to subcontractors.

With the acquisition of Grover Enterprises, Environmental Applications' estimated backlog for the next 12 months, including work for which the company has been selected but is not yet under contract, rose from approximately $7.8 million to approximately $11.5 million.

Grover Enterprises, Inc. operates out of offices in Massachusetts and New Hampshire, and has an equipment inventory of over 40 earth-moving machines. Grover Enterprises will focus primarily on the underground storage tank replacement market.

NEW YORK (SEPT. 25) PR NEWSWIRE - The Middle Market Group, L.P. announced today that it has completed the purchase of the investment banking operations known as The Middle Market Group from The Stamford Company, Inc. Terms of the transaction were not disclosed.

The new company is a partnership of the senior investment banking professionals of The Middle Market Group, Shearson Lehman Brothers Inc., and a private investor. It will continue to provide corporate finance services to the middle market. The Middle Market Group was formerly a joint venture of The Stamford Company and Shearson Lehman Brothers.

The management partners include Arnold S. Hoffman, chairman, Peter J. Biche, Robert Dickey IV, Seth J. Lehr, Robert G. Levine and Thomas D. Pickens. The company is headquartered at 1700 Market St., Philadelphia, and will be relocating its New York City offices, currently at 335 Madison Ave., to new quarters shortly. The Middle Market Group has a total of 14 professionals.

The Middle Market Group's focus is domestic and international corporate finance, primarily in the areas of mergers & acquisitions and financings. Its strategy is to provide its middle market clients, both publicly and privately held, with both a broader range of capabilities than those typically provided by "boutique" firms and more senior level attention than is generally offered by larger institutions.

Hoffman noted that the management acquisition represents continuity for the firm and for its clients. "Most of us have been together as a unit since 1985

when we started the middle market investment banking group at Shearson Lehman Brothers to focus on the needs of companies with revenues generally between $15 million and $150 million," he explained. "This management acquisition reinforces our commitment to the middle market and our continued affiliation with Shearson Lehman Brothers.

"We are confident that we will provide a superior level of corporate finance advisory services to middle market companies in the year's to come," Hoffman concluded.

#90268p7797 09/25/1990 ~PR Newswire

RICHARDSON, TX (SEPT. 25) PR NEWSWIRE - CONVEX Computer Corporation (NYSE: CNX) today announced a Tape Library Interface (TLI) connection that allows the company's C2 Series supercomputers to interconnect to the 4400 Automated Cartridge System (ACS) developed by Storage Technology Corporation (NYSE: STK) Louisville, Colo.

TLI combines block multiplexer channels and software for connecting to the 4400 ACS. The 4400 ACS consists of up to 16 interconnected library storage modules each of which contains approximately 6000 18- track cartridge tapes. This allows users to store and retrieve up to 19 terabytes (19,000 gigabytes) of data.

The StorageTek 4400 ACS interface consists of a control path and a data path. The control path begins with a connection from the CONVEX TLI to StorageTek's Library Control System, which translates the tape commands, and relays the instructions to the Library Control Unit of the appropriate 4400 ACS. This unit manages the robotic actions inside the Library Storage Module with an electromechanical robotic arm that identifies the external bar-coded label on a cartridge. The robotic arm pulls a selected tape cartridge and delivers it to an attached StorageTek 4480 tape drive or passes it to another Library Storage Module, allowing data to be available to the user in a matter of seconds.

The TLI product was developed through a software compatibility agreement between CONVEX and Storage Technology. It will be available for delivery in 1991.

Storage Technology Corporation manufactures, markets and services worldwide information storage and retrieval subsystems for high- performance computers.

CONVEX Computer Corporation, a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market and service high

performance systems. The company markets its products primarily to scientific engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing, aerospace simulations and molecular biology. CONVEX has sold nearly 700 systems in 33 countries. The installed base now represents nearly half a billion dollars of cumulative revenues from more than 400 customers worldwide. The systems are sold and serviced through direct sales and an extensive distribution network.

CHICAGO (SEPT. 25) PR NEWSWIRE - Telephone and Data Systems Inc. (AMEX: TDS) announced today that it has proposed the exchange of TDS' interests in certain

cellular Rural Service Areas (RSAs) representing an aggregate of 2,458,000 population equivalents (the "RSA Interests") for 12,500,000 shares of United States Cellular Corp. (AMEX: USM) common stock. After the proposed exchange, TDS' ownership of USM common stock would be increased from 81.5 percent to approximately 87.1 percent.

Under the proposal, TDS would transfer the RSA Interests to USM in return for an aggregate of 12,500,000 shares of common stock of USM, consisting of 3,545,355 common shares and 8,954,645 Series A common shares (plus additional consideration to reimburse TDS for investments and expenditures in respect of the RSA Interests). If the transfer occurs as proposed, TDS would own, as of June 30, 1990, approximately 87.1 percent of the total outstanding common stock of USM and control more than 95 percent of the combined voting power of its common stock. As of June 30, 1990, TDS owned approximately 35 percent of the outstanding common shares and all of the outstanding Series A common shares of USM, constituting approximately 81.5 percent of the combined total of both classes of common stock and more than 95 percent of their combined voting power.

As a result of FCC-sponsored lotteries, TDS and certain of its affiliates (other than USM) hold or will soon become the holders of permits to construct cellular systems or licenses to operate cellular systems in a total of 29 RSAs in 17 states.

If the transfer occurs, USM will own or have the right to acquire cellular interests representing an aggregate of more than 12.1 million population equivalents in a total of 144 metropolitan and rural areas in 34 states.

The TDS proposal is subject to negotiation and has been referred to a previously established independent committee of the USM board of directors. The independent committee has retained Lazard Freres & Co. as its financial advisor. The proposed transaction is subject to approval by the independent committee of the USM board of directors and of the shareholders of USM, to definitive documentation and to compliance with regulatory requirements. The proposal was made by TDS in compliance with an agreement entered into with USM at the time of USM's initial public offering.

TDS is a diversified Chicago-based communications service company with established local telephone operations and developing cellular telephone and radio paging operations.

ATLANTA (SEPT. 25) PR NEWSWIRE - Intermet Corp. (NASDAQ: INMT) experienced a

contained fire yesterday in a section of the Rushville, Ind., foundry of its 60 percent-owned subsidiary INTAT Precision Inc., but damages are covered by both casualty and business interruption insurance.

"In light of our insurance coverage we do not expect any material adverse financial impact from the fire damage or interruption of operations," explained John D. Ernst, Intermet's secretary-treasurer.

He said the extent of the damage, which was confined to one holding furnace and surrounding equipment, was still being assessed, but that the preliminary review indicated that operations can be resumed within the next few days. All repair work should be completed within four to six weeks.

INTAT Precision Inc. is 40 percent-owned by Aisin Takaoka Inc. of Toyota City, Japan. Atlanta-based Intermet Corp. and its subsidiaries, with foundries in six states and three foreign countries, manufacture precision iron parts for automotive and industrial customers in North America, Europe and Asia. Intermet is the world's leading independent manufacturer of iron castings.

CHICAGO (SEPT. 25) PR NEWSWIRE - Centel Corp. (NYSE: CNT) announced today that Nancy R. McCabe has been named general manager-federal regulatory affairs effective immediately. In her new position, McCabe will be the company's principal liaison with the Federal Communications Commission, the National Telecommunications and Information Administration and other federal regulatory agencies.

McCabe joined Centel in 1987 as assistant manager-government relations. Prior to Centel, she was a regulatory affairs associate with the National Food Processors Association. She is a 25-year resident of the Washington, D.C. area, and will continue to work out of Centel's Washington office in her new position.

"Mrs. McCabe has done an outstanding job of representing Centel and its views on regulatory matters," said David A. Bohmer, Centel's senior vice president-government relations. "Her new position, along with the recent appointment of Patricia Simmons as vice president-federal legislative affairs, signifies the importance the company places on its government relations efforts.

"The telecommunications industry is a key component in the economic growth of our nation, and the need for effective telecommunications policies continues to increase," Bohmer said. "The role of our Washington office is growing in

scope and importance as we work to meet the telecommunications challenges of the future."

McCabe is a graduate of Wilson College, Chambersburg, Pa. Chicago-based Centel Corp., which had 1990 revenues of $1.19 billion, provides local exchange telephone service through more than 1.6 million access lines in nine states; operates cellular communications franchises that serve nearly 150,000 access lines in 15 states, and supplies electric power to more than 136,000 customers in two states.

MINNEAPOLIS (SEPT. 25) PR NEWSWIRE - Endotronics, Inc., (NASDAQ: ENDO) today announced that it has been awarded a grant from the National Center for Research Resources of the National Institutes of Health (NIH). This five-year grant was awarded to Endotronics to establish a large-scale animal cell production service to support biomedical research.

Under the direction of Dr. Mark Hirschel, Endotronics' manager of research projects, a variety of customized services will be developed to provide large quantities of mammalian cells and secreted products to university biomedical scientists throughout the United States.

"This grant represents another positive step in making the new Endotronics a fully integrated supplier of bioprocessing products and services," said Richard E. Sakowicz, president and chief operating officer.

"We are extremely honored to receive this prestigious award. The establishment of a national cell culture center at Endotronics allows the company to strengthen its ties to the biomedical research community throughout the United States, leverage existing company resources and expand the application of our cell culture technology. The company would like to recognize the members of its scientific advisory board, who assisted in the development of the grant proposal," added Sakowicz.

The board members include: Chairman, Dr. Todd M. Schuster, professor of biophysics in the department of molecular and cell biology and the director of the University of Connecticut Biology Center; Dr. Harvey W. Blanch, professor in the department of chemical engineering at the University of California; and Dr. Ralph A. Reisfield, head of the division of tumor cell biology at the Scripps Clinic and Research Foundation.

Endotronics, Inc. is a Minneapolis-based company which supplies products and services for the processing of mammalian cells to biotechnology, pharmaceutical, diagnostic companies and research centers worldwide.

PITTSBURGH (SEPT. 25) PR NEWSWIRE - Now there is an easier way for customers of The Peoples Natural Gas Co. to pay their gas bills, the company said today.

Beginning this month, Peoples' residential customers may elect to have their gas bill payments automatically deducted from their checking accounts using a new electronic system called "ZipCheck."

John R. Fellabom, treasurer for Peoples Gas, said ZipCheck makes it simple and convenient for customers to pay their gas bills, without writing checks or searching for postage stamps.

Fellabom noted that ZipCheck is absolutely free. There are no sign-up fees, and there is no charge per transaction.

He said that customers may choose the date when their gas bill payment should be made each month. The customer, Fellabom said, will receive billing notification at least 10 days before that date so that any questions about the bill can be resolved before the payment is withdrawn from the customer's banking account.

Customers may participate in the ZipCheck program regardless of where they bank.

Peoples Gas customers can sign up for ZipCheck by completing the authorization form enclosed in their gas bills or by visiting one of the local Peoples Gas offices, Fellabom said.

Customers with any questions about ZipCheck can call the toll-free telephone number at 1-800-762-2090.

Peoples Gas provides natural gas service to more than 329,000 residential, commercial and industrial customers in 16 southwestern Pennsylvania counties.

#90268p7817 09/25/1990 ~PR Newswire

PHOENIX, AZ (SEPT. 25) PR NEWSWIRE - Checker today introduced a statewide reclamation program for the collection and reprocessing of used motor oil.

According to Marc Graham, company spokesperson, the effort is focused on the return and recycling of used oil. "The program offers consumers an easy, clean, environmentally smart way to collect and return used motor oil to any of our stores." Added Graham, "We'll provide people with a simple oil drain and storage device that can be used and returned over and over again."

Graham said Checker has made an agreement with a local recycler to collect and transfer the oil for later reprocessing. One of the largest programs of its kind in the United States, the recycling effort provides individuals with a way to deal with a problem that is growing and poses severe environmental concerns.

According to the Environmental Protection Agency (EPA), more than 1.3 billion gallons of used oil are generated annually. While some of that oil enters the reprocessing industry, more than 180 million gallons are dumped carelessly into the environment by home mechanics -- and the impact on the U.S. water system is frightening.

Sources estimate that used motor oil from one oil change can contaminated up to one million gallons of drinking water -- enough fresh water for 50 people during a year.

Graham said the program, which has been implemented in several states, will be introduced nationwide over the next 18 months.

AMBLER, PA (SEPT. 25) PR NEWSWIRE - Due to increasing costs of raw materials, energy, and transportation, Henkel Corp. announced today that its Cospha/CD Division increased prices effective Oct. 8, 1990, or as contract terms permit.

The increases are as follows: All Standapol(R) and Sulfotex(R) liquid and powder fatty alcohol sulfates, one to four cents/pound; ether sulfates, 1.5 to three cents/pound; betaines, 1.5 cents/pound; sulfosuccinates, two cents/pound; Standamid(R) alkanolamides, two cents/pound; Standamox(R) amine oxides, one cent/pound; Cetiol(R), Cutina(R), and Emerest(R) fatty acid esters three cents/pound; Deriphat(R) amphoterics, three to ten cents/pound. Other specialties were also increased by 1.5 to three cents/pound.

Additionally, Lanette(R) cetyl and stearyl off-schedule prices will increase by three cents/pound. It was further announced that lanolin products will change freight terms to FOB Hoboken, N.J., plant and lanolin derivatives, FOB Mauldin, S.C.

All orders shipped by Oct. 8 will be offered at old prices. Henkel Corp., the specialist in applied chemistry, provides the right chemicals and services to manufacturers in almost every industrial sector, to help them improve their products and ultimately serve consumers better.

Based in Gulph Mills, Pa., Henkel Corp. is the U.S. operating company of the Henkel Group, headquartered in Duesseldorf, and benefits from the parent company's worldwide resources in research, product and process development, and customer service. Worldwide, the Henkel Group has sales of about $7 billion.

TORONTO (SEPT. 25) PR NEWSWIRE - Ray B. Mundt, chairman and chief executive officer of Alco Standard Corporation (NYSE: ASN) of Valley Forge, Pa., has been elected chairman of the board of NOCOPI International, Inc. (OTC).

The announcement was made by Norman A. Gardner, president and chief executive.

Mundt recently acquired a 14 percent lock of the company's common stock from one of the company's founders, Michael P. Voticky, in a private transaction. Mundt also acquired an option to acquire Voticky's remaining 5.8 percent stake in the Company.

Gardner and Mundt announced that they had entered into a pooling arrangement to vote their shares in the corporation.

The company also announced that Richard Denman, formerly vice president-paper, Weyerhaeuser Paper Company and a director of Alberta Newsprint Company was elected a director of the company to replace Voticky who resigned from the board of directors and that Richard C. Gozon, president and chief executive officer and a director of Alco Standard Corporation, was appointed an advisor to the board of directors.

NOCOPI International, Inc. is a publicly traded U.S. Corporation which owns international patents to a process which protects confidential documents from unauthorized photocopying or faxing.

CANTON, OH (SEPT. 25) PR NEWSWIRE - The Timken Company (NYSE: TKR) announced today that $170 million is being invested in Canton to advance its steel manufacturing facilities and to develop new steel business systems. The $170 million is part of the company's previously announced $1 billion, five-year capital investment program.

"This investment will enable us to strengthen our leadership position in the quality alloy steel bar markets," explained Joseph F. Toot, Jr., president, in making the announcement. "We shall be able to offer our customers better steel products in a more timely manner. In addition, the projects offer a very good return on investment.

"The $170 million program comprises several projects that will enhance our existing operation and improve our overall quality and competitiveness," Toot said. "The Steel Business Unit's ability to supply alloy seamless tubing and bar products with improved quality and cost is of great importance to not only our external steel customers but also to our own Bearing Business, which consumes approximately 25 percent of our steel products.

"These projects will make a strong contribution toward achieving the objectives of the Bearing Business as it completes its own investment strategy. Further announcements will be made as that work is completed.

"We are making this commitment in Canton because of the community's continued support of our endeavors to remain competitive in the marketplace," Toot explained. "We particularly appreciate the efforts of local government officials who listened to our concerns and then worked with us during our

analysis of the viability of such an investment. They are diligently progressing our requests for tax abatements locally along with employee training assistance. We expect to work out those details yet this week."

"In our Harrison Steel Plant, we plan to replace the existing bloom continuous caster with new casting equipment," Charles H. West, executive vice president - steel, explained in discussing the investment further. "Also, major modifications and improvements will be made to the small bar rolling mill, and bar finishing operations will be brought to a leadership position.

"Select investments will be at our Faircrest Steel Plant to accelerate productivity gains and advance its leadership position in the manufacture of high quality alloy steel products," West said. "The $170 million investment also focuses on new steel business systems, which have been designed to lead the marketplace in on-time delivery performance and communications with our customers."

TRAINER, PA (SEPT. 25) PR NEWSWIRE - Creating what will be among the largest radon analysis organizations in the world, EKS-RadTech, Inc., a wholly owned subsidiary of Electro-Kinetic Systems, Inc. (NASDAQ: EKSIA), announced today that it has purchased the assets of Douglas Martin & Associates, Inc., according to Jack Reilly, chairman and CEO of Electro-Kinetic Systems, Inc. The new entity will be known as DMA-RadTech, Inc.

In announcing the merger, Reilly explained, "Radon gas has become a very serious and deadly health problem in the United States. It is the second leading cause of lung cancer (smoking is first). The Surgeon General of the United States and the Environmental Protection Agency (EPA) have both strongly recommended that all homes, regardless of location, be tested.

"In addition, new EPA standards for safe waterborne radon concentrations and the EPA Safe Drinking Water Act will demand testing of over 31,000 municipal water supplies throughout the country, and spark testing of over 13 million private wells, on a periodic, on-going basis.

"These expanding markets made it opportune for our two companies, which have provided non-competitive, complementary products and services in the field of radon testing, to merge our strengths and take advantage of this dramatically growing market."

EKS-RadTech, Inc. is considered a leader in the manufacture and marketing of both professional and home radon testing devices. EKS-RadTech products incorporate a unique filtration and humidity absorption system based on a

patented technology under an exclusive license from Brandeis University.

Douglas Martin & Associates, Inc., established in 1976 and located in Emmaus, Pa., is in the business of radiation and radon detection and analysis, mitigation, and professional consulting. The company has four operating groups: DMA Analysis Group, Martin Consulting, DMA Chemicals Group and DMA Infosystems. Clients include such major corporations as Honeywell and AT&T, as well as the state of Pennsylvania.

Commenting on the merger, Richard Martin, president of Douglas Martin & Associates, Inc. stated, "The merger of our two companies is a milestone for the industry. Through this merger, DMA-RadTech, Inc. will have the resources to aggressively enter and capture a significant share in the profitable areas of waterborne radon testing, large corporate and government contracts, and nuclear power plant testing for effluents."

HEBER SPRINGS, AR (SEPT. 25) PR NEWSWIRE - Skil Corporation produced its 10 millionth circular saw from its facility here on Sept. 12. This milestone was accomplished in only 11 years, since the plant was opened in 1979. Local and state officials, including the Honorable Bill Clinton, governor of Arkansas, attended the celebrations.

Bob Tegarden, plant operations manager, presented the commemorative saw to Bill Davis, executive vice president, Emerson Electric Co. Emerson, located in St. Louis, Mo., is Skil's parent.

"Throughout its history, Skil has focused on building the best line of high-performance power tools in the world," said Davis. "Dedicated employees, loyal suppliers and customers have all contributed to our success, as evidenced by this accomplishment.

"Over the last 65 years the equity in the name Skilsaw(TM) has steadily increased," said Tom McKane, Skil's president. "Skil invented the circular saw, and it continues to be the standard by which circular saws are measured. The company has earned widespread brand recognition for its product quality and durability."

Edmond Michel and Joseph W. Sullivan founded the Skil Corporation in 1924 with the invention of Michel's power handsaw and the subsequent registration of the trademark "Skilsaw."

In 1979 Emerson Electric Company acquired Skil, consolidating domestic and foreign manufacturing of all Skilsaw circular saws within the Heber Springs plant. Following a multimillion-dollar capital investment, Skil manufactured the first "World Saw" to meet the requirements of domestic and global markets from one source in 1985. Skil continues to invest in areas of automation, quality, productivity and capacity to maintain market leadership.

Alice Mae Jo Hunt, Heber Springs mayor, proclaimed Sept. 9-15 "Skil Employee Appreciation Week." The proclamation recognizes employees' contributions to the company, and to the community of Heber Springs.

Skil Corporation is a manufacturer of portable electric power tools and accessories serving industrial, construction and consumer markets worldwide.

WASHINGTON (SEPT. 25) PR NEWSWIRE - Marshall Turner, a venture capitalist and former public broadcasting station board chairman, was unanimously elected chairman, and Daniel Brenner, a lawyer and director of the Communications Law Program at the University of California Los Angeles (UCLA), was reelected vice chairman of the board of directors of the Corporation for Public Broadcasting (CPB) at its annual meeting here today.

Turner is general partner of Taylor & Turner Associates, Ltd., a San Francisco -based firm he cofounded in 1981, which manages several venture capital investment partnerships that invest in new technology-related companies during their early development.

Turner was a member of the board of directors of KQED/KQEC-TV/FM, Inc., San Francisco, one of public broadcasting's largest outlets, for 10 years and was its chairman for two years in 1986 and 1987.

Turner was a White House Fellow, serving as special assistant to Elliot Richardson, secretary of Health, Education and Welfare, in 1970-71, and earlier, at the National Institutes of Health, co-designed a new implantable heart assist pump that won international recognition in the scientific and general press. He collaborated in a series of 29 surgical implants of the pump in calves and authored several articles about this work in medical and engineering publications.

Brenner is counsel to LeBoeuf, Lamb, Lieby & MacRae, a law firm with offices in the United States and Europe, teaches law at UCLA in addition to being director of the Communications Law Program, and is a senior fellow of the Annenberg Washington Program in Communication Studies of Northwestern University.

Before joining the faculty of UCLA in July 1986, Brenner was senior adviser to Federal Communications Commission (FCC) Chairman Mark Fowler. He also served as legal adviser to both Fowler and former FCC Chairman Charles Ferris. Brenner practiced law with Wilmer, Cutler and Pickering in Washington from 1977 to 1979 and clerked for Federal District Judge William Matthew Byrne Jr. in Los Angeles from 1976 to 1977.

Turner was appointed to the CPB board in June 1987 for a term that expires in March 1992 and is chairman of the board's Mission and Goals Committee. As chairman, he succeeds Ken Towery, a Pulitzer Prize- winning journalist and newspaper publisher of Austin, Texas, who became board chairman in February 1989 and was reelected in September 1989.

Brenner was appointed to a five-year term on the CPB board in October 1986 and was elected vice chairman of the board in September 1989.

CPB is a private, non-profit corporation that was authorized by the Public Broadcasting Act of 1967 to develop non-commercial radio and television services for the American people.

EAST HARTFORD, CT (SEPT. 25) PR NEWSWIRE - Now under construction at its main plant in East Hartford, Pratt & Whitney's $30 million Material Distribution Center will help ensure that customers get their parts when they need them. On a routine basis, parts distribution cycle time will be reduced by more than 30 percent.

"One of our customer support goals is the elimination of parts-related work stoppages at the airlines,' said Sel Berson, president of Pratt & Whitney's Commercial Engine Business. "We've reached that goal with many customers and this new distribution center will help us in meeting the customer's needs even better," Berson added.

Computerized, the facility will centralize and automate the processing, storage and shipment of spare parts that commercial and military customers order to overhaul and maintain engines. The center also will handle finished parts used for the assembly of Pratt & Whitney's production engines.

Pratt & Whitney receives about 30,000 spare parts orders a month from over 430 airline, military and independent engine overhaul and maintenance facilities throughout the world.

Echoing Berson's comments was Don Mann, vice president of commercial spare parts. "The primary reason we're building the new distribution center is to further strengthen our customer support efforts," Mann said.

Scheduled for completion in mid-1992, the center will have two automated induction, storage and retrieval units controlled by an integrated computer system. One, for large engine parts, will have more than 8,000 pallet-storage locations. The small-parts system will contain some 19,000 openings. A 2,400-foot network of pallet, shipping, bin, and tote conveyors, plus ten automated guided vehicles, will connect the two systems to the parts receiving and distribution area.

Pratt & Whitney is a unit of United Technolgies Corporation (NYSE: UTX), located in Hartford, Conn.

DALLAS (SEPT. 25) PR NEWSWIRE - Interphase Corporation (NASDAQ: INPH) has signed a three-year OEM contract valued at $8 million with Motorola, Inc. (NYSE: MOT), Microcomputer division.

Under the terms of the contract, Motorola will purchase the Interphase V/SCSI 4210 Jaguar host bus adapter for use in its Delta Series systems products and its new MultiPersonal Computer (MPC) product line.

The Jaguar, an intelligent, high-performance SCSI (Small Computer System Interface) host bus adapter, controls peripherals for computer systems designed with the VMEbus architecture. VMEbus is the leading 32-bit open system bus and is used as the foundation for many of today's leading computer systems, workstations and minisupercomputers.

Motorola Microcomputer division, headquartered in Tempe, Ariz., designs and manufactures computer systems and boards based on the VMEbus standard architecture.

Interphase is the market leader for high-performance VME disk controllers and is also a major supplier of networking controllers for the VMEbus.

Motorola is one of the world's leading manufacturers of electronic equipment, systems and components produced for worldwide markets. Products include two-way radios, pagers, cellular telephone systems, semiconductors, defense and aerospace electronics, automotive and industrial electronic equipment, data communications and information processing and handling equipment.

Based in Dallas, Texas, Interphase Corporation is a leading manufacturer of high-performance mass storage and disk controllers for open systems. The company sells to computer manufacturers, VARs (Value Added Resellers), and end users through a worldwide sales network. Interphase was founded in 1974 and had its initial public offering of stock in 1984.

#90268p7841 09/25/1990 ~PR Newswire

CHARLOTTE, N.C. (SEPT. 25) PR NEWSWIRE - Four new Trevira(R) polyester fiber variants for nonwoven applications now are available from Hoechst Celanese Textile Fibers.

Two new variants, Types 183 and 283, are trademarked Celwet (TM) and are intended for what presently are rayon-dominated applications.

The other two new variants, Types 105 and 106, extend Hoechst Celanese's line of Celbond(R) bicomponent fibers for wet-lay end uses. Types 105 and 106 are for filtrations, sanitary products, wipes and medical and automotive applications.

Featuring a proprietary surface treatment, Celwet fibers produce nonwoven fabrics with high-wetting, high-wicking and outstanding absorbancy characteristics.

Those characteristics result from Celwet fibers' hydrophilic or water-friendly traits, as contrasted to the hydrophobic or water-resistant tendencies of most polyester fibers.

Fabrics of these fibers have absorption characteristics superior to standard polyester fabrics. Also, Celwet fibers are suitable alternatives to rayon in many uses, including blends, and are high-potential candidates for industrial,

personal wipes, hospital and medical, filtration and interlinings applications.

Type 183 is available currently as a high-tenacity, 1.5-denier-per-filament fiber for carding and thermal or resin bonding, as well as for hydro-entanglement. Type 283 is available as a standard tenacity, 3-denier-per-filament fiber for use when higher denier-per-filament fibers are needed.

Celbond bicomponent Types 105 and 106 short-cut fibers have a polyester core and a copolyolefin sheath. Both types are engineered for use in wet-lay processes.

Type 105 has a proprietary, adhesive-activated sheath, which forms an exceptionally strong bond when blended with a wide variety of polyester, glass pulp, rayon and polyolefin fiber products.

Type 106 Celbond bicomponent fiber has a polyester core and a copolyolefin sheath for use in 100 percent form.

Hoechst Celanese Textile Fibers is part of Hoechst Celanese Corp., a wholly owned subsidiary of Hoechst AG of West Germany, which has leading positions in chemicals, fibers, advanced materials and technologies and the life sciences.

COLUMBIA, MD (SEPT. 25) PR NEWSWIRE - The Rouse Company (NASDAQ: ROUS) announced that its board of directors, at its meeting today, elected a new member, Jeremiah E. Casey. Casey is currently chief executive-U.S.A. of Allied Irish Banks plc, and chairman of First Maryland Bancorp and its principal subsidiary, First National Bank of Maryland.

He is a career banker who was based in Ireland with Allied Irish Banks plc until 1977 when he moved to New York. In 1984 he moved to Baltimore, following a major investment by Allied Irish Banks in First Maryland Bancorp.

Casey was appointed chairman of both First Maryland Bancorp and First National Bank of Maryland in June of 1987, and he was appointed chief executive-U.S.A. of Allied Irish Banks plc in June of 1989. Casey is 50 years old, and lives in Baltimore with his wife and four children.

In an additional action, the board of directors named Mathias J. DeVito president of the company. DeVito, currently chairman and chief executive officer, will fill the vacancy created by the tragic death of the late president, Michael D. Spear, in a plane crash on Aug. 24, 1990.

DeVito had previously served as president of The Rouse Company from 1973 to 1986. He has been chief executive officer since 1979 and chairman of the board of directors since 1984.

#90268p7846 09/25/1990 ~PR Newswire

MAPLE GROVE, MN (SEPT. 25) PR NEWSWIRE - Computer Network Technology Corporation (CNT) (NASDAQ: CMNT) today announced a series of extensions to its Channelink line of Extended Channel Networking products.

Channelink now provides high speed support for remote tape controllers, terminal control units and Front End Processors. These extensions broaden Channelink's ability to connect mainframes and peripherals by using a technology referred to by CNT as "Extended Channel Networking."

Channelink's support for remote tape controllers allows IBM 3480 and 3420 tape subsystems to communicate with hosts as if they were locally connected - regardless of the distance between the host and the tape facilities.

New aspects of this product include support for DS-3 communications links, substantial performance improvements and support for IDRC tape drives. These features improve use of the DS-3 bandwidth and sharing of tape facilities among multiple hosts.

The second area in which the connectivity of Channelink products has been extended is support for IBM 3174 terminal control units. Channelink enables the organization to connect a remotely located 3174 to the host channel.

Both the 3174 and the host treat the communication as if it were a local connection, even though there many be thousands of miles between the two. This approach allows the organization to improve user response time while sharing mainframe channels among several peripheral devices.

The third area where Channelink has been expanded is support for remote, channel attached Front End Processors (FEPs). Channelink provides a local channel connection for FEPs that are any distance from the host. By adding a FEP to a Channelink Extended Channel Network, CNT customers can provide locally connected response time for remote users while saving the hardware and software costs associated with FEP operation.

Computer Network Technology Corporation develops, manufactures, and markets the Channelink family of Extended Channel Networking systems. Channelink provides high-speed interconnection of mainframe computers, database computers and peripheral devices over unlimited distances. The company's common stock is traded on the national over-the-counter market under the NASDAQ symbol CMNT.

CONTACT: Doug Anderson of Computer Network Technology, (612) 420-4466; or Marian Briggs or Nancy Johnson of Padilla Speer Beardsley, (612) 871-8877, for CNT.

#90268p7856 09/25/1990 ~PR Newswire
HAMBURG, W.Germany (SEPT. 25) PR NEWSWIRE - The German publishing group Heinrich Bauer Verlag today reported that consolidated sales rose by 6.7 percent in 1989 to reach DM 2.139 billion. Press and media sales increased by 6.8 percent to reach DM 2.103 billion. International sales, the company said, rose 28.5 percent to DM 395 million.

Domestic growth, with only a 2.8 percent rise, was sluggish as expected. Since advertising revenues remained more or less stagnant, the sales growth achieved resulted from distribution.

In other international markets, the outstanding event of the year under review was the introduction of the women's magazine First For Women in the North American market. In the face of very strong competition, First For Women is now selling almost three million copies per issue. The magazine Women's World could also enhance its market position this year.

In the GDR, Heinrich Bauer said the company is trying to acquire several regional newspaper publishing enterprises with whom cooperation agreements have already been in effect since March 1990. To this end preliminary expenditures have been already made amounting to DM 60 million.

CLARKSBURG, WV (SEPT. 25) PR NEWSWIRE - Alamco Inc. (AMEX: AXO) announced that Alamco has satisfied its remaining obligations with respect to the guarantee of partnership debt through the payment of $500,000 in cash to Alamco's primary bank lender and, in addition, Alamco has completed the

settlement of one pending investor lawsuit (Hill v. Alamco, et al.) and has partially settled another suit (Smith v. Alamco, et al.).

These settlements will not have a material adverse effect on Alamco's financial condition.

John L. Schwager, Alamco's president and chief executive officer, stated that the $500,000 debt guarantee payment in mid-September completely discharged Alamco's liability under its guarantee of partnership debt, which at the end of 1986 approached $27 million and which was reduced to $3,550,000 in November 1987 as part of an agreement with its primary bank lender. He also noted that settlement discussions are continuing on the two remaining investor lawsuits.

Alamco, headquartered in Clarksburg, W.Va., is an independent producer of gas and oil in the Appalachian Basin with a major operating concentration in West Virginia gas fields.

#90268p7858 09/25/1990 ~PR Newswire

HOUSTON (SEPT. 25) PR NEWSWIRE - Contracts to install 120 miles of pipe in the Gulf of Mexico have been awarded to OPI International, the newly formed operating company of Offshore Pipelines, Inc. (OPI) (NYSE: OFP). These contracts bring the value of OPI's total domestic backlog to $45 million.

Construction of some of the pipelines began in early September, with the balance of the projects to begin later this month.

Transtex Gathering Systems, Inc. has contracted OPI International to install the first of three potential lines comprising a newly formed gas gathering system. OPI International will begin construction in late September on 40 miles of 12-inch pipeline from High Island Block A69 to High Island Block 109. The Transtex line is the longest ever to be built by OPI International.

Installation of a 21-mile, 10-inch pipeline for Conoco's Grand Isle project began earlier this month, while construction of Transcontinental Gas Pipe Line's 9.4-mile, 10-inch line in High Island and 12.2-mile, 16-inch line in Mustang Island are both scheduled for late September.

Hall Houston has contracted OPI International to build seven lines totaling 23.3 miles. Approximately 24 miles of pipeline have been contracted by other companies including Mobil, TEPCO, Union Exploration partners and Union Pacific Resources.

More than 400 hourly workers have been hired in the last 45 days by OPI International to help build the pipelines contracted for September startup and

to complete construction projects at the company's fabrication facility in Orange, Texas.

Richard R. Foreman, president and chief operating officer of OPI, underscored the significance of the new contracts. "These new contracts are good news for the Gulf Coast economy, Gulf Coast workers and OPI.

"Considering that OPI led the industry in 1989 by laying 183 miles of pipeline contracts totaling 120 miles are very important to us. We're also pleased that we're putting to work so quickly three of the construction vessels we purchased last month from Brown & Root."

On Aug. 17, 1990, OPI purchased 23 marine construction vessels from Brown & Root, International, Inc.

OPI operates one of the largest marine construction fleets in the world, capable of handling a full range of large-capacity and deep- water construction projects worldwide. OPI is an industry leader in laying marine pipelines; installing, salvaging and refurbishing offshore platforms; and fabricating offshore platforms and their component parts.

READING, PA (SEPT. 25) PRNEWSWIRE - Robert W. Cardy today was named by the board of directors of Carpenter Technology Corp. (NYSE: CRS) as president and chief operating officer and a director of the corporation.

Cardy, currently executive vice president, assumes the post on Nov. 1. He will succeed Dr. Adolph J. Lena, who will reach age 65 in October and will be retiring from the president and chief operating officer position on Oct. 31.

The board also announced that Lena will retire as a director at the annual stockholders meeting on Oct. 30 but will maintain a part-time consulting relationship with the specialty metals manufacturer. He will report to Paul R. Roedel, chairman and chief executive officer.

Cardy was named executive vice president in October 1989. He served as vice president-sales and marketing from July 1987 until being named to that post.

He joined Carpenter in 1962 as a sales representative at the Dayton, Ohio, service center. He subsequently served as a sales representative in Dallas and then Tulsa, Okla., until 1969 when he was named branch manager at the Indianapolis branch. A year later, Cardy was named central district manager, Indianapolis. In 1973, he was named western district manager at Los Angeles.

In 1977, Cardy was promoted to general sales manager for the Carpenter Steel Division, then was elevated to Steel Division vice president-commercial in January 1979. He became vice president-commercial in 1982.

Lena was named president and chief operating officer in July 1987, having served as executive vice president since April 1986. He joined Carpenter as a consultant in 1985.

Lena came to Carpenter with 32 years of specialty metals experience. He had served in executive positions at both Allegheny Ludlum Steel Corp. and AlTech Specialty Steel Corp. He is a past chairman of the Specialty Steel Industry of the United States. He also is a past chairman of the Pittsburgh Chapter, past national trustee, and past national secretary of the American Society of Metals.

SAN FRANCISCO (SEPT. 25) PR NEWSWIRE - Chevron U.S.A. Inc. today announced an increase in the posted prices it will pay for all grades of crude oil in its Eastern Region (U.S. areas outside of California and Alaska). The increase of $4.75/bbl was effective Monday, Sept. 24, at 7 a.m. Chevron will now pay:

$37.00 for West Texas Intermediate $35.00 for West Texas Sour
$37.00 for South Louisiana Sweet (Onshore)

New prices for all grades other than those from California and Alaska are reflected in Chevron's Eastern Region Crude Oil Price Bulletin 90-E51. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

CUT BANK, MT (SEPT. 25) PR NEWSWIRE - MSR Exploration Ltd., (AMEX, Toronto: MSR) an Alberta Public Company operating with head offices in Cut Bank, Montana, today announced that exploding world oil prices are having an extraordinary impact on its production revenues. Oil and gas revenues for the month of August 1990, alone, exceed production revenues received during the entire third quarter (three months) of 1989. During third quarter 1989, MSR received an average of some $16.75 per barrel - compared to an average of $24.00 per barrel for the month of August 1990.

In addition, the company, through its subsidiaries operating in the United

States, has drilled eight new (100 percent owned) successful wells. Four of these wells are in Texas, on the newly acquired OMNI oil and gas properties purchased during the second quarter of this year - along with four successful completions in northern Montana. A total of six of these wells have been completed for production, with two remaining to be completed - one in Texas and one in Montana. A total of 250 barrels per day of new production has been indicatd by early completion testing.

Additional drilling will continue on the company's Texas, Montana and North Dakota properties, during the next quarter, to take advantage of current W5 1/4h oil prices.

MSR Exploration Ltd. is listed on both the American Stock Exchange and The Toronto Stock Exchange under symbol ''MSR''.

#90268p7866 09/25/1990 ~PR Newswire

SAN DIEGO (SEPT. 25) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced a family of products called Virtual Private Data Services (VPDS) which will eventually enable users to bring the power of supercomputers to the desktop. The first two members of that family, high-capacity Switched T1 and Switched T3 services, are slated for commercial availability in 1991.

"MCI is positioning itself as a catalyst for emerging advanced applications such as LAN networking, image transfer, disaster recovery and mainframe networking," said Don Heath, MCI's vice president of data marketing. "Our switched T1 and T3 services are only the beginning."

MCI is demonstrating the new capabilities with Cray Research, Inc. and IBM Corporation here at the Telecommunications Association's annual meeting. The demonstrations show how advanced services can be provided through short duration, high capacity, long distance connections between computing equipment.

Cray Research is demonstrating remote supercomputer access using MCI's switched T3 circuits to remotely access a Cray supercomputer in Minneapolis from a Sun workstation in San Diego. The supercomputer, running on an FDDI LAN in Cray's research facilities, will be connected by a Switched T3 circuit to the workstation for only as long as is required to run an application. The demonstration shows how switched wideband service can increase commercial, scientific and research productivity in the 1990's and beyond.

IBM Corporation is using MCI switched T1 circuits to demonstrate a variety of commercial applications which include LAN-to-LAN interconnection, image

transfer, and the sharing of widely separated computing facilities. IBM's applications demonstrate how switched T1 can effectively be used to increase computer productivity in a commercial environment.

T1 circuits, which are equivalent in capacity to 24 telephone lines, and T3, which is equal to 672 voice lines, are currently available only as dedicated circuits or with reserve services that require advance reservations.

"From CAD/CAM to industrial design, from financial modeling, product testing to automated ordering, businesses are relying on data processing more and more to survive," said Heath. "Computers today process at rates of billions of operations per second, but with existing dial-up services, can communicate at only thousands of bits each second. MCI is dedicated to breaking that communications bottleneck that prevents businesses from exploiting the true power of today's computers."

#90268p7873 09/25/1990 ~PR Newswire

DALLAS (SEPT. 25) PR NEWSWIRE - Dorchester Hugoton Ltd. (NASDAQ: DHULZ), a Texas limited partnership, announced today that on Sept. 14, 1990, notice was given to Howard C. Wadsworth Inc. to effect its immediate removal as a general partner of the Partnership. Dorchester's general partners continue to manage and operate the Partnership pursuant to the provisions of its partnership agreement.

As previously reported, James E. Raley Inc. became a general partner of Dorchester by virtue of a merger with James A. Ford Inc., which was effective on Aug. 16, 1990. Preston Peak, president of P.A. Peak Inc., general partner of Dorchester, praised this change, stating, "James E. Raley, the president and sole shareholder of James E. Raley Inc., the successor in interest to the general partnership interest of James A. Ford Inc. brings to the Partnership valuable expertise in the natural gas industry. Since 1984, Mr. Raley has practiced as an engineering consultant and has dealt with natural gas operations, gas contract disputes, and natural gas litigation. He is a member of the Steering Committee of the Natural Gas Supply Association. Formerly, as the president of Dorchester Gas Producing Co., Mr. Raley had reponsibility for the operation of the properties now owned by the partnership."

After the change in general partner, Howard C. Wadsworth resigned as the general manager of Dorchester, effective Aug. 23, 1990. As a result, Dorchester made severance and related payments approximating $216,000 to Howard C. Wadsworth, or for his account, which will adversely affect the Partnership's earnings for the quarter ending Sept. 30, 1990.

In response to the notice of removal of Howard C. Wadsworth Inc. as a general partner, Howard C. Wadsworth and Howard C. Wadsworth Inc. filed suit in the 134th Judicial District Court of Dallas on Sept. 20, 1990, against Preston A. Peak, P.A. Peak Inc.; James E. Raley, James E. Raley Inc.; Dorchester Hugoton Ltd.; and Hugoton Nominee Inc. seeking to avoid such removal and, on Sept. 21, 1990, obtained a temporary restraining order prohibiting steps to remove Howard C. Wadsworth Inc. as general partner or to terminate insurance coverage for Wadsworth and his dependents. At this time, the general partners of Dorchester do not anticipate that such litigation will have a material adverse impact upon the Partnership.

Dorchester Hugoton Ltd., is a Dallas-based producer of natural gas and its depositary receipts are traded on the NASDAQ National Market System under the symbol DHULZ.

COSTA MESA, CALIF. (SEPT. 25) PR NEWSWIRE - The board of directors of ICN Biomedicals Inc. (AMEX: BIM), yesterday declared a special one-time cash dividend of three and one-half cents a share on the corporation's common stock in addition to the regular quarterly cash dividend of three and one-half cents a share.

Both the special dividend and the regular dividend are payable Nov. 1, 1990 to shareholders of record Oct. 16, 1990.

ICN Biomedicals said the board declared the special dividend to recognize the continued growth and strong performance of the company.

For the first fiscal half of 1990, ICN Biomedicals reported net income of $4.7 million, or 42 cents a share, on sales of $68.3 million. That compared to net income of $2.5 million, or 23 cents a share, on sales of $27 million in the first six months of 1989.

The regular dividend of three and one-half cents equals 14 cents a share on an annualized basis.

ICN Biomedicals, listed on the American Stock Exchange, is a leading supplier to the world biotechnology and clinical diagnostic marketplace.

MINNEAPOLIS (SEPT. 25) PR NEWSWIRE - Possis Corporation (NASDAQ: POSS) announced today its preliminary unaudited results for its fiscal year ended July 31, 1990. Total revenues were $19.1 million compared to $11.5 million a year ago. A profit of $.67 million or $.08 per share compares to a loss of $4 million or $.50 per share last year. FY 1990 sales and earnings results included a non-recurring net payment of $1.8 million from Ebara Corporation in conjunction with a licensing agreement on waterjet products for Japan and Southeast Asia.

Results show revenues up 66 percent over the preceding year. The sales increase is attributable to strong growth in all of its operating entities. Technical Services revenues increased from $7.8 million to $9.7 million for a 25 percent increase; waterjet equipment sales rose from $2 million to $5 million, a 150 percent increase; and medical product sales showed its first significant sales of $.5 million. Net payments on sale of heart valve patents increased 26 percent.

The company's annual report with audited figures is scheduled to be mailed to shareholders in early November.

#90268p7884 09/25/1990 ~PR Newswire

WILMINGTON, DEL. (SEPT. 25) PR NEWSWIRE - Du Pont (NYSE: DD) and American National Can have signed an agreement to cooperate in a program that will encourage the recycling of rigid plastic bottles, such as syrup and multilayered ketchup bottles, and other types of plastic materials not now being widely recycled.

"Both companies have demonstrated that plastic containers can be recycled and manufactured into new bottles and many other useful products. This alliance between the leading packaging manufacturer and one of the leading plastics producers allows us to work together to accelerate the development of economical and useful end-markets," said Jean-Pierre Ergas, ANC chief executive officer.

"This partnering effort benefits everyone, including consumers," said Archie Dunham, Du Pont group vice president -- polymer products. "It adds other types of post-consumer plastic to the mix of those that can be recycled while providing quality resin to American National Can, a major producer of bottles."

The first demonstration of this cooperative development is expected to occur early next year in Chicago. Chicago was selected because of the existing facility of the Plastic Recycling Alliance, a joint venture between Du Pont and Waste Management Inc. (NYSE: WMX). The new agreement will involve the

joint development of plastic sorting technology through the PRA as well as the development of end-use markets for all grades of plastics.

PRA's recycling capability will be expanded from its current stream of polyethylene terephthalate (PET) soda bottles and high density polyethylene (HDPE) milk jugs and laundry detergent bottles.

The rigid multilayered plastics will be collected by Waste Management through its "Recycle America" curbside pickup program. PRA will process the collected plastic containers into a form for use in the joint development program between American National Can and Du Pont.

American National Can, based in Chicago, is a $4.3 billion multinational manufacturer and marketer of a broad line of metal, glass and plastic packaging products.

Du Pont, of Wilmington, is a diversified, multinational company with manufacturing and processing operations in 39 countries on six continents that had 1989 sales of $35.5 billion.

Headquartered in Oak Brook, Ill., Waste Management of North America, a subsidiary of Waste Management Inc., is the nation's largest provider of residential and commercial recycling collection services.

DAYTON, OHIO (SEPT. 25) PR NEWSWIRE - USAir Express will significantly expand service at Dayton International Airport this fall. USAir Express, operated by Jetstream International of Dayton, will inaugurate non-stop service to Nashville, Tenn.; Roanoke, Va.; Cincinnati; Knoxville, Tenn.; and Fort Wayne, Ind., and increase existing non-stop service to Louisville, Ky. and Indianapolis.

Jetstream International, a wholly owned subsidiary of USAir Group, Inc. (NYSE: U), will provide the new service using 19-passenger Jetstream 31, pressurized, prop-jet aircraft.

On Oct. 1, USAir Express will inaugurate four daily roundtrip flights between Dayton and Cincinnati, as well as one daily roundtrip between Dayton and Fort Wayne.

Starting Nov. 1, USAir Express will begin four daily roundtrip flights between Dayton and Nashville, two daily roundtrip flights between Dayton and Roanoke and three daily roundtrip flights between Dayton and Knoxville.

Also on Nov. 1, USAir Express will improve the frequency of existing service from Dayton by adding one additional daily roundtrip between here and Indianapolis and two additional daily roundtrips to Louisville.

"USAir Express is pleased to add these new destination opportunities for Dayton area residents," said Keith D. Houk, president of Jetstream International. "All the new flight times have been scheduled to assure convenient connections with the approximately 10,000 seats USAir and USAir

Express offer daily from USAir's Dayton hub."

James R. Wood, director of Dayton International Airport, said that "this new service added by USAir Express is another example of USAir's efforts to build traffic at the Dayton hub. These new flights will bring in travelers who have not in the past connected through Dayton. The flights will also provide Dayton-area leisure and business travelers with service to additional destinations. We hope the community will support these flights."

By Nov. 1, USAir Express will offer 65 daily flights from Dayton International Airport, an increase from the Sept. 1 schedule of 48 USAir Express flights.

#90268p7905 09/25/1990 ~PR Newswire

CHICAGO (SEPT. 25) PR NEWSWIRE - Multipress Division of Consolidated American Industries, Inc. today announced a joint agreement with Wes-Tech Automation Systems under which Multipress will market automated small press systems built on modular Tech-Trak conveyor platforms developed by Wes-Tech. The announcement was made at Assembly Technology Expo, held at O'Hare Expo Center.

Multipress, headquartered in Columbus, is the largest U.S. manufacturer of small hydraulic "C"-frame bench presses and other equipment. Wes-Tech, based in Buffalo Grove, Ill., custom designs automated assembly systems using its proprietary Tech-Trak conveyor system.

"There is a strong demand for automated press operations that incorporate such functions as product testing, quality control and statistical process control " said David Greene Lilly, president of Consolidated.

Multipress presses are widely used in the automotive, appliance and electrical industries for such operations as forming, staking, riveting, swaging and assembly. Multipress was also the first press design to be approved by the Food and Drug Administration (FDA) for food-processing use. More than 50,000 Multipress units are now in use world wide.

Working with Wes-Tech, Multipress will be able to combine robotics, vision inspection and other advanced technologies in a single turnkey system, Lilly said.

Wes-Tech and Multipress have already worked together to develop a $2-1/2 million assembly system for precision automotive components. This thirty-station system includes three Multipress Model MP-1.5 bench presses and 250 feet of a new design Tech-Trak HSI (high speed index) conveyor.

According to Robert J. Weskamp, president of Wes-Tech, the new assembly system will produce a completed part every 1.7 seconds, while a conventional system would have required 3 to 4 seconds per part.

"This is a significant accomplishment for a system of this kind," said Weskamp. "But it is only the beginning of what we expect to do together with Multipress."

CONTACT: D.J. Calvin, vice president, or Stephen Springer, 614-228-0185, both of Consolidated Industries, Inc.; or Richard Gilchrist, vice president, sales/marketing of Wes-Tech Automation Systems, 708-541-5070.

#90268p7909 09/25/1990 ~PR Newswire

TAMPA, FLA. (SEPT. 25) PR NEWSWIRE - Although the Persian Gulf region lies some 9,000 miles from this Central Florida city, Anheuser- Busch has taken the first step to provide thirsty U.S. troops over there with Tampa-brewed O'Doul's.

"We've worked overtime to brew and package this gift," said Renaul Abel, plant manager of the company's Tampa brewery. "Now, it's on its way."

Anheuser-Busch announced earlier this month that it was donating 22,000 cases of O'Doul's non-alcoholic brew to U.S. military personnel serving in the Persian Gulf region.

This morning, a convoy of ten tractor trailers loaded with the full shipment of O'Doul's pulled out of the Anheuser-Busch complex in Tampa en route to Charleston, S.C. It will be loaded onto "The Achiever," a cargo ship, at the Port of Charleston and transported to American troops taking part in Operation Desert Shield.

Among those who worked to make it happen is Corbett Caldwell, a Tampa brewery employee whose son, David, is serving in Saudi Arabia with the 101st Airborne Division.

"This was a labor of love for all of us," Caldwell said. "As a company and as ordinary Americans, we enjoyed pitching in to get it done right and done on time. And of course I'm hoping that at least one cold can of O'Doul's -- which I helped package here in Tampa -- ends up in my son's hands in the desert."

Caldwell was among several dozen brewery employees who took part in a brief

ceremony just before the trucks left the Tampa brewery and headed north on Highway 75 for Charleston.

"We always take a lot of pride in our work," said Abel, the brewery's plant manager. "But we take special pride when we consider that this shipment is going to American men and women who answered the call and who're doing a very tough job in a very faraway place."

The St. Louis-based company decided to donate a total of 22,000 cases (528,000 cans, or the equivalence of 1,600 barrels) of O'Doul's non-alcoholic brew to American troops after reading a news report quoting a reportedly hot and thirsty tank crewman who urged Anheuser- Busch to "send in the Budweiser plane."

However, due to religious and governmental restrictions, alcoholic beverages cannot be distributed in Saudi Arabia.

The O'Doul's shipment of 230 pallets is expected to arrive in the Middle East in October, officials said, and will be distributed to U.S. troops serving in the desert, aboard ship and elsewhere.

"And when it arrives," Abel said, "we hope that our troops understand that along with O'Doul's, we're also sending our best wishes for success and for a rapid and safe return home."

OKLAHOMA CITY, OKLA. (SEPT. 25) PR NEWSWIRE - As part of an ongoing program to strengthen its marketing operations, Kerr-McGee Refining Corp. plans to sell company-operated retail properties in the southeastern United States. The sale of these properties will enable the company to concentrate its retail marketing efforts in the Midwest and certain Texas markets, where its brand presence is strongest.

Kerr-McGee is soliciting bids for 95 properties, including 52 operating stations, 31 closed stations and 12 undeveloped sites, located in Alabama, Arkansas, Florida, Louisiana, Mississippi and Tennessee.

Funds generated from the sales will be used to build and acquire additional retail units in the company's primary branded marketing area, where Kerr-McGee continues to emphasize both its branded wholesale and retail operations.

Kerr-McGee and its Triangle Division will continue to aggressively expand unbranded wholesale operations in the Southeast and all other states where the

company currently markets wholesale petroleum products.

#90268p7914 09/25/1990 ~PR Newswire

STRATFORD, CONN. (SEPT. 25) PR NEWSWIRE - The new and highly affordable Pitney Bowes Model 9100 facsimile system features revolutionary inkjet printer technology which allows for noiseless operation and crisp, clear image on plain paper at low cost and easy maintenance.

"We have taken a proven technology utilized by the computer industry for years and applied it to fax. The result is a highly reliable, cost-effective, "true" plain paper machine that delivers superb copy quality. The print mechanism in the Model 9100 is the same found in the more than one million inkjet printers installed around the world," according to Meredith Fischer, vice president, marketing, Pitney Bowes Facsimile Division. "The 9100 responds to our customers' call for a fax with advanced convenience features, plain paper printing, and a reasonable price. We believe it will make a significant impact on the fax industry."

The Model 9100 features extra-fine, 300 x 300 dpi/11.8 x 11.8 dpmm, printing and scanning. This, combined with plain paper printing and CCITT error correction, ensures clear transmission of fine print copy, detailed drawings and halftones.

A natural replacement for thermal fax in smaller businesses, branch offices or incremental "department" machines, the Model 9100 is equipped with many memory functions designed to save time and provide hassle-free service.
Multi-station transmission enables the transmission of the same document to as many as 100 stations sequentially. Specific documents also can be sent

selectively to different destinations. In case of line failure, memory feature redials and retransmits from the page where disconnection occurred. In addition to a standard memory capacity of 12 pages, the 9100 can be configured with optional memory of 42, 72 and 132 pages.

"Saving time and money is critical in business today -- that's why the Model 9100 is designed to transmit and receive letter size originals in as little as 12 seconds," Fischer said.

Fischer also noted that the Model 9100 is equipped with diagnostic software which allows engineers in Pitney Bowes Diagnostic Centers around the world to identify and correct 70 percent of all problems over the telephone. "The customer's business can resume almost immediately, without having to wait for a service tech." If, however, on site service is required, the company provides a 4 hour service response through over 6,000 Pitney Bowes technicians in locations worldwide.

The Model 9100 is compact, 17.8" x 15" x 9.1" (w x d x h), and weights 26 lbs. (12kg) and is available through a variety of financial terms, including Pitney Bowes rental.

Pitney Bowes, Inc. (NYSE: PBI) is a $2.9 billion, multinational manufacturing and marketing company that provides mailing, shipping, copying, dictating, facsimile and retail systems, as well as business supplies and services, and product financing.

DALLAS (SEPT. 25) PR NEWSWIRE - Future Communications Inc., (NASDAQ: FCMI) today announced earnings for its three and nine months periods ended July 31, 1990.

For the third quarter ended July 31, 1990, net income increased 61 percent to $324,649, from the $202,168 earned during the third quarter of 1989. For the nine months ended July 31, 1990, net income was $820,364, compared to $704,150 the previous year. This represents a 17 percent increase in net income for the first nine months of operations.

Earnings per share for the 1990 periods were $0.081 for the third quarter and $0.205 for the nine months on 4 million shares outstanding; compared to $0.060 for the 1989 third quarter and $0.21 for the nine months on 3,345,298 shares outstanding.

Sales for the 1990 third quarter were $636,667, compared to $548,881 for 1989,

and for the current nine months were $1,553,054, compared to $2,386,533 for the previous year's period.

Commenting on the interim results, Sergio Bosco, president and chief executive officer, stated, "The improved earnings, higher margins and superior balance sheet ratios including working capital, were anticipated. They are positive proof of the benefits to be derived from our three faceted business plan." The divestiture of cable system operating responsibility and overhead in exchange for a fixed revenue interest; maximizing of revenues from sales of the company's net vast library of programming; and cable system acquisition, construction and sale.

Future Communications is engaged in the development, implementation, marketing and sales of innovative nostagic programming; the development, acquisition and sale of SMATV cable systems; and the furnishing of specialized telecommunications consulting services.

NEW YORK (SEPT. 25) PR NEWSWIRE - Effective yesterday, Moody's Investors Service assigned ratings to four tax anticipation note issues for Maricopa County school districts, the first school district note sales in the state. Three school districts received Moody's highest ranking of "MIG 1": Phoenix Union High School District No. 210, Paradise Valley Unified School District No. 69 and Deer Valley Unified School District No. 97. Cartwright Elementary School District No. 83 notes were assigned a "MIG 2". The current offerings,

which were negotiated on Sept. 24, are part of the Maricopa County Arizona School District Tax Anticipation Note Financing Program.

Moody's said, "The three 'MIG 1' ratings reflects the districts' reasonable cash flow projections, modest level of borrowing and generally early segregation of funds for note repayment. The 'MIG 2' rating for the Cartwright Elementary School District reflects that district's tighter financial operations and the later segregation of funds."

Recent legislation in Arizona allows school districts to issue TANs provided that the principal amount does not exceed 90 percent of the total year's tax collections for operations. The current offerings are expected to lower interest costs for the issuing districts and will reduce the districts' reliance on warrants for cash flow purposes.

The debt affected by the ratings includes $7.8 million for Phoenix Union High School District No. 210, $5.05 million for Paradise Valley Unified School District No. 69, $2.6 million for Deer Valley Unified School District No. 97, and $2.4 million for Cartwright Elementary School District No. 83.

#90268p7921 09/25/1990 ~PR Newswire

TROY, Mich. (SEPT. 25) PR NEWSWIRE - Inacomp Computer Centers, Inc. (NASDAQ: INAC) today announced the signing of an agreement with US Integrated Technologies (USIT), marking the end of an extensive search for a high-quality inexpensive compatible PC manufacturer. The agreement could signify major expansion opportunities for Inacomp through its new dealer programs, TeamWorks.

Inacomp, which recently closed its year with revenues over $500 million, will become the primary distribution arm for USIT products in all computer channels.

Inacomp is adopting the USIT personal computer product line as its dominant entrant in the low-cost, compatible market. Rick Inatome, Inacomp president and CEO stated, "We are very excited about our partnership with USIT. This product line will permit us to expand into new market segments, and will provide out TeamWorks franchisees and resellers with additional opportunities." TeamWorks is Inacomp's recently announced dealer program which offers a variety of options to meet resellers' needs.

Dr. Richard Hsiao, USIT president, stated the agreement resulted largely from a common philosophy on how products should be brought to market. "USIT had the choice of either building a retail organization from scratch based on our market philosophy, or partnering with an organization that shared our views. It turned out that we were two companies in search of one another," Hsiao said.

"Rick Inatome and I were both looking for a relationship in which vendors and resellers become partners in solution-oriented selling and niche markets," continued Hsiao.

Inatome agreed. "This partnership will give us the ability to provide other solutions to niche markets and end users. To remain competitive, the Inacomp network needs a variety of products to offer their customers," Inatome said.

As an example of USIT's niche marketing, Hsiao cited the company's "The Home Office," an 80286, 16 MHz computer which includes a 40 megabyte hard drive, VGA interface, 2400 baud modem, FAX board, voice mail and integrated software, including free membership to an on-line service, all for a suggested retail price of $2,795.

"We spent many months looking for an inexpensive compatible manufacturer who met our standards for high quality and could meet our strategic goals for expanding into new markets through our TeamWorks program," Inatome said. "The fact that USIT is an American company whose products qualify under the 'Buy America' Act was important to us and to the government contracts we are currently pursuing. Another winning factor is that USIT boards incorporate surface-mount technology, a known contributor to product dependability and reliability."

Inatome explained that the original list of potential vendors began with over 15 candidates. "We wanted to be sure that we continued in the Inacomp tradition of providing customers with the very best in products and services. We feel we have met that goal with USIT."

Inatome further stated that the long search and the ultimate signing of the agreement was a strategic decision to address the anticipated period of leveling growth and continued margin pressure.

Inacomp Computer Centers, Inc. markets microcomputer systems and related products and services through over 230 company-owned, franchised and affiliate locations across the country. Corporate offices are in Troy.

USIT is the American manufacturing facility for Universal Scientific Industrial Co. (USI), a 14-year-old company well known for its pioneering developments in hybrid and surface-mount technology. USI's many customers include IBM, Wang, ITT, General Motors, Ford and Chrysler.

Since its founding in the winter of 1989, USIT has realized dramatic growth through independent computer resellers and large OEMs. The company currently ships in excess of 15,000 computers per month. USIT is located in Richmond, Calif.

#90268p7924 09/25/1990 ~PR Newswire

MIAMI (SEPT. 25) PR NEWSWIRE - Despite generally declining sales in the beverage alcohol industry, Bacardi Breezer, a recently introduced line of low-alcohol, rum-based refreshers, has bucked market trends and leaped from its 49th place ranking, when launched nationally earlier this year, to fifth place and climbing, among all spirit-based beverages sold in the country, today announced Bacardi Imports, Inc.

"In the mid-1980s, when Bacardi Breezer was in development, we wanted to better, different and profitable," remembers Alfredo Piedra, senior brand manager for Bacardi Breezer.

Bacardi Breezer handily met Piedra's objectives. Sales were 35-40 percent ahead of projections during 1988 and 1989 when the product was available in only 23 percent of the country. In addition, despite varying distribution channels state-by-state and changing consumer drinking habits, both retailer and consumer response was extremely favorable.

The situation became even rosier in 1989, when 755,000 cases of Bacardi

Breezer were sold in the 10 states in which it was available -- 250,000 cases more than anticipated.

Bacardi Breezer began full-scale, nationwide distribution in April 1990. "We are looking at selling well over four million cases in 1990," projects William Tovell, vice president of sales at Bacardi Imports. "Other brands generally expect to sell only a few hundred thousand cases of a new label in its first year."

"When we started developing Bacardi Breezer," explains Juan Grau, president of Bacardi Imports, "we noticed that low-alcohol beverages, including wine coolers, were strong. But, not wanting to participate in the increasingly crowded wine cooler category, we virtually created our own, with a rum-based refresher able to compete against all low-alcohol beverages, including beer and wine."

Other factors contributing to Bacardi Breezer's success so soon after exiting the starting gate, according to Grau, are its great- tasting flavor and packaging, as well as its superior top-shelf, premium image.

Bacardi Imports, Inc., based in Miami, is the sole marketer and distributor of Bacardi Rum, the nation's best-selling spirit since 1979, as well as Bacardi Breezer and Martini & Rossi sparkling wine and vermouths.

SAN FRANCISCO (SEPT. 25) PR NEWSWIRE - Regional nonprofit health and human services agencies face growing demands on their resources, and the business community can provide important support for many of these agencies by redoubling efforts to assist this year's United Way of the Bay Area (UWBA) campaign, according to Jim Sullivan, vice chairman of San Francisco-based Chevron Corp.

As the UWBA's single largest source of funding for more than 20 years, Chevron has a long history of support for United Way. Chevron's combined employee, retiree and corporate contribution to United Way in 1989 was $4.3 million. The employee/retiree goal for 1990 is $2.68 million, and Chevron's corporate contribution will be tied to the increase in the average employee contribution. In recent years, Chevron's total gift has accounted for about 8 percent of UWBA's annual budget.

"Chevron has a long tradition of giving to United Way," said Sullivan, who also is a member of UWBA's board of directors and chair of the campaign Industry Group. "The organization makes a profound difference in the quality

of life in our community, and Chevron is committed to our leadership role in helping fund the programs of United Way's family of agencies," he said. "We hope our contributions will continue to grow and that there will be a broader base of support from all Bay Area companies and employees, in order to create a healthier community for everyone."

Approximately 65 percent of United Way's budget comes from employees in private companies, government, educational and nonprofit organizations. Corporate gifts account for 30 percent of pledges, and the remaining 5 percent of the budget comes from other donors.

GERMANTOWN, Md. (SEPT. 25) PR NEWSWIRE - Microlog Corporation (NASDAQ-NMS: MLOG) announced that an agreement has been reached between Microlog and Racal Recorders, Limited which provides for the granting of an exclusive license to Racal to market Microlog's voice-processing technology throughout Europe.

The final agreement is expected to include a license fee and a commitment by Racal to buy Microlog voice-processing products. "Microlog's versatile microcomputer-based technology gives Racal the flexibility to incorporate the voice platform on a variety of European-manufactured computers. This flexibility will speed acceptance of the product in Europe's various postal-telecommunications jurisdictions," commented Nigel Vaughan, Racal Recorders, Limited, marketing director.

J.G. Hartwell, chairman and chief executive officer of Microlog, stated, "With Racal Recorders' large customer base and marketing expertise, this agreement could prove very profitable for both companies."

Racal Recorders, Limited, headquartered in the United Kingdom, is one of the world's largest manufacturers and suppliers of professional recording equipment for the communications and instrumentation markets. The company is a unit of Racal Electronics, which has worldwide sales in excess of $3.25 billion.

Microlog Corporation designs, assembles, markets, and services voice processing systems with a variety of applications. The company also provides, through its subsidiaries Old Dominion Systems Incorporated of Maryland and Old Dominion Services, Inc., performance analysis and technical and administrative support services, primarily to a prime contractor to the U.S. Navy.

NEW YORK (SEPT. 25) PR NEWSWIRE - Noise Cancellation Technologies, Inc. (NCT) (NASDAQ: NCTI), today announced the signing of a joint development agreement with a major European aerospace manufacturer whose reputation for quality is known worldwide. The agreement calls for the two companies to develop systems for enhanced passenger comfort by quieting aircraft passenger compartments. The aerospace company will fund the development of the quiet cabin. NCT will use patented computer technology to actively (electrically) cancel unwanted noise in the passenger compartment. While the first system will be developed for passenger planes, future cabin quieting applications include helicopter cabins, military transport planes, automobiles and trucks. "This is a marvelous opportunity for NCT to expand its business into the substantial

aerospace industry," said John McCloy II, NCT chairman. "We anticipate significant revenue from the integration of our technology into aerospace and automotive passenger cabins."

"Because NCT's system is selective," explained McCloy, "only the offering noise is abated, leaving speech, music, hazard warnings and other desired sounds unaffected. In this way, we actually control sound rather than simply eliminate it allowing us to achieve the optimum level of comfort and safety for the air traveler."

The noisy aircraft cabin environment results in passenger discomfort and fatigue. NCT will use small microphones conveniently located in passenger seats to "listen" to the noise heard by passengers. NCT then will use its patented computer technology to analyze the structure of the noise wave and generate 'anti-noise,' a sound wave 180 degrees out of phase with the offending noise. The 'anti-noise,' projected via loud speakers, will effectively attenuate the offending noise leaving the passengers in a zone of quiet.

Noise Cancellation Technologies, Inc. is a world leader in active noise and vibration abatement. NCT is headquartered in New York City with research and development facilities in Linthicum, Md., and a European base in Cambridge, U.K.

HEWLETT, N.Y. (SEPT. 25) PR NEWSWIRE - Spurred on by significant deposit inflows that have enabled it to accumulate a substantial amount of cash to lend, Hewlett, N.Y.-based Anchor Savings Bank FSB (NASDAQ: ABKR) has launched

a major promotion -- "Year of the Loan."

Contrary to trends in the thrift industry as a whole, Anchor's deposits have jumped by more than 8.5 percent or $588.2 million from June 1989 to June 1990. According to financial data released after the first half of the year, the bank had $7.4 billion in deposits at its more than 120 branches in New York, New Jersey, Georgia and Florida.

"Anchor has renewed its commitment to provide financing for homes, automobiles and other consumer needs and will do so with rates that are extremely competitive and with unparalleled customer service," said Chairman and Chief Executive Officer James M. Large, Jr. "Anchor is back in the loan business in a big way and our goal is to earn a reputation as the metropolitan area's premier consumer loan bank."

Anchor's "Year of the Loan" promotion consists of television, radio and print advertising as well as point of sale material, including Chinese fortune cookies containing information on the bank's various loan products. Also included in the "Year of the Loan" promotion is a 500,000 piece direct mail campaign and a sweepstakes with two grand prizes of a seven-day trip for two to Hong Kong and $1,000 spending cash.

All of the "Year of the Loan" promotional material features "Sir Loans-A-Lot," a friendly looking dragon being portrayed in his new home, automobile, and other situations that are a direct result of financing provided by an Anchor loan or mortgage.

The television commercials and print ads to be used in conjunction with the promotion feature real Anchor employees. This is the second year of the highly successful campaign with the slogan "We're Your Anchor Bankers...Here for You." More than 200 Anchor Bankers from as far away as Florida and upstate New York paid their own transportation costs to New York City in June to audition for the 16 available roles.

The "Year of the Loan" promotion was unveiled at a cocktail reception held for Anchor employees at the Meadowlands Sheraton. Anchor officials noted that when it comes to loans, rates and customer service are the only factors that distinguish one bank from another.

"We want to include all Anchor Bankers in the promotion right from the start because its success or failure rests almost entirely on their shoulders. With the extraordinary talent and dedication of Anchor's staff, I have no doubt that the program will exceed even our highest expectations," said Large.

Increasing Anchor's loan business is a crucial component of the bank's plan to come into compliance with new federal capital standards within two years. The plan was recently approved by the Office of Thrift Supervision, the federal agency charged with overseeing the thrift industry bailout.

Anchor already has achieved several of the plan's major goals including the sale of some assets such as its mortgage subsidiary, Residential Funding Corporation; the sale of deposits at 18 of its Georgia branches; and a return to profitability. In the quarter ended June 30, Anchor reported net income of $40.9 million. Core profits which exclude one-time gains from the sale of assets totaled $1.9 million.

"Although we're not yet out of the woods, Anchor has taken enormous strides toward regaining its health. With all we have going for us, including one of the strongest franchises in the nation, excellent name recognition and one of the most qualified and dedicated staffs in the business, I'm extremely optimistic," concluded Large.

Anchor Savings Bank is among the 25 largest U.S. thrifts. It operates 122 branches in four market areas: 62 in metropolitan New York/New Jersey, 18 in upstate New York, 24 in Georgia and 18 in Florida.

FAIRFAX, VA. (SEPT. 25) PR NEWSWIRE - Richard F. Tucker, vice chairman of Mobil Corporation and president of Mobil Oil Corporation (NYSE: MOB), announced today that he has elected to retire on May 1, 1991, when his current three-year term as a Mobil Corporation director comes to an end. He will be 64 when he retires. Beginning Oct. 1, he will undertake a broad review of Mobil's changing business environment, according to Allen E. Murray, chairman and chief executive officer.

"In view of the turbulence and uncertainty facing our industry," Murray said,

"and given Mr. Tucker's plans, I felt this was the appropriate time to ask him to take on this study of the major changes that will influence Mobil's future direction." Murray cited the Middle East crisis, fast-changing events in Eastern Europe, growing environmental concerns, and the uncertain economic outlook as examples of external forces affecting the industry.

"Mr. Tucker will consult widely with government and industry leaders throughout our areas of operations to assure that we have the broadest possible access to informed views on the outlook for Mobil's core businesses," Murray said. "I feel certain that we will benefit immeasurably in the months ahead from his review."

To free Tucker for his new assignment, administrative responsibilities within his portfolio will be realigned on Oct. 1. P.J. Hoenmans, president, exploration and producing division, and E.A. Renna, president, marketing and refining division, will report to Murray. J. P. Keehan, vice president, Middle East, will report to Renna. W.A. Bork, vice president, sales and supply, and J.E. Crawford, vice president, research, engineering and environmental affairs, will continue to report to Tucker.

WALL, N.J. (SEPT. 25) PR NEWSWIRE - The continued growth of all New Jersey Resources Corporation (NYSE: NJR) subsidiaries has been the key ingredient in NJR's financial success, company executives told a group of research analysts and institutional investors here today. NJR's excellent long-term financial prospects are reflected in a consistent dividend strategy that has resulted in 13 straight years of common stock dividend increases, NJR officials said.

NJR is the parent company for New Jersey Natural Gas Company (NJNG), Commercial Realty & Resources Corp. (CR&R), and NJR Energy Corporation (NJR

Energy).

NJR is committed to promoting growth in current earnings, cash flow and long-term asset values, company Chairman and Chief Executive Officer James T. Dolan Jr. told visitors to NJR's new corporate headquarters in Monmouth Shores Corporate Park. A focus on natural gas distribution, commercial real estate development and natural gas and oil exploration and production activities has been directed toward the enhancement in the value of the company's common stock.

NJNG, NJR's principal subsidiary, has achieved strong, though moderating, customer growth in 1990. In the past five years, NJNG has added nearly 70,000 new customers, increasing its customer base by almost 30 percent.

Expansion of the utility's rate base, which reflects this growth, along with an adequate percentage of common equity supporting the rate base, enhance the company's long-term earnings potential. NJNG's approved rate base has grown from $196 million to $333 million since July 1986. At the same time, NJNG's allowed common equity ratio has increased from 45.4 percent to 52.6 percent.

State regulators approved a $17.3 million, or six percent, increase in base rates for NJNG, effective March 26. On Aug. 7, NJNG filed another petition to increase base rates by $14.8 million because of higher operating, financing and capital construction costs associated with its growth.

NJR's non-utility subsidiaries have also realized progress in 1990. CR&R's level of developed space increased to more than 800,000 square feet with an occupancy rate of more than 95 percent, while NJR Energy increased its base of proved reserves of natural gas and oil to record levels for the fifth consecutive year.

#90268p7947 09/25/1990 ~PR Newswire

AUSTIN, TEXAS (SEPT. 25) PR NEWSWIRE - Motorola's (NYSE: MOT) Microprocessor Products Group today announced that it is reducing the prices of the 16-, 20-, 25-, and 33 MHz members of its 88000 RISC (Reduced Instruction Set Computer) microprocessor family.

The 16 MHz version of the 88100 is now priced at $49 in 1,000 piece quantities. Executing 14 MIPS (million instructions per second), the 16 MHz 88100 reduces the cost of the 88000 family to as low as $3.50 per MIP. The 88100 MPU features the integration of both floating-point math and integer units on a single chip. According to Motorola, the lower cost of the 88000 makes RISC technology more affordable to a much broader base of applications.

Pricing was also released for the higher speed 20-, 25- and 33 MHz devices. The prices for 20-, 25-, and 33 MHz speeds is $75, $101 and $150 respectively, all in 1,000 piece quanitities.

The 88000 offers the highest integrated RISC solution available in volume production. In addition to the 88100 RISC MPU, Motorola offers the 88200 CMMU (cache and memory management unit). The 88200 incorporates 16Kbytes of high-speed cache memory, a cache controller and memory management unit on a single piece of silicon. A complete RISC solution can be designed with one 88100 MPU and two 88200 CMMUs (one as an instruction cache and the other as a data cache).

The 16 MHz version of the 88200 CMMU is priced at $87 in 1,000 piece quantities. A complete 88000 RISC solution with one MPU and two CMMUs is now available for $223. Pricing was also announced for the higher speed 88200 CMMUs. The price of the 88200 in 20-, 25-, and 33 MHz speeds are $116, $153 and $232, respectively, all in quantities of 1,000.

Motorola is now accepting orders at these new prices for delivery beginning Jan. 1, 1991.

The 88000 has been endorsed by more than 60 manufacturers that support a wide range of applications including high performance computers, workstations and networking products. These companies include Avalon, BBN, Data General, Dolphin Server Technology, Encore Computer, Force, Motorola Computer Systems Division, Norsk-Data Europe, Northern Telecom, Omron Tateisi Electronics, Opus Systems, Philips Data Systems, Plessey, Prometa, Quotron, Sanyo/Icon, Tadpole Technology, Tektronix, Thomson and Unisys.

SOUTH WINDSOR, Conn. (SEPT. 25) PR NEWSWIRE - On Monday, Oct. 1, four established industrial distributors will officially join together to operate under one name: Cardinal Supply, Inc. Together they will continue a long tradition of serving northeast industry with strong local support, computer and technical knowledge and systems contracting savvy, Cardinal Supply announced today.

Martin B. Perry, president and CEO of Cardinal Supply will conduct a "ceremonial unveiling" for a small group of key customers, suppliers and the business media at 10:30 a.m. at the company's corporate headquarters in South Windsor, Conn. He will outline future plans and direction for the newly formed business, introduce the Cardinal management team, and unveil the new corporate identity to key customers, vendors and invited guests.

The four business units who are joining together are: Brian Supply of Providence, R.I.; Lindquist Supply of Bridgeport and Hartford, Conn.; Industrial Supply of Syracuse and Schenectady, N.Y. (formerly a division of Syracuse Supply Company) and Chase Parker & Woodis, a subsidiary of Brian

Supply located in Milford, Mass. All of these businesses have served northeast industry for more than 70 years, with three units having been in the business since the 1800s.

In 1989 Cardinal Industries of South Windsor, acquired these businesses in an effort to create a strong, regional supplier to northeast industry. (The trend in other parts of the U.S. has been toward large, regional distributorships.) In April 1990, Cardinal Industries announced the appointment of a separate management team to run the industrial supply operations, now dubbed Cardinal Supply, Inc.

Cardinal Supply, Inc. administers large systems contracts with GE, Texas Instruments, Raytheon, and other Fortune 500 manufacturers in the northeast. It also has on-site ordering systems -- computer links so customers can order supplies directly -- with Remington, Torrington, Bic Pen and many other northeast manufacturers. Through its six local facilities, Cardinal Supply offers these and other customers with a wide range of industrial products, equipment and services.

Cardinal Supply, Inc., sells industrial products, process control equipment, MRO supplies, pumps, compressors, power and hand tools, and perishable tooling to industry throughout the northeast. The company operates six stocking facilities in New England and upstate New York and has its corporate headquarters and main warehouse in South Windsor.

Cardinal Supply, Inc., is a wholly owned subsidiary of Cardinal Industries, Inc. (NASDAQ: CDNI).

#90268p7957 09/25/1990 ~PR Newswire

BOISE, ID (SEPT. 25) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) announced today that it has declared a dividend on its convertible preferred stock and has revised its shareholder rights plan.

The company declared a regular semiannual dividend of $1.659375 per share on its Series D (ESOP) convertible preferred stock. The dividend is payable on Dec. 28 to preferred stock shareholders of record on Dec. 13.

The company also revised its shareholder rights plan in order to further enhance the ability of all shareholders to realize the long-term value of their investment in the company. The revised plan encourages a potential acquirer to negotiate with the board of directors earlier than was likely under the previous plan.

Under the revised plan, shareholder rights will become exercisable if a person or group acquires 15 percent of Boise Cascade's voting securities. Previously, under the provisions of the plan, the rights were not exercisable until a person or group acquired 20 percent of the company's voting securities.

In addition, the stock ownership threshold for triggering the plan's so-called flip-in provision has been lowered to 15 percent from 25 percent. In general, the flip-in provision describes a process and circumstances under which each right will entitle the holder of the right to acquire shares of Boise Cascade stock having a market value equal to twice the exercise price of the right.

Boise Cascade adopted its shareholder rights plan to better enable the company's board of directors to represent shareholder interests should the company become the target of coercive and unfair takeover tactics.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

CONTACT: Scott Lamb of Boise Cascade Corp., (208) 384-7675, or after hours, (208) 343-8380.

HOUSTON (SEPT. 25) PR NEWSWIRE - Transco Energy Co. (NYSE: E) today announced that its subsidiary, TEMCO Liquids Co., has purchased a 50-percent interest in the Cameron Meadows natural gas processing facility from OXY USA, Inc. The purchase price was not disclosed for competitive business reasons.

As joint owners, both companies will be major gas processors at the facility and OXY will continue as operator. Connections were recently completed between the plant and the North High Island Offshore System (North HIOS) and the U-T Offshore System (UTOS), two large offshore gathering systems.

Located in Johnsons Bayou, La., near Port Arthur, Texas, the plant's capacity

was recently expanded from 300 million cubic feet per day (MMcf/d) to 500 MMcf/d after the relocation of the Sea Robin II plant. All of the natural gas liquids produced at the Cameron Meadows plant will be separated at OXY's Lake Charles facility.

TEMCO's president, William H. Heil, said, "When added to other currently owned capacity, TEMCO is now one of the top 20 processors of natural gas liquids in the United States. TEMCO's ongoing transition to an equity participant in gas processing facilities indicates the company's growing commitment to its liquids business."

#90268p7965 09/25/1990 ~PR Newswire

LAKE SUCCESS, NY (SEPT. 25) PR NEWSWIRE - Park Electrochemical Corp. (NYSE: PKE) today reported its second quarter performance.

Sales were $39,945,000 for the quarter which ended Aug. 26, 1990 as compared to $34,722,000 for the comparable quarter of last year. Earnings were $896,000 (18 cents per share) compared to $1,025,000 (20 cents per share) for last year's second quarter.

Jerry Shore, president, said, "We were pleased that sales for the second quarter were at record levels despite generally negative market trends. However, earnings continued under serious pressure.

"Even before the outbreak of the Iraqi-caused crisis, the signals were negative toward a market recovery this second half. It is this weakness that has put pressure on our earnings stream. The latest industry forecasts indicate 'recovery' by mid-1991."

Shore continued, "Nonetheless, we remain confident that we are investing in an industry that will regain its strength and our operations will emerge more dominant than they were prior to the present debacle."

Park Electrochemical Corp., through its subsidiaries, is primarily a manufacturer of advanced electronic circuit materials.

OLD TOWN, ME (SEPT. 25) PR NEWSWIRE - Penobscot Shoe Company (AMEX: PSO) reported Tuesday that net sales for the third quarter ended Aug. 24, 1990, were $4,154,000, up 1 percent from $4,117,000 of the comparable period in 1989. A net loss of $88,000, or 6 cents per share, was incurred in the current quarter compared to a net profit of $78,000, or 5 cents per share, a year ago.

For the nine months year-to-date, net sales were $10,100,000, down 7 percent from $10,809,000 in 1989. Net losses year-to-date total $387,000, or 26 cents per share, compared to losses of $28,000, or 2 cents per share, last year.

The company's results continue to be poor as a result of the ongoing weakness of footwear retailing, with operations being further depressed by markdowns and selloffs of excess inventory. Although recent independent surveys indicate that TROTTERS are being well received by both retailers and consumers in the Comfort Casual and Comfort Dress Shoe categories, the company does not look for improvement within the current fiscal year. Recovery should by underway in 1991 with progress expected, but growing softness in the economy does give reason for caution as we approach the new year.

At a scheduled meeting of the board of directors held today the directors voted to pay a dividend of 5 cents per share on Dec. 14, 1990, to all stockholders of record Nov. 23, 1990.

MONTREAL (SEPT. 25) PR NEWSWIRE - On Monday, Oct. 1, Air Canada becomes the first scheduled airline to ban smoking on all flights between North America and Europe.

The airline's move, which was announced in July, has received praise from various European and North American health-related groups, as well as from the United Nations' World Health Organization.

''Air Canada is pleased to have received support from such respected groups as the World Health Organization,'' said Leo Desrochers, the airline's executive vice president, marketing, sales and service. ''Such broad-based support for

our initiative will reinforce Air Canada's resolve to remain a world leader in promoting smoke-free flights to passengers.''

Air Canada becomes the first international airline to offer only nonsmoking seats on all its flights to European and North American destinations. In fact 99.8 percent of Air Canada's seats are entirely nonsmoking as of Oct. 1 -- the only exception being its flights from London to Bombay and Singapore.

#90268p7971 09/25/1990 ~PR Newswire

BOCA RATON, FL (SEPT. 25) PR NEWSWIRE - Cascade International, Inc. (NASDAQ: KOSM) today reported record-high revenues and earnings for the fiscal year ended June 30, 1990. Net income increased 64 percent to $7,749,000 or 43 cents per share from $4,716,000 or 32 cents per share a year ago. Revenues more than doubled to $52.4 million vs. $25.7 million in fiscal 1989.

John T. Sirmans, executive vice president, said he is pleased with Cascade's continued profitable growth. He attributed the company's increased profits primarily to "strong performance in our cosmetics retailing business." Higher revenues reflect both steady growth in the core business and major store acquisitions made near the beginning of the 1990 fiscal year, he said.

"We have assimilated the year-ago acquisitions over the past fiscal year and now we begin our 1991 year with a major investment in a much larger retail chain," Sirmans commented. Sirmans was referring to Cascade's Aug. 14 announcement that it had purchased controlling stock interest in Conston Corporation.

Conston, presently in Chapter 11 federal bankruptcy proceedings, is a specialty retailer of women's clothing and accessories with approximately 260 stores operating as Famous Maid, 16 Plus and Charles'. In its latest fiscal year, Conston reported sales of approximately $170 million.

Cascade is a diversified holding company with operating subsidiaries, which retails women's apparel and cosmetics in each section of the apparel market.

Cascade's proprietary cosmetics are distributed under the Jean Cosmetics name. Its retail susbidiaries for women's apparel include JB's Boutiques, Boutiques Diana, Boutiques Allison, and the recently acquired Cricket Shop chain of Florida specialty stores offering sportswear and swimwear.

#90268p7977 09/25/1990 ~PR Newswire
CHICAGO, (SEPT. 25) PR NEWSWIRE - The Amoco Corporation (NYSE: AN) board of directors today elected H. Laurance Fuller, 51, as chairman of the board and chief executive officer effective Feb. 27, 1991 with the retirement of chairman and chief executive officer Richard M. Morrow at age 65.

In addition to becoming chairman and CEO, Fuller will retain his current position as president of Amoco Corporation, a post he has held since 1983.

Also effective next February, Fuller will replace Morrow as chairman of the board's executive, contributions, salary, and nominating committees.

Prior to being elected president of Amoco in 1983, Fuller had served as executive vice president since 1981, the same year he was elected to Amoco's board of directors.

The native of Moline, Ill., joined Amoco in 1961 and has had assignments in engineering, law, refining, marketing, and supply. He became president of Amoco Oil Company, Amoco's petroleum refining, marketing, and transportation subsidiary, in 1978 after having been named executive vice president of Amoco Oil in 1977.

Fuller received a B.S. in chemical engineering from Cornell University and a law degree from Depaul University. He serves on the board of directors of The Chase Manhattan Corporation, The Chase Manhattan Bank, N.A., Abbott Laboratories, and The American Petroleum Institute. He also holds leadership positions with a number of civic, cultural, and education-related organizations.

Morrow has been chairman and CEO since 1983. He was elected president of Amoco Corporation in 1978 and a director of the company in 1976. He joined Amoco Production Company, another Amoco subsidiary, in 1948.

The West Virginia native received a B.S. in mining and petroleum engineering from Ohio State University. He is a director of First Chicago Corporation, The First National Bank of Chicago, Westinghouse Electric Corporation, R. R. Donnelley and Sons Company, Potlatch Corporation, and The American Petroleum Institute. Morrow also is active in numerous educational and civic endeavors.

#90268p7979 09/25/1990 ~PR Newswire
BURLINGTON, MASS. (SEPT. 25) PR NEWSWIRE - Ontologic, Inc. has introduced ONTOS Release 2.0, a significant upgrade of the company's second generation

object-oriented database product, ONTOS.

The upgrade offers several features that extend the capabilities of ONTOS, a full-featured, object-oriented database management system designed for interactive, network-based, data-intensive applications.

"Release 2.0 makes ONTOS the most advanced database available for distributed applications," said Seaforth M. Lyle, president of Ontologic. Like its predecessor, ONTOS R2.0 is available on multiple platforms including Sun 3, Sun 4/SPARC, Apollo, DEC Station, and OS/2.

ONTOS R2.0, which began shipping in September 1990, offers full support for multiple inheritance and C++ R2.0, as well as full data distribution across local area networks. Specialized transaction support for design applications has been further advanced with the new release.

Integrated into R2.0 is the graphical design tool which automatically generates C++ header files and database schema. Interactive database inspection and maintenance has been further simplified with the addition of a graphical browser.

Established in 1985, Ontologic, Inc. is headquartered in Burlington, Mass. The company is privately held and has sales offices in the United States and distributors in Europe, the United Kingdom and Australia.

For further information about ONTOS R2.0, contact Thomas Smither, vice president of sales and marketing, at Ontologic, Inc., Three Burlington Woods, Burlington, Mass. 01803. Telephone: 617-272-7110; Fax: 617-272-8101.

CONTACT: Seaforth M. Lyle, president of Ontologic, 617-272-7110; or R. Barry Chalfin of Chalfin Kostopoulos & Gilmore, 617-423-2096, for Ontologic

#90268p7982 09/25/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (SEPT. 25) PR NEWSWIRE - Aeroflot, the state airline of the Soviet Union, today announced that it will install collision avoidance systems from Allied-Signal Aerospace Company on new Airbus aircraft.

Paul Gralnick, president of Allied-Signal's Bendix/King Air Transport Avionics Division in Ft. Lauderdale, Fla., said Aeroflot has selected the company's Traffic Alert and Collision Avoidance System (TCAS) for five Airbus A310 aircraft now on order.

"We selected Bendix/King for our TCAS based on their recent record of certification and the superior quality of the equipment that we observed during demonstration flights," said Leonid Gavrilovich Verkhoven, director of the Department of New Science and Technology for Aeroflot. "We selected their

radar, communication and navigation equipment because we know they are the leaders in the industry."

Bendix/King was the first TCAS manufacturer to complete the Federal Aviation Administration certification process and the first to begin deliveries to airlines. The company so far has more than 3,300 TCAS orders, nearly 60 percent of the market. The world market for TCAS is expected to exceed $1.5 billion through the year 2000.

TCAS is a federally-mandated collision avoidance system that operates independently of ground-based radar stations. It informs pilots of the location of transponder-equipped aircraft in their vicinity, alerts them to potential threats and issues vertical course correction advisories, if the situation warrants.

The federal government has ordered all aircraft flying in U.S. airspace and carrying more than 30 passengers be equipped with collision avoidance systems by the end of 1993.

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), a $12 billion advanced technology company with businesses in aerospace, automotive products and engineered materials.

CONTACTS: Lee Haines, (305) 928-3369, or M. J. Ascolese, (201) 455-4674, both of Allied.

#90268p7985 09/25/1990 ~PR Newswire

HOUSTON (SEPT. 25) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that its monthly distribution to unit holders will be made on Oct. 15, 1990, to unit holders of record on Oct. 5, 1990. This distribution represents amounts payable to the trust with respect to production for the month of July 1990.

The total amount of the October distribution will be $681,312 or approximately $.03587 per unit. This distribution includes no proceeds from Jay Field due primarily to increased repair and maintenance activity at Jay. The excess expenses, amounting to approximately $17,000, will be recouped from future proceeds. Excess expenses of $89,000 associated with the Offshore Louisiana property were recouped in the current month, with a resulting distribution of approximately $263,000. Due to the nature and timing of other operating and capital projects along with fluctuation in monthly production as well as the price of crude oil, this distribution is not necessarily indicative of future monthly distributions.

As previously announced, the working interest owner has begun to escrow amounts for the Fort Worth Basin property in connection with the issue of

recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code. The trust's interest in the amount escrowed from the current month's distribution and the cumulative balance of such are $3,628.03 and $521,519.26 respectively. As stated last month, pending the possible appeal by the IRS of the previously announced favorable ruling rendered by the United States Tax Court on the Section 1254 issue, the working interest owner has made no decision on whether and when these amounts will be released from escrow.

The working interest owner has determined under the terms of the trust documents that it is eligible to escrow funds from all trust properties for the 1254 recapture issue. However, it has advised the trustee that it does not intend to exercise its rights to escrow funds, other than for the Fort Worth Basin, for this issue for the October 1990 distribution. However, the working interest owner intends to continue to monitor its estimates of relevant factors in order to evaluate the necessity of escrowing funds for this issue on an ongoing basis. The working interest owner is under no obligation to give any advance notice to the trustee or the unit holders in the event it determines that funds should be escrowed. If the working interest owner does begin to escrow such funds with respect to the productive properties, other than Fort Worth Basin, the effect on royalties paid to the trust would be significant, and in certain circumstances could eliminate distributions for a period of time.

#90268p7988 09/25/1990 ~PR Newswire

OAK BROOK, IL (SEPT. 25) PR NEWSWIRE - GTE Airfone and Eastern Airlines today announced an agreement whereby GTE Airfone will equip more than 150 of Eastern's aircraft with the Seatfone(TM) system.

The new inflight service will allow passengers on Eastern's domestic flights to place telephone calls without leaving their seats. Terms and conditions of the agreement were not disclosed.

GTE Airfone will install the system on Eastern's fleet of Boeing 727-200s and 757-200s, McDonnell Douglas DC-9-50s and DC-9-30s, and Airbus A300 aircraft, as well as any future models of these aircraft that the airline might acquire.

"The Airfone(R) service is becoming increasingly popular with our customers, particularly with business travelers," said Eastern Trustee Martin R. Shugrue. "The new Seatfone system is convenient to use, and makes travel time more productive for the business flyer."

"Eastern Airlines' decision to offer the Seatfone system to its passengers is evidence of the increasing need for this service as well as Eastern's confidence in GTE Airfone to meet those needs," said GTE Airfone President Robert C. Calafell. "Our Seatfone system provides the public with a convenient and reliable way to keep in touch while traveling."

This month, GTE Airfone began installing Eastern's aircraft with the system, and will complete the installation process by mid-1991. Eastern Airlines has offered GTE Airfone's cordless system since May 1985, when 42 Lockheed L10-11 and Airbus A300 aircraft were equipped with the Airfone service.

The Seatfone system offers Eastern Airlines' passengers use of a telephone in the center seatback of each coach row and in each first-class seatback. Air travelers activate the system with most credit cards or an AT&T Calling Card. After activating the system, the air traveler simply dials the area code and telephone number he or she wishes to reach.

Passengers may make domestic calls anywhere in the United States or Canada and international calls while inflight over the United States, including Alaska, Hawaii, Puerto Rico, the Virgin Islands, and southern Canada.

For domestic calls, GTE Airfone rates are $2 per minute, plus a $2 set-up fee per call. For international calls, the rates are $4 per minute, plus a $4 set-up fee per call. To date, more than eight million calls have been placed by air travelers using the Airfone service.

GTE Airfone, based here, provides public telephone service for travelers on airplanes and trains serving more than 1,300 commercial aircraft representing 16 domestic carriers and one international airline. GTE Railfone, a wholly owned subsidiary of GTE Airfone, provides public-telephone access on major AMTRAK routes on the East and West coasts.

CONTACT: Kevin Petschow of GTE Airfone, (708) 575-1448 or (evenings) (708) 612-8531; Karen Ceremsak of Eastern Airlines, (305) 873-6360; or (in Washington) Julia Spicer of GTE, (202) 463-5206.

SEATTLE (SEPT. 25) PR NEWSWIRE - First Bank, based in Ketchikan, Alaska, has become a member of the Federal Home Loan Bank of Seattle (FHLB of Seattle), announced FHLB of Seattle President James R. Faulstich.

First Bank became a full member and stockholder of the FHLB of Seattle on Sept. 12th. Membership in the Federal Home Loan Bank System, previously available only to savings institutions, was opened to commercial banks and credit unions through the Financial Institutions Reform, Recovery and Enforcement Act passed in August 1989. To qualify for membership, commercial

banks and credit unions must have a minimum of 10 percent of their total assets in residential mortgage loans or related assets.

"When the new Federal law was passed a year ago, First Bank immediately started the paperwork to become a member of the FHLB. However, in doing so, we found a major stumbling block - Alaska law did not conform with the Federal law," said William G. Moran, Jr., president of First Bank. "We owe many thanks to Sen. Lloyd Jones, who was instrumental in getting that law amended. Lloyd introduced a bill late in the legislative session through his Senate Transportation Committee and, with the help of Rep. Dave Donely in the House, the bill moved through the legislature in an unprecedented six days." With $180 million in assets, First Bank operates branches in Craig, Juneau, Ketchikan, Petersburg, Sitka, and Wrangell, Alaska.

The Federal Home Loan Bank of Seattle is one of 12 district banks in the Federal Home Loan Bank System. Created in 1932, the Federal Home Loan Bank System's primary purpose is to support homeownership by providing home mortgage credit to housing lenders. Through their credit and lending-related programs, the Federal Home Loan Banks make funding available to their member institutions so that they, in turn, can make home mortgage loans in their communities. Collectively, the Federal Home Loan Banks have over $160 billion in loans outstanding which represent the equivalent of three-and-one-half million residential mortgages.

The Federal Home Loan Bank of Seattle is a stockholder-owned, wholesale bank with over $8 billion in assets. The Federal Home Loan Bank of Seattle serves housing lenders in Alaska, Hawaii, Idaho, Montana, Oregon, Utah, Washington, Wyoming and the Territory of Guam.

KANATA, ONTARIO (SEPT. 25) PR NEWSWIRE - Newbridge Networks Corporation (TSE: NNC; NASDAQ: NNCXF) announced today that an agreement has been signed with Rochester Telephone Corporation (NYSE: RTC) to supply Rochester Tel and its affiliated telephone companies with equipment for their new smart digital Special Services network.

The new contract will include the complete Newbridge T-1 networking product line from low-end, narrowband multiplexers to high-end bandwidth managers and network management systems. The Newbridge products will provide Rochester Telephone with enhanced digital connectivity to its customers.

In addition, the Newbridge products and backbone partitioning software will be used to provide customers with Virtual Private Networks sharing public equipment and facilities.

Robert Ingram, Rochester Tel's network engineering director, said, "Newbridge's unique line of products and software bring intelligence and reliability to our customers' dedicated data and voice circuit needs. Sophisticated network management tools give us and our customers better control of circuit integrity, installations, changes and repairs."

"Our initial plan calls for the installation of Newbridge 3600 MainStreet(TM) Bandwidth Managers into 18 central offices in the Rochester metropolitan region," said Dave Birchenough, Rochester Tel's project manager. "We will be able to serve 90 percent of our current special services circuit with this first phase."

"This contract comes after a very successful year of working with Rochester Tel," said Peter Madsen, president of Newbridge Networks U.S. "We are extremely pleased with Rochester Tel's increased commitment and we look forward to a long term and prosperous business relationship." This agreement is in addition to an earlier contract, which allowed Rotelcom Inc., a subsidiary of Rochester Tel, to become an authorized Newbridge dealer.

The Newbridge MainStreet products are designed to meet a wide range of digital network applications. The products support a variety of data and voice interfaces, and additional features include 8kbit/s and 16kbit/s voice compression and subrate multiplexing for maximum utilization of bandwidth.

Rochester Tel and its 33 telephone companies serve more than 680,000 access lines in 14 states. Its principal operating territory is a six-county area in west central New York.

In addition to Rotelcom, it owns two other unregulated subsidiaries, RCI Long Distance, a regional interexchange carrier, and Rochester Tel Mobile Communications, which manages its cellular interests.

Newbridge Networks is an international company which specializes in the design manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States, and Europe.

#90268p8004 09/25/1990 ~PR Newswire

MORRISTOWN, NJ (SEPT. 25) PR NEWSWIRE - As a result of a slowdown in economic activities in the state, compounded by uncertainties resulting from the Persian Gulf crisis, Jersey Central Power & Light Company (JCP&L) announced today that it is deferring construction of a 230-kilovolt (kV) transmission line from Aberdeen to Red Bank (Monmouth County, N.J.). Consequently, JCP&L

is withdrawing its petition pending before the Board of Public Utilities for authority to construct the line and related facilities along a New Jersey Transit Railroad route between the two municipalities. The transmission line would also have run through the townships of Hazlet, Holmdel and Middletown.

"Since the time the line was proposed in 1988, two significant things have happened," said Carl R. Fruehling, vice president- transmission and distribution engineering and operations. "First, the state's economy, like that of the region, has slowed down substantially, a slowdown we do not expect to be reversed quickly. Second, Iraq invaded Kuwait, an event that we believe may not only cause electricity prices to increase, but may well have an adverse effect on the economy in general. We expect electricity usage to be lower than that which we anticipated a few months ago.

"As a result of the combined effects of a changing economy and steps the company took since proposing the project to enhance our existing supply system we believe this project can be deferred until sometime in the mid-1990s" Fruehling explained. "However, because future demand and economic factors can change rapidly, the company may need to seek to build the line earlier to meet developing service requirements of the area."

Prior to the economic changes in the state and the area to be served by this project, the utility had experienced five consecutive years of strong growth. During that time, the JCP&L system had established several records in all-time peak demand. During the summer of 1988, demand in the region of the proposed line had grown by 10 percent over the previous year.

To address the growth in customers and electricity usage in the region, the company had proposed construction of the 9.8 mile transmission line. The project was designed to both expand the capability and enhance the reliability of the existing power supply system.

#90268p8006 09/25/1990 ~PR Newswire

CHICAGO (SEPT. 25) PR NEWSWIRE - United States Cellular Corp. (AMEX: USM) announced today that it has received a proposal from Telephone and Data Systems, Inc. (AMEX: TDS), the holder of more than 80 percent of USM's common stock, for the transfer to USM of certain interests in Rural Service Areas (RSA Interests) representing approximately 2,458,000 population equivalents.

TDS has proposed to contribute the RSA Interests it holds to USM in exchange for an aggregate of 12,500,000 additional shares of common stock of USM comprised of 3,545,355 common shares and 8,954,645 series A common shares (plus additional consideration to reimburse TDS for investments and expenditures in respect of the RSA Interests).

Under the proposed terms, the exchange would increase TDS's ownership of USM's common stock as of June 30, 1990 from 81.5 percent to approximately 87.1 percent.

The TDS proposal is subject to negotiation and has been referred to a previously established independent committee of the USM board of directors. The independent committee has retained Lazard Freres & Co. as its financial advisor.

The proposed transaction is subject to approval by the independent committee of the USM board of directors and of the shareholders of USM, to definitive documentation and to compliance with regulatory requirements. The proposal was made by TDS in compliance with an agreement entered into by USM at the time of USM's initial public offering.

TDS has advised USM that it is the holder, directly or indirectly, of RSA Interests in 29 rural service areas in 17 states, as a result of FCC-sponsored lotteries that were concluded in December 1989. Based on 1989 Donnelly marketing service estimates, the RSA Interests held by TDS and proposed to be transferred represent approximately 2,458,000 population equivalents.

USM owns, operates, invests in and has the right to acquire interests on cellular telephone systems on a total of 116 metropolitan and rural areas in 32 states. At Aug. 31, 1990, the interests that the company owned or had the right to acquire represented approximately 9.6 million population equivalents.

The proposed combination would allow USM to combine the ownership and operations of all the RSA Interests now owned by TDS, including a number of rural service areas that are contiguous to metropolitan statistical areas or RSAs that USM already operates.

NEW YORK (SEPT. 25) PR NEWSWIRE - The First Boston Corporation today announced that Charles H. Mayer has joined the firm as a managing director and chief information officer (CIO), effective immediately.

Mayer, 43, has more than 21 year's experience in technology and information systems. Since 1989, Mayer had served as chief operating officer of Tech Partners, a computerized equity arbitrage trading firm, where he was responsible for operations, accounting, technical services and administration.

From 1987-1989, he served as a director in the MIS department at Salomon

Brothers, responsible for systems and all international operations. Before that he was a principal and director of systems at Morgan Stanley (1980-87), where he oversaw the development and launch of their Trade Analysis and Processing System (TAPS), and participated in the development of the automated trading support system (PAIRS).

Mayer served as principal at Arthur Young, responsible for the systems implementation practice in New York City (1973-80); and as director of computer auditing at Lehman Brothers (1971-73).

Robert Raziano, head of finance, administration, systems and operations at The First Boston Corporation said, "Charlie's appointment underscores First Boston's commitment to technology and information systems. His broad experience in both the information management and financial services businesses makes him ideally qualified to lead this important area of our firm."

Mayer received a B.A. in Industrial Relations (1969) and an M.B.A. in Finance (1973) from Seton Hall University (N.J.).

The First Boston Corporation is a full service investment bank serving the Americas, with headquarters in New York. It is an operating unit of CS First Boston, Inc.

DES MOINES, IA (SEPT. 25) PR NEWSWIRE - Allied Group, Inc. (NASDAQ: ALGR) board chairman and president, John E. Evans, announced today that the company's board of directors has approved a stock repurchase program to acquire up to $1 million of the company's common stock.

Completion of the program, expected within 12 months, is dependent upon market conditions, with no guarantee as to the exact number of shares to be repurchased.

The repurchase program is not in response to any tender offer or any other offer for shares of the company, nor is this announcement a request or offer for tender of shares to the company. The company has no present intention to cause its shares to be delisted or deregistered as a result of this purchase program.

Allied Group is a holding company that through its subsidiary companies offers property-casualty insurance, excess and surplus lines insurance, data processing, and investment services. As of June 30, 1990, the company's book

value per share was $16.94. The stock closed Monday, Sept. 24, 1990 at a price of $12.50 per share.

DETROIT (SEPT. 25) PR NEWSWIRE - Quest BioTechnology, Inc. (NASDAQ: QBIO) (Quest) announced that effective Sept. 17, 1990, it acquired approximately 34 percent of AM Diagnostics, Inc.'s common stock pursuant to its reorganization and recapitalization.

As a proponent of AM Diagnostics' Sixth Amended Plan of Reorganization, Quest has the option, after certain conditions have been met, to purchase 100 percent of the common stock of Nippon Monitor K.K., AM Diagnostics Japanese subsidiary.

Quest's involvement with AM Diagnostics began in 1987 with the selection of the AM Diagnostics current management team. Since that time, management has adopted a turnaround philosophy centered on customer satisfaction, product quality and new product development.

AM Diagnostics, with subsidiaries in Japan, the United Kingdom, Canada, France and Germany, along with manufacturing facilities in Indianapolis and a North American distribution network, provides Quest with a pathway into domestic and international distribution networks and markets for diagnostic products.

In addition, by combining technologies between Quest and AM Diagnostics, Quest believes there is significant potential for a next generation of diagnostic products using Quest's QUADROMA(TM) technology for the preparation of bispecific monoclonal antibodies.

"The reorganization of AM Diagnostics has been largely driven by customers' acceptance of our new and improved analyzers which facilitates the company's ability to fill a $5 million backlog of orders," said Eugene I. Schuster, chairman of AM Diagnostics and chairman, president and chief executive officer of Quest. "The turnaround of AM Diagnostics continues, and management believes that the most difficult tasks of the reorganization have been accomplished."

Quest BioTechnology, Inc. is a development stage company organized to acquire, develop, and commercialize biotechnology and human health care products and processes.

Quest is organized into two groups, the Technology Development Group which manages Quest's two wholly owned subsidiaries, PolyCell, Inc. and Quest Blood Substitute, Inc., and the Clinical Diagnostics Group, formed to implement turnarounds of diagnostics-based businesses.

CONTACT: Mary J. Lore of Quest BioTechnology, Inc., (313) 873-0200.

#90268p8025 09/25/1990 ~PR Newswire

WASHINGTON (SEPT. 25) PR NEWSWIRE - Unit Investment Trusts, investment companies that purchase fixed portfolios of selected bonds or stocks, increased their deposits through offerings in August of $515.6 million for a year-to-date total of $4.73 billion in 1990 compared to $7.36 billion through August 1989, according to statistics compiled by the Investment Company Institute.

Tax-free bond trusts issued shares in August with deposits of $408.05 million for a year-to-date total of $3.46 billion compared to $5.24 billion year-to-date in 1989. Taxable bond trusts totaled $74.1 million in August for a 1990 total of $902.5 million compared to $1.34 billion for the prior year-to-date. Deposits to equity trusts totaled $33.5 million in August bringing the year-to-date total to $370.2 million compared to $784.1 million for the previous year-to-date.

There were 70 new tax-free bond trusts issuing shares in August, five new taxable bond trusts and four new equity trusts.

In terms of maturity, long-term bond trusts with an average weighted maturity of more than 15 years were the most commonly offered in August with $390.2 million in shareholder deposits.

Year end 1989 data on the total market value of unit trusts issued and outstanding through December 1989 indicates a total of 11,527 unit trusts with a market value as of December 1989 of $108.77 billion. According to responses of 17 sponsors, there were a total of 10,475 tax free bond trusts representing a year-end 1989 market value of $92.28 billion, 886 taxable bond trusts representing year end 1989 market value of $11.63 billion, and 166 equity unit trusts reporting year-end 1989 market value of $4.87 billion.

SAVANNAH, GA (SEPT. 25) PR NEWSWIRE - M&M Supermarkets announced today the conversion of their 14 stores in Savannah, Waycross, Jesup and Statesboro, Ga. to Kroger Food Stores.

"The name change would take place on or about October 29," according to David Polk, M&M president.

The Kroger Co., operators of 1,234 Kroger Food and Drug Stores in 24 states, has been the parent company of M&M Supermarkets since December 1985. M&M Stores wil become part of the Atlanta marketing area of Kroger, operators of 120 Kroger Stores in Georgia and South Carolina.

"We realize this transition has not been without inconvenience to our customers and employees," stated Paul Smith, president of the Atlanta K.M.A. "The payback will be the opportunity to blend the vast resources of Kroger Atlanta and the dedicated M&M employee group to greatly enhance customer service and value in the Savannah area," Smith added.

"The community services long provided by M&M in Savannah has been an important factor in the long history of the company. This is a tradition long embraced by Kroger Atlanta and one we intend to continue," Smith continued.

Kroger Atlanta operates two Food and Drug Combination Stores in Savannah and recently converted the M&M Supermarket in Dublin, Ga., to a Kroger Food Store.

The combination of Kroger and M&M in Savannah will employ 1,300.

#90268p8041 09/25/1990 ~PR Newswire

SAN MATEO, CA (SEPT. 24) PR NEWSWIRE - Interactive entertainment software giant Electronic Arts (NASDAQ: ERTS) today delineated its six-part strategy for Sega(R) Genesis(R), the leading 16-bit video-game console.

"With this plan, and our track record in 16-bit software, our goal is to become the dominant third-party supplier on Genesis," said Bing Gordon, vice president of marketing.

Part 1 of the strategy is to reprogram EA's portfolio of "hits" on 16-bit computers. This phase began last June when EA started shipping Genesis versions of Populous(TM) and Budokan: The Martial Spirit(TM).

Zany Golf(TM) will be ready by September; Lakers vs. Celtics and the NBA(R) Playoffs(TM), and either Battle Squadron(TM) or Sword of Sodan(TM) will ship by Christmas.

In addition, EA has in its vaults at least a dozen best-selling 16-bit computer games which, though inappropriate for an 8-bit system like Nintendo(R), could be ported to the Genesis.

Part 2 is to develop original EA titles that really take advantage of Genesis' power. For example, an all-new version of John Madden Football(TM), with improved graphics and digitized speech, is now being readied for a Christmas kickoff.

Part 3 is to reprogram the 16-bit floppy-disk-based hits from other publishers continuing what has become a very successful Affiliated Labels co-marketing program.

At least eight new titles are being readied for EA by New World Computing, Cinemaware, Ubisoft, Three-Sixty Pacific, and Ocean; the first products resulting from these Genesis-specific development agreements will be announced at the January 1991 CES.

Part 4 is to extend EA's strong entertainment software distribution and marketing support to Genesis retailers, most of whom already carry EA software. "Because we are already a leading PC software vendor at retailers like Babbage's, Electronics Boutique, and Toys R Us, we can get better shelf placement and stronger merchandising support," explained Gordon.

Part 5 extends the strategy to Europe, where Genesis is known as Megadrive. EA's European division will ship its first titles in November, after translating each into local languages.

Distribution will be handled exclusively by Virgin Mastertronic, whose Managing Director, Nick Alexander, said, "We're delighted to take on the distribution of EA products for the Megadrive. It's first-class software like EA's that will ensure that Megadrive keeps its number-one position."

Part 6 looks to the East. EA has already delivered its first product, Budokan: The Martial Spirit, to Sega Japan, which has the rights to license 20 Electronic Arts titles. "Although we've yet to realize any revenue from this licensing agreement, it could end up being the most significant licensing deal that we have ever done," said Gordon.

#90268p8045 09/25/1990 ~PR Newswire

PITTSBURGH (SEPT. 25) PR NEWSWIRE - Nippon Steel Corp. of Japan was found in contempt of court Monday by a magistrate of the U.S. District Court for the Eastern District of Pennsylvania in Philadelphia, it was announced today.

The ruling arises out of a patent infringement lawsuit brought against Nippon and others by Allegheny Ludlum Corp. (NYSE: ALS), Pittsburgh, on June 8, 1989.

The Allegheny Ludlum lawsuit charged patent infringement of a process for manufacturing grain-oriented silicon electrical steel. The case followed earlier attempts by Allegheny Ludlum to reach an amicable settlement which Nippon Steel rejected.

Federal Magistrate Edwin E. Naythons ruled that Nippon had violated a court order requiring the production of certain proprietary and confidential information. He described Nippon's misconduct as causing a "flagrant waste of judicial resources" and an unnecessary cost to U.S. taxpayers. In making the contempt citation, he imposed a fine of $10,000 to be paid within 10 days.

The trial of the patent infringement case was originally scheduled for April 1990 and was subsequently rescheduled for September.

Nippon previously sought an extension of the trial date, and the trial is now scheduled for November 1990.

"A contempt finding is rare, particularly against a foreign corporation. We are very pleased with the magistrate's ruling," says John B. Williams, attorney with Collier, Shannon & Scott of Washington, D.C., representing Allegheny Ludlum.

Grain-oriented silicon steel, which possesses unique magnetic characteristics, is used in high efficiency electrical equipment, including power transformers, distribution transformers, large generators and a wide range of small transformers. Allegheny Ludlum's patent disclosed a specific melt composition for the steel, as well as various heat treatment steps in the processing of

the steel, that further enhance its magnetic properties.

Allegheny Ludlum is a leading producer of a wide range of specialty materials, including stainless steels, electrical steels and high temperature alloys. The company reported sales of $1.2 billion in 1989.

#90268p8055 09/25/1990 ~PR Newswire

AKRON, OH (SEPT. 25) PR NEWSWIRE - Roadway Services, Inc. (NASDAQ: ROAD) reports revenue for the third quarter ended Sept. 8 of $703,522,000, compared with revenue of $625,294,000 in the third quarter last year, which ended Sept. 9, 1989.

Net income for the third quarter this year was $34,528,000 or $.88 per share compared with $23,612,000 or $.60 per share in 1989.

For the 36 weeks ended Sept. 8, revenue was $2,013,041,000 compared with revenue of $1,802,718,000 for the first three quarters a year ago. Net income for the 36 weeks this year was $73,837,000 or $1.88 per share compared with net income of $65,581,000 or $1.67 per share for the comparable period in 1989.

Results for the quarter reflect a surge in demand during late July and early August related to shipper concern over the potential for a work stoppage at United Parcel Service, a major competitor.

"While felt to some degree at our LTL carriers, the impact was most significant at Roadway Package System (RPS), our small package specialist," said Joseph M. Clapp, chairman and president.

Earnings comparisons for Roadway Express, the company's largest operating subsidiary, showed improvement from third quarter results a year ago as a result of improved yield and moderate gains in productivity. Freight composition and revenue yield were slightly and temporarily affected by some increase in package business as discussed above. Roadway Express net freight rates were 5.9 percent above those of last year's third quarter.

Escalating fuel prices due to the Middle East crisis necessitated the adoption of fuel surcharges by most of the operating companies. The Roadway Express surcharge was implemented August 22 at 1.2 percent and is currently at 1.7 percent.

"These surcharges are solely for the purpose of recovering the increased cost of fuel in the present circumstances and will be adjusted up or down as appropriate," said Clapp.

Since the companies delayed the adoption of this mechanism, only a portion of the increased fuel expense for the quarter was recovered.

Third quarter tonnage for Roadway Express, the company's principal operating subsidiary, increased 3.0 percent from last year, which reflects increases of 3.5 percent in LTL tons, shipments weighing less than 10,000 pounds each, and 1.0 percent in truckload tonnage.

"Third quarter results reflect a combination of underlying improvements in several of our operations and of business circumstances unique to this period " said Clapp.

"Sustaining these improvements will be increasingly important in the face of difficult economic circumstances," he said, noting that tonnage levels at Roadway Express are now flat to slightly below those of a year ago.

Roadway Services owns Roadway Express, Inc., one of the nation's largest motor freight carriers; Spartan Express, Inc., a regional carrier serving the central and southern regions; Viking Freight, Inc., a regional carrier serving the western region; Roberts Express, Inc., a critical shipment carrier; and Roadway Package System, Inc., a carrier serving shippers in the small package market.

FORT WORTH, TX (SEPT. 25) PR NEWSWIRE - Food Lion, Inc., (NASDAQ-NMS: FDLN) the North Carolina based supermarket chain, has purchased 128 acres from the Perot Group for the construction of its new Dallas/Fort Worth food distribution center. The announcement was made by Tom Smith, chairman of the board, chief executive officer and president of Food Lion, and Ross Perot, Jr. of The Perot Group.

Food Lion, one of the nation's largest and fastest growing supermarket chains, will be the anchor tenant of The Perot Group's Alliance Gateway development. Alliance Gateway is a 2,500-acre master planned office and industrial park, bisected by 6.5 miles of State Highway 170.

The Gateway development is bordered by Intersatate Highway 35W on the west and U.S. Highway 377 and the Union Pacific Railroad on the east. Alliance Gateway is one of the three projects of The Perot Group's 11,000-acre Alliance regional development program.

Food Lion's distribution center will be located on the south side of Henrietta Creek Road, west of U.S. Highway 377. The first phase of construction will bring the facility to 735,000 square feet and is scheduled to be completed by the late summer of 1991. Phase II construction, for which a timetable has yet to be determined, will bring the facility to a total of 1.2 million square feet.

The new distribution center will be served by the Union Pacific Railroad and, when fully built, is expected to receive 2,300 to 2,500 rail cars of groceries per year.

"We are pleased that Food Lion has chosen the Alliance Gateway as the location of its new facility," Perot said. "Alliance Gateway offers a strategic location for companies such as Food Lion, which need multimodal tranportation capabilities. We are excited about the positive impact Food Lion will have on the Metroplex economy and welcome them to North Texas."

The construction of the distribution center follows the company's plans to enter the Dallas/Fort Worth market. Earlier this year, Food Lion announced

plans to open 30 to 40 supermarkets in the Dallas/Fort Worth Metroplex during the summer and fall of 1991, making it one of the largest supermarket chains in the area.

When Food Lion first opened stores in Jacksonville, Florida, in the summer of 1987, food prices were reduced by six percent, according to a Florida Times Union survey. Food Lion officials expect the same results for the Metroplex. "Food Lion's presence in this market will save every man, woman, and child in the Metroplex more than $100 per year on their grocery bill," Smith said.

CONTACT: Mike Berry, or Bill Burton, (817) 877-3100, both of The Perot Group; Mike Mozingo, Food Lion, Inc., (704) 633-8250.

#90268p8067 09/25/1990 ~PR Newswire

PEABODY, MA (SEPT. 25) PR NEWSWIRE - Webster Industries, a leading manufacturer of plastic trash bags, announced that its RENEW trash bags, the nation's first bag made from over 80 percent recycled plastics, and its heavier-weight basic line GOOD SENSE trash bags, made from over 50 percent recycled plastics, have been certified by Green Cross -- a private, not-for-profit organization that sets standards for environmental products.

RENEW and GOOD SENSE bags contain an unprecedented 24 percent of post-consumer waste. RENEW and GOOD SENSE, at present, are the nation's first and only plastics products to receive the certification.

Rajeev Bal, president of Webster Industries, stated, "The Green Cross certification is added proof of Webster's commitment to employing innovative methods to solve the nation's growing solid waste problem. We are able to put recycling efforts to good use by utilizing such a high percentage of post-consumer and industrial waste in our trash bags."

Bal added that the Green Cross certification will allow consumers to easily indentify, and purchase, products that truly benefit the environment. By using the highest possible level of recycled materials, Webster Industries preserves natural resources (such as oil) and reduces the amount of solid waste going into landfills.

The Green Cross certification independently verifies a manufacturer's claim to using maximum, state-of-the-art recycled materials. By establishing high standards for recycled content claims, the Green Cross certification provides consumers and retailers with independent assurance that a product manufacturer is making a significant contribution to solid waste reduction.

As one of the nation's largest recyclers of plastics, Webster Industries reclaims more than 50 million pounds of plastics each year. Every box of RENEW for example, contains an average of two pounds of plastic that would have

otherwise required incineration or disposal in a landfill. Webster's branded trash bags, including RENEW and GOOD SENSE, are sold through both grocery and non-food outlets, such as mass merchandiser, drug and hardware stores.

Headquartered in Peabody, Mass., Webster Industries has been a pioneer in pro-environment technologies for over two decades. In addition to their progressive recycling efforts, Webster continues to seek innovative ways to help the environment through source reduction, product improvements and consumer education.

CONTACT: Gary Swain of Webster Industries, 508-532-2000, ext. 147; or Cindy Drucker of Cone Communications, 617-227-2111, for Webster Industries.

HUNTINGTON BEACH, CALIF. (SEPT. 25) PR NEWSWIRE - McDonnell Douglas Space Systems Co. (MDSSC) announced today that the Space Data Division of Orbital Sciences Corp. in Chandler, Ariz., has been selected for further negotiations to develop an affordable booster subsystem for the Ground-Based Surveillance and Tracking System (GSTS) program.

McDonnell Douglas (NYSE: MD) is conducting the GSTS Technology Validation Experiment for the U.S. Army Strategic Defense Command in Huntsville, Ala. The program is sponsored by the Strategic Defense Initiative Organization (SDIO). The experiment will resolve issues associated with midcourse surveillance, track and discrimination.

The GSTS is a key element in the Phase One architecture for the SDIO and is also a necessary element for any Limited Protection System. GSTS sensor data sent to the ground for processing, are used to distinguish warheads from decoys, establish reentry vehicle trajectories and points of impact, and assist intercept planning.

The major subcontractors to McDonnell Douglas on the GSTS program are Honeywell, Clearwater, Fla.; Hughes Aircraft, El Segundo, Calif.; SPARTA, Huntsville, Ala.; and TRW, Huntsville, Ala.

MADISON, NJ (SEPT. 25) PR NEWSWIRE - The board of directors of Schering-Plough Corporation (NYSE: SGP) today authorized the purchase of up to $1 billion of the company's common stock.

Robert P. Luciano, chairman and chief executive officer, said, "While the company continues pursuing appropriate acquisitions and business partnerships as part of our strategic plan, we are undertaking this share repurchase program because current market conditions have made the stock an exceptionally good value."

The company expects to purchase the shares in open market transactions from time to time, depending upon prevailing market conditions. Existing cash balances and operating cash flows will be used to fund the share repurchase program. The repurchased shares will be used for general corporate purposes, including employee benefit plans.

As of June 30, 1990, there were approximately 226,940,000 shares outstanding.

Merrill Lynch & Co. will act as exclusive brokers on the transactions.

SHELBY, N.C. (SEPT. 25) PR NEWSWIRE - Shelby Federal announced changes in its operating charter at its annual stockholders meeting held Sept. 20, 1990. The institution will no longer operate as a savings and loan association, but rather will be officially chartered as a federal savings bank. Effective September 20, the new name is Shelby Federal Savings Bank.

The bank also announced that two prominent Shelby men have been named to its

board and that the bank will open its first branch next year in the Cleveland Mall.

G. Dean Whisnant, president and chief executive officer, said, "The new charter and new name more accurately describes what we have become. With the advent of checking accounts and consumer loans, our business has become much more like a bank than a savings and loan association."

Shelby Federal Savings Bank will operate with the same staff as before. Savings accounts continue to be insured up to $100,000 by the Federal Deposit Insurance Corporation (FDIC).

The bank also announced the appointment of Robert J. Arey, Sr. as chairman of the board of directors. Arey has been a member of the Board for more than 20 years. A native of Cleveland County, he is a graduate of Shelby High School and is married to the former Lorraine Clay. They have two children, Robert J. Arey, Jr. and Kim, now Mrs. Michael E. Bridges. Arey is an active member of Aldersgate Methodist Church and President of Arey Oil Company and Arey Realty, Inc. He is also a member of Shelby Lions Club.

In addition, the bank announced the appointment of two new board members. They are Robert L. Holland and W. James Horn.

Shelby Federal Savings Bank is the oldest savings institution headquartered in Cleveland County, established in 1905.

CHICAGO (SEPT. 25) PR NEWSWIRE - Tribune Entertainment Company (TEC) will expand its role in domestic television program distribution.

Donald Hacker, executive vice president, announced here today that the sales and marketing division of TEC will assume distribution responsibilities for "Geraldo" and "The Joan Rivers Show." These services were previously supplied by Paramount Domestic Television.

Sheldon Cooper, TEC president, commented on the announcement saying, "Paramount Domestic Television has done a terrific job distributing 'Geraldo' and 'Joan Rivers' during the past four years. However, with eight years of continuous growth at TEC, it's important that we increase our participation in these significant customer services."

New program development also will be increased as part of the expanded TEC marketing strategy, targeting early fringe, access, late night, and weekends. Specific announcements are forthcoming.

Hacker went on to say, "Over the years TEC has continually received inquiries

from various major studios interested in distributing many of our shows. While the time has come to assume direct responsibility for our own distribution, this does not preclude joint venture arrangements with others including Paramount."

TEC has co-ventured such television projects as "Charles In Charge" (with MCA-TV), "Tales From The Darkside" (with Laurel Entertainment and LBS), the "TV Net" movies and "What A Country" (with Viacom), "G.I. Joe" (with Claster-Sunbow), and the children's show "Ghostbusters" (with Group W). In recent years, TEC has established sales offices in New York, Chicago, Los Angeles and Nashville, according to David F. Sifford, executive vice president of sales & marketing. Additional sales personnel will be recruited as a part of the expanded distribution activity.

Founded in 1982, Tribune Entertainment has emerged as one of the leaders in program syndication, especially first-run and advertiser- supported shows.

TEC is a subsidiary of Tribune Broadcasting Company, which operates independent television stations in New York (WPIX), Los Angeles (KTLA), Chicago (WGN), Atlanta (WGNX), Denver (KWGN) and New Orleans (WGNO) as well as radio stations in New York, Chicago and Sacramento. Additionally, Tribune Broadcasting produces network programming through its Los Angeles-based joint venture, Grant/Tribune Prodctions.

Tribune Broadcasting is a wholly owned subsidiary of Tribune Company (NYSE: TRB), a diversified communications company with interests in newspaper publishing and newsprint manufacturing as well as broadcasting. The company also owns the Chicago Cubs baseball team.

#90268p8092 09/25/1990 ~PR Newswire

PORTLAND, ORE. (SEPT. 25) PR NEWSWIRE - Nichiei America Corp. today announced its acquisition of the landmark Benjamin Franklin Plaza office building in downtown Portland, Ore. The multi-national lumber products and real estate company plans to make the building its permanent corporate headquarters.

Nichiei America purchased the building, which is located at 1 SW Columbia, from RREEF U.S.A. FUND-II, a San Francisco-based pension fund. The sale, which is the largest of its kind in Oregon this year, will close on Sept. 25 for a purchase price of $34 million. Melvin Mark Brokerage Co. represented Nichiei America in the transaction.

"We are truly pleased to have acquired one of the premier office buildings in

Portland for our headquarters," said Nichiei America president Jun Kato. "We're looking forward to many more happy and productive years as a member of Oregon's business community and to offering the finest possible facility for our tenants."

Kato listed downtown Portland's vitality and Oregon's receptive business climate as factors in Nichiei's decision to locate here.

"Our purchase of this building is a symbol of our commitment to Oregon," Kato said. "We hope to solidify our ties with Portland, strengthen our relationships with other Oregon companies and contribute to the region's economic growth and prosperity."

Melvin "Pete" Mark, Jr., managing partner for Melvin Mark Companies, sees Nichiei America's purchase as proof of downtown Portland's flourishing economy.

"While many American cities are witnessing the flight of corporations from their downtown cores, Portland has gained the headquarters of a multi-national corporation," Mark said. "This is a major milestone for our city."

Nichiei America is a 10-year-old Oregon company that purchases finished North American sawmill products and other housing materials for export to Japan. The company's 1990 sales are estimated at $70 million.

Because Nichiei America's focus is on exporting finished wood products, the company has been applauded for helping to maintain and create new jobs for the United States' embattled sawmill industry.

Mac Epley, vice president, Western Wood Products Association (WWPA), speaking from WWPA's fall conference in Monterey, Calif., called Nichiei's announcement welcome news for the forest products industry.

"Nichiei's commitment seems to be right in line with national sentiment," he said. "Any time new markets can be found for finished lumber products, it's a reason to celebrate."

Nichiei America also is engaged in real estate development in the greater Portland area through its subsidiary, Nichiei Properties Corp. The company currently is building seven homes in Lake Oswego, Ore. Nichiei America is a subsidiary of Japan-based Nichiei Co. Ltd., which engages in a range of businesses from housing materials to real estate.

NEW YORK (SEPT. 25) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) has formally implemented a division dedicated to meeting the needs of the technology industry. This action has been taken in recognition of the increasing need for specialized services and products for the diverse members of these complex, high-growth businesses. The Technology Industry Division will operate under the auspices of the National Resource Division, and is headquartered in San Jose, Calif.

The Technology Industry Division has been created with the intent of giving Corroon & Black a distinct and measurable advantage in the technology industry marketplace. Defining that advantage will be based on a variety of industry-specific services either currently available or in development, including marketing, loss control engineering, claims management, and new product development. The Technology Industry Division offers Corroon & Black a resource unique in the industry, enhancing the corporation's ability to take advantage of the tremendous domestic and international opportunities in the technology field.

Gary P. Sheerer is managing director of the division, and he will also maintain his role as executive vice president of Corroon & Black (San Jose). John C. Lamberson is vice president of the Division, acting as a member of the National Resource Division.

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

ATLANTA (SEPT. 25) PR NEWSWIRE - National Healthcare Inc. (NHI) announced today that the jury in a state court action in Cumming, Ga., had rendered a verdict awarding damages of $1,250,000 for alleged medical malpractice occurring in January 1987 against it and an anesthesiologist formerly on the medical staff of the hospital in Cumming, Ga.

In addition, the jury awarded the plaintiffs $24 million punitive damages against NHI. Officials of the company stated that they believe the jury's verdict to be clearly excessive and unsupported by the evidence. If allowed to stand, the verdict would have a substantial adverse effect on the company which is insured to a $6 million limit for damages. The company intends to take all available steps to overturn the verdict, including motions directed

to the trial court and appeals.

IRVINE, CA (SEPT. 25) PR NEWSWIRE - The Irvine Co. has selected Hyatt Hotels Corp. to assume management of its 536-room hotel in Jamboree Center in Irvine, it was announced today by Don McNutt, vice president and general manager of Irvine Hotel Co., a division of The Irvine Co.

Formally The Irvine Hilton and Towers, Hyatt will begin its management responsibilities Oct. 16 at which time the hotel will be renamed the Hyatt Regency Irvine at Jamboree Center.

The hotel is located at the Jamboree Road exit of the San Diego (I-405) freeway near the John Wayne Airport. It is part of The Irvine Co.'s Jamboree Center, a leading international financial and business center featuring 1.6 million square feet of office space including two, 12-story towers and three, 20-story towers.

It joins eight other Hyatt properties located in Southern California including the Hyatt Newporter, Hyatt Regency Long Beach, Hyatt Edgewater and Hyatt Regency Alicante.

"We're pleased to announce our new relationship with Hyatt and welcome them to Jamboree Center," said McNutt. "Hyatt has long been recognized as a leader in hotel development and management both nationally and internationally. We know their expertise will continue the tradition of this property as a premier business hotel in the heart of the Irvine Business Complex."

"With its strategic location and quality design and amenities, this hotel is a first-class business hotel," said Darryl Hartley-Leonard, president of Hyatt. "The expansion of the John Wayne Airport will make the Irvine area an even stronger destination for the Hyatt Regency Irvine at Jamboree Center.

The 12-story hotel has 536 rooms and 20 suites available to guests. It also features more than 30,000 square feet of meeting space including a 14,700-square-foot Grand Ball Room and a 2,300-square-foot state-of-art conference theater.

In addition, the hotel offers two full service restaurants, 24-hour service, an entertainment lounge, priority access to the Tustin Ranch Golf Club, lighted tennis courts and a heated outdoor pool. A private health club is available for guests use with facilities including a hydrotherapy pool and saunas. The Regency Club, a special services floor, will also be located

within the hotel.

DEDHAM, MA (SEPT. 25) PR NEWSWIRE - Multibank Financial Corp. (NASDAQ: MLTF) announced that its board of directors declared a cash dividend for the third quarter ending Sept. 30, 1990 of 10 cents per share payable Oct. 19, 1990 to shareholders of record as of Oct. 9, 1990.

It was also announced that, according to its current estimate, the company's financial results for the third quarter ending Sept. 30 will show a loss in an amount considerably less than the $11,912,000 loss reported for the second quarter ended June 30, 1990. It is presently believed that results for the fourth quarter ending Dec. 31, 1990 will show a profit.

In addition, the board of directors adopted a revised schedule for the consideration and payment of dividends. Henceforth, starting with the fourth quarter 1990, a quarterly dividend will be considered in the first month following the end of the quarter and payment of a declared quarterly dividend will be made in the second month.

Accordingly, a dividend for the fourth quarter 1990 will be considered by the board of directors at its meeting in January 1991 and payment of a dividend, if declared, for the fourth quarter 1990 will be made in February 1991.

Chairman, David B. Lynch, commented "The revised timetable will normally enable the board to have available final quarterly results when considering the quarterly dividend."

Multibank Financial Corp. is a registered bank holding company with six Massachusetts banks and several related financial service companies. The

company's stock is traded on the over-the-counter market and is listed and quoted through the NASDAQ National Market System (NMS) under the symbol of MLTF.

Trading activity for the company's stock is reported in the NASDAQ National Market stock table appearing in leading newspapers. The newspaper listed abbreviation is Multbk.

DENVER (SEPT. 25) PR NEWSWIRE - Bond International Gold, Inc. (NYSE: BIG, TSE: BG) announced today it has taken advantage of the recent run-up in gold prices to sell forward 810,000 ounces of gold at an average price of US$425 per ounce. The average contract length is approximately one year. The average spot price where the forward transactions occurred was approximately US$398 per ounce.

Mitchell T.G. Graye, Chief Financial Officer of Bond, stated, ''The primary goal we have at Bond is to lower the Company's debt to a more acceptable level in order to improve the Company's financial flexibility. The forward selling we have done will allow the Company to cut its debt in half in two years, and ensure there are enough funds available to fully exploit the Company's asset base.''

Bond's forward position for the balance of 1990, 1991 and 1992, now totals 843,000 ounces of gold at an average price of US$425 per ounce. This is approximately 1.6 years of production after allowing for mandatory repayments under Bond's gold loan.

Bond International Gold, Inc. operates five gold mines in the United States, Canada and Chile, and conducts an active exploration program in North and South America.

#90268p8139 09/25/1990 ~PR Newswire

STAMFORD, CT (SEPT. 25) PR NEWSWIRE - Erbamont Inc. said that it is informed that Italian authorities today have seized the doxorubicin production facility and supplies of doxorubicin of SICOR S.p.A., the Italian supplier of Cetus Corp. (NASDAQ: CTUS) and Ben Venue Laboratories.

In addition to impounding the plant, the authorities seized all quantities of doxorubicin found on the premises.

Principals of SICOR have been the subject of an ongoing criminal investigation initiated by the public prosecutor in Milan into allegations of conspiracy and theft of trade secrets and the doxorubicin producing strain from Erbamont's affiliate, Farmitalia Carlo Erba S.r.l. of Milan, Italy. The Italian magistrate in charge of the investigation has taken the testimony of a number of persons connected with SICOR and has received the report of a court-appointed expert who examined the SICOR facilities and production process. The seizure action taken today followed the magistrate's review of the expert's report.

"We are pleased with the action taken by the Italian authorities," Erbamont stated. "It has always been our belief that the doxorubicin sold by Cetus in the United States is the result of technology stolen by its supplier from Farmitalia Carlo Erba, which originated doxorubicin in the early 1970s." Erbamont sells doxorubicin in the United States under the trademark Adriamycin(R) through its Adria Laboratories division.

Erbamont has previously charged Cetus with infringement of its rights under a U.S. process patent, for making doxorubicin, in proceedings pending in Federal District Court in California and before the International Trade Commission (ITC). The Initial Determination of the ITC Administrative Law Judge issued in May 1990 was based solely upon Erbamont's claims that SICOR's process infringed Erbamont's U.S. process patent. Erbamont did not assert the conspiracy or theft of trade secret claims in the ITC proceeding, and accordingly those claims were not considered in the Initial Determination of

the Administrative Law Judge. The Initial Determination of the ITC Administrative Law Judge is currently under review by the full commission.

ARKHANGELSK (SEPT. 25) TASS - THE LATEST IN A SPATE OF RECENT SOVIET HIJACKINGS WAS NARROWLY AVERTED EARLY THIS MORNING.

ON MONDAY NIGHT, A PASSENGER ON A LENINGRAD-ARKHANGELSK FLIGHT DEMANDED THAT THE AIRCRAFT FLY TO STOCKHOLM. HE THREATENED TO BLOW UP THE AIRCRAFT WITH A

BOMB HIDDEN IN HIS BRIEFCASE. THE AIRCRAFT WAS THEN NEARING PETROZAVODSK. THE CREW CONVINCED HIM THAT THE PLANE HAD TO LAND IN ARKHANGELSK FOR REFUELING.

AS A RESULT OF TALKS WITH THE HIJACKER, ALL 66 PASSENGERS WERE RELEASED FROM THE AIRCRAFT. AFTER THAT, A SPECIAL GROUP FROM THE ARKHANGELSK REGIONAL KGB CAPTURED THE HIJACKER.

THE HIJACKER HAS BEEN IDENTIFIED AS GRIGORY POLYAKOV, 53, A RESIDENT OF KHABAROVSK TERRITORY IN THE SOVIET FAR EAST. POLYAKOV HAD THREE PREVIOUS CONVICTIONS. TWO YEARS AGO, HE WAS CHARGED WITH ATTEMPTING TO LEAVE THE SOVIET UNION ILLEGALLY.

MOSCOW SEPTEMBER 25 TASS - SOVIET PRIME MINISTER NIKOLAI RYZHKOV TODAY MET HIS BULGARIAN COUNTERPART ANDREI LUKANOV, ON A WORKING VISIT IN MOSCOW.

THE TWO LEADERS AGREED THAT THE REFORMS IN THE SOVIET UNION AND BULGARIA REQUIRE THE REVISION AND THE SUBSEQUENT RENEWAL OF THE MECHANISM OF BILATERAL ECONOMIC, SCIENTIFIC AND TECHNICAL COOPERATION TO MEET CONDITIONS OF MARKET RELATIONS.

THEY POINTED TO THE IMPORTANCE OF THE INTERGOVERNMENTAL AGREEMENT ON THE TWO COUNTRIES' TRANSITION FROM JANUARY 1, 1991 TO A NEW MECHANISM OF MUTUAL ECONOMIC TIES AND PAYMENTS IN FREELY CONVERTIBLE CURRENCY AT CURRENT WORLD PRICES.

THE MEETING SHOWED THE HIGH DEGREE OF MUTUAL UNDERSTANDING BETWEEN THE TWO COUNTRIES ON ISSUES THE TWO LEADERS DISCUSSED AND THEIR INTEREST IN EXPANDING SOVIET-BULGARIAN COOPERATION.

(SEPT. 25) UPI - Canadian Prime Minister Brian Mulroney in Ottawa Monday

defended his adminstration's handling of this summer's Mohawk crisis. Mulroney is under siege for what his critics call a lack of leadership. He accused militant Mohawks from the United States of ''hijacking'' a peaceful native reserve south of Montreal and launching a 10-week armed stand-off against police and soldiers.

A former Roman Catholic priest pleaded NO contest Monday to charges that he produced and appeared in child pornography films. John Bauer was sentenced to eight years in state prison. Prosecutors say Bauer operated a ring that made videotapes of young boys in Mexico and Hollywood and distributed them worldwide. A co-defendant... a former assistant Boy Scoutmaster... also pleaded NO contest to appearing in one of the films.

#90268u0104 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Twenty paper mills nationwide are contaminating fish with hazardous dioxin at levels posing high cancer risks to fishermen who eat their catch, the Environmental Protection Agency said.

The EPA, estimating health risks from 104 U.S. paper mills, said Monday it had found 20 facilities threatening lifetime cancer risks greater than 1 in 10,000 for nearby residents who eat at least two quarter-pound meals each month of fish caught downstream of the plants.

The highest risk was from International Paper Co.'s mill at Georgetown, S.C., where consumption of downstream fish carried a cancer risk of 1 in 50. For heavy fish-eaters - such as subsistence fishermen - the risk could be as high as 1 in 10, EPA officials said.

The risk estimates for the 20 plants are much higher than the EPA's general goal of limiting the chance of getting cancer from dioxin contamination to 1 in 1 million or less over a lifetime of exposure.

Altogether, the EPA listed 81 mills as posing cancer risks greater than 1 in 1 million.

For the five highest-risk mills, all in the South, the EPA said moderate consumption of fish also was predicted to cause liver damage. In addition to the International Paper facility in South Carolina, those plants were Union Camp Corp. at Franklin, Va.; Buckeye Cellulose, Perry, Fla.; Weyerhauser Co., Plymouth, N.C.; and Westvaco Corp., Covington, Va.

Of the 20 high-risk plants, three are in Florida and there are two in each of these states: Maine, Virginia, Mississippi, North Carolina, Texas, California and Washington. The remaining three are in South Carolina, Arkansas and Louisiana.

The EPA is moving to reduce dioxin risks from paper mills through tougher discharge limits, but agency officials noted those stricter rules might not take effect at some plants for another three years.

They said the risk analysis pointed up the need for immediate action by states to warn fishermen near the 20 worst plants about elevated cancer risks from eating tainted fish.

''EPA suggests that states consider imposing fish consumption advisories or start site-specific monitoring programs at all streams that have a projected

risk as high as 1 in 10,000 or greater,'' Deputy EPA Administrator Henry Habicht said in a statement.

Fish consumption advisories already have been posted for nine of the 20 highest-risk plants identified by the EPA.

The risk analysis stems from a major EPA initiative to reduce dioxin residues generated in the chlorine-bleaching process used in mills to whiten wood pulp. Tiny amounts of dioxin are deposited in white paper products - such as milk cartons, coffee filters and toilet paper - and also discharged into streams in mill wastewater.

In April, the EPA and Food and Drug Administration issued preliminary health risk estimates for affected consumer products. The agencies said eating contaminated fish generally carried the highest cancer risks.

Scientists have longed considered dioxin a very hazardous substance, posing significant cancer risk at even minute levels. However, some federal health officials recently told Congress dioxin's dangers have been greatly exaggerated.

Despite the controversy, Habicht said the EPA would press ahead with efforts to reduce dioxin discharges.

''The overall risk of dioxin to human health and aquatic systems requires the precautionary actions we are taking, even though the scientific basis for estimating dioxin cancer risk and the mill-based specific risk numbers themselves may be changing,'' he said.

The EPA is rewriting wastewater discharge permits for 66 paper mills to tighten limits on dioxin residues. The affected plants - including the 20 highest-risk facilities - are supposed to meet the stricter discharge rules by June 1993.

The EPA's initiative is complicated by disputes with several states over how much to tighten limits. EPA officials recently challenged Georgia's proposed dioxin limits as too lax.

State officials have primary responsibility for setting and enforcing water quality standards but the EPA has oversight powers.

#90268u0125 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Pope John Paul II released the Vatican's long-awaited - and feared - norms for Roman Catholic universities and colleges Tuesday, restricting the range of permissible dissent from church doctrine.

Contained in a 49-page Apostolic Constituion, the norms declare that Catholic colleges and universities must, as part of their identity, include ''a recognition of and adherence to the teaching authority of the church in matters of faith and morals.''

It is the first papal document ever issued for the entire Catholic higher educational community throughout the world, a system of some 950 colleges and universities, including 230 in the United States.

The document appears to heighten the local bishop's power to safeguard doctrinal obedience at centers for higher learning within their dioceses.

''The church, accecpting the legitimate autonomy of human culture and especially of the sciences, recognizes the academic freedom of scholars in each discipline in accordance with its own principles and proper methods, and within the confines of the truth and common good,'' the pope said.

Earlier drafts of the statement, circulated in 1985 and 1989, were greeted with alarm and protest by Catholic educators in the United States, including presidents, adminsitrators, theologians and teachers.

Catholic education leaders have made a number of trips to Rome in an effort to forge a compromise between the Vatican's earlier insistence of strict obedience to its view of doctrinal truth and the role academic freedom plays in college and university life in the United States.

In the United States, the Association of Catholic Colleges and Universities cautiously accepted the document, noting that concerns raised by U.S. educators had been included in the new text. Specifically, the document recognizes the institutional autonomy of a school and the notion of academic freedom.

Sister Alice Gallin, executive director of the association, called the new document ''a call to renewal for those who believe in the distinctive character of a Catholic university.''

Many of the Catholic institutions of higher learning the United States receive significant amounts of public and other non-Catholic funding.

The University of Dayton, a Catholic school with a 1989 budget of $123 million - including $10 million in federal aid and $3.5 million in Ohio student grants - was especially concerned about earlier versions of the Vatican document that severely restricted acadmemic freedom.

In particular, educators are concerned about the implications of the church applying canon 812 of the Code of Canon Law (the rules governing the church), which require Catholic theologians to teach only material that is approved by the bishops and the Vatican.

While the new rules do not stress canon 812, it does make use of it in insisting ''Catholic theologians ... are to be faithful to the Magesterium (teaching authority) of the church as the authentic interpreter of sacred Scripture and sacred tradition.''

It also gives local bishops ''the right and duty to watch over the preservation and strengthening'' of a school's Catholic ''character'' and the power to ''take the iniatives necessary to resolve'' issues that might be counter to Catholic teaching.

A number of incidents in recent years have pitted Catholic scholars against Vatican teaching.

In the most celebrated case, the Rev. Charles Curran was stripped of his ''mandate'' as an official Catholic theoligan while at the Catholic University of America because of his dissent from official church teaching on such issues as birth control, abortion, homosexuality and premarital sex.

But the church did not invoke canon 812 in the Curran case because it indicates authorities external to the university can interfere with its affairs, a violation of academic freedom.

#90268u0132 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - A Pentagon report released Tuesday showed that estimated Soviet defense spending dropped by as much as 5 percent last year, but warned that ''risk remains'' from a nuclear superpower in domestic turmoil.

''Prudence demands that we focus on the most dangerous challenge to our national security,'' Defense Secretary Dick Cheney wrote in the preface of the 111-page annual publication titled ''Soviet Military Power.''

''The military might of the Soviet Union is enormous and remains targeted on the United States and our allies,'' said Cheney. ''Furthermore the threat is no longer clear cut; the implications of change within the Soviet Union are not completely known.''

Cheney said U.S. intelligence estimates Soviet military spending declined up to 5 percent in real terms in 1989. The annual publication noted the scheduled Soviet troop withdrawals from Eastern Europe.

''Soviet 1989 output of military materiel generally fell from 1988, mirroring (Soviet President Mikhail) Gorbachev's January 1989 announcement that output would be reduced,'' the book said.

''The most pronounced cuts occurred in ground forces materiel. Output of

strategic systems was generally level while the number of naval surface units produced actually rose. The production of submarines remained the same.

''The deepest cut occurred in the production of the premier offensive ground forces weapon, the tank; output was halved from 3,400, as the Soviets had announced, to about 1,700 - which is still twice the annual NATO production,'' the book said.

The Soviets also cut production of bombers and fighters, the Pentagon said.

Cheney emphasized that the Soviets have continued to modernize their strategic nuclear weapons.

''The Soviet intercontinental ballistic missile (ICBM) force is undergoing a complete upgrade,'' he said. ''The includes the continued deployment of the SS-24, a multiple-warhead missile deployed in both fixed and mobile version, the mobile SS-25, and the new version of the SS-18, which carries 10 warheads.''

The book, noting its cover picture of a nuclear submarine, said the Soviets launched a seventh Delta IV-class strategic ballistic missile sub in 1990 and that additional subs, equipped with 16 multiple-warhead ballistic missiles, are expected to enter the fleet this decade.

''The ninth edition of Soviet Military Power is published at a time of unprecedented economic and political turmoil in the Soviet Union,'' Cheney said.

''With that turmoil,'' he added, ''has come an unusual degree of uncertainty about the future course of the Kremlin's enormous military structure.''

The Pentagon said, ''The immediate threat of a Soviet-Warsaw Pact multipronged armored thrust that pushes NATO into the Atlantic is nearly gone. What remains is a Soviet Union with modern, increasingly capable conventional and nuclear weapons and chemical-biological warfare capability.

''These weapons are controlled by a government that is being increasingly challenged at home and which cannot count on any support for offensive operations from its erstwhile allies. Responding to the threat is now complicated by the uncertain course of events in the Soviet Union.''

The Pentagon said the new environment presents the United States and the West with an opportunity to secure the positive trends toward freedom.

''The United States must continue to encourage positive change, while maintaining the capability and flexibility to cope with - and deter - a still vast Soviet military capability at a moment of turmoil and uncertainty,'' the report concluded.

#90268u0136 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - A special congressional commission recommended Tuesday that the federal government develop a universial health care program, but the panel's members failed to agree on how to raise the estimated $70 billion annually it would cost to pay for such a plan.

Under the health care plan released by the 15-member Pepper Commission, the federal government would be required to cover the unemployed and the poor through a program that replaces and expands medicaid.

The commission recommended that employers with more than 100 workers provide coverage to its employees and that the federal government use tax credits or subsidies to encourage smaller firms to do the same.

If small businesses do not provide coverage after five years of a plan, they would be forced to do so.

The report also recommended a plan for government-supported long-term health care in the home, community-based facilities and nursing homes for the elderly and disabled.

The report is virtually identical to the commission's preliminary finding released last March. The final report includes many of the same dissenting comments from commission members.

The Pepper Commission was named for its first chairman, the late Rep. Claude Pepper, D-Fla. It was established by Congress to recommend a plan to assure the availability of comprehensive health care for all Americans and long-term health care for the elderly and disabled.

The plan would cost the federal government $70 billion in new spending, according to the final report, which said there are an estimated 30 million Americans who do not have health insurance.

Sen. David Pryor, D-Ark., hailed the report as ''a sound, sensible approach to dealing with the nation's health care challenge.''

Commission Chairman Sen. John Rockefeller, D-W.Va., said, ''With this report, the commission has fulfilled this task. Now the commission calls for action from the Congress and the president to turn its recommendations into law.''

But that will not be an easy task, since the commission experienced deep divisions.

An 8-7 majority approved recommendations for access and financing of health

care for those under age 65. Recommendations concerning long-term health care and health care for the elderly received 11-4 votes.

A spokesman for Health Secretary Louis Sullivan said the secretary stood by his remarks following the release of the preliminary report.

Sullivan said: ''This divergence (of views among commission members) reflects the simple fact that there is no consensus in our country today on how to achieve the kind of health care system we want, or how the cost of improvements in our system should be borne.'' Sullivan opposes national health insurance.

Rep. Pete Stark, D-Calif., admonished fellow commission members for failing to state precisely how the $70 billion should be raised. The report offers several options, but fails to take a stand on a specific approach.

''My fellow commissioners who support this section of the report must believe in a 'health care fairy' who will place vouchers under beneficiaries' pillows '' said Stark in his dissenting statement.

Commission member John Cogan of the Hoover Institute, who contended the majority's proposals are not viable, agreed with Stark.

''The majority's proposed solutions to the lack of affordable health insurance and long-term care both suffer from the same fundamental flaw - a failure to specify how they would be paid for,'' Cogan said. ''Given the present state of our federal finances, it is critical that any proposals for new programs be accompanied by a practicable plan to finance them.''

Rep. Louis Stokes, D-Ohio, who voted for all parts of the plan, said ''making definitive recommendations about taxes was not necessarily within the purview of our jurisdiction.''

#90268u0138 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Quitting smoking is the ''single most important step'' smokers can take to extend their lives, with those who stop before age 50 halving the risk of dying in the next 15 years of their lives, Surgeon General Antonia Novello reported Tuesday.

In her first report on smoking since taking over the post from vocal tobacco foe C. Everett Koop in March, Novello emphasized the ''good news'' about the health benefits of stopping smoking, rather than scaring Americans with the ''bad news'' of smoking-related diseases and death.

About 38 million Americans have kicked the habit - about half of all living adults who ever smoked. However, another 50 million Americans still smoke and

an estimated 390,000 people die each year from diseases caused by smoking.

''Smoking cessation has major and immediate health benefits for men and women of all ages. People who quit smoking live longer than those who continue to smoke,'' Novello said in her 628-page report.

People who stop smoking before age 50 have just half the risk of dying in the next 15 years compared with continuing smokers, the report said. Even older smokers can reap benefits, with the risk of death falling about 10 percent over the 15 years for an otherwise healthy man who quits smoking between the ages of 60 and 64.

Stopping smoking increases life expectancy because it reduces the risk of smoking-related disorders like lung cancer, coronary heart disease and stroke, as well as ulcers and other potentially fatal lung and artery diseases.

After quitting smoking, people gain only about 5 pounds on average and less than 4 percent gain more than 20 pounds, the report said. Kicking the habit can also cause anxiety, irritability, frustration, anger and other signs of increased stress in many people.

Despite those drawbacks, the report concluded the health benefits ''far exceed'' any possible health problems related to a few extra pounds or relatively short-lived psychological symptoms.

Brennan Dawson, a spokeswoman for the Tobacco Institute, said the industry group had no official response to the report, but believes smokers are ''capable of making their own individual decisions about whether or not they want to quit.''

The report, which has been issued annually since 1964, targeted the elderly, pregnant women, and people who already have smoking-related diseases as groups in which smoking cessation efforts urgently need to be bolstered.

Some older people ''may believe they are no longer at risk of smoking-related diseases because they have survived smoking for many years. Others may believe that any damage may have been caused by smoking is irreversible after decades of smoking,'' Novello warned.

About 7 million Americans age 60 or older still smoke, although smoking is a major risk factor for six of the 14 leading causes of death among the elderly, the report said.

As for pregnant women, the report said: ''Prevalence of smoking during pregnancy has declined over time but remains unacceptably high.''

About 25 percent of pregnant American women smoke throughout pregnancy. Studies have shown women who smoke beyond the first three to four months of

pregnancy have double the risk of having an underweight baby as non-smokers, and also face a greater chance their fetus or baby will die.

Smokers whose habit has already created health problems sometimes keep on puffing away ''because of a belief the damage is already done,'' Novello said.

However, the report points out that stopping smoking can yield important health benefits even to patients who already suffer from smoking-related illneses.

Studies have found coronary heart disease patients who stop smoking reduce their risk of recurrent heart attack by 50 percent or more. In addition, the report said some research suggests ''even smokers who have already developed cancer may benefit from smoking.''

#90268u0191 09/25/1990 ~United Press International
(SEPT. 25) UPI - Crude oil prices surged near record levels Monday. Analysts blamed the Persian Gulf crisis for a war-time buyer's mentality that shot oil prices up almost three dollars a barrel. One price on the European spot market cleared 40 dollars for a barrel. The U-S benchmark price topped 38 dollars. Oil experts say Iraq's weekend threats to attack Saudi Arabia and Israel have caused people to buy out of fear.

Supreme Court nominee David Souter won votes of confidence Monday from two Senators whose votes had been considered up for grabs. Democratic Senators Howell Heflin of Alabama and Dennis DeConcini of Arizona strongly endorsed Souter. Heflin said those who demand Souter's ''precise views'' are ''wrong.'' But Democrat Alan Cranston of California says he will vote against Souter because he says the nominee considers abortion an ''open question.''

Thailand reports that at least 42 people died when the driver of a tank truck tried to beat a red light and flipped over on a turn... causing a series of explosions. The truck spewed gasoline onto a Bangkok street where it exploded several times... incinerating 47 cars and 30 shops. An American who witnessed the accident said he saw one man with his body burned white who lay down and said ''let me die.''

A prosecutor said Monday that blood and a knife were found in the clothes of a youth charged in the murder of a Utah man on a New York subway earlier this month. The assistant D-A said the ringleader of the gang also made written and videotaped confessions about stabbing the man who tried to defend his parents after a mugging. Brian Watkins was the 18th person killed in the city's subway system this year.

-30- 1858
#90268u0201 09/25/1990 ~United Press International
(SEPT. 25) UPI - Ryne Sandberg's milestone could prove to be New York's millstone.

Sandberg regained the National League home run lead with his 38th of the year, sparking a three-run sixth inning Monday that helped the Chicago Cubs damage New York's title hopes with a 4-3 victory over the Mets.

With the Cubs trailing 3-1 in the sixth, Sandberg, trying to become the first NL second baseman to lead the league in homers since Rogers Hornsby in 1925, hit a home run.

''It just felt good hitting a home run against the Mets,'' Sandberg said. ''It's kind of fun to play the last games against the Pirates and the Mets. We want to make it tough on somebody.''

The loss dropped New York three games behind idle Pittsburgh in the NL East and lowered the Pirates' magic number to seven for clinching the division. Both teams have nine games left, including three in Pittsburgh Oct. 1-3.

New York starter Frank Viola, 19-11, failed in his second attempt at his 20th victory. Paul Assenmacher, 7-2, went 3 2-3 relief innings for the victory.

''I was getting a little excited - I like beating the Mets,'' Assenmacher said.

''I had a 3-1 lead. I'm expected to hold onto it,'' Viola said. ''It's frustrating.''

What's even more puzzling to Viola is the team's internal struggle.

''The guys in this clubhouse remind me a lot of the '87 Twins (who won the World Series) as far as the camaraderie goes,'' Viola said. ''But once we get across the lines, it just stops. I don't know what it is. We have to take it among ourselves to keep it (drive) going.''

Mark Grace and Andre Dawson followed with singles, and Grace scored on Luis Salazar's single down the left-field line, tying the score 3-3. Shawon Dunston hit into a double play, but Dawson reached third and scored on Doug Dascenzo's single.

In other games, Philadelphia defeated Montreal 3-0, Los Angeles outlastedHouston 7-5 in 11 innings and San Francisco beat San Diego 3-1.

In the American League, it was: Kansas City 10, Oakland 3; Toronto 9, Milwaukee 5; California 3, Texas 2; and Baltimore 6, New York 3 in 10 innings.

-- AROUND THE NL --

Phillies 3, Expos 0

At Philadelphia, Pat Combs pitched a four-hitter, helping the Phillies complete a four-game series sweep that effectively knocked Montreal from the race. The loss dropped the third-place Expos seven games behind first-place Pittsburgh with nine to play. Montreal would have to win every one to reach 90 victories. The eventual division winner will capture at least 89.

Dodgers 7, Astros 5, 11 innings

At Houston, Mike Sharperson tripled in Alfredo Griffin with the go- ahead run in the 11th inning, keeping Los Angeles' pennant hopes alive. The Dodgers' victory pulled them to within 4 1-2 games of Cincinnati in the NL West and kept the Reds' magic number at five to clinch the division.

Giants 3, Padres 1

At San Francisco, Robby Thompson doubled in the go-ahead run in the fifth inning to lift the Giants. Kelly Downs, 2-2, recorded his second victory over the Padres since coming off the disabled list Aug. 10. Steve Bedrosian notched his 14th save. Derek Lilliquist, 4-11, was the loser.

CAIRO, Egypt (SEPT. 25) UPI - Iraqi troops taking control of Kuwaiti hospitals have removed terminal patients and taken newborn babies from incubators, leaving them to die, said a group of Egyptian doctors returning from Kuwait.

The six doctors, speaking at a Kuwaiti-organized news conference Monday, also said the emirate's health system is in tatters after the Aug. 2 Iraqi invasion and that some Iraqi soldiers had inflicted wounds on themselves to avoid combat.

The doctors said some American and British doctors remain in Kuwait but changed their hiding places regularly to avoid capture by Iraqi troops and detention as hostages.

''Most American and British doctors have already left Kuwait following the Iraqi invasion,'' said Dr. Farid Ghezawi, an allergy specialist. ''But a number of Western doctors are still hiding and changing their places on a daily basis.''

One doctor said Iraqi troops threw terminal patients out of intensive care units and removed newborn babies from incubators, leaving them to die.

''The Iraqi soldiers entered the hospital and removed terminal patients from their wards, even removing newborn babies from incubators and leaving them to die,'' said Dr. Yehia Mohamed Ahmed, who worked as an anaesthetist at Kuwait's El Jahra general hospital.

Ghezawi, for his part, said, ''Priority is given to the Iraqi soldiers, but operations at the hospital have now stopped. Even cancer patients were taken out of the hospital and most of them died as a result.''

Egyptian dermatologist Dr. Ibrahim el Siyyad said, ''Mentally- retarded children and patients receiving psychiatric treatment at one of the hospitals were deprived of food and handicapped patients were thrown out.

''Even pregnant Kuwaiti women were not admitted to hospitals to deliver their babies,'' he said.

''We were working without any guarantees the Iraqi soldiers would not attack us, and some doctors were attacked,'' he added.

Ahmed meanwhile said Iraqi troops wanted to use the hospitals as army barracks and transport advanced equipment to Iraq.

''The Iraqis wanted to use the hospital as a barracks and remove advanced medical equipment to Iraq,'' Ahmed told reporters. ''They stole the food of the patients and these people are dying from lack of food, not because of a shortage of medicine.''

One Egyptian doctor at Kuwait's El Addan hospital said he helped treat about 200 Iraqi soldiers, many of whom were suffering from self- inflicted wounds.

''About 200 Iraqi soldiers, including a number of Iraqi Kurds, were admitted to the hospital over a period of three weeks after the invasion,'' said Dr. Mohammed Lutfi.

''A number of these soldiers injured themselves on purpose hoping to be discharged from service,'' Lufti said. ''Most of these Kurds are not trained and some of them were injured as a result of being unable to use the weapons at their disposal.''

#90268u0309 09/25/1990 ~United Press International

(SEPT. 25) UPI - The Oakland Athletics' march to their third straight division title has turned into a crawl.

The injury-riddled A's suffered through a 10-3 loss Monday to the Kansas City Royals, keeping Oakland's magic number to clinch the American League West crown at two for the second straight day.

''Sure it's a concern,'' said A's Manager Tony La Russa, who had to use infielder Mike Gallego in the outfield for the first time because of injuries to outfielders Jose Canseco, Willie McGee, Dave Henderson and Rickey Henderson and third baseman Carney Lansford.

''I think if we can give these guys enough rest, they'll be okay,'' La Russa said. ''The only one I'm really worried about is Rickey Henderson, but he doesn't want to rest until we clinch the pennant.

''With all that's going on - MVP, the batting title and the stolen base record - winning is still most important and that's why I admire him so much.''

''It's inevitable that Oakland is going to clinch the division with the club they have, but it's important to me that they don't do it here, '' Kansas City Manager John Wathan said. ''I've been on both sides and it's no fun to watch

another team celebrate, especially with our high expectations this year.''

Kurt Stillwell helped make sure the A's didn't get any closer to the title by belting a three-run inside-the-park home run in the seventh inning and a run-scoring double that triggered a six-run fifth inning.

Stillwell's inside-the-park home run, the second of his career, caromed high off the center-field fence and away from Darren Lewis.

''I was really hurting rounding third, I was out of gas,'' said Stillwell, who scored on a diving tag of home plate. ''I think it was more of a fall than a slide.''

Tom Gordon, 12-11, posted his sixth victory in his last nine starts.

The Royals sent 11 men to the plate in the six-run fifth as they rapped out three doubles and three singles off starter Curt Young, 9-6, and reliever Todd Burns.

In other games, Toronto outlasted Milwaukee 9-5, California edged Texas 3-2 and Baltimore defeated New York 6-3 in 10 innings.

In the National League, it was: Chicago 4, New York 3; Philadelphia 3, Montreal 0; Los Angeles 7, Houston 5 in 11 innings; and San Francisco 3, San Diego 1.

-- AROUND THE AL --

Blue Jays 9, Brewers 5

At Milwaukee, George Bell went 5 for 5, helping Toronto increase its lead in the AL East to 1 1-2 games over Boston. Bell, tying his career high for hits in a game, doubled in the second, singled in the third, doubled home two runs in the fifth, and singled in the eighth and ninth. Jimmy Key, 12-7, got the victory and Tom Henke pitched 1 1-3 innings for his 31st save. Jaime Navarro, 7-7, was rocked for five runs and seven hits in 4 2-3 innings.

Angels 3, Rangers 2

At Arlington, Texas, Lance Parrish smacked a two-run homer and Mark Langston and Bryan Harvey combined on a five-hitter, leading California. Langston, 10-16, recorded his fifth victory in his last six decisions and Harvey earned his 24th save. Nolan Ryan, 13-8, pitched his fifth complete game and struck out 11, improving his league-leading strikeout total to 221 and extending his record for most in a major-league career to 5,297.

Orioles 6, Yankees 3, 10 innings

At New York, Cal Ripken Jr. led off the 10th with a homer and Bill Ripken followed with a two-run double, lifting the Orioles to their sixth straight victory. Jose Bautista, 1-0, got one out in the ninth for the victory. Gregg Olson pitched the 10th for his 34th save, tying Don Aase's club record. Alan Mills, 1-5, gave up Cal Ripken Jr.'s homer.

#90268u0312 09/25/1990 ~United Press International

(SEPT. 25) UPI - Around the world... around the clock... news from United Press International: .

Two armed men are holding 19 hostages in a McDonald's restaurant in the Los Angeles suburb of La Verne. Authorities say they ran into the restaurant last night after a robbery at a clothing store across the street. NO shots have been fired. A SWAT team from Los Angeles has been flown in by helicopter.

Crude oil prices have shot up above 40 dollars a barrel for the first time in a decade. The jump followed Iraq's threat to shut off oil supplies with military strikes on Saudi Arabia. Yesterday's surging oil prices and Middle East worries caused stock markets to plummet. The Dow Jones industrial average fell 59 points.

Two moderate Democrats on the Senate Judiciary Committee say they'll vote for David Souter's nomination to the Supreme Court. The announcement by Howell Heflin of Alabama and Dennis DeConcini of Arizona indicates Souter will be confirmed. The committee vote is set for Thursday.

Budget negotiators report some progress on a five-year agreement to lop 500-BILLION dollars from the federal deficit. Democrats say the biggest obstacle is the Republicans' insistence that capital gains taxes be cut. The White House says there's NO agreement in several other areas.

President Bush says it is too early to lift economic sanctions against South Africa. Bush says political prisoners must be freed first. Bush met with South African President F-W de Klerk yesterday. De Klerk pledged NOT to turn back from the reforms he has been making to ease racial segregation.

#90268u0325 09/25/1990 ~United Press International

TOKYO (SEPT. 25) UPI - Japan's newly appointed Justice Minister apologized Tuesday for a remark he made Friday comparing an influx of foreign prostitutes to blacks moving into a white neighborhood in the United States.

Following a raid on a red-light district in the Shinjuku section of Tokyo that netted 45 foreign women, Seiroku Kajiyama told reporters, ''It's like bad money chasing out good money, or like blacks driving whites out of

neighborhoods in America.''

His apology came a day after the U.S. State Department reportedly termed the remarks offensive.

''It was very inappropriate to relate a racial issue in the United States to the problem in Shinjuku. I'd like to take back my words and express my deep apologies to everyone concerned,'' Kajiyama said at a news conference Tuesday.

Kajiyama was appointed to his post Sept. 13, following the sudden resignaton of Shin Hasegawa for health reasons.

He previously held two other Cabinet posts, as minister for home affairs and minister for international trade and industry.

-30- 1235

#90268u0330 09/25/1990 ~United Press International

EAST RUTHERFORD, NJ (SEPT. 25) UPI - With a chance to surpass some great running backs, Thurman Thomas elected to sit rather than play.

Thomas gained a career-high 214 yards on just 18 carries Monday night to help the Buffalo Bills post their sixth straight victory over the New York Jets with a 30-7 rout of their AFC rivals.

With Thomas on the bench in the fourth quarter, he turned down Buffalo Coach Marv Levy's offer to return and attempt to break Bo Jackson's Monday Night Football record. He was 7 yards short.

''Hey, we have to play the Jets again,'' Thomas said. ''It would have made the Jets look bad and it would have made the Bills look bad.''

Thomas also could have set his sights on O.J. Simpson's single-game club rushing record of 273 or Walter Payton's NFL high of 275.

But he did help the Bills, 2-1, rush for 292 yards - their highest single-game total since 1978. Buffalo has won its last six games over the Jets by a combined score of 164 to 44. The Jets dropped to 1-2 under new coach Bruce Coslet.

''Now people can say 'You looked like the same old Jets,''' New York center Jim Sweeney said. ''That's bull.

''We didn't execute. The emotion was there, emotion doesn't always win games. A win is a win, a loss is a loss, you can't make any more of it or any less of it because it's Buffalo again or national TV.''

Thomas, with a 60-yard run in the first quarter, finished with 146 yards on 10

carries in the first half. His previous single game-high was 148 yards in a 1989 game against Miami.

''It all starts with the offensive line,'' Thomas said. ''When the season began I told them I would reward them if I gained 150 yards in a game. I can't tell you what I owe them. When nobody touches you and you're in the secondary, it's a great feeling.''

Buffalo quarterback Jim Kelly completed 16 of 26 for 174 yards and 2 TDs. He was intercepted once and sacked twice. Jets quarterback Ken O'Brien went 15 of 30 for 153 yards and was sacked three times, including twice by Bruce Smith.

Scott Norwood kicked three field goals for the Bills, who bounced back from a 30-7 drubbing by the Dolphins last week.

The Bills racked up 305 yards and the Jets 87 in total offense by halftime, taking a 20-7 lead after rattling off 13 points in the second quarter.

''I didn't think anyone could manhandle us that way, physically,'' Coslet said.

Kelly hit tight end Butch Rolle for a 2-yard TD pass in the second quarter to break a 7-7 tie at 4:48 and Norwood added field goals of 48 and 42 yards.

Johnny Hector's fumble was recovered by Nate Odomes to set up the first, and Eric McMillan's 15-yard personal foul put the Bills into range for the second as the half expired.

The Bills dominated the first quarter statistically but were tied 7- 7. They outrushed the Jets 109 yards to 36 and passed for 82 yards to New York's 11.

The Jets scored their first touchdown against Buffalo in 13 quarters 7:15 into the game on Brad Baxter's 1-yard run. After a pass interference call against James Williams put the ball on the 1, New York scored on its first series for the second straight week.

The Bills tied the score on the next drive at 11:04. A would-be interception by Jets end Jeff Lageman was negated by a holding call that gave Buffalo first down at New York's 44. Kelly found Keith McKeller wide open at the 20 and the tight end ran to the 1 to set up Kenneth Davis's first TD of the season.

On the Jets' next drive, Al Toon's apparent reception at the Bills' 38 was ruled incomplete because the referee said he was juggling the ball. There was discussion among officials but the call stood. Toon's reception on the Jets' first drive, for 6 yards and a first down, extended his streak of games with at least one catch to 65 - every game he has played over six seasons.

The Bills threatened quickly but sputtered and had a field goal attempt deflected by Ron Stallworth. Thomas ran 60 yards through the Jets secondary to

the New York 23 and again for 15 to the 5 but Lageman sacked Kelly for 8 yards before Stallworth's block.

In the third quarter, the Bills went up 23-7 on Norwood's 27-yard field goal, with Thomas collecting 64 yards on the drive, including a 39-yard run.

They added a fourth-quarter TD on Kelly's 6-yard pass to McKeller with 6:34 left in the game.

New York wide receiver JoJo Townsell suffered a concussion as did Buffalo safety Mark Kelso. Townsell came back after Toon left the game with a bruised back late in the second quarter.

#90268u0384 09/25/1990 ~United Press International

(SEPT. 25) UPI - Iraq opted to boycott a U.N. General Assembly session after U.S. officials refused to let Baghdad's envoy arrive on an Iraqi government plane amid U.N. preparations to add an air traffic embargo to economic sanctions against Iraq.

Baghdad's earlier threats against Saudi oil fields and Israel in apparent response to U.N. economic sanctions meanwhile pushed up crude oil prices, which surged nearly $3 Monday to more than $40 a barrel for the first time in a decade.

The market also was jittery in advance of a taped message by Iraqi leader Saddam Hussein to the American people, which was expected to be released for dissemination to U.S. TV networks Tuesday.

State Department spokesman Richard Boucher said Washington had rejected Iraqi Foreign Minister Tariq Aziz's request to fly to the United States on an Iraqi government plane, but he could get a visa to come on a commercial airliner.

The Iraqi government, in a statement on official Baghdad radio, said Monday it was boycotting the U.N. General Assembly session because the United States ''has blocked'' Aziz's trip by ''refusing his plane landing rights.''

State Department spokeswoman Margaret Tutwiler said Aziz's right to come to the United States was not in dispute, only his right to use ''the convenience of a government aircraft.'' She noted Iraq still held least 93 Americans in detention, had refused to allow American diplomats to leave Iraq, and refused to allow consular access to those detained.

The official Iraqi News Agency reported Aziz had sent a letter of protest to U.N. Secretary-General Javier Perez de Cuellar.

The decision to boycott came on the eve of a U.N. Security Council meeting to tighten sanctions against Baghdad with an air traffic embargo to punish Iraq for its Aug. 2 invasion of Kuwait during an oil and border dispute.

The 15-nation Security Council, the more powerful U.N. body, was to vote Tuesday afternoon on a resolution asking governments to withdraw landing rights to aircraft flying to and from Iraq or occupied Kuwait, and to forbid airlines from making scheduled or non-scheduled flights to these two countries.

U.N. diplomats said the air embargo would almost certainly be approved because the five permanent members of the council - the Soviet Union, the United States, China, France and Britain - have agreed on the resolution.

French President Francois Mitterrand meanwhile presented a four-point peace plan to the U.N. General Assembly on the first day of its annual debate Monday. He called for a U.N.-guaranteed Iraqi withdrawal from Kuwait, release of all foreign nationals detained as hostages, reconciliation among countries in the region, and arms reduction from Iran to Morocco.

Mitterrand also called for an international conference on the Middle East to implement resolutions on the conflict and act as a ''catalyst'' for peace.

There was no immediate comment to the plan from leaders at the General Assembly, a forum with the attendance of all 160 U.N. member countries.

Earlier Monday, France rejected an apology Iraq said it made Sunday for breaking into the residence of the French ambassador in occupied Kuwait on Sept. 14. France said it had not yet received an official apology and that it would not be adequate anyway.

A French Foreign Ministry spokesman said France, which responded to the Iraqi move by dispatching extra ground forces to the Persian Gulf, would only be satisfied when Baghdad released three French civilians abducted in the raid on its diplomatic quarters as well as ''all the unjustly held hostages.''

Saddam Hussein is believed to be holding Western male hostages at vital installations in Iraq and occupied Kuwait as ''human shields'' against a possible attack by the U.S.-led multinational force in the Persian Gulf.

At the White House, President Bush meanwhile strongly condemned ''appalling acts of hatred'' in the United States against Arab- Americans.

''This is a sad irony, if while our soldiers fight overseas, a few hatemongers here at home are perpetrating their own brand of cowardly aggression and death threats, physical attacks, vandalism and religious violence,'' he said.

''Discrimination against Arab-Americans must end and these hate crimes have no place in a free society,'' he added. ''We're not going to stand for them.''

At a briefing for Arab-Americans, Bush also warned those who are seeking an Arab solution to the crisis ''we're not going to yield one inch'' on the demand Iraq withdraw from Kuwait ''completely, immediately and without condition.''

#90268u0439 09/25/1990 ~United Press International
(SEPT. 25) UPI - Hot weather in the Great Plains Tuesday led the National Weather Service to wonder if an early Indian summer was taking place, while to the east cool weather prevailed and sunshine covered much of the nation.

Overnight lows dipped into the 40s in the Northeast and frost warnings were in effect at higher elevations.

Even Florida got a bit nippy during the night, with Jacksonville recording its second record cold day in a row.

The temperature dipped to 51 degrees early Tuesday, breaking a 9- year-old record by 1 degree. The early morning low Monday plunged to 53 in the city, breaking a 23-year-old record by 6 degrees.

High pressure kept the rest of the South fair and cool, with daytime temperatures in the 70s and low 80s. Early morning temperatures dropped into the mid 40s in Knoxville, Tenn., but where in the high 70s in Miami.

Hot weather hit the Plains states Tuesday with temperatures expected to top 90 in Nebraska, Kansas and other states to the north. The unseasonable heat prompted the NWS to say it seemed like Indian Summer came early this year to the region.

Skies were clear over much of New York state with light winds and temperatures in the 40s and 50s. In New Jersey, in Wrightstown and Millville, skies were clear with temperatures in the 40s. North Philadephia, Willow Grove and Harrisburg, Penn., had temperatures in the 40s with clear skies.

Flood waters receded in southwest Texas as clear skies and cool temperatures covered the region where roads remained closed Mondays following weekend storms.

Cloudy skies and cool temperatures covered much of the Northwest and to the south low clouds covered the morning sky and the thermometer hovered in the mid 60s in Southern California.

#90268u0476 09/25/1990 ~United Press International
WITH THE U.S. FORCES, Saudi Arabia (SEPT. 25) UPI - Any Iraqi-backed attackers trying to penetrate U.S. forces in Saudi Arabia would have to run ''a gauntlet of fire'' under security rules tightened after a 1983 Beirut car bomb killed 241 Marines, officials said Tuesday.

''I think he would be a pretty stupid terrorist,'' Chief Warrant Officer Charles Roe, who lost 60 friends in the Lebanon bombing, said of any assailant trying to enter his base. ''As a personal opinion, we would like to even the

score. I promise you, he is going to suffer.''

President Bush said Friday he would hold Iraq's Saddam Hussein responsible for any anti-American terrorist activities, underlining Washington's concern about the threat of extremist attacks on some 150, 000 U.S. troops now in the gulf on a mission of confronting Baghdad.

At a large staging facility for the 1st Marine Expeditionary Force, a base which authorities would not allow to be identified, officials said the alert level had been reduced since a few weeks ago, when ''specific information'' prompted them to impose highest security.

''Right now we are at what we would call less than our maximum,'' said Lt. Col. Tom Hayden, the security commander for the sprawling base.

Hayden categorized his potential enemy as ''the same kind of people who have been blowing up Americans for the past 10 years.''

Shiite radicals, whose Islamic fundamentalist creed is firmly anti- American, at one point had occupied the holy mosque in Mecca in 1979. But analysts believe Saudi authorities have quelled the extremist challenge.

However, the U.S. military is also concerned Iraqis or Palestinian sympathizers could have slipped across from Kuwait, particularly among a brief torrent of refugees allowed out the occupied nation 10 days ago.

Hayden believed an extremist's preferred weapon would be a car bomb, and to prevent a repeat of the Beirut debacle, concrete barriers have been erected at gates, forcing all incoming vehicles to slow down for checking.

Machine-gun nests and grenade launchers lined entrance roads, gun- mounted vehicles staged patrols, and the military has also dispersed living and working quarters. The Marines killed on Oct. 23, 1983 in Beirut were housed inside a seven-story building.

''You would have to go through a gauntlet of fire to reach any significant target,'' Roe said. ''Our main lessons from Beirut were dispersion ... and great vigilance.''

Personnel said there was little comparison between the two situations.

In Beirut, hundreds of Marines were housed in the ill-fated building as the best protection from shelling and sniping by militia units. Roe said the car bomber came through an area patrolled by the Lebanese army, and the Americans had a very small control perimeter.

In comparison, U.S. officials said they were confident of their Saudi colleagues, who check civilian workmen entering the base.

Some checkpoints are manned by both Saudi and American personnel, but the base is otherwise clearly defined into areas run by the different militaries, with little overlap.

Authorities have also tried to prevent random attacks against American troops by forbidding troops from entering civilian areas.

Another crucial difference was the Marines in Beirut were under restrained rules of engagement and could not use maximum force. They had an ambiguous mission as peacekeepers while being constantly attacked amid the complex witches' brew of Lebanese politics.

Here, Saddam is a clearly defined enemy. There are no rules of restraint and few gray areas.

''Every Marine is more aware. Certainly every Marine who was in Beirut is more aware,'' said Roe, 41, from Norfolk, Va., who was ordered to leave Beirut the day before the bombing. ''But you can't allow it to dominate your life, or you give in to fear and terrorist pressure.''

#90268u0499 09/25/1990 ~United Press International

(SEPT. 25) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait:

UNITED NATIONS - The U.N. Security Council will meet to consider tightening sanctions against Baghdad with an air traffic embargo. The 15-nation Security Council was to vote Tuesday afternoon on a resolution asking governments to withdraw landing rights to aircraft flying to and from Iraq or occupied Kuwait and to forbid airlines from making scheduled or non-scheduled flights to these two countries. U.N. diplomats said the air embargo would almost certainly be approved.

WASHINGTON - Iraqi leader Saddam Hussein said he would give his videotaped message to the American people to television networks Tuesday. The message is expected to be a rebuttal to the videotaped speech President Bush presented to the Iraqi citizens. The networks were expected to air all or part of the tape after they viewed it.

CAIRO, Egypt - Iraq said it will boycott the U.N. General Assembly session after squabbling with the United States over what type of aircraft would be allowed to transport the Iraqi foreign minister to New York. Foreign Minister Tariq Aziz had requested he be allowed to fly to New York for the U.N. meetings on an Iraqi government plane. The State Department said no, but added Aziz would be welcome if he arrived on a commercial airliner.

WITH THE U.S. FORCES, Saudi Arabia - Any Iraqi-backed attackers trying to penetrate U.S. forces in Saudi Arabia would have to run ''a gauntlet of fire'' under security rules tightened after a 1983 Beirut car bomb killed 241 Marines officials said Tuesday. President Bush has said he would hold Iraq's Saddam Hussein responsible for any anti- American terrorist activities, underlining Washington's concern about the threat of extremist attacks on some 150,000 U.S. troops now in the gulf.

Stocks plunged in erratic trading Monday on major global stock exchanges as surging oil prices and worries over the Middle East crisis combined to rattle investor confidence. Analysts said stocks plummented as oil surged despite a new estimate that members of OPEC are pumping enough oil to forestall, at least until winter, worldwide energy shortages resulting from the Middle East crisis. The extra oil is coming from Saudi Arabia, the United Arab Emirates and Venezuela. Stocks plummeted in New York, London, Frankfurt, Belgium, Amsterdam, Paris, Australia and New Zealand. In New York, the Dow Jones industrial average fell 59.41 points, or 2.36 percent, to 2452.97, its lowest close since late June and early July of 1989.

WASHINGTON - As the last American evacuees headed to their homes in the United States, the State Department said some 1,000 Americans, including 69 with serious medical problems, remain in Iraq and Kuwait against their will. According to the State Department's count, more than 1,900 U.S. citizens and dependents - mainly women and children - were evacuated to the United States by chartered flights. That included 100 on the last planned charter, which arrived in the United States late Sunday.

WASHINGTON - Turkish President Turgut Ozal said the embargo against Iraq will almost certainly resolve the gulf crisis and that threats of war by Iraqi President Saddam Hussein are rhetoric. Asked Monday if Turkey would commit its 800,000-man army to military action against Iraq, Ozal, who is in the United States to meet with President Bush on Tuesday, said on the Cable News Network ''90 percent to 95 percent of the situation can be solved through embargo.'' He called recent Iraqi war threats an ''exaggeration'' that prove the economic embargo is working.

WASHINGTON - The government of Saudi Arabia, amid growing tension with Iraq and warnings of potential terrorist attacks against Saudi diplomats, ordered its embassies around the world to cancel Monday's public National Day receptions. According to two spokesmen at the Saudi Embassy in Washington, the National Day receptions were canceled ''out of solidarity with Kuwait.'' But the invitations for the reception at the Saudi Embassy in Washington had been mailed on Sept. 13, six weeks after the Iraqi invasion of Kuwait occurred.

#90268u0580 09/25/1990 ~United Press International

(SEPT. 25) UPI - Iraq says it's boycotting a U-N General Assembly session after U-S officials refused to allow Baghdad's envoy to arrive in New York City on an Iraqi government plane. The move comes as the Security Council prepares to vote today on a resolution to impose an air embargo against Iraq. The measure tightening sanctions against Baghdad asks governments to withdraw landing rights to planes flying to and from Iraq or occupied Kuwait.

Some progress is reported toward agreement on a deficit-reduction plan. But White House Chief of Staff John Sununu says congressional and White House negotiators are ''NOT quite there yet.'' The two sides meet again today... as the deadline for avoiding automatic spending cuts draws nearer. If NO agreement is reached, the cuts are to take effect Monday.

Two moderate Democratic members of the Senate Judiciary Committee say they'll vote in favor of David Souter's nomination to the Supreme Court. The votes of Senators Howell Heflin of Alabama and Dennis DeConcini of Arizona... coupled with the panel's Republicans... assure Souter of approval when the committee meets Thursday. The full Senate could act on the nomination by Friday.

The Soviet Parliament moved a step closer to a market economy yesterday, but stopped short of adopting a specific program of reforms. The parliament gave President Gorbachev new powers to begin a transition to a market system. But the lawmakers delayed adoption of a specific blueprint... ordering that two different plans be combined and presented to Parliament next month.

-30- 1729

#90268u0663 09/25/1990 ~United Press International

(SEPT. 25) UPI - Skyrocketing oil prices sent stock prices crumpling to their lowest level of the year Tuesday in thin trading on the Tokyo Stock Exchange.

The Nikkei Average of 225 selective issues, which gained 174.85 points Friday, tumbled 418.51 points or 1.8 percent to 23,359.32.

The market was closed Monday for a national holiday.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which gained 1.80 points Friday, plunged 50.41 points to 1, 719.36.

Volume was razor thin as only 230 million shares changed hands, compared with 458.2 million shares Friday.

Elsewhere in Asia, stocks dropped sharply in moderate trading on the Hong Kong Stock Exchange as fears of a worldwide economic crisis affected investors.

The benchmark Hang Seng Index, which tumbled 70.09 points Monday, dropped another 54.27 points or 1.9 percent to 2,807.50.

Among the narrower indexes, financials fell 35.54 points, industrials shed 44.22, utilities were down 68.76, and properties nosedived 99.89 points.

Volume remained light as an estimated 600 million shares changed hands, compared with 575 million shares Monday.

In Singapore, stocks crumbled in quiet trading on the Singapore Stock Exchange as investors continued to worry over surging oil prices and the impact on the local economy.

The Straits Times Industrial Index, which fell 15.65 points Monday, dropped another 19.55 points to 1,113.19. The broader-based All Singapore Index, which fell 5.98 points Monday, lost 5.07 points to 315.18.

An estimated 43.1 million shares changed hands, compared with 32.3 million shares Monday.

In Bangkok, stocks fell sharply on the Thailand Stock Exchange reacting the situation in the Gulf and domestic political developments.

The Stock Exchange of Thailand (SET) Index, which gained 9.16 points Monday, dropped 33.16 points or 5.1 percent to 613.95.

An estimated 1.2 billion shares changed hands, compared with 1.6 billion shares Monday.

In Australia, stock prices fell to their lowest level since May 1988 on the Sydney Sharemarket amid rising Middle East tensions and skyrocketing oil prices.

The All Ordinaries Index, which fell 14.9 points Monday, dropped 17.7 points or 1.3 percent to 1,394.9.

An estimated 80.4 million shares chnaged hands, compared with 52.9 million shares Monday.

#90268u0666 09/25/1990 ~United Press International

BOSTON (SEPT. 25) UPI - A 37-year-old cafeteria cook who won a $3.6 lottery million last month died of a heart attack Monday and his sister-in-law blamed his death on the stress of being an instant millionaire.

William Curry of South Boston won the Sept. 8 Megabucks drawing and took a couple of weeks off.

''He never got to enjoy it,'' Shirley Bourdon said of her brother-in- law's new wealth. ''All he really bought was a Dalmatian puppy for the kids. He

couldn't have afforded that before.''

Curry returned to his job of 20 years at the Merit Food Co. Monday morning for the first time since he won and suffered a fatal heart attack, the Boston Herald reported Tuesday.

Bourdon said Curry had shown signs of stress since winning the jackpot. She said Curry was beseiged by accountants and financial advisers and other people asking for money.

''It was the stress of it that killed him,'' she said. ''We've had no peace'' since winning.

She said Curry and his family were going to sit back for awhile and consider what to do with the money. ''They were only just starting to talk to people about investments.''

Last week Curry cashed the first of 20 annual installments of $180, 722. In his will, he left the money to his family.

He is survived by his wife, Maureen, a 7-year-old son and a 5-year- old daughter.

-30- 1541

#90268u0696 09/25/1990 ~United Press International

(SEPT. 25) UPI - U-N diplomats expect the embargo against Iraq to be widened today. It's almost certain the Security Council will approve an embargo on air traffic. The five permanent Security Council members already have approved the plan.

Egyptian doctors report Iraqi troops have removed terminally ill patients from hospitals in occupied Kuwait. They say premature babies were removed from incubators and died and mentally retarded patients were denied food.

A gunman held 19 hostages for six hours in a McDonald's restaurant in La Verne California, until early this morning. A SWAT team created a diversion with ''flash-bang'' grenades, freed the hostages and arrested the gunman.

Congressional and White House budget negotiators ended a session early this morning saying they made some progress. But they still have NO agreement. More talks are scheduled this afternoon on a 500-BILLION- dollar deficit reduction package.

An engineer for the Christian Broadcasting Network was convicted yesterday of two counts of interrupting soft-porn cable television networks with religious messages. Thomas Haynie was acquitted of four counts.

11 people were killed today when a tourist bus carrying elderly people rolled down an embankment in Australia. 10 seniors and the driver died and 35 other passengers were injured.

Japan's justice minister has apologized for comparing foreign prostitutes to American blacks. Justice Minister Seiroku Kajiyama said at a news conference today he expressed his ''deep apologies.''

A university student has died in India of burns he received when he set himself on fire. He was protesting a government plan to reserve 27 percent of government jobs for India's lower castes.

-30- 1895

#90268u0708 09/25/1990 ~United Press International

(SEPT. 25) UPI - Angola has agreed to accept 100-thousand tons of food from the United States. But a U-S official says it may be too late to save some hungry children. The food will go to all parts of Angola, including those held by rebels.

Nicaragua's Sandinista Front has called for strikes and civil disobedience to protest government plans to fire thousands of workers. The Sandinista front's labor union urged Nicaraguans to stop paying utility bills.

Civil rights leader Jesse Jackson is trying to solve Canada's standoff with Mohawk Indians. Jackson is to meet with Indian leaders on their reservation near Montreal. The land dispute has gone on for 10 weeks.

The Senate has voted to bar age discrimination in workers' benefit plans. The bill overturns a Supreme Court ruling denying disability benefits to a 60-year-old woman.

The shuttle Discovery is expected to be launched October 6th or 7th. An exact target date will be announced today. Discovery is to fire a European spacecraft into orbit around the poles of the sun.

Four people were killed yesterday when an airplane crashed while trying to land at a foggy airport in San Luis Obispo, California. Another light plane crash at the base of Mount Baldy in California killed two people.

Airline unions say if a United Airlines employee buyout of the company fails, a strike may result. Union leaders urged pilots to tell the board of directors they support the buyout.

Siegfried and Roy put on the 10-thousandth performance of their illusionist show last night at Las Vegas, Nevada. They hold the record for most performances.

-30- 1775
#90268u0727 09/25/1990 ~United Press International
CRANSTON, RI (SEPT. 25) UPI - The CVS pharmacy chain will not pursue a shoplifting charge against a state senator who allegedly stuffed condoms into his socks and pocket and walked out of a store without paying for them.

The general counsel for CVS, Zenon P. Lankowsky, sent police an affidavit explaining that the Woonsocket-based chain did not wish to proceed against Sen. Dominick Ruggerio, D-Providence.

Lankowsky, a CVS vice president, said in the affidavit that the company is dropping charges ''without threats, coercion or intimidation.'' A company spokesman declined further comment Monday and Ruggerio could not be reached.

Ruggerio is running for re-election in the 4th Senate District in Providence. He was to have been arraigned Tuesday on a misdemeanor charge he shoplifted a dozen condoms from a CVS store on Sept. 14. The court appearance was canceled when the company decided against pursuing the charge.

Police arrested Ruggerio shortly after they arrived at the pharmacy to investigate the shoplifting complaint. The store manager told police she saw Ruggerio opening boxes in the toiletry aisle and putting packages into his sock.

Ruggerio paid for other items at the counter and walked out of the store. When police confronted him, a pat-down search yielded two packages of condoms from Ruggerio's left sock, one from his right sock, and another from his left pants pocket, a police report said.

-30- 1622
#90268u0730 09/25/1990 ~United Press International
PARIS (SEPT. 25) UPI - The world petroleum market has adequate reserves of crude oil to withstand the embargo against Iraq, but the supply of refined oil products is less clear, a representative of the International Energy Agency said Tuesday.

He said the agency is unlikely to propose its 21 member countries draw from their crude oil reserves when the body's governing board meets in Paris Friday to review the world petroleum supply in light of the Iraqi invasion of Kuwait.

''Seven weeks after the start of the gulf crisis, supplies of crude remain sufficient, though not comfortable,'' according to the high-level representative, who did not want to be named.

''There is more petroleum on the market than we had expected,'' the representative added.

He said the agency's members would draw from their crude oil reserves only in case of real shortages, putting aside suggestions that they try to regulate the sharp fluctuations that have destabilized the world oil market in recent weeks.

Since the advent of the crisis Aug. 2 the agency has twice decided it was not necessary to draw on its members' emergency petroleum reserves or to impose its emergency oil-sharing system.

''To try and allay the fluctuations in the world oil market by drawing on the strategic stocks would have little impact on petroleum prices because market operators are not reacting to the fundamentals but rather to a fear of war,'' the representative said.

Spot oil prices for October delivery of Britain's North Sea Brent went above the $40 a barrel mark in London Monday, the highest spot price for the benchmark crude since December 1980.

The U.S. benchmark West Texas Intermediate crude for November delivery ended the day at $38.25 a barrel, up $2.82 over Friday's record close on the New York Mercantile Exchange, which began trading WTI futures contracts in March 1983.

Nevertheless, industry experts point out that the $40 a barrel reached during the second oil shock in 1979 is equivalent to $80 a barrel today if inflation and the evolution of the U.S. dollar are taken into account.

Total emergency oil reserves among IEA members total about 1 billion barrels, the equivalent of 150 days of the agency's net petroleum imports and 100 days of consumption at current levels.

The United States has set aside 590 million barrels in response to the oil shortages of the 1970s, with Japan's reserves put at some 208 million barrels and West Germany's at 53 million barrels.

The IEA's emergency oil-sharing system may be put into effect if several or all of its member countries see their oil supplies reduced by 7 percent, at which point the agency would determine quotas according to the consumption level of each member.

Production by the 13-member Organization of Petroleum Exporting Countries reached 22 million barrels a day this month due to faster than expected production increases by Saudi Arabia, Venezuela, and the United Arab Emirates, according to industry sources.

At its last meeting Aug. 31, the IEA's Governing Board said the agreement by OPEC countries to increase production sharply and the significant use of

commercial stocks had stabilized then world-oil supply. But the agency also warned at the time that the outlook for the coming months remained uncertain.

Since then, the halt in activity by Kuwaiti refineries resulting from the U.N. embargo on Kuwaiti and Iraqi oil has disturbed certain markets, especially in Asian and East African countries and in the Indian Ocean area, according to industry observers.

The refined oil products market will encounter further difficulties if the coming winter in the Northern Hemisphere is particularly cold or if there is an incident at a major refinery leading to a drop in production, the official said.

-30- 4037

#90268u0736 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - America's slumping output of goods and services inched up only 0.4 percent in the second quarter, the government said Tuesday in its final estimate of the gross national product for the period.

In its previous estimate, the Commerce Department reported the real GNP increased 1.2 percent in April, May and June. Most private economists expected no change in the final data.

The tiny gain was the worst since the final quarter of 1989, when the real GNP squeaked ahead 0.3 percent.

A Commerce Department spokesman attributed the poor showing, which amounted to an increase of $4.5 billion, to less income on U.S. investments abroad and a decline in industrial prduction.

Adding to the disheartening economic news, the government also said Tuesday that after-tax corporate profits were down 0.6 percent in the second quarter, wiping out a gain of 0.5 percent in January, February and March.

Analysts keep close watch on the real GNP. Two or more consecutive quarters of negative growth indicate a recession. Small increases, such as the 0.4 percent gain, can be a warning sign of hard times ahead.

In the first quarter of the year, the real GNP advanced a modest 1.7 percent - or $17.4 billion - according to the data compiled by the department's Bureau of Economic Analysis.

The implicit price deflator, an important barometer of inflation, tied to the real GNP data slid to 4.7 percent in the second quarter of 1990 from 4.8 percent in the first quarter, the government said.

During April, May and June, personal spending edged up 0.2 percent, with a 5.1

percent advance in services ofset by declines of 9.5 percent for durable goods and 1.9 percent for non-durable goods.

Exports of goods and services, which have been a pillar of strength in recent months, were off a substantial 5 percent, which imports increased 0.7 percent, the Commerce Department said.

Business investment, meanwhile, fell 4.7 percent from the previous quarter, the department said, while government purchases of goods and services jumped 6.2 percent.

(SEPT. 25) UPI - Federal officials say government probes of the weight loss industry are shifting from diet aid quacks to ''mainstream'' diet centers with big name programs. Richard Kelly of the Federal Trade Commission told a House panel yesterday the agency is looking at 14 diet clinics and programs in ''a broad-scale investigation of the diet industry.''

A consumer group says Americans' lack of knowledge of consumer matters costs them BILLIONS of dollars each year, and threatens their health and safety. The Consumer Federation of America says Americans averaged just 54 percent on a test designed to assess their knowledge on consumer issues such as banking, food and insurance.

A new survey shows conflicting attitudes on the issue of separation of church and state. Americans United for Separation of Church and State says many Americans indicate they support such separation. But they also support such ideas as government involvement in school prayer. The group says many Americans have a poor understanding of the meaning of religious freedom.

Hot weather hit the Great Plains today, with temperatures expected to top 90 degrees in Nebraska, Kansas and other states to the north. To the East, cool weather prevailed. Overnight lows dipped into the 40's in the Northeast, and even Florida was a bit nippy. The temperature this morning in Jacksonville was 51 degrees.

#90268u0856 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - America's slumping output of goods and services edged closer to recession in the second quarter, inching up only 0.4 percent, the government said Tuesday in its final estimate of the gross national product for the period.

The latest weak data ''suggest that we are in a recession now,'' said Allen Sinai, chief economist at the Boston Co.

Robert Dederick, chief economist at Northern Trust in Chicago, added, ''I think a mild recession is ahead because of the oil shock'' set off by Iraq's occupation of Kuwait.

In its previous estimate, the Commerce Department reported the nation's real GNP increased 1.2 percent in April, May and June. Most private economists

expected no change in the final data.

The tiny gain in the months before Iraq crisis was the worst since the final quarter of 1989, when the real GNP squeaked ahead 0.3 percent during a nationwide winter cold snap.

At the White House, presidential spokesman Marlin Fitzwater said: ''It's not good news. The number is very low. Obviously we are concerned about the economy and the growth rate. ... It is certainly cause for concern.''

But Fitzwater added: ''We don't believe we are in a recession right now.''

A Commerce Department spokesman attributed poor second quarter showing, which amounted to an increase of $4.5 billion, to less income on U.S. investments abroad and a decline business inventories on weak industrial production.

Sinai also cited a ''slide in business capital spending, trade, state and local government spending and most consumer spending.''

''I think we're in for a moderate recession,'' Sinai said. ''I think we can no longer expect a mild recession, with considerable risk of something worse than moderate'' if war breaks out in the Middle East.

Adding to the disheartening economic news, the government also said Tuesday that after-tax corporate profits were down 0.6 percent in the second quarter, wiping out a gain of 0.5 percent in January, February and March.

Dederick noted the data ''emphasizes that the economy was running out of gas in the second quarter prior to the oil shock.''

''It was a well-balanced slowdown,'' Dederick said. ''It was a tired- old expansion waiting for something to happan and what happened was the oil shock.''

Analysts keep close watch on the real GNP. Two or more consecutive quarters of negative growth indicate a classic recession. Small increases, such as the 0.4 percent gain, can be a warning sign of hard times ahead or indicate a period of punishing stagnation.

In the first quarter of the year, the real GNP advanced a modest 1.7 percent - or $17.4 billion - according to the report compiled by the department's Bureau of Economic Analysis.

The implicit price deflator, an important barometer of inflation, tied to the real GNP data slid to 4.7 percent in the second quarter of 1990 from 4.8 percent in the first quarter, the government said.

During April, May and June, personal spending edged up 0.2 percent, with a 5.1

percent advance in services offset by declines of 9.5 percent for durable goods and 1.9 percent for non-durable goods.

Exports of goods and services, which have been a pillar of strength in recent months, were off a substantial 5 percent, which imports increased 0.7 percent, the Commerce Department said.

Business investment, meanwhile, fell 4.7 percent from the previous quarter, the department said.

Government purchases of goods and services jumped 6.2 percent on a strong non-defense spending by the federal government, offsetting weak state and local government purchases.

#90268u0862 09/25/1990 ~United Press International

LUSAKA, ZAMBIA (SEPT. 25) UPI - President Kenneth Kaunda, just one day after proposing to scrap the one-party system, suspended three members of Parliament Tuesday for going too far in espousing multi-party democracy.

Bennie Mwiinga, one of the suspended members of the United National Independence Party, accused Kaunda of violating the constitution.

''The fact that we hold different views from those of the UNIP does not mean that we have stopped being UNIP members,'' he said. ''We have taken this as the last kick of a dying horse.''

Mwiinga said he and the two others suspended from the 135-member party left the 25th National Council session of the UNIP immediately after Kaunda announced their suspension. He quoted the president as saying the three had gone ''too far in their criticism of the party policies.''

Kaunda made an unexpected policy reversal Monday in a bid to avert mounting popular discontent. He then asked the UNIP National Council to approve an end to the one-party state and discard a national poll on the issue scheduled for 1991.

Pro-democracy activists welcomed the proposal and Arthur Wina, chairman of the opposition Multi-Party National Interim Committee, Wina said he wanted to credit Kaunda ''for having read the political signs for change correctly.'' Wina said the multi-party movement would start planning strategies ''to catch up with the change.''

Kaunda had announced in June, following a week of bloody anti- government rioting, that Zambia would hold a referendum in August 1991 to test popular support for a return to the multi-party system phased out 17 years ago.

But the 65-year-old president, who has ruled since independence from Britain in 1964, said Monday he was proposing a restoration of democracy without holding a referendum to prevent further bloodshed in the debt- strapped southern African state and because ''I do not want to split the country into two camps.''

Under Kaunda's new proposals, a president would be directly elected for a five-year term by a majority vote. But he gave no details of requirements for candidates or prospective parties nor any indication of when an election would be held.

Kaunda's announcement followed massive public protests - two of them drawing up to 100,000 people - by citizens demanding an early implementation of a multi-party democracy.

#90268u0864 09/25/1990 ~United Press International

BANGOR, MAINE (SEPT. 25) UPI - A twin-engine charter airliner with 204 passengers on board was forced to make an emergency landing at Bangor International Airport early Tuesday after losing cabin pressure over the Atlantic.

The British-owned 757 Air Europe jetliner had left Bangor about midnight bound for London when it gradually lost pressure about an hour and a half out over the Atlantic, causing decompression problems for some of the passengers, said Bangor airport manager Peter Derrico.

The pilot descended to a safe altitude and came back to Bangor, landing about 2:30 a.m., Derrico said.

The change in pressure caused discomfort to some passengers' ears, and about 70 were checked by medical personnel after they landed, Derrico said.

No one was seriously injured, he said.

#90268u0865 09/25/1990 ~United Press International

(SEPT. 25) UPI - The government today revised the gross national product for the second quarter and says the economy grew only four-tenths of one percent. Earlier estimates said the increase was three times as large. A Commerce Department spokesman says industrial production declined and U- S investments abroad brought less income. Gross national product is a measure of the nation's total output of goods and services.

A SWAT team stormed a McDonald's restaurant in La Verne, California, early this morning to rescue 19 diners and employees who were held hostage. A gunman

who held them for more than six hours was arrested. The police first freed restaurant workers from the basement. Then, they used ''flash-bang'' grenades to create a diversion and rescued the remaining hostages in the dining room.

The U-N Security Council meets today to consider tightening the embargo against Iraq. It is expected to approve a plan to ask governments to prohibit landing rights to planes flying in or out of Iraq and Kuwait. The five permanent Security Council members have approved the plan and U-N diplomats expect the full council's backing.

NASA officials are expected to make a final decision today on when the shuttle Discovery should be launched. Engineers at a review yesterday recommended October 7th. Discovery is to fire a European spacecraft on a journey that will take it near Jupiter, then toward the sun where it will go in orbit around the solar poles.

#90268u0905 09/25/1990 ~United Press International

BEIRUT (SEPT. 25) UPI - A Lebanese newspaper reported Tuesday that some of the 13 foreign hostages held in Lebanon would be freed as a result of summit talks between leaders of Syria and Iran.

The Ad-Diyar daily newspaper quoted unnamed diplomatic sources as saying that the captives would be freed shortly after the return of Syrian President Hafez Assad to Damascus from Tehran.

Assad, who held talks in Tehran with his Iranian counterpart Hashemi Rafsanjani focusing on the Persian Gulf crisis, was expected to return home within 24 hours.

Political sources had reported Syria would exert fresh efforts with Iran to resolve the hostage plight as a result of a recent visit to Syria by Secretary of State James Baker.

Iran is believed to enjoy wide influence on the kidnappers of the 13 foreign captives, while Syria is considered a major power broker in Lebanon with 35,000 Syrian troops deployed on two thirds of the country.

There have been a series of reports that some or all three British hostages

would be released soon as a fruit of a rapprochement between Iran and Britain.

#90268u0929 09/25/1990 ~United Press International

EAST HARTFORD, CT (SEPT. 25) UPI - Pratt & Whitney, a major manufacturer of jet engines, has advised customers of cracks found inside the main turbine shafts of 12 of its newest engines, a company spokesman said Tuesday.

The problem was considered serious enough to advise all customers and the Federal Aviation Administration when it was discovered earlier this month by the company, said Pratt & Whitney spokesman Mark Sullivan.

Sullivan said emergency inspections have turned up cracks in only 12 of the 174 PW4000 engines delivered to aircraft builders and air carriers so far. The engines are designed to power widebody airliners.

As a precaution, the company inspected additional low-pressure tube shafts destined for manufacturers but no defects were found, Sullivan said.

He said the company does not believe any engines with flawed shafts now are in service. ''We're confident that we reacted very quickly,'' the spokesman said.

The PW4000 is Pratt's newest and most powerful jet engine and is viewed as the company's single most important product of the 1990's.

One of the defective shafts had been in airline service before it was grounded and three others had been shipped to aircraft manufacturers for installation on jumbo passenger jets, said Sullivan. He declined to identify the airline that had the defective engine.

Sullivan said the other eight were found in various stages of assembly at Pratt plants in Connecticut.

All the defective shafts had cleared inspections at Pratt and at LeFeill Manufacturing Co., the California subcontractor that forged the engine shafts for Pratt.

Michael Ciccarelli, spokesman for the FAA's regional office in Burlington, Mass., said the problem is being worked on and he expected the agency to come up with guidelines within the week.

Sullivan said the cracks were traced to a ''process problem'' at the California forging house but it has yet to be determined what caused the problem.

Pratt, which employs about 46,000 workers and has annual sales of about $7 billion, is headquartered in East Hartford, Conn., and is a subsidiary of

United Technologies Corp.

Since entering service in 1987, Pratt has delivered more than 350 of the engines to power the Boeing 747, the MD-11, and the Airbus A300, A310 and A330 widebody planes for airlines around the world.

-30- 2572

#90268u0938 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Amid word of some progress toward an agreement on a five-year, $500 billion deficit reduction package, the White House spokesman warned both sides Tuesday that ''the consequences of their negotiations are central to the course of the economy.''

Negotiators face an Oct. 1 deadline to reach an agreement on a deficit-cutting budget or face sequester or massive, automatic across- the-board cuts.

''We don't like to use the 'R' word,'' said White House press secretary Marlin Fitzwater, referring to a recession, ''but clearly a sequester would be very difficult. It would be difficult for the economy as well as for the country directly in terms of services provided.

''So we want to avoid sequester... and we're very hopeful we can get a deal that will avoid it,'' he said.

Fitzwater expressed particular concern about word Tuesday that the country's slumping output of goods and services inched up by only 0.4 percent in the second quarter - the worst gain since the final quarter of 1989.

''I guess if there is any single message that these numbers give us is that the urgency for a budget agreement is real,'' he said. ''I would hope that all parties to the negotiations, Republican and Democrat alike, understand that the consequences of their negotiations are central to the course of the economy and these numbers clearly show the urgency of that need.''

Fitzwater noted that the negotiators had worked through the night until about 12:30 a.m. Tuesday, and that some progress had been made.

After the nearly four hours of talks with Democrats, White House chief of staff John Sununu, one of the negotiators, reported, ''We're making progress on savings ... cutting spending, but we're not quite there yet.''

And Senate Republican leader Bob Dole of Kansas said the group had made ''some'' progress.

But there was no indication that any significant progress had been made on what Democrats have said is the biggest obstacle blocking an agreement - President Bush's insistence on cutting the capital gains tax.

Negotiators planned to resume talks Tuesday afternoon.

Negotiators are working under a rapidly approaching deadline to avoid imposition of $105.7 billion in automatic, across-the-board spending cuts required under the Gramm-Rudman balanced budget law.

Those cuts, split evenly between defense and domestic programs, are scheduled to take place beginning Oct. 1, the start of federal fiscal year 1991.

The cuts are expected to cause massive furloughs of federal workers and huge cutbacks in services ranging from air traffic control to food inspections.

Negotiators met for four hours Sunday night but failed to reach agreement on several unresolved issues, including Bush's call to cut the capital gains tax.

On Monday, Fitzwater denied that Bush's support for cutting capital gains taxes on profits from the sale of assets ''is the major stumbling block'' in reaching a budget agreement, as Democrats claim.

''We still don't have agreement on two or three other areas as well, big areas '' Fitzwater told reporters. ''There are many other issues still outstanding. We are not even close on the spending cut side. In fact, the Democrats have proposed spending increases.

Fitzwater charged that ''Democrats have been able to focus attention on the capital gains provision to the overall detriment of the progress in the negotiations, as far as we are concerned.''

Republicans vented frustration on the House floor at lack of a budget accord.

''The Democrat leadership of this Congress is not merely adamant and incalcitrant, it is also imcompetent, unable to pass a budget, unable to pass appropriations and only willing to allow (automatic spending cuts) to come about,'' said Rep. Bill Frenzel, R-Minn., a budget negotiator.

''We need a budget agreement now. It has to take place in the next 24 hours. And Congress better do it or it's going to stand judged as even more incompetent than its usual low standard.''

To demonstrate their frustration, House Republicans demanded time- consuming roll call votes on a long list of mostly non-controversial bills on Monday's House calendar - bills which often pass on voice votes or lop-sided recorded votes with broad bipartisan backing.

#90268u0950 09/25/1990 ~United Press International

SEOUL, SOUTH KOREA (SEPT. 25) UPI - International Olympic Committee President Juan Antonio Samaranch received the first Seoul Peace Prize Tuesday for his ''contributions to world peace and harmony of mankind.''

The prize, composed of a citation, a plaque and a cash gift of $300, 000, was awarded to Samaranch by prize committee chairman Kim Yong-shik at a ceremony in downtown Seoul.

The Seoul Peace Prize was created to commemorate the 1988 Seoul Summer Olympic Games, in which 160 nations participated, and Samaranch was picked as the first recipient for his roles leading the Seoul Olympiad to success.

''I am well aware of the devoted and unsparing efforts of President Samaranch and the IOC to ensure the success of the Seoul Olympic Games,'' President Roh Tae-woo said in a congratulatory speech at the ceremony.

Samaranch, said he would donate all the prize money for an Olympic museum to be located at Lausanne, Switzerland.

Samaranch arrived in Seoul Monday night from Beijing where he attended the opening of the 11th Asian Games now under way.

The Seoul Peace Prize will be awarded once every two years to individuals and organizations that contribute to world peace and harmony of mankind through sports.

#90268u0968 09/25/1990 ~United Press International

BEIRUT, LEBANON (SEPT. 25) UPI - The government of President Elias Hrawi said Tuesday that Gen. Michel Aoun's 2-year-old rebellion ''should be ended soon,'' but insisted it still is pursuing ''peaceful options.''

The declaration followed numerous reports that Hrawi was preparing for an attack against Aoun's forces by using the 20,000-member regular army loyal to him.

Information Minister Edmond Rizk said the Cabinet, during a meeting chaired by Hrawi at the temporary presidential palace in Moslem west Beirut, ''discussed the case of (Aoun's) rebellion and decided to give a chance to peaceful options.''

''But the mutiny should be ended soon,'' Rizk said.

The government made no mention of reports that Hrawi's Lebanese army troops planned to block all roads around Aoun's enclave to tighten the noose around the isolated general.

Aoun, a Christian Maronite general, was appointed as head of a transitional government by former President Amin Gemayel Sept. 22, 1988. But since then, Aoun, with 15,000 troops under his command, has held the traditional presidential palace in the district of Baabda, 5 miles southeast of Beirut.

Aoun has refused to recognize Hrawi, who was chosen president as a result of a peace accord that was worked out last October by the Lebanese parliament in Taif, Saudi Arabia.

In an interview with the French magazine Le Monde, excerpts of which were published Tuesday by the Lebanese Moslem-run daily As-Safir, Aoun ruled out an imminent military offensive against him for the lack of Syrian backing.

''The Syrians have other things to worry about now,'' Aoun said. ''They'll have to follow up on Iraq's events, Israel, the possible collapse of Jordan and internal disturbances,'' Aoun said.

Syria, a main power broker in Lebanon with 35,000 troops covering two-thirds of the country, has sent troops to Saudi Arabia as part of an international deterrent force against Iraq.

Syrian President Hafez Assad was in Iran reportedly seeking to persuade the Iranians to back off from a rapprochement with the Iraqis.

-30- 2274

#90268u0976 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Sales of existing single-family homes increased 2.1 percent in August despite an increase in mortgage interest rates, the National Association of Realtors said Tuesday.

The group's monthly survey reported an annual sales rate of 3.40 million existing dwellings in August vs. 3.33 million homes in July. The figures were adjusted for seasonal factors.

''Sales of previously-owned homes remained at a healthy level during August, reflecting continued buyer strength in certain regions of the country,'' the association said.

''The month-to-month rise shows an upward trend over the last three months, however, the August rate was 1.2 percent lower than the August 1989 rate,'' the group said.

The median price for existing homes was $97,000 in August, and the Federal Home Loan Mortgage Corp., Freddie Mac, said the average rate for 30-year fixed-rate mortgages rose last month to 10.24 percent from 9.84 percent.

''Despite rising interest rates, the resale market is stable and slightly better than July,'' said Norman Flynn, president of the national association. ''The strength we see largely is due to people who are buying homes in less populous areas and recreational areas.''

By region, the association said ''sales pace increases were seen in the Midwest and the South from July to August, while the Northeast and West experienced declines.''

In the Northeast, the August resale rate dipped 1.8 percent and the median price last month was $144,900. In the Midwest, resales rose 2.2 percent and the median price was $75,000.

In the South, the resale rate climbed 6.9 percent and the median price was $86,900. In the West, August housing resales fell 3.8 percent and the median price was $141,600.

The association also said there was a 9.4-month supply of existing single-family homes available for sale from coast-to-coast at the end of August, up from a 9.3-month supply in July.

There was an 8.1-month supply in August 1989.

#90268u0984 09/25/1990 ~United Press International

(SEPT. 25) UPI - The surgeon general's report on smoking says quitting is the ''single most important step'' smokers can take to extend their lives. Surgeon General Antonia Novello emphasized the ''good news'' rather than the ''bad news'' of diseases caused by smoking. She says that smokers who quit before the age of 50 will cut by 50 percent the risk of dying in the next 15 years of their lives.

Relatives say it was the stress of being an instant Millionaire that killed William Curry of South Boston. The 37-year-old cafeteria cook won a three-point-six-Million-dollar lottery jackpot last month. He returned to his job for the first time yesterday and suffered a fatal heart attack. His sister-in-law says Curry was beseiged by financial advisers and people asking for some of the money he won, and she says it was that pressure that contributed to his death.

The Vatican says there are limits on how far teachers in Roman Catholic universities can dissent from church doctrine. Pope John Paul released a

Vatican report today that appears to give local bishops more power to enforce doctrine at centers for higher learning. The text does recognize the notion of academic freedom, a concern that U-S educators expressed in trips to Rome.

LA VERNE, CALIF. (SEPT. 25) UPI - A Special Weapons Team using ''flash-bang'' grenades as a diversion stormed a McDonald's restaurant early Tuesday, freeing 19 hostages held by a gunman during a nearly seven-hour seige.

The incident ended peacefully after a night of chilling memories of the McDonald's massacre of 1984 that left 22 people dead in San Diego.

None of the hostages, who ranged from a 3-year-old girl to an 85- year-old woman, was injured.

The gunman and a second suspect, both ex-convicts believed involved in an earlier armed robbery of a clothing store near the restaurant, were arrested.

The incident began about 5:30 p.m. Monday when Douglas Girard, 32, of San Jacinto, Calif., walked into the Kids Mart clothing store with a handgun and robbed the clerk of about $200, Los Angeles County Sheriff's Deputy Roger Hom said.

Before leaving the bandit told the clerk that another man armed with a high-powered rifle was waiting outside in a car, Hom said.

The clerk immediately called 911 to report the robbery and a La Verne police officer was at the store within 30 seconds, Hom said.

The officer saw two men who looked liked the suspects walk into the McDonald's restaurant across the street from the children's store. Police immediately surrounded the restaurant.

A McDonald's employee said the men ordered Big Mac hamburgers, French fries and drinks before someone noticed the handgun.

Officers arrested Frank Teresi, 38, of Anaheim, when he walked out minutes later. He was unarmed.

With several employees and customers still inside with Girard, who still had the gun, a sheriff's SWAT team was brought in by helicopter.

Police units from at least three other cities were also sent to aid the small police force in La Verne, a city of 32,000 located about 30 miles east of Los Angeles.

A command post was set up at a high school and a sheriff's negotiator attempted to contact the gunman. A nearby shopping center was evacuated, surrounding streets were closed and family members of the hostages gathered at La Verne's police station.

''During the standoff it was discovered that 12 McDonald's employees had barricaded themselves in the basement of the restaurant away from the gunman '' Hom said. One of the employees used the telephone in the basement to talk with deputies.

Deputies were able to rescue the 12 employees from the basement about 11:25 p.m. Monday, Hom said.

Shortly after midnight, the SWAT team detonated three ''flash-bang'' concussion grenades inside the restaurant. Deputies then rushed the suspect, arrested him without shots fired and rescued two children and five adult customers.

A loaded .38-caliber pistol was recovered inside the restaurant.

Girard was treated for a bloody nose suffered during the arrest and because police believed he was under the influence or heroin, La Verne police Sgt. John Ortega said.

Both Teresi and Girard were booked at the La Verne jail on suspicion of armed robbery and false imprisonment.

Teresi is currently on parole for robbery and being under the influence of drugs, Ortega said. He was held without bail. Teresi was also wanted on four outstanding warrants, one for being under the influence of drugs and three for failing to appear in traffic court.

Girard was released from parole in June, 1990, and was wanted on a bench warrant for failing to appear in a Riverside, Calif. court on a burglary charge, Ortega said.

The incident brought back memories of another Southern California McDonald's about 130 miles to the south. On July 18, 1984 in the San Diego suburb of San Ysidro, 22 people died in a fusillade of gunfire, including gunman James O. Huberty, who killed 21 people at the restaurant before being shot to death by a police sniper.

It was the single largest mass-shooting murder in a single day in U.S. history.

#90268u1006 09/25/1990 ~United Press International

AUSTIN, TEXAS (SEPT. 25) UPI - A state district judge Tuesday declared

unconstitutional a $528 million school finance reform bill passed by Texas lawmakers in an attempt to meet a state Supreme Court order to equalize education funding between rich and poor districts

The plan, which was challenged by plaintiffs who won the landmark Edgewood vs. Kirby case before the Texas high court, had been before Judge Scott McCown since July.

Kevin O'Hanlon, an assistant attorney general who represented the state in the case, said the ruling by McCown strikes down the new financing system but does not give the state any guidance as to how to remedy the problems.

McCown set a new deadline, Sept 1, 1991, for the Legislature to come up with a more equitable plan.

Lawmakers adopted the $528 million finance in early June in an effort to comply with an order from the state Supreme Court to equalize education funding.

McCown issued the ruling in response to a challenge filed by plaintiffs who won the landmark case before the court. The plaintiffs have argued the proposal is just a ''Band-Aid'' that pumps more money into the same, old inequitable funding system.

The five-year plan, which is backed by a package of tax hikes, budget cuts and fee increases, was passed by lawmakers in June during its fourth special session on the issue.

The plaintiffs, which include the Edgewood School District in San Antonio, contended that the plan did little to meet the Supreme Court order that the state change its system for distributing state aid to guarantee equal educational opportunities to students in wealthy and poor school districts.

O'Hanlon said the finance system will stand for the remainder of the school year and the state will study the decision before it decides to appeal to the Texas Supreme Court.

In the first year, the bill pumps $528 million in new money into the system to begin supplementing districts with low property wealth.

Passage of the bill came just a few days after a special court master released a ''Robin Hood'' plan for redistributing already appropriated education money. That plan would have taken millions from rich and urban districts to supplement poor schools.

PITTSBURGH (SEPT. 25) UPI - Former Philippine first lady Imelda Marcos, granted immunity from prosecution, testified Tuesday before a federal grand jury investigating allegations of $17 milion in bribes paid by Westinghouse Electric Corp. to her late husband.

Marcos's lawyer said she was not a target of the investigation into $17 million allegedly funneled to Ferdinand Marcos in connection with construction of a nuclear power plant in the Philippines.

Mrs. Marcos was greeted outside the courthouse by several dozen supporters. She offered hugs, kisses and handshakes to them before an initial appearance before U.S. District Judge Alan Bloch, who signed a grant of immunity.

''They wrote a letter and offered it,'' her attorney, James Linn, said outside the grand jury room. ''Any attorney who would decline it would be crazy. It means what she says cannot be used against her. It also means she is not a target.''

Linn said he expected Marcos to be in front of the grand jury ''for most of the day.'' He said she has little information to offer to the investigation.

The intermediary who allegedly funneled the bribe to Ferdinand Marcos is the former president's one-time golfing partner, Herminio Disini.

''She hardly knew (Disini),'' Linn said. ''I think she only met him two or three times in her life.''

Westinghouse acknowledges the $17 million payment to Disini but said the money was paid as commissions to him for his assistance when Westinghouse was attempting to secure the construction contract for a $2.3 billion nuclear power plant.

The plant was built about 60 miles west of Manila but has never been put into operation by the government under Corazon Aquino.

A jury in New York this year cleared Mrs. Marcos of fraud charges involving the Marcoses's purchase of millions of dollars in real estate.

#90268u1067 09/25/1990 ~United Press International
BRUSSELS, BELGIUM (SEPT. 25) UPI - Recent sharp hikes in oil prices during the Persian Gulf crisis are the ''totally unjustified and indefensible''

result of speculation at consumer expense, the European Community's top energy official said Tuesday.

He also warned the oil and gas industries that their ''future relationships with governments'' could be threatened by recent practices.

Oil prices have doubled since Iraq invaded Kuwait Aug. 2, and spot oil prices topped $40 on Monday for the first time in a decade.

''The increases in oil prices yesterday and in the past few weeks are totally unjustified and indefensible,'' said Antonio Cardoso e Cunha, the EC energy commissioner.

''They can only be explained by speculation at the expense of consumers,'' he said.

The loss of oil production from Iraq and Kuwait as a result of the Aug. 6 U.N. embargo imposed in the wake of the Iraqi invasion has been made up by higher production elsewhere, he said, so oil stocks in Europe and other regions are ''unusually high.''

About 11 percent of the 12-nation EC's oil imports came from Iraq and Kuwait last year.

Companies and traders will eventually be left holding high-priced oil and facing large financial losses, and ''they will deserve no public sympathy,'' Cardoso said in a statement.

''I believe that the oil companies and the oil-producing countries should now think very carefully about the long-term implications of this situation,'' he said.

Prices paid by Europeans for gasoline will soon rise ''considerably,'' he said because oil companies link gas and oil prices, ''a practice which is no longer justifiable'' in the current speculative market.

''The oil and gas industries should reflect on the effect these types of practices could have on public opinion and on their future relations with governments,'' Cardoso said.

#90268u1070 09/25/1990 ~United Press International

NORFOLK, VA (SEPT. 25) UPI - The Navy's newest nuclear-powered aircraft carrier, the $3 billion USS Abraham Lincoln, steamed out of port Tuesday, headed for a long shakedown cruise and its new homeport of Alameda, Calif.

About 4,500 sailors and some 500 families will be leaving Norfolk for the West

Coast. They will bring a $30 million payroll to the area around the Naval Air Station in Alameda.

The 95,000-ton, 1,092-foot carrier pulled out of the Norfolk Naval Station at 10:35 a.m. as dozens of family members waved goodbyes to the sailors who stood in crisp white uniforms along the deck rail.

A banner hung on the ship's stern read like a huge license plate: ''1990 California, Made in VA''

''It's a great ship and a great crew,'' Capt. William Hayden of Oakland, Calif., said. ''We're ready to go to sea.''

The Lincoln will travel for about two months, sailing around Cape Horn on the tip of South America, to its new Pacific base. It is the first extensive cruise for the Navy's fifth Nimitz-class carrier, built at a cost of more than $3 billion at Newport News Shipbuilding.

Alameda was at one time the homeport of all nuclear-powered carriers assigned to the West Coast but it recently lost the Nimitz to a new port in Bremerton, Wash., as well as the carrier Carl Vinson and the carrier Enterprise to extensive overhauls.

The Enterprise, which was in Alameda, traveled to Norfolk this year for the start of a $1 billion overhaul.

#90268u1080 09/25/1990 ~United Press International

DEARBORN, MI (SEPT. 25) UPI - Honda Motor Co. has announced plans to have both driver- and passenger-side air bags as standard equipment on all Honda and Acura cars starting with the 1994-model year.

Company President Nobuhiko Kawamoto, during a press conference Monday in Dearborn, denied that Honda's decision had anything to do with rival Chrysler Corp.'s safety-oriented advertising.

Chrysler is boasting that it is the only U.S. manufacturer to have driver-side air bags as standard equipment in all domestically made models.

Federal safety regulations stipulate that after Sept. 1, 1993, all new cars must have passive restraints for both the driver and front passenger. That includes automatic shoulder belts, although most carmakers are expected to choose air bags, as public acceptance of the balloon-like safety devices grows.

Industry leader General Motors Corp. plans to install passenger-side air bags in all models by 1996, relying on automatic belts in some models until then. Ford Motor Co. plans to do the same by the mid-1990s.

A spokesman for Honda North America Inc. in Detroit said Tuesday all of Honda's car lines will have undergone major redesigns by 1994, which will include the dual air bags.

But he said driver-side air bags will be phased in before then on cars like its mid-sized Accord, which is now equipped with automatic belts. Only its Acura Legend and sporty NSX models now have driver-side air bags as standard.

Kawamoto's visit to Detroit was part of his first U.S. tour since he was named to his new position in June from senior managing director.

On other matters, Kawamoto, 54, said he does not expect to increase Honda's U.S. production capacity in the near future. Honda now operates assembly plants in Marysville and East Liberty, Ohio, with a total capacity of 500,000 Accord and Civic cars.

He also said the Honda has plans to boost the domestic content of its U.S.-made cars from 70 percent to 80 percent.

''We want to make really American cars,'' Kawamoto said. ''That is the first job for me.''

#90268u1127 09/25/1990 ~United Press International

(SEPT. 25) UPI - There's word of some progress toward agreement on a 500-BILLION- dollar deficit-reduction package, but the White House warns administration and congressional negotiators that time is running out. Spokesman Marlin Fitzwater says- quote- ''the consequences of their negotiations are central to the course of the economy.''

Negotiators face an October 1st deadline to reach agreement on a deficit-cutting budget or face sequester- that is, massive, automatic

across-the-board cuts. Fitzwater says a sequester would be very difficult for the economy as well as for the country directly in terms of services provided.

The Commerce Department is out with new warnings about the economy. The final revision on second-quarter gross national product shows it was up four-tenths of one percent, NOT the one-point-two percent originally reported. And corporate profits dropped six-tenths of one percent, once taxes were paid.

October 6th is the date for the flight of the space shuttle Discovery. The 750-Million-dollar mission will carry a European science probe into space, where it will then be fired at the sun. The four-day mission is the first for NASA since April. Fuel leaks have grounded the shuttles Columbia and Atlantis.

An official of the International Energy Agency in Paris says the world petroleum market has adequate reserves of crude oil to withstand the embargo against Iraq... but the supply of refined oil products is less clear. The official says supplies of crude- quote- ''remain sufficient, though NOT comfortable.''

-30- 1724

#90268u1138 09/25/1990 ~United Press International

(SEPT. 25) UPI - The Pentagon has released its yearly assessment on Soviet military strength. And the 111-page document shows that Soviet defense spending dropped by five percent last year. Tank production dropped by one-half, but the Kremlin continued to modernize its intercontinental ballistic missile force.

The World Health Organization predicts that Millions of infants will have developed and died of AIDS by the turn of the century. The report from the U-N health agency estimates that 400-thousand infants have already been stricken by AIDS world-wide.

A special 15-member congressional panel has released its final report, calling for development of a universal health care program for the country. But commission members could NOT agree on how to fund the estimated yearly cost of 70-BILLION dollars. The program would replace and expand Medicare.

A SWAT team used so-called ''flash-bang'' grenades as a diversionary tactic and stormed a McDonalds restaurant in La Verne, California, last night, freeing 19 hostages held by a gunmen during a six-hour seige. The incident ended peacefully after a night of chilling memories of the McDonalds' massacre of 1984 that left 22 people dead in San Diego.

-30- 1374

#90268u1153 09/25/1990 ~United Press International

SOFIA, BULGARIA (SEPT. 25) UPI - Bulgarian Socialist Party leader Alexander

Lilov was re-elected to the party chairmanship Tuesday in a resounding defeat for liberals who sought faster economic reform and a complete break with the party's authoritarian past.

With up to a third of the membership threatening to walk out, Lilov appealed for party unity and promised to complete the democratic restructuring of the Socialist party, formerly known as the Communist Party.

Lilov won the leadership by a margin of 2-1 at the end of an all- night session of the 39th party congress in Sofia. Less than 24 hours earlier, he had offered to resign amid growing demands by reformist factions for a purge of the old-guard communist leadership.

''I hope the leaders of the reformist factions will continue to work for the radical reformation and renovation of the party,'' Lilov said in a closing speech.

Liberal party members had predicted a split if Lilov was re-elected and were to debate the issue at a meeting Saturday.

''We will not play the game of the old guard. If Lilov wins we will not serve on the presidium or on any bodies,'' said George Karasameonov, a delegate from Sofia and a prominent member of a radical reformist faction known as Demos, on Monday.

Few leaders of radical factions were named to the 151-member Party Supreme Council, also elected Tuesday. But also failing to make the list were several prominent conservatives closely associated with former communist leader Todor Zhivkov's hard-line regime - including former President Petar Mladenov and Finance Minister Belcho Belchev.

In offering his resignation Monday, Lilov condemned attempts to remove older and more conservative members from the leadership as ''profoundly wrong and dangerous.''

During his closing speech, Lilov stressed the need for ''all Socialists to join hands'' and ''keep working for the renewal and unity of the party on the basis of the plurality of opinions, ideas and platforms.''

He described the congress as ''difficult but successful,'' and emphasized the importance of the other achievements of the 4-day meeting. These included agreements on platform language calling the transformation of the BSP into a modern social-democratic party and urging a purge of corrupt party members.

The delegates also voted to adopt the red rose as the official party symbol, replacing the red star that stood for Bulgarian communism for the past 44 years.

The political maneuvering during the congress sparked confusion and speculation over the future of the ruling Socialists, who changed their name from the Communist Party in April after adopting sweeping democratic reforms.

Although the party won a parliamentary majority in historic multiparty elections in June, public opinion polls and a declining membership show its strength is waning as Bulgaria's economic crisis worsens.

#90268u1179 09/25/1990 ~United Press International
NEW DELHI (SEPT. 25) UPI - Angry students rampaged through the southern part of the capital Tuesday, torching dozens of vehicles and hurling stones at police following the death of a young man who set himself ablaze to protest a controversial federal job quota program.

Police opened fire on a mob trying to torch a bus and police cars, killing at least one man, the Press Trust of India and witnesses said. Hospital sources said at least five other youths were wounded by police gunfire, including a 16-year-old boy shot in the head.

The violence in the capital came as Mukesh Goel, a student in Ghaziabad city on the eastern edge of New Delhi, poured fuel on his body and set himself ablaze, the fifth person to attempt self-immolation to protest the federal job quota plan.

The Press Trust of India said the youth received burns over 60 percent of his body. Sandeep Choudhury, a student in Haryana state north of New Delhi, killed himself by swallowing insecticide to protest the job plan, the Press Trust said.

The violent clashes around Safdarjung Hospital in the capital erupted as news spread about the death of S.S. Chauhan, 24, a university student who poured gasoline over his body Monday and set himself ablaze. Chauhan received burns over 90 percent of his body and died at 10:15 a.m. Tuesday, officials said.

Chauhan was the fourth student to set himself ablaze in less than a week but the first to die of his injuries. He set himself on fire to protest a government decision to reserve 27 percent of all federal jobs for the so-called backward classes.

Hours before his death, police staged a lightning raid on the area around Safdarjung Hospital, driving away hundreds of students who had been maintaining a vigil since last Wednesday, when the first student set himself ablaze and was hospitalized there.

Students had maintained control of the area for several days and had neatly painted over the street signs in front of the hospital, renaming the tree-lined, six-lane avenue Rajiv Goswami Road in honor of the first student to set himself on fire.

Dolly Kandpal, a Delhi University student, said police rounded up about 2,500 students up in the pre-dawn raid. ''Lots of the guys are missing and their parents don't know where they are,'' she said.

Following the raid, police blocked the avenue and cordoned off an area about 1 mile around the hospital. As news of Chauhan's death spread, students returned

to the area and erected their own roadblocks on main streets and side roads near police lines using large stones, tree limbs and burning bicycle tires.

Police clashed with the male and female university students in the area, beating them with cane clubs and firing tear gas and live ammunition. The students charged that police opened fire on them without provocation.

''We were opposing the implementation of this black reservation (program),'' said one student, who identified himself only as Gautam. ''We stood there protesting against the government and the police and they fired on us unprovoked.''

The use of live ammunition triggered an angry reaction by the protesters. The youths stopped buses, government cars, trucks and motorcycles passing through the area. They forced the drivers and passengers out of the vehicles and set them ablaze.

Burned-out vehicles littered the neighborhood around Safdarjung Airport, just north of the hospital. At one forked intersection, students torched two government cars, overturned one of the vehicles and used its charred hood to build a street barricade.

A block away, flames licked at the tires of a truck, causing them to squeal and explode. Smoke hung over the neighborhood and only bicycles, motor scooters and three-wheeled auto-rickshaws moved on the streets.

''An hour ago it was solid police and people,'' said one man. ''People throwing stones and police firing tear gas and things like that.''

''They want to shut down democracy in India,'' said one youth who had been arrested and put inside a blue police bus with wire-mesh windows. ''We were protesting democratically today. We were chanting slogans and they arrested us.''

Another arrested youth defended those who have set themselves on fire to protest the federal job quota program, saying: ''All other peaceful methods have been tried. We have no other alternative left to us.''

High-caste youths oppose the job reservation scheme because it will restrict their ability to find work in India's elaborate bureacracy, which includes not only government and military service but banks, railways and other forms of business.

BY ARELY MUNOZ - UPI

SAN SALVADOR, EL SALVADOR (SEPT. 25) UPI - When Salvadoran children play war, they choose to be rebels or soldiers, imitating a decade of civil strife that has orphaned or killed countless playmates and seen their older brothers take up real guns.

The country's youngest children have never lived in peacetime, but were born and raised in the midst of ''an absurd war waged by the absurd,'' in the words of San Salvador's Auxiliary Bishop Gregorio Rosa Chavez.

''That war that, after the violence of last November, children at play innocently imitated. That war that sweeps away the lives of infants, mutilates their tender bodies, that has left thousands of orphans,'' he said.

Since 1979, more than 72,000 Salvadorans have been killed in the war and related violence - victims of combat, of government bombing raids, political assassinations and massacres. The majority of them were civilians.

But for many of El Salvador's children, war is still just a game.

A major rebel offensive last November - centered on the capital and major cities - ended a lull in the fighting and brought the word ''war'' into the minds and on to the lips of children.

An article published following the offensive illustrated how children between the ages of 8 and 12 crawled in the dirt, using sticks as guns.

The article described the game in the children's words: ''It's the third day of an offensive, we are fighting against the soldiers ... look out they're coming again ... bang! bang! surrender, surrender!''

Guillermo Martir, a child psychologist with the independent Association for Mental Health Training and Research, attempts to explain the game.

''The children live in an atmosphere of war and violence, so they incorporate violence in their games. It is part of daily life here,'' he said.

Martir also blames the civil war for family breakups that lead youths to take drugs and join gangs of delinquents, while young girls fall into prostitution.

A professor at the University of El Salvador takes the tragedy a step further:

''The children we see playing war today, if this does not end, they will be the ones making war tomorrow. You have to take into account that these children are aged between 5 and 12, and soon they will be ready to swell the ranks of one side or the other,'' he warned.

UNICEF estimates that 80 percent of the children born in El Salvador suffer from malnutrition, most of them in rural areas. And again it comes down to the

war.

Edmundo Avalos, director of the Benjamin Bloom children's hospital, notes that 30 percent of the national budget goes to pay for the war, while less than 10 percent is earmarked for health programs.

Nearly a third of the estimated 190,000 births each year in El Salvador are to women between the age of 12 and 19, and 23 percent of school age children do not complete their studies.

Rosa Chavez denounces this as he prays for the ''thousands of Salvadoran children looking for food in trashcans, those who are raped, and those who wander the streets, commanding public charity.''

He blames war for ''filling the jails, and plunging so many homes into sadness and abandonment because of the absence of the father.

''There are children's rights that are virtually unknown. I think we adults forget this, that the country should be made for the children,'' Rosa Chavez said.

#90268u1214 09/25/1990 ~United Press International
NEW YORK (SEPT. 25) UPI - Two Canadian tourists who stopped their car to escort an elderly woman across a street were beaten by a group of youths who thought the visitors were robbing the woman.

The incident occurred in the Bensonhurst section of Brooklyn Monday night, said Police Department spokeswoman Janice Swinney.

Eric Plourde, 19, and Patrick Chartrand, 20, both of Quebec, had stopped at a traffic light when they saw the elderly woman, who asked for their help in crossing the street, Swinney said.

Chartrand said as he returned to his car, the woman collapsed and cried out for help again.

Chartrand and Plourde both rushed to her side and were helping her to her feet when a group of as many as a dozen teenagers surrounded them, police said.

Swinney said the youths apparently thought the elderly woman was being mugged and asked Chartrand and Plourde several questions they did not understand - since they speak French - and attacked them with clubs.

Finally Chartrand managed to get free and jumped in his car and drove off. Plourde grabbed the window of the car and hung on as the car sped away. Both were treated for bruises and cuts at Coney Island Hospital.

The woman vanished during the altercation as did the youths, police said.

#90268u1235 09/25/1990 ~United Press International

MOSCOW (SEPT. 25) UPI - Mikhail Gorbachev called exiled writer Alexander Solzhenitsyn a great man Tuesday but said his ideas are destructive and he ''belongs to the past.''

Writing last week from abroad for two Soviet newspapers, the anti- Communist Solzhenitsyn, 71, said the Soviet Union should divest itself of its multinational state and consist only of three Slavic republics.

''Being a politician I do not share the views of Mr. Solzhenitsyn,'' Gorbachev told Parliament. ''He belongs to the past, Russia of the former years, Czarist monarchy.

''I do not accept his views with respect to the future of our multinational state and these views are far away from reality and they are far away from the actual state in which the country is at present.''

Gorbachev, in effect conducting an unprecedented dialogue with Russia's great man of letters, said he had twice read Solzhenitsyn's recent manifest, ''How to make Russia a living place.''

''And after thinking it over I have a feeling and I still have a story of contradictory feelings,'' Gorbachev said. ''Being a Russian as he is, I am also concerned about the destiny of Russian people, about the destiny of Russia.

''I fully understand it ... and at the same time there is a sort of disrespect here.

''I will say more I believe that in their nature the views have a destructive character, although I do believe that they have some very deep source in them. They are very interesting, because these thoughts are put forward by a very famous and great man.''

Solzhentisyn, who has lived in Cavendish, Vermont, since he was exiled from Russia in 1974, was given his citizenship back but has refused entreaties to return home from the Russian Republic prime minister Ivan Silayev.

But Solzhenitsyn, at work on a massive series of historical novels, said he will not go back until old charges against him are dropped and he gets an apology.

Although Solzhenitsyn was deported because of publishing abroad his mammoth history of the Soviet prison camp system, the ''Gulag Archipelago,'' that book and all his other writings are now openly published in the Soviet Union.

Despite the difference with Solzhenitsyn's concept of Russia, Gorbachev's across-the-ocean dialogue with the writer was an open admission of the vast eminence that Solzhenitsyn enjoys in his native land and the popularity of his

views.

The dialogue also recalled Gorbachev's reaching out to the Soviet Union's other great dissident Andrei Sakharov, by calling him by telephone in his exile in Gorky in 1986 and telling him to come back to Moscow. Sakharov, who was then elected to Parliament, died as a hero last year.

Solzhenitsyn, a decorated officer during World War II, was sent to a labor prison camp right from the front in 1945 because of a letter he wrote referring to dicator Josef Stalin as the ''whiskered one.''

But he emerged from eight years in the camps to publish a novella about his imprisonment, ''One Day in the Life of Ivan Denisovich,'' followed by a series of novels making him the most prominent Russian writer of his generation.

(SEPT. 25) UPI - The 15-nation U-N Security Council is to vote this afternoon on a resolution asking governments to withdraw landing rights to aircraft flying to and from Iraq or occupied Kuwait. The resolution also would forbid airlines from making scheduled or non-scheduled flights to these two countries. U-N diplomats say the air embargo most likely will be approved because the five permanent members of the council already have agreed on the resolution.

President Bush has signed the treaty that reunifies the two Germanies, sending it to the Senate for ratification. The historic accord ends the artifical division of Germany at the end of World War Two. It makes the current borders the permanent ones for the new Germany. And all Soviet troops are to be out of German territory by the end of 1994.

Reports from Lebanon indicate that summit talks between Syria and Iran could lead to freedom for some of the 13 foreign hostages still held in the war-torn country. The reports quote unnamed diplomatic sources who say the releases could come after Syrian President Hafez Assad returns from Iran in the next day.

The first Seoul Peace Prize went to International Olympic Committee President Juan Antonio Samaranch today for his ''contributions to world peace and harmony of mankind.'' The prize, awarded to Samaranch in the South Korean capital, consists of a citation, a plaque and a cash gift of 300-thousand dollars. The award commemorates the 1988 Seoul Summer Olympics. Samaranch says he will donate the prize money to an Olympic museum in Lausanne, Switzerland.

(SEPT. 25) UPI - Another try is being made at setting up a peace conference for Cambodia. An attempt last week in Bangkok, Thailand, fell apart after three days in a squabble over who would serve as chairman. Now Cambodian resistance leaders say the have settled their differences and are waiting for word from the Vietnamese-backed government.

There are NO reports of injuries among any of the 204 passengers aboard a chartered British airliner that lost cabin pressure over the Atlantic early this morning. The Boeing 757 turned back less than two hours after leaving Bangor International Airport in Maine and made a safe landing.

-30- 784

#90268u1271 09/25/1990 ~United Press International

LONDON (SEPT. 25) UPI - Don't let your children be tempted into following the Teenage Mutant Ninja Turtles into the sewers, the government warned parents this week after two children were rescued from a culvert.

The turtles - Leonardo, Michaelangelo, Raphael and Donatello - are self-styled crimebusting cartoon characters who love takeaway pepperoni pizza and yell ''Cowabunga.''

The problem, as far as the government is concerned, is that they live and adventure in sewers. And the turtle craze has encouraged some children to venture underground.

''What's O.K. for Ninja Turtles may not be good for children,'' warned Gus Gaugain, of the British Health and Safety Executive said. ''Don't let your children be tempted to follow their cartoon heros, the Mutant Ninja Turtles, in adventures down sewers.''

Recently, two youngsters wre rescued from a culvert by the fire brigade at Stoke-on-Trent. Two other children emerged from a manhole on a English Midlands building site after a Ninja Turtle game. Other incidents were reported from Leeds, Hertfordshire and North London.

The turtles have captured the imaginations of British children, as Americans before them. Even the princes William 8, and Harry 6, are crazy about the mutants.

''Yes, the Mutant Turtles have taken over our household too,'' the boys' mother Princess Diana said recently.

The Turtles appear twice daily on satellite television and Saturday mornings on the British Broadcasting Corporation.

In Britain, they have been renamed Hero Turtles, rather than Ninja Turtles ''because of connection to martial arts,'' a BBC spokesman said.

Heros or not, the turtles have caused problems, Gaugain said.

''Responsible construction companies do everything possible to stop children trespassing on construction sites, but the children may still be able to gain access to sewers if they are determined to do so,'' said Gaugain.

''Children and parents should realize that sewers, culverts and other underground drainage networkks are extremely dangerous places. Apart from injuries from slips or falls, there are risks of drowning or of suffocation from lack of oxygen. Entering sewers without proper precautions and equipment could easily have lethal consequences.''

#90268u1272 09/25/1990 ~United Press International

(SEPT. 25) UPI - Oil markets were rallying midday Tuesday after prices dipped as traders took profits on the prior day's rise when Iraqi war threats drove crude over $40 a barrel for the first time in 10 years.

The widely traded North Sea Brent, which rose to a decade-high price of $40.40 a barrel Monday, was being quoted midday at $40.70 a barrel on the European spot market, where crude is bought and sold for cash. It sold earlier at $40.20 a barrel.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for November delivery was up 40 cents over Monday's close to $38.65 a barrel after trading as low as $37.10 a barrel.

On the U.S. Gulf Coast spot market, prompt delivery WTI was losing 30 cents to $38.75 a barrel.

The United Arab Emirates' Dubai Light, the key Middle East crude shipped mainly to the Far East, had gained 30 cents to $34.15 a barrel.

''The Merc came in weak on the back of European profit taking. After we held at $37 a barrel, the market started to move back up,'' said Tom Bentz, director of trading at New York's United Energy Inc.

''We'll probably test Monday's (WTI) highs of $39.20 a barrel. The fact that the Brent is strong is a good sign the market wants to go higher,'' the trader said.

Bentz expected WTI prices to go to $42-$43 a barrel soon.

Even though there are ample supplies of crude, the spot price of Brent crude had more than doubled since its $20.50 a barrel level on the day before Iraq's Aug. 2 invasion of Kuwait triggered the Gulf crisis and the U.N. embargo of

exports from the two nations.

Prices shot up Monday on weekend threats by Iraq's President Saddam Hussein to retaliate against Israel and oil fields in Saudi Arabia if the U.N. embargo causes pain in his country.

''We're rallying back on the same old fears,'' said Peter Beutel, an analyst with Pegasus Econometrics Inc. of Hoboken, N.J.

''The market has got to decide whether Iraq's threats are credible or not,'' said Robert Baker, senior energy analyst with Prudential-Bache Securities Inc. in New York.

On the Merc, unleaded gasoline for October delivery was up 0.17 cent at $1.0440 a gallon after trading as low as $1.01 a gallon earlier.

October home heating oil was up 0.13 cent at $1.045 a gallon, 3.3 cents higher than its morning low.

Turkish President Turgut Ozal, interviewed on the Cable News Network, said the embargo against Iraq will almost certainly resolve the gulf crisis and that threats of war by Iraqi President Saddam Hussein are rhetoric.

He called recent Iraqi war threats an ''exaggeration'' that prove the economic embargo is working.

Soviet Foreign Minister Shevardnadze also warned Iraq it may face military action. He is presiding over a U.N. Security Council meeting is expected to vote air embargo against Baghdad.

-30- 3037

#90268u1300 09/25/1990 ~United Press International

IRVING, TX (SEPT. 25) UPI - Backup quarterback Steve Walsh was traded by the Dallas Cowboys Tuesday to the New Orleans Saints for three draft picks.

The Cowboys will receive a first- and third-round draft choice in 1991 and a No. 2 choice in 1992. The second-round choice could be upgraded to a first-round pick, depending on Walsh's performance.

Walsh, who played at the University of Miami, was selected by Dallas in the supplemental draft last year, but has seen little action behind Troy Aikman, the No. 1 choice overall in the 1989 draft.

The Saints lost their first two games this season behind quarterback John Fourcade before winning last Sunday. Walsh will compete with Fourcade for the starter's job.

Bobby Hebert was the starting quarterback for New Orleans at the start of last season, but has vowed never to play for the team again.

-30- 1048

#90268u1301 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - The chairman of the Federal Deposit Insurance Corp. warned Tuesday that raising bank premiums to bolster the nation's shrinking insurance fund will cut into the profits of the ailing industry.

''A higher premium cannot be the answer to the problem,'' FDIC chief William Seidman told the House Banking Committee. ''We weaken the overall soundess of the banking industry through reducing profits.''

Weaker banks would fail if forced to pay higher premiums, he said.

Although Seidman has advocated a higher premium, he agreed with Federal Reserve Board Chairman Alan Greenspan that more steps must be taken for banks to bolster their capital reserves - and not rely heavily on the government.

''We have to do something about the risk in the system,'' Seidman said.

The White House and Congress are eager to push through legislation lifting a ceiling on the premium the FDIC can charge banks. The FDIC protects bank deposits up to $100,000.

The current premium is 12 cents per $100 of deposits. It will be increased to 15 cents per $100 on Jan. 1 - or possibly 19 1/2 cents per $100 pending a decision Thursday by FDIC officials, the agency said.

The size of the government's Bank Insurance Fund has fallen to about $13 billion in the biggest wave of bank failures since the Great Depression, including the recent collapse of the National Bank of Washington in Washington D.C.

''The fund is now clearly under stress and will continue to be under stress for some time to come even with the 19 1/2 cent premium,'' Seidman told the congressional panel.

But lawmakers, who failed to forsee the crisis in the savings and loan industry, are eager to take some sort of action to avert similar widespread problems in America's commercial banking industry.

In his testimony, Seidman said that, ''Deposit insurance reforms that do not deal with the structural problems will produce few lasting improvements in the deposit insurance system and will not materially reduce the ultimate exposure of the taxpayer to difficulties among banks and thrifts.''

''The purpose of deposit insurance reforms should not be to hold together an antiquated banking industry,'' Seidman said.

Some members of the committee called on Seidman and other government regulators to go tough on the nation's banks.

The financial institutions ''need more supervision, more examination, '' said Rep. Frank Annunzio, D-Ill. ''The more we can examine the banks the more we can keep them in line.''

#90268u1309 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - CBS won the first week of the 1990-91 television season, the first time the network has been tops for premiere week since 1984, it was reported Tuesday.

It was the first time since the week ending Jan. 25, 1987 that CBS won a week during the season.

Three of the four CBS shows in the top 10 (actually top 11 because of a tie for 10th place) were women-oriented - ''Designing Women,'' tied with ''60 Minutes'' for third, ''Murphy Brown'' in sixth and ''Major Dad'' tied for 10th.

In addition, CBS's top-rated new show was ''The Trials of Rosie O'Neill,'' in 28th, and its winning Sunday movie was ''Leona Helmsley: The Queen of Mean.''

Comedy remains king for the new season - nine of the top 11 shows are sitcoms.

The CBS win was not exactly a landslide, with only 0.4 rating points separating No. 1 from No. 3, making it the closest premiere week since the start of the 1966-67 season. The one-two spots on the Nielsen list went to NBC's ''Cheers'' and ABC's ''Roseanne.''

In ratings for the week ending Sept. 23, according to the A.C. Nielsen Co., CBS won with a 13.6 rating and a 23 share. NBC was second with a 13.4 rating and a 23 share, edging out ABC which posted a 13.2 rating and a 22 share.

In explaining the win David Poltrack, senior vice president, planning and research, CBS/Broadcast group, said: ''As we have noted before, CBS entered the season with a two-part strategy. One, build on our sophisticated adult programming base and, two, attract a new young audience.''

Curt Block, vice president, media relations, at NBC, said, ''First we want to congratulate CBS. They won the closest premiere week since 1966. Almost by definition premiere week is atypical - it's not a normal week.

''This is week one and we are in this for the long haul and we'll see how

things pan out. The 1990-91 season has begun and it looks like it will be close.''

Janice Gretemeyer, director of media relations for ABC, noted that ABC's ratings were up 1 percent over last year's opening week, while CBS was up 5 percent and NBC down 20 percent.

The top-rated of the new shows were special, out-of-time-period showings of ''American Dreamer'' (NBC) and ''Married People'' (ABC), tied for 20th. In their regular time periods, ''American Dreamer'' dropped to a tie for 53rd and ''Married People'' tied for 32nd.

Next among the newcomers was ''Rosie O'Neill,'' 28th, followed by ''America's Funniest People'' (ABC), tied for 32nd; ''The Flash'' (CBS), 34th; ''Uncle Buck'' (CBS), 35th; ''Fresh Prince of Bel Air'' (NBC), tied for 41st; ''Evening Shade'' (CBS), 45th; ''The Fanelli Boys'' (NBC), tied for 51st; ''Law and Order'' (NBC), tied for 53rd; ''Ferris Bueller'' (NBC), 57th; ''Working It Out'' (NBC), tied for 58th.

Down on the low end of the list were ''Gabriel's Fire'' (ABC), 62nd; ''Get A Life'' (Fox), 64th; ''Parenthood'' (NBC), 67th; ''Family Man'' (CBS), 71st; ''Lenny'' (CBS), tied for 72nd; ''E.A.R.T.H. Force'' (CBS), 77th; ''Parker Lewis'' (Fox), 78th; ''True Colors'' (Fox), 80th; ''Against The Law'' (Fox), 84th; ''DEA'' (Fox), tied for 85th, and ''American Chronicles'' (Fox), 89th.

In the Sunday movie clash, ''Queen of Mean'' (CBS) was in 24th; NBC's ''She Said No'' was 29th and ABC's ''The Running Man'' tied for 47th.

Night-by-night competition saw NBC win Tuesday, Thursday and Saturday. CBS won Sunday and Monday and ABC took Wednesday and Friday.

ABC's ''World News Tonight'' was No. 1 for the 37th consecutive week, with a 10.3 rating and a 21 share. ''NBC Nightly News'' with Tom Brokaw moved up to second with an 8.8 rating and an 18 share, while ''CBS Evening News'' with Dan Rather dropped to third with an 8.5 rating and a 17 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top programs for the week ending Sunday, Sept. 23, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. Roseanne (ABC)
3. (tie) 60 Minutes (CBS)
4. Designing Women (CBS)
5. The Cosby Show (NBC)
6. Murphy Brown (CBS)

7. Golden Girls (NBC)
8. A Different World (NBC)
9. Empty Nest (NBC)
10. (tie) Unsolved Mysteries (NBC)
    Major Dad (CBS)

#90268u1327 09/25/1990 ~United Press International

TORONTO (SEPT. 25) UPI - Yuppies in Canada's richest city are committing suicide in record numbers, an expert said Tuesday.

Gordon Winch, executive director of the Toronto Distress Centre, said those in the 30-39 age bracket had the highest suicide rate in the city in 1989.

''This is a group of people whose expectations were very rosy but perhaps they've hit an obstacle along the way,'' Winch said.

''They got a surprise bad role of the dice and for some of these people hoplelessness sets in more easily than those in other groups,'' Winch said.

Of 316 suicides in Toronto last year, a record high 64 were in the 30-39 age group; 15 were in the 19 and under bracket; 61 in the 20-29 group; 54 in 40-49; 39 in 50-59; 33 in the 60-69 group; 27 in the 70-79 group; 23 in the 80 plus age group.

Winch said the highest numbers previously were recorded in the 20-29 age group and he expects the suicide-prone group is one that is moving upward through the age curve.

Winch said while records don't show the backgrounds of the people behind the suicide statistics, an increasing number of affluent ''yuppies'' are calling the Toronto Distress Centre hotline.

Some callers say they are such workaholics they have few friends to talk to, while others have been cut off from their social circle because of a downturn in their economic status, Winch said.

Winch said people who are used to success, or have been born into comfort, can find it harder to cope with unexpected downturns in events.

Winch said he knows of a successful yuppie couple whose young son is facing surgery with a less than 50 percent success rate.

''In that kind of case, it doesn't matter if you drive an Audi or not,'' Winch said.

The east coast province of Newfoundland, chronically Canada's poorest province

and having its highest unemployment rate, also has the country's lowest suicide rate, Winch said.

''If you don't have a job there, you're not considered a failure because maybe your father or your brother don't have jobs either,'' Winch said.

''In Toronto, the measure of failure or success is what you do or don't do,'' Winch said.

-30- 2329

#90268u1341 09/25/1990 ~United Press International

ATLANTA (SEPT. 25) UPI - At least one of the doctors who pioneered using the experimental cancer treatment known as hyperthermia to battle AIDS wants to conduct further trials despite the government's condemnation of the procedure.

Dr. William Logan, a thoracic surgeon, said Tuesday he is negotiating with two medical schools to perform the unproven and highly controversial blood-heating treatment on more AIDS patients.

Logan refused to divulge the names of the medical schools, saying only that one is in Chicago and the other is in the South.

''I have had some encouraging results with two patients,'' Logan said. ''I am definitely interested in doing some more work.''

Dr. Kenneth Alonso, who has split with Logan since the two presented results of the hyperthermia procedure on two patients, would not confirm reports that he is pursuing further experimentation.

The reports in the Atlanta Journal-Constitution said Alonso, a pathologist, wants to consult with doctors in Miami, Dallas, Los Angeles and possibly Germany, Costa Rica and Rome about doing the procedure.

''We're certainly not happy about what has transpired,'' Alonso said. ''But we're regrouping and trying to salvage something out of the situation.''

The two doctors came forward in May with claims of possibly halting the progress of the virus in an Atlanta patient by raising the temperature of his blood to 108 degrees using a heating apparatus similar to a dialysis machine.

The operation, conducted previously only on cancer patients, was performed Feb. 20 on Carl Crawford, a 33-year-old waiter, at an Atlanta hospital that has since been closed for several unrelated violations.

It is still unclear if Crawford was permanently helped by the treatment despite his claims to national television audiences to have experienced a miracle recovery from his AIDS symptoms, including the disappearance of Kaposi

sarcoma legions.

As of Tuesday, Crawford maintained he was in good health.

The two doctors on June 14 performed the treatment on a second patient, a 37-year-old Chicagoan named Tony Mascio, who came to doctors on his deathbed but who is still alive three months after having the operation.

A third patient, New York artist Victor Koziakin, died 12 hours after the procedure was performed on him by Alonso in Mexico City.

On Sept. 4, investigators with the National Institute of Allergy and Infectious Diseases released results of a four-month probe into the treatment, rejecting it as ineffective and recommending that no further human trials be conducted.

''There appears to be no clinical, immunological or virologic support'' for using hyperthermia in AIDS patients, the report concluded.

The report, put together by NIAID Director Dr. Anthony Fauci, also questioned whether Crawford ever had a full-blown case of AIDS and whether his so-called AIDS-related lesions may have been caused by another infection.

In defending his intentions to conduct further human hyperthermia trials on AIDS patients, Logan dismissed the government's conclusions as totalitarian, the work of a ''burn-the-books'' type attitude that prevailed under Hitler.

''I resent the attitude of Dr. Fauci and I resent his statements,'' Logan said. ''I think for a person in his position to make those statements was very inappropriate.''

Meanwhile, questions about Alonso's credibility continue to cast a shadow on his involvement.

Alonso, who did much of the testing of the hyperthermia patients, has been repeatedly challenged by the state for alleged inaccuracies in tests performed by his commercial lab, Laboratory Atlanta.

The laboratory had corrected all deficiencies cited by the state, but questions about Alonso's diagnostic work surfaced again this month when, as part of the government's scrutiny of hyperthermia, two experts from the U.S. Army Institute of Pathology concluded the lesions on Crawford's skin that apparently disappeared after his hyperthermia treatment were the result of cat-scratch disease or another infection, not AIDS-related Kaposi's sarcoma.

Logan had his initial foray in hyperthermia halted a decade ago by Georgia Baptist Medical Center after eight patients died.

(SEPT. 25) UPI - Soviet Foreign Minister Shevardnadze warned the U-N General Assembly this morning of the possibilities of war over the Persian Gulf crisis. He lashed out at Iraq, calling its occupation of Kuwait- quoting now- ''an affront to mankind.'' Shevardnadze called on Iraqi President Saddam Hussein to- quote- ''hear reason, to obey the demands of the law and plain common sense'' and to restore ''tranquility and good relations with their neighbors.'' .

Shevardnadze is to chair a meeting of the Security Council later today. It is supposed to end with agreement on extending the land and sea embargo against Iraq to include airline flights in or out of the country.

A public hearing opened in Denver today over federal conflict-of- interest charges against Neil Bush for his role as a director of Silverado Banking, Savings and Loan Association. The accusations were brought against President Bush's 35-year-old son by the federal Office of Thrift Supervision, a regulatory agency. The case is NOT expected to be decided until next spring.

Former Philippine first lady Imelda Marcos is testifying before a federal grand jury in Pittsburgh under a grant of immunity. The jury is looking into allegations that Westinghouse Electric paid a 17-Million- dollar bribe to her deceased husband, Ferdinand Marcos, when he was president of the Philippines.

#90268u1363 09/25/1990 ~United Press International
BEIJING (SEPT. 25) UPI - Two years after his fall from grace, Canadian sprinter Ben Johnson returned to track and field Tuesday, receiving a welcome and a warning.

''Yesterday Johnson finished his disqualification and from yesterday he is a free athlete,'' Primo Nebiolo, president of the International Amateur Athletic Federation, told a news conference. ''He has paid for his mistake and he is like all the athletes in the world. He can now compete with the other athletes and we wish him all the best.''

Nebiolo said Johnson has been clean since his disqualification at the 1988 Seoul Olympics, where he tested positive for anabolic steroids after winning the 100 meters in world-record time. He was stripped of the record and gold medal.

Johnson has said he wants to compete for Canada in the 1992 Barcelona Olympics. His government has cleared him to run, but he has yet to receive approval from Canada's Olympic authorities.

Nebiolo said Johnson has been tested for drugs four times in the past six months.

''So now the history of Johnson is finished,'' he said. ''He is like the other athletes. I hope he will strictly observe our rules.''

As a reminder, Nebiolo pointed out that second offenders faced a lifetime ban.

The disqualification of Johnson was perhaps the biggest scandal in Olympic history. However, Nebiolo says the constant focus on Johnson unfairly brought track and field into disrepute as a sport rife with drug abuse.

''We are continuing with our great campaign against doping in athletics, but I would like to underline our federation is one of the most serious federations in this battle,'' he said. ''We have been fighting against doping for many years.

''A great champion was found positive in Seoul, but remember there were 11 cases of doping in all sports. Everybody talks about Johnson, but they all forget about the other 10 names.''

Nebiolo said reports indicated Johnson, 29, had lost none of his speed during his two-year absence from competition and was aiming to reclaim his world records.

''If it happens it would be good propaganda for athletics and good for sprinting,'' he said.

Nebiolo reaffirmed the IAAF would not allow a head-to-head race between Johnson and American Carl Lewis, who placed second behind the Canadian in the Olympic 100-meter final and was promoted to first following the disqualification.

''We are against such a race between just two runners,'' he said. ''We do not like such exhibitions, but it would be all right if the other six lanes were filled with people like Leroy Burrell and Linford Christie.''

Nebiolo also fired a warning shot across the bows of the International Olympic Committee, which is considering having a soccer game close the 1992 Olympics, a spot traditionally filled by the marathon.

''We have not received any official information about this matter,'' Nebiolo said. ''Our council will consider it and present it to our congress. But it will be the marathon which will close the Olympics.''

MOSCOW (SEPT. 25) UPI - Mikhail Gorbachev, who has turned the Soviet Union topsy turvy with reforms, proposed a new name for it Tuesday: the Union of Sovereign Socialist States.

Gorbachev's suggestion would mean the country could no longer be called the U.S.S.R., standing for the Union of Soviet Socialist Republics.

Other legislators in parliament had different suggestions in the debate that unfolded over Gorbachev's next big reform: a new constitutional framework for the world's largest state.

A delegate from Kazakhstan put forward the name ''Union of Soviet Sovereign Republics,'' while radical deputies suggested the ''Union of European-Asian Republics.''

The union treaty leading to the formation of the Soviet Union in 1924 was signed in 1922 beween the republics and the communist-led central government.

With almost all 15 Soviet republics having declared sovereignty of a sort, Gorbachev says a new treaty defining broader powers for the republics and a lesser role for the center is needed.

The reform on the constitutional setup also dovetails with Gorbachev's plans to shift the country toward a market economy in which republics will direct their own economies.

''The transition to market relations is possible only in a single country,'' said deputy Georgy Tarazevich, warning against a breakup of the country.

The Russian nationalist views of exiled Soviet writer Alexander Solzhenitsyn entered into the floor debate Tuesday on the new union treaty.

In a manifesto published last week on how he saw the new Russia, Solzhenitsyn

said the country should abandon all preteneses to its enormous multinational empire of 15 republics.

The new Russia should consist, Solzhenitsyn said, of the three Slavic republics of Russia, the Ukraine and Byelorussia and perhaps half of Moslem Kazakhstan, the central Asian republic he says was built up by Russian prisoners.

Yeurin Auyelbekov called Solzhenitsynn's attitude to his republic ''insulting.''

Gorbachev dismissed Solzhenitsyn as belonging ''to the past, Russia of the former years, the Czarist monarchy.''

Boris Oleinik, a legislator from the Ukraine, said Solzhenitsyn's views slighted other nationalities, ''belittled their national dignities and could lead to separatism.''

Solzhenitsyn, a fervent anti-internationalist, said in his manifesto the Soviet Union should give independence to Georgia, Armenia, Azerbaijan, Estonia Latvia and Lithuania and four central Asian republics. He said Moldvavia should be allowed to join Romania.

Gorbachev is arguing for a looser union that allows the republics unprecedented independence. He also insists only a single currency must exist throughout the vast state.

WAYMART, PA (SEPT. 25) UPI - Convicted murderer Joseph Kallinger, who recently tried to commit suicide by swallowing staples and paper clips, will continue to try to take his life, his attorney said Tuesday.

The attempt was discovered last week when Kallinger, 54, also known as ''the Shoemaker,'' underwent a routine X-ray at the Fairview State Hospital for the Criminally Insane, where he is being held, said Jeffrey Wander, Kallinger's lawyer.

He was then taken to Wayne County Memorial Hospital in Honesdale for further X-rays, but doctors there decided surgery was not needed.

''He told me personally that the Lord told him it was time to come home, with or without the court's help,'' Wander said. ''Mr. Kallinger will continue to try to take his life.''

Wander said Kallinger claimed to have had a vision of the Holy Spirit in his toilet bowl. He said Kallinger had been swallowing paper clips since

mid-August but it was only discovered last week.

Kallinger, the subject of the book titled ''The Shoemaker: Anatomy of a Psychotic,'' is serving life terms for the slayings of his son, Joseph Jr., 14 and Jose Collazo, 10, in Philadelphia in 1974.

He also was sentence to life in prison for the murder of Maria Fasching of Leonia, N.J., plus more time for robbery in Dauphin County and Camden County, N.J.

Cassandra Jones, a spokeswoman with the state Welfare Department, would not confirm that it was Kallinger who swallowed the paper clips and staples last week but she said that a patient did and that no serious harm would have occurrred if he had swallowed even a larger quantity over a long period of time.

''The doctors and the hospital didn't treat this as a serious suicide attempt '' Jones said.

Jones said the patient got the paper clips and staples from legal documents.

Jones said Kallinger undergoes physicals routinely and is checked every 15 minutes because he has attempted suicide in the past.

Two weeks ago, Kallinger, who has refused to eat since June 22, used a cigarette to burn a 14-inch section in the nasogastric tube used to force-feed him.

Wander said he is appealing a commonwealth judge's August order to feed Kallinger through the tube.

In August, Kallinger attempted suicide by placing some 70 elastic bands around his arms and legs to try to cut off circulation. That attempt was discovered 36 hours later.

#90268u1431 09/25/1990 ~United Press International

BOSTON (SEPT. 25) UPI - People who have smoked sometime in their lives are more likely to have suffered a bout of depression than non-smokers, researchers said Wednesday.

A survey of 3,219 people aged 18 and older in St. Louis found more than twice as many current or past smokers said they had suffered depression than non-smokers, said Dr. Alexander Glassman of Columbia University in New York.

In addition, the study found less than half as many smokers with a history of depression were able to quit smoking as those who had never experienced

serious depression, Glassman and colleagues reported in the Journal of the American Medical Association.

In a separate study published in the journal, scientists at the federal Centers for Disease Control in Atlanta also found that depression apparently interferes with a smoker's ability to quit.

The biological reasons for the apparent association between smoking and depression are unclear, but Glassman noted other researchers have speculated that depressed smokers use cigarettes to make themselves feel better.

''That they are smoking to self-medicate is speculation, although I believe it is true,'' he said. ''These two studies are convincing evidence that an association exists between a pre-existing psychiatric condition and vulnerability'' to smoking, he said.

Analyzing data from two national health and nutrition studies involving 2,963 people, Dr. Robert Anda and his colleagues at the CDC found that among 820 who smoked and were traced nine years later, 17 percent of those who had were not depressed had stopped smoking compared to 10 percent who were depressed.

The findings ''suggest that depression plays an important role in the dynamics of cigarette smoking in the United States,'' the scientists said.

Glassman said the two studies show a ''powerful'' link between smoking and depression that has particularly strong implications for women, who suffer higher reported rates of depression than men.

He emphasized that ''the kind of depression we're talking about here is not the brief kind that everyone gets sometime in their lives, but persistent depression that usually lasts for at least two months'' and causes problems such as sleep disturbance, loss of energy and loss of interest in work and sex.

Glassman said it is estimated that between 5 percent and 10 percent of Americans suffer this type of depression at least once in their lives. In the St. Louis survey, which included 1353 men and 1866 women, 5.1 percent said they had at least one bout of major depression.

However, the researchers said that among those who said they had smoked daily for at least one month sometime in their lives, 6.6 percent had experienced persistent depression, while among non-smokers, the depression rate was 2.9 percent. Those categorized as smokers or past smokers included 67 percent of the men and 50 percent of the women, Glassman said.

He said the survey also found that while 31 percent of the non- depressed men who smoked and 25 percent of the non-depressed women had been able to quit, only 13 percent of male smokers with a history of major depression and 14 percent of the women had given up smoking.

''It appears clear that depression makes you both more vulnerable to starting smoking and makes it harder to stop,'' said Glassman, who added that the link between the two appears stronger than between depression and increased vulnerability to drug use or alcoholism.

Health care practitioners could use the results of the studies in smoking prevention and treatment programs, Glassman said. Because most smokers begin in their teens, he said parents, doctors and teachers should be aware that teenagers who experience depression and mood swings may be at highest risk of becoming long-term smokers.

For smokers who are trying to quit, he said physicians should be aware that depression may make the task nearly impossible for some people. In research currently going on, Glassman said he and colleagues have found that depressed smokers trying to quit have a far higher success rate when given anti-depressant drugs.

#90268u1432 09/25/1990 ~United Press International

BONN (SEPT. 25) UPI - All hurdles have been cleared, the final sprint is on and Germany is certain of victory.

When the race toward unification of East and West Germany is completed Oct. 3, united Germany will emerge as a sports superpower, fielding some of the world's top sportsmen.

Had Germany already been a single country at the 1988 Seoul Olympics, it would have raked in a total of 142 medals - more than any other nation, including the Soviet Union, which took 132 medals.

But the success could be short-lived. The East German talent-scouting system that spotted sprinters at an early age, brought them into the right clubs and coached them to great internatinal careers has crumbled along with the communist leadership, ousted last fall.

Right now, Germany is looking forward to a powerful squad that will include the renowned track-and-field athletes and swimmers from the East and the tennis and soccer stars from the West.

In recent months sports officials have been battling against time to keep up with the frenzied pace of German unification, preaparing for the merger of squads, clubs and organizations.

The German Soccer Association, founded in Leipzig in 1900 will be relaunched in the East German city, Nov. 21, when the East and West German asociations merge.

The occasion will be marked with a friendly between the two national teams, their last ''international'' before they are meshed into one single squad.

East Germany's first division clubs currently face their toughest tests in the country's 41-year history - the champion and runner-up will join the 18 West German clubs for next year's all-German first division action.

A total of six East German teams will be among the 24 in the new second division.

Clubs in the East have been quick to adjust to Western standards, displaying sponsors' names on their jerseys and obtaining top fees for players transferred to the wealthier West German clubs.

German athletes are confident their national colors will fly high over the Spanish city of Seville at next spring's Indoor European Championships.

The last championships, in Split, Yugoslavia, in August gave sports fans a taste of things to come, with East German athletes, including Kathrin Krabbe and Heike Drechsler, collecting 34 medals, including 12 gold.

The West German squad, with its seven medals, was clearly relegated to the sidelines - where they are now likely to stay as their more successful eastern colleagues line up for positions in the national teams.

''We won't allow any West German sprinter in,'' said Kerstin Behrendt, who ran for bronze in the 100-meter final and gold in the four-by-100 meter relay in Split.

''The athletes will come from the East, the officials from the West,'' said Harald Schmid, a former top West German runner.

But analysts believe Germany's days of glory in the athletic field are counted.

''East Germany has been the worldwide pilot program that tried to get a person's best possible results with the best possible facilities,'' said Klaus Steinbach, a senior official of the West German track-and-field association.

''This system was a dream, which cannot be repeated,'' he said.

The situation is similar in swimming, also a traditional East German stronghold.

The two German swimming associations merged in September, in advance of the all-German championships in November. In January 1991, Germany will present its first combined team at the trials for the World Championships in Perth, Australia.

In the short-term, many East German clubs and coaches will feel the pinch.

Deprived of heavy government subsidies that kept them alive in the past, many East German clubs and federations struggle for survival and money.

Soccer clubs have sold their stars to the West. Many of them, like first divisionist Dynamo Dresden, had to cut their regular line- up in half in order to make ends meet.

In track and field, many of the almost 600 East German coaches will be out of a job once the new all-German team is formed later this year.

#90268u1447 09/25/1990 ~United Press International

LONDON (SEPT. 25) UPI - The government published a comprehensive outline of its environmental policy Tuesday including stricter emissions controls on vehicles, but the plan was immediately criticized as being ''long on words and short on action.''

The much-heralded publication of Environment Minister Chris Patten's white paper, a major outline of government environmental policy to the end of the century, called for Britain to hold to current policies.

''It is long on words and short on action. We are disappointed,'' said David Gee of environmental group Friends of the Earth.

Although the government has committed itself to cutbacks in pollution, CFC production and greenhouse gas emissions, environmentalists contend it has lagged on implementing far-reaching changes.

In fact, pressure groups have taken to calling Britain ''the dirty man of Europe,'' as part of the propaganda to underline the distance between the United Kingdom and European countries, such as Denmark and West Germany, on action to clean up the environment.

The government paper, entitled ''This Common Inheritance'' contained more than 350 proposals.

''This is the first really comprehensive statement of government policy on the environment, ranging from the street corner to the stratosphere. Never before has the United Kingdom government examined all the environmental issues in this way,'' said Patten at a news conference to release the statement.

Specifically, the paper called on Britain to stick to existing programs including:

-A $11.2 billion plan to clean up acid rain emissions by the electricity industry.

-A $52.64 billion program to the year 2000 on improving Britain's water quality.

-Phasing out ozone depleting gases by 2000.

-Stabilizing carbon dioxide emisions at 1990 levels by 2005.

There were new proposals in the paper, including stricter enforcement of emissions levels and speed limits to encourage energy-efficient cars, promises of tenfold increases in renewable energy use, and government help for the maintenance of Britain's historic cathedrals.

The bulk of the paper included broad policy statements encouraging voluntary implementation of environmental measures by private citizens and industry.

''Although we welcome the paper as a first step, it cannot be a final position because it won't even allow Britain to reach the standards it has already committed itself to, such as reduction of carbon-dioxide emissions,'' said Stewart Boyle of the Association for the Conservation of Energy.

''We would have liked to see a clearer statement of new directions in investment and policy. As it is, it seems a continuation of the voluntary approach, which we've seen doesn't work,'' said Boyle.

Business analysts said industry costs would go up if action was implemented, especially in those businesses relying on intensive energy or water use such as steel or heavy manufacturers.

''In the run-up to the year 2000, we can expect more specific measures, such as stiffer penalties to control storage and dumping of wastes,'' said environmental analyst Jan Vernon.

''But not all is bad news. Reducing energy use will result in savings for businesses. And environmental labelling will allow companies with good environmental performance to reach the 'green' market,'' she added.

#90268u1451 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - The Pentagon said Tuesday that Iraq is losing about $100 million a day in revenue from banned oil exports and that the U.N. economic sanctions have ''proven very effective.''

Iraq's imports have been ''significantly reduced,'' Pentagon spokesman Pete Williams said. ''Right now less than 15 percent of the Iraqi merchant fleet is

operating on the high seas.''

''The U.N.-sponsored ecnomic sanctions imposed on Iraq, we believe, have so far proven very effective. The Pentagon estimates loss of revenue from oil exports alone to Iraq to be about $100 million a day,'' he said.

The United States has more than 50 warships in the Middle East region to help enforce the U.N. embargo, which was adopted in retaliation for Iraq's Aug. 2 invasion of Kuwait. Other nations have also sent warships into the area.

President Bush ordered U.S. warships Aug. 16 to enforce the U.N. sanctions against Iraqi goods, and the United Nations late last month adopted a resolution approving enforcement of the embargo.

Williams said there have been 1,290 interceptions of commercial ships in the Persian Gulf, the Gulf of Oman and the Red Sea since the operation began, and that most of these have been by radio contact in which the master of the ship is asked his destination and to describe his cargo.

He said there have been 110 boardings to inspect the cargo by naval forces of various countries. Of the 110, 100 were by American vessels, he said.

Since the operation began, warning shots have been fired near Iraqi tankers and some ships have been diverted from Iraq or the Jordanian port of Aqaba, but no violence or injuries have been reported.

#90268u1455 09/25/1990 ~United Press International

MIAMI (SEPT. 25) UPI - Tropical Storm Josephine began to weaken Tuesday as it drifted west across the Atlantic Ocean and was expected to lose its tropical storm characteristics by Wednesday.

At noon EDT, Josephine was centered near latitude 20 north, longitude 35.1 west, or about 675 miles west northwest of the westernmost Cape Verde Islands.

Forecaster Hal Gerrish at the National Hurricane Center said the system was drifting at less than 5 miles an hour, and was expected to continue in that direction for the next 24 hours.

Maximum sustained winds were near 45 mph, but Gerrish said Josephine was expected to gradually weaken to a tropical depression.

Tropical storm force winds extended outward 145 miles to the north and 60 miles to the south of the center.

#90268u1459 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Big Green, the environmental movement, may be in big trouble as Congress writes the final version of the new farm policy law, sources said Tuesday after an acrimonious bill-drafting meeting.

House and Senate negotiators deadlocked on the use of conservation easements on farm land the government obtains by foreclosure, a relatively minor topic but one that could presage tough battles for the more controversial environmental programs in the bill.

The 1985 farm policy law was a milestone for linking environmental and farm policy goals. The new farm bill contains proposals to broaden the environmental focus by creating voluntary programs to take sensitive land out of production or defray the cost to farmers for changing production methods to reduce the risk of contaminating water supplies.

After the meeting between House and Senate negotiators, staff workers said more environmental battles were likely. They also said environmentalists, who played an influential role in writing the House and Senate bills, could be at a disadvantage in the final drafting.

''We have a weak hand on conservation,'' said an aide to Chairman Patrick Leahy, D-Vt., of the Senate Agriculture Committee.

Leahy appeared outnumbered during the debate on easements but put off a vote until Thursday. Congressmen wanted to cut in half the Senate's proposed limit on how much land could be put under a conservation easement. Two senators agreed with the House proposal.

The easements are used as a way to preserve wetlands. Administration policy says an easement should be applied to all of the wetland on a foreclosed parcel. The Senate proposed a ceiling of 20 percent with Agriculture Department authority to reduce the level if it would make the parcel economically viable.

''We want to be environmentalists,'' said Chairman Kika de la Garza, D-Texas, of the House Agriculture Committee, but farmers ''are not the culprits'' and already are taking steps to preserve their land.

A Senate Republican staff worker said that attitude - ''We want to be environmentalists but we have to take care of our farmers too'' - would influence future discussions on conservation programs.

Leahy doggedly insisted on the Senate language on easements, proposing to drop the section entirely rather than compromise.

His opponents said a ceiling was needed to prevent the government from ''destroying'' the agricultural value of a piece of land. They worried a

ceiling would be interpreted as the minimum amount to be covered.

''I am troubled we cannot even offer different numbers,'' Rep. Glenn English, D-Okla., told Leahy.

While some observers saw danger to the new environmental provisions, one veteran said it was common for negotiators to get into an argument early in farm bill negotiations. The Tuesday meeting was the second work session for conferees.

Environmentalists, who aided floor passage of the House and Senate bills, may have some influence in the final round of drafting. One spokesman has noted it could be difficult to pass a farm bill that does not respond to rising public interest in food safety and chemical residues.

The farm bills would spend between $54 billion and $62 billion on the farm program over the next five years, compared with estimates of $54 billion if there was no change in current law.

-30- 3605

#90268u1465 09/25/1990 ~United Press International

BRUSSELS, Belgium (SEPT. 25) UPI - A defiant European Community agriculture chief said Tuesday he will not modify his proposal on farm subsidies despite U.S. warnings that world trade talks could collapse.

The proposal, said EC Agriculture Commissioner Ray MacSharry, is ''balanced, meaningful and realistic,'' and he urged the United States to ''match that if you can.''

MacSharry's proposal for trade-liberalization talks in the General Agreement on Tariffs and Trade would cut farm supports by 30 percent over a 10-year period beginning in 1986.

The United States said it will propose slashing subsidies by 70 percent over 10 years, beginning in 1991.

U.S. Trade Represenative Carla Hills has warned in recent days that GATT talks will fail unless farm supports are significantly cut, because developing countries will otherwise not agree to free trade in services and intellectual property, such as copyrights.

''As far as I'm concerned there is no need for any modification,'' MacSharry said of his proposal, which embarrassingly failed to win support of the 17 EC commissioners last week.

The EC Commission will consider the proposal again next week.

At a news conference following a meeting of the EC Agriculture Council, MacSharry said he expected to win approval the second time around, but twice refused to answer why the Commission's response would be any different.

Italian Agriculture Minister Vito Saccomandi, who presided over the Council meeting, said the proposed 30 percent cut in supports was ''certainly a large one.''

The EC, he said, ''must show a single front'' to the United States and the other 103 participants in the GATT talks. The current round of GATT talks is slated to end in Brussels in December.

MacSharry's proposal, sources said, would also impose stiff tariffs on soybeans and corn gluten feed, two lucrative U.S. exports to the EC which have been tariff-free since the 1962 GATT round.

The EC says such tariffs would ''rebalance'' harm caused to EC farmers from a reduction in agriculture supports. The United States staunchly opposes any new tariffs, arguing they run counter to GATT's purpose of liberalizing world trade.

The MacSharry proposal, sources said, would impose duties of 6 percent on oilseeds and 12 percent on protein food meals up to a quota level based on average 1986-1988 imports, and then higher tariffs above that level.

About 5 million tons of U.S. corn gluten feed entered the EC last year, an increase of 200 percent in the past decade. U.S. soybean exports to the EC, a $2 billion-per-year business, are expected to total about 7 million tons this year.

#90268u1494 09/25/1990 ~United Press International

PASADENA, CA (SEPT. 25) UPI - Comedian Bob Newhart, whose low-key style of humor has made him one of television's most enduring personalities, was named Tuesday the grand marshal of the 102nd New Year's Day Tournament of Roses Parade.

''I could think of no one better suited to lead (the 1991 parade),'' Roy Coats president of the Tournament of Roses Association, said of Newhart.

The theme this year's parade is ''Fun and Games.''

As grand marshal, Newhart, 61, will lead the Jan. 1 procession of floats, bands and equestrian teams down Colorado Boulevard. He also will preside over the start of the Rose Bowl Game, which pits the champions of the Big Ten and the Pacific-10 football conferences.

''I never expected this to be so much fun, or to be able to keep this a secret for so long,'' Newhart said. ''I'm delighted and am looking forward to the parade and game.''

The announcement of the grand marshal follows the naming of the Tournament of Roses court earlier this week.

Newhart, whose first comedy album ''The Button-Down Mind of Bob Newhart'' won him a Grammy and made him a virtual household name in the early 1960s, has starred in two successful television comedies that cast him as the sole sane voice in a sea of zany characters.

In ''The Bob Newhart Show,'' which ran from 1972-78, the comedian played a Chicago psychologist who juggled his patients' neuroses with an antic-filled home life.

Four years later, he returned as the owner of a quaint Vermont inn filled with oddball characters in ''Newhart,'' which ran from 1982-90.

In addition, Newhart has also appeared in numerous feature films, including ''Hell is for Heroes,'' ''Catch-22,'' ''Cold Turkey,'' ''Little Miss Marker'' and ''First Family.''

Newhart follows in the footsteps of past Rose Parade grand marshals who have included Shirley Temple Black, former presidents Dwight Eisenhower, Richard M. Nixon and Gerald Ford and stars such as John Wayne and Bob Hope.

(SEPT. 25) UPI - There's still NO budget deal between White House and congressional negotiators, despite a rapidly approaching October 1st deadline. Negotiators reported ''some'' progress'' after nearly four hours of talks that ended early today. But there's NO indication that any significant progress was made on the biggest obstacle blocking agreement- cutting the capital gains tax.

The Commerce Department today reported that the nation's slumping output of goods and services edged closer to recession in the second quarter... inching up only four-tenths of one percent. White House spokesman Marlin Fitzwater says that news about the gross national product is ''certainly cause for concern.''

At Cape Canaveral, Florida, NASA today cleared the space shuttle Discovery for blast-off next week on a high-profile mission to fire a European probe over the poles of the sun. NASA is pulling out all the stops to get Discovery ready for launch as soon as possible. If all goes well, it will be the space agency's first shuttle flight in five months.

President Bush has signed and sent to the Senate a historic treaty ending the division of East and West Germany and paving the way for a sovereign united democratic nation. At a Rose Garden ceremony, Bush said the treaty is a culmination of more than four decades of Western resolve and determination.

The World Health Organization reports that the deadly AIDS virus is spreading, especially among children. The W-H-O says that as many as 10- Million children world-wide could be infected with the disease by the year 2000... boosting the number of infected people around the globe up to 30-Million.

MOSCOW (SEPT. 25) UPI - The shortage of medicines in the Soviet Union is reaching the critical stage, with less than three-quarters of the required drugs available this year, a top health official said Tuesday.

Deputy Health Minister Alexei Moskvichev said while last year the country had only 86 percent of the pharmaceuticals it needed, this year the shortage will be even worse with only 72 percent of the need met.

He said domestic production currently meets 39.4 percent of the country's requirements, and vital imports are threatened because the government is in arrears for previous shipments.

''Vneshekonombank (Bank for Foreign Economic Affairs) repaid only a part of bills of foreign firms for medicines purchased this year,'' Moskvichev told the official Tass news agency. ''There is a real danger that deliveries under existing contracts might stop and that foreign partners will not conclude more deals.''

He added that Eastern European countries only delivered about three- quarters of the normal amount of medicines this year after the radical shifts in trade within the former East Bloc after last fall's peaceful revolutions.

Moskvichev said in addition to hard currency for more imports, the Soviet pharmaceutical industry also needed an infusion of cash to improve production facilities.

If the pharmaceutical industry is given the hard currency it needs it will be able to continue to produce about a third of the medicine needed in the country, but without increased budgets it will only be able to manufacture 19 percent, he said.

Moskvichev appealed for urgent measures to buy more medicines and modernize the Soviet pharmaceutical industry, warning of a ''sharp aggravation of the situation in the months ahead'' if nothing is done.

#90268u1511 09/25/1990 ~United Press International

(SEPT. 25) UPI - Soviet Foreign Minister Eduard Shevardnadze, warning war could break out at ''any day, any moment,'' denounced Saddam Hussein's occupation of Kuwait Tuesday as the U.N. Security Council considered clamping an air embargo on Iraq.

In a speech to the U.N. General Assembly, Shevardnadze called Iraq's Aug. 2 invasion of its southern neighbor a ''major affront to mankind'' and called on Moscow's former ally to ''to obey the demands of the law and plain common sense'' and withdraw.

Stocks on many world markets, meanwhile, plunged to their lowest level in years as oil prices and the Persian Gulf crisis brought investors around the globe to their knees.

Representatives from Iraq did not attend Shevardnadze's speech, boycotting the General Assembly session because of the refusal by U.S. authorities to let Baghdad's envoy, Foreign Minister Tariq Aziz, arrive in New York on an Iraqi government plane.

In Washington, Iraqi Ambassador Mohammed al-Mashat delivered President Saddam Hussein's videotaped response to President Bush's televised message to the Iraqi people last week. Major television networks said they would broadcast excerpts after screening the tape.

Shevardnadze was to chair the meeting of the Security Council Tuesday afternoon that was called to adopt an air traffic embargo on Iraq.

The foreign ministers of the council's 15 member states attending the meeting were expected to ask governments to withdraw landing rights to aircraft flying to and from Kuwait or Iraq and to detain ships that have violated U.N. sanctions against Iraq.

U.N. diplomats said the air embargo would almost certainly be approved because the five permanent members of the council - the Soviet Union, the United States, China, France and Britain - have agreed on the resolution.

The Pentagon said Iraq is losing about $100 million a day in revenue from banned oil exports and that the U.N. economic sanctions have ''proven very effective.'' Iraq's imports have been ''significantly reduced,'' Pentagon spokesman Pete Williams said. ''Right now less than 15 percent of the Iraqi merchant fleet is operating on the high seas.''

In his speech, Shevardnadze said the Iraqi military occupation of Kuwait was an ''act of terrorism'' against the post Cold War period, he said.

''War may break out in the gulf region any day, any moment,'' Shevardnadze said. He offered no concrete solution other than to defend the unanimity of the five permanent members of the Security Council to deal with the crisis.

Shevardnadze reiterated a Soviet proposal made several years ago that the Security Council's military staff committee be revived to oversee a U.N. military force which could be used in crises like that in the gulf.

The Soviet government said it would join the multinational force in the gulf only if it was set up by the council.

#90268u1532 09/25/1990 ~United Press International

LOS ANGELES (SEPT. 25) UPI - MCA Inc. confirmed Tuesday it was holding acquisition talks, following a report that Japan's Matsushita Electric Industrial Co. may buy the entertainment giant for up to $7.5 billion.

MCA's stock soared $22.375 to $56.825 in early afternoon trading on the New York Stock Exchange.

MCA, long the subject of merger speculation, did not identify Matsushita as the possible buyer, saying only that it is in discussion with ''a major international company.''

''The discussions are continuing on a friendly basis,'' the company said. ''No agreement has been reached. There is no assurance that an agreement will be reached.''

The announcement was the first time MCA, which is the parent of Universal Studios and generated nearly $3.4 billion in revenues last year, admitted it was in acquisition talks.

Matsushita is one of the world's largest electronics manufacturers, with brand names including Panasonic, Technics and Quasar, and has a retail network of 25,000 stories. It earned $1.7 billion last year and has annual sales of more than $44 billion.

Jeffrey Logsdon, an entertainment analyst with Seidler Amdec Securities of Los Angeles, said such a deal would make sense, given the strength of Matsushita.

Logsdon said Matsushita appears to be the driving force behind the possible deal, even though 77-year-old MCA Chairman Lew Wasserman may be looking to get out of the business.

Wasserman, who helped build MCA from a small booking agency, owns a 7 percent stake, while other directors control about 11 percent.

Logsdon estimated MCA's asset value in the range of $80 to $90 a share. Besides the movie studio, the company owns theme parks in Los Angeles and Orlando, Fla., several record companies, television station WWOR in Seacaucus, N.J., Putnam Publishing Group and a 49 percent stake in the Cineplex Odeon movie theater chain.

MCA's film library includes all-time box-office leader ''E.T. The Extra-Terrestrial,'' ''Jaws,'' Paramount's pre-1948 library and a wide variety of TV series.

It also manages facilities at Yosemite National Park.

The deal would make Universal the second major Hollywood studio under Japanese control. Sony Corp. bought Columbia Pictures Entertainment Inc. last year for $3.4 billion, plus the assumption of $1.4 billion in debt.

If it buys MCA, Matsushita would be following Sony in melding a vast ''hardware'' empire with entertainment ''software.''

Matsushita already made its entry into Hollywood through its Victor Co. unit. Victor agreed last year to invest $100 million in a joint venture - Largo Entertainment - with Hollywood producer Larry Gordon to develop, produce and finance movies.

Last year, prior to the Columbia deal, Sony was rumored to be negotiating with MCA over a possible buyout.

MCA, like other media and entertainment concerns, has been pummeled on Wall Street recently. Its major releases this year, ''Back to the Future Part III'' and ''Bird on a Wire,'' have performed adequately, but did not acheive blockbuster status.

Investors have been less than pleased with the performance of the company's $650 million Florida theme park, where rides have broken down. Some believe MCA paid too much in its $550 million deal for Geffen Records this year.

MCA's acquisition several years ago of an interest in the Cineplex Odeon chain has not turned out well, largely because of the Canadian company's huge debt load.

MCA's earnings for the first six months of this year were $76.4 million on revenues of $1.86 billion, up from earnings of $69.3 million on revenues of $1.53 billion for the year-ago period.

The Wall Street Journal reported Tuesday that individuals with knowledge of

the MCA-Matsushita talks said many barriers, such as regulatory problems, remained.

MCA's ownership of the giant WWOR could present a problem. A foreign company would be prevented from owning it under federal regulations.

#90268u1552 09/25/1990 ~United Press International

PASADENA, CA (SEPT. 25) UPI - After a shaky start, the Magellan probe is successfully mapping cloud-shrouded Venus, beaming back ''revolutionary'' views of a heavily fractured, volcanic planet that may be geologically active, scientists said Tuesday.

A brief but dramatic movie made with Magellan data was unveiled at a news conference that simulated a zooming 12-mile-high flight above a tortured region of complex faults and fractures, giving viewers a bird's eye view of a planet otherwise hidden from view.

Other photographs released Tuesday, including a giant 10-by-10 foot mosaic, show numerous volcanic craters, sharply defined Los Angeles- sized impact craters and broad regions of cracked terrain covered in places by lava flows indicating a possibly geologically active planet.

''There's a lot of activity on Venus,'' said Brown University researcher James Head. "I think Venus is very much alive in the broad sense. But actually being able to document changes that have occurred in (recent) years is difficult to document.''

''It's reasonable to anticipate that there might be, somewhere on the planet, volcanological activity occurring on the scale of days to years to tens of years. But really, we have no way of detecting that directly.''

With no water on the hellish 900-degree planet, erosion appears to be remarkably minimal, giving scientists a chance to look at large features that might otherwise be destroyed over time.

''This is a really interesting thing for Venus because we seem to see very pristine forms ... that seem not to have been modified by water- type erosion on the surface,'' Head said. ''This is going to (permit) us to see lots of relationships that are essentially destroyed on the Earth.''

Along with photographs from Magellan, scientists also revealed data from a device called an altimeter that gave researchers a look down into a 25-mile-wide, 1,640-foot-deep volcanic crater rising more than 980 feet above the surrounding countryside.

''In the small amount of data we've seen so far, we've been able to really look at the surface of Venus as sometimes 10, sometimes 100 times better (clarity) than we've ever seen before,'' Head said. ''Believe me, it's giving us a revolutionary new view of Venus.

''Literally, Magellan is a microscope on Venus. There's just an untold wealth of data that's providing tremendous excitement.''

But engineers said they have been unable to figure out what twice knocked the spacecraft out of contact with Earth last month.

''The problem ... may happen again,'' said John Slonski, Magellan spacecraft systems engineer. ''By its nature, it's random. We're putting into place procedures based on our experiences last month that will allow us to recover in a much more rapid fashion and minimize data loss.''

Even though one of Magellan's attitude control computer systems has been declared unusable until a fix is devised, the spacecraft was ordered to resume mapping operations Sept. 1.

Since then, officials said, Magellan has successfully completed more than 82 mapping orbits, beaming back 50 hours of priceless data to eager scientists on Earth. The mission to map 90 percent of Venus's surface is scheduled to last at least 243 days.

Magellan, built by Martin Marietta Astronautics Group of Denver, dropped into orbit around Venus Aug. 10, 15 months after launch from the space shuttle Atlantis on May 4, 1989.

The 2 1/2-ton solar-powered satellite was designed to ''see'' through the clouds that perpetually blanket Venus by bouncing radar beams off the planet's surface.

Extensive computer processing on Earth can convert such radar data into photo-like images showing surface features as small as a football field, some 10 times better than the best previous effort.

Magellan began mapping the surface of Venus on Aug. 16. But after one and a half orbits, the spacecraft suddenly went into a computer-induced state of hibernation and aimed its main antenna away from Earth.

Contact was restored the next day, but it was lost again the following week. Emergency commands radioed to Magellan ''in the blind'' caused to spacecraft to search for Earth and communications ultimately were restored.

Additional instructions were radioed to the probe later to prevent it from going into such computer-induced hibernation and losing contact with Earth if similar problems crop up in the future.

#90268u1555 09/25/1990 ~United Press International

EAST BERLIN (SEPT. 25) UPI - The once feared and hated State Security police of the former East German Communist authorities was the best organized in the world, according to a report presented Tuesday by East German Interior Minister Peter-Michael Diestel.

''This inhuman repression and surveillance system has successully been smashed through peaceful means,'' Diestel said, referring to the dismantling earlier this year of the special police and intelligence force, known as the Stasi.

During the 40 years of hardline communist rule in East Germany, the Stasi built up a net of 85,000 full-time agents covering the entire country, to combat activities deemed hostile to the government.

These included contact with Westerners, public criticism of the ruling Communist Party and unauthorized emigration attempts.

The report says that over 10,000 officers were employed at the district level primarily to control individuals viewed as potential dissidents or would-be emigrants.

More than 4,000 Stasi officials were emplyed in the letter-opening divisions and telephone-bugging sections.

Stasi observation was so thorogh that the six million files on individuals, and mountains of other documents left behind by the organization, are said to be so voluminous that they would stretch a distance of 100 miles.

''The state security police was the best organized secret service in the world '' Diestel said.

His report lists some of the Stasi wealth, which included 18,000 appartments and nearly 2,000 sport, vacation and recreation resorts for State Security officials.

Regarding controversy about the employment of an estimated 3,500 former Stasi officers at the interior ministry after the disbanding of the organization, the report says that the officials had a clean record and were working as bodyguards, ''anti-terrorist specialists'' and drug control agents.

The order to dismantle the Stasi under a special government-appointed committee was given Feb. 8, 1990.

Large numbers of Stasi officers could theoretically be arrested after Oct. 3 German unification. But a new, all-German parliament is due to discuss a proposed amnesty for former Stasi officials.

LONDON (SEPT. 25) UPI - A huge plant will likely be built in upstate New York to recycle waste paper into newsprint, a Dublin-based firm said Tuesday.

The Jefferson Smurfit Group said the mill would recycle 300,000 metric tons of waste paper per year, much of which now goes into landfills in the Northeastern United States, and produce about 250,000 tons of newsprint to be used by major U.S. publishers.

The preliminary feasibility study, completed with the help of the New York Department of Economic Development, had selected New York as a site, but engineering studies had yet to commence, said Smurfit officials.

The Irish conglomerate said the final site selection would be based on acceptable ''site-specific'' costs and satisfactory technical requirements being met.

''More than two sites'' in upstate New York are under consideration, said group secretary Michael Pettigrew, refusing to be more specific.

''I don't think there will be any hostilities aroused by the decision,'' Pettigrew said, adding the mill would employ local labor, be environmentally clean and prevent regional landfills from overflowing.

Among the publishers interested in the project are Newhouse Newspapers, The Boston Globe, Dow Jones & Co., and the Times Mirror Co., Smurfit said.

Waste paper for the mill will come from municipal and commerical recycling centers throughout the Northeast, Smurfit said.

Smurfit Recycling Co., a subsidiary of Jefferson Smurfit Corp., is a leading commercial collector and markerter of waste paper in the United States, currently diverting more than four million tons from landfills for re-use, a company statement said.

Jefferson Smurfit Group, with its affiliates, is one of the world's largest producers of recycled paper and paperboard products.

WASHINGTON (SEPT. 25) UPI - The Pentagon said Tuesday the number of Iraqi forces in Kuwait and southern Iraq has increased to 430,000 from 360,000 a

week ago, but officials conceded they have expanded the geographic area they are counting.

The Defense Department refuses to define the size of the area in southern Iraq that it is using in its Iraqi troop estimates.

''Iraqi forces in the Kuwaiti theater of operations - which is Kuwait itself and the areas immediately continguous to the north and west around Kuwait - number 430,000 troops, 3,500 tanks, 2,500 armored personnel carriers and 1,700 artillery pieces,'' Pentagon spokesman Pete Williams said.

That is an increase of 70,000 troops, 700 tanks, 700 armored personnel carriers and 250 artillery pieces from last week's Pentagon estimates.

Williams said ''part'' of the additional troops have come from the Iraqi border with Iran.

Iraq President Saddam Hussein recently gave land back to Iran that his forces seized during the eight-year war and also made diplomatic overtures to Iran in an apparent attempt to circumvent a U.N. embargo against Iraqi goods.

Asked if the larger number of Iraqi troops is due to the Pentagon counting forces in a larger geographic area or a reflection of an actual increase in troops, Williams replied, ''Both.''

He said the Iraqi military buildup had not surged in the past week but was ''about on a par'' with steady increases since the Aug. 2 invasion of Kuwait.

Two weeks ago, the Pentagon said there were 265,000 Iraqi troops in Kuwait and southern Iraq.

''It is still essentially a defensive force,'' Williams said of the Iraqis.

''They continue to move infantry units closer up to the border with Saudi Arabia and to reposition some of the heavier (armored) forces back a little bit further north,'' Williams said.

''Our analysts think what they're gaining here is flexibility, that by putting more of the infantry forces forward ... and generally moving the mechanized equipment back, it gives them more flexibility.

''If mechanized forces are up front, they don't have much place to go,'' Williams said. ''If they're back they have more options, they can go here, they can go over there.''

-30- 2445
#90268u1627 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - A group of 33 former Bankers Trust Co. staff has linked with Japan Leasing Corp. to launch a new international private investment banking firm, spokesmen said Tuesday.

Fieldstone Private Capital Group L.P. will specialize in project and lease finance, private placements and corporate restructuring, spokesmen said.

Five senior Fieldstone partners - Charles J. Hill, Sharon K. Peterson, C. Wesley Reynolds, Charles A. Quattrochi and Gaby Abdelnour - were managing directors of Bankers Trust.

''These executives were instrumental in a number of large transactions while at Bankers Trust, including the $1.3 billion leveraged lease of transport vessels by the Military Sealift Command of the U.S. Navy, the recently completed debt restructuring of Morningstar Foods and the $230 million financing of a solar power project for Luz International,'' spokesmen said.

''The debt epidemic that swept the '80s has changed the mindset of corporate America,'' Hill said. ''Many companies have been left with new financial needs which demand that advisors have technical abilities in a series of interrelated services, plus an objective perspective.''

Fieldstone will provide clients with custom-tailored solutions to meet those needs, Hill said.

Each of the former Bankers Trust staff has an equity postion in Fieldstone, which anticipates expansion, spokesmen said.

Japan Leasing, based in Tokyo, is a commercial finance and leasing company with financial assets of approximately $20 billion.

Fieldstone has headquarters in New York and offices in London and Tokyo.

#90268u1652 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Amid stiffening congressional opposition to tougher fuel economy legislation, the EPA Tuesday named the Geo Metro XFI - a Japanese-made General Motors import - the most miserly of the 1991 model-year cars at 50-plus miles per gallon.

Japanese-built cars once again dominated the annual gasoline mileage ratings, winning nine of the top 10 spots. The German-made Volkswagen Jetta was the only non-Japanese car among the top 10.

The mileage guide was released by the Environmental Protection Agency as legislation to increase federal fuel economy standards bogged down in the Senate. Backers of the bill failed to get the 60 votes needed to limit debate, handing opponents a victory in their efforts to prevent action on the bill. That could kill the bill for this congressional session, which is nearing its end.

The bill, strongly opposed by automakers and the Bush administration, would raise the fuel efficiency standards for new cars to a fleetwide average of 40.1 mpg by 2001, up from the current 27.5 mpg.

The EPA said the 1991 model-year fleet is expected to average 28.1 mpg, up from the 27.8 mpg estimate for 1990 cars. However, the slight increase for 1991 cars still leaves the fleetwide average short of the 1988 industry-wide average of 28.6 mpg.

The decline in fuel economy over the last two years has been cited by energy conservation proponents as clear evidence the government must force Detroit to make sigbificant fuel economy improvements above the current 27.5 mpg federal standard.

For individual carmakers, the Geo line, manufactured by Suzuki and imported and sold by GM, made the best showing of any brand name, taking four of the top 10 spots on the EPA's mileage list. Honda and Suzuki took two spots apiece

on the top 10 list.

The EPA said the top-rated Geo Metro XFI gets 53 mpg in city driving and 58 mpg on the highway. It was the fifth year in a row that the best gasoline mileage was posted by the Geo Metro XFI, a tiny 1,875-pound, three-cylinder subcompact.

The biggest gas guzzler among 1991 models was the Lamborghini DB132- Diablo, a high-powered sports car that logged 9 mpg in the city, 14 mpg highway.

In ranking cars by class, the EPA said:

-For ''mid-size'' cars, Chrysler's Acclaim and Spirit were the most fuel-efficient, both averaging 24 mpg in the city and 34 on the highway. Three Rolls Royce models were the worst, all averaging 10 mpg city and 13 highway.

-For ''large'' cars, the best was the Saab 9000 at 20 mpg city and 26 highway, and the worst was Cadillac Brougham at 16 mpg city and 25 highway.

-For ''large station wagons,'' the best was Ford's Grand Marquis and LTD Crown both 17 mpg city and 24 highway, and the worst was GM's Caprice Wagon, Custom Cruiser and Roadmaster models, all getting 16 mpg city and 25 highway.

EPA officials noted the agency's fuel mileage ratings were based on laboratory tests under optimum conditions and on-the-road results could vary.

In the showdown on Capitol Hill over fuel economy legislation, senators voted 57-42 in favor of limiting debate on the bill - three short of the needed 60.

That provided a big boost for the filibuster effort led by Sen. Don Riegle, D-Mich., whose home-state automakers strongly oppose the bill. The vote could enable Riegle to block Senate action on the bill this year, forcing proponents to start over next year.

Even if measure gets through the Senate, it faces a bleak outlook in the House where it likely will be sent to the House Energy and Commerce Committee. That committee is headed by Rep. John Dingell, another Michigan Democrat protective of Detroit.

Automakers and the administration oppose the bill as unrealistic, saying the technology does not exist to make big fuel economy improvements. They maintain the only way to meet the bill's requirements would be to make cars smaller and lgihter, which could lessen highway safety, restrict customer choice at the car lot, hurt sales and cost auto industry jobs.

The bill has gained momentum since the Persian Gulf crisis, which has underlined America's heavy dependence on foreign oil and re-energized government oil conservation efforts.

Backers of the bill say that with motor vehicles accounting for 40 percent of U.S. oil consumption, the nation will never reduce its reliance on imported oil unless cars are more fuel-efficient.

WASHINGTON (SEPT. 25) UPI - Following are the top 10 1991 model-year cars for fuel efficiency as announced Tuesday by the Environmental Protection Agency:

1. Geo Metro XFI, 53 mpg city, 58 mpg highway.

2. Honda Civic CRX HF, 49 city, 52 highway.

3. Geo Metro, 45 city, 50 highway.

4. Geo Metro LSI, 45 city, 50 highway.

5. Suzuki Swift, three cylinders, 45 city, 50 highway.

6. Honda CRX HF, 43 city, 49 highway.

7. Geo Metro LSI Convertible, 41 city, 46 highway.

8. Suzuki Swift, four cylinders, 39 city, 43 highway.

9. Daihatsu Charade, 38 city, 42 highway.

10. Volkswagen Jetta, 37 city, 43 highway.

#90268u1673 09/25/1990 ~United Press International

JERUSALEM (SEPT. 25) UPI - In one of the largest mass demolitions of Arab buildings since the start of Palestinian uprising, the army resumed Tuesday night bulldozing homes in a Gaza refugee camp where a reserve soldier was burned to death last week.

Less than four hours after the Supreme Court lifted a temporary restraining order, six bulldozers began destroying 16 homes in the Bureij refugee camp. Palestinian sources said the residents or owners of 38 shops and homes had received demolition orders.

The army spokesman confirmed the military was continuing the demolition, but had no information on how many Palestinians were affected.

Before the restraining order was issued Monday night, the army knocked down 18

shops, and four houses were sealed Tuesday morning, residents reached by telephone said. As many as 300 refugees were left homeless by the demolitions. The Red Cross delivered 120 tents to provide shelter.

The army said the demolitions were not intended to punish camp residents but to widen the street to ''enable greater security'' in an area of frequent stone-throwing at military patrols. Palestinians and several left-wing Israelis, however, said the demolitions were a form of collective punishment.

''It's not a means of punishment,'' said Judge Advocate General Amnon Strashnow. ''There were different means of punishment which (are being) taken against the perpetrators of the offenses.''

He said the houses of three suspects will be demolished after they have an opportunity to appeal.

Giorgio Giacomelli, commissioner-general of U.N. Relief and Works Agency, which oversees Palestinian refugee camps, arrived in the Gaza Strip Tuesday to check on the situation in the Bureij camp.

The houses and shops were located along a 100-yard strip of the camp's main commercial road.

The Association of Civil Rights in Israel had sought an extension of the injunction, issued late Monday, to allow Palestinian owners of the shops and homes time to appeal the demolition orders, claiming they were punitive.

In a written statement, Maj. Gen. Matan Vilna'i told the court that there was an ''urgent and direct military need'' for widening the road in order to increase security, a plan approved by Defense Minister Moshe Arens.

The Southern District commanding officer said the orders had been issued 24 hours in advance and residents could have appealed to local commanders.

The army also has said it would destroy the houses of those directly involved in killing reserve Sgt. Amnon Pomerantz Thursday after he mistakenly drove into the camp in his civilian car. The soldier was stoned and his car set on fire by an mob after he hit two Arab teenagers while trying to flee stone-throwers.

The killing, one of the most brutal murders of an Israeli since the start of the Palestinian 33-month-old uprising, shocked the country and brought calls from extreme right-wing politicians for mass deportations and demolitions.

Justice Minister Dan Meridor expressed satisfaction at the ruling, which the court said it would explain in detail at a later date.

''I think that it has again been proven that there is no contradiction between

the preservation of the norms of law and the preservation of security,'' he told Army Radio. ''We are struggling against a cruel enemy. We saw a terrible phenomenon in Bureij. The security system believed immediate steps should be taken.''

The army promised to pay compensation to those affected by the orders and find alternative housing. But it is unlikely the Palestinians would accept compensation because it would be considered condoning the military's actions.

Since the start of the uprising, 308 houses in the occupied West Bank and Gaza Strip have been destroyed, a punitive measure that Israel claims is legal under the 1945 Emergency Security Regulations drawn up during the British Mandate. The demolitions are usually carried out before a suspect is brought to trial.

Israel views demolitions as one of the harshest punishments at its disposal to prevent violence. However, the Middle East Military Balance 1988-1989, an Israeli academic analysis of the region, concluded that during the uprising demolitions had lost their power to deter more violence and had been ''transformed into a stimulus to further escalation of resistance to Israeli rule.''

Under a 1989 Supreme Court decision, the army was ordered to allow Arabs receiving demolition orders time to appeal them to the area commander and the high court. The ruling however did not cover cases of operational military necessity, the army's rationale for widening the Bureij street.

#90268u1677 09/25/1990 ~United Press International

INGLEWOOD, CA. (SEPT. 25) UPI - The Los Angeles Lakers acquired some much needed scoring punch off the bench Tuesday, obtaining swingman Terry Teagle

from the Golden State Warriors for their 1991 first-round draft choice.

In another trade, Los Angeles dealt veteran center Mark McNamara to the San Antonio Spurs for future considerations.

One of the NBA's most dangerous streak shooters, the 6-foot-5 Teagle played out of position at forward the last two seasons yet registered a career-high 16.1 points a game in only 29 minutes per contest in 1989- 90.

Teagle, 30, is expected to replace Michael Cooper in the Lakers' rotation. Cooper, who also played both guard and forward, left Los Angeles this summer to play in Italy.

''We're happy to add the services of a proven NBA scorer such as Terry to our ballclub,'' Lakers General Manager Jerry West said. ''We feel he'll give us immediate help in an area where we need it.''

The trade also fits nicely into the plans of Warriors Coach and General Manager Don Nelson, who now has three first-round selections in the 1991 NBA Draft.

Nelson has said he will attempt to construct a trade that would enable Golden State to move up in the draft or land a sorely needed big man.

''We feel this is a very positive move both for Terry Teagle and the Warriors '' Nelson said. ''Terry's coming off his best year as a pro and, we expect, will play an important role in the Lakers' drive for another world championship.

''The good news for the Warriors is that we now have three first- round picks in what we hope will be a strong 1991 draft.''

Teagle, who also grabbed a career-best 4.5 rebounds a game last year, spent the last six seasons with the Warriors. The former Baylor standout began in the NBA at Houston as a first-round pick in 1982 and started 44 games as a rookie.

Teagle was released by the Rockets in 1984 and played briefly with the Detroit Pistons before joining the Detroit Spirits of the Continental Basketball Association, where he averaged 19.5 points a game before singing with Golden State.

McNamara, a seven-year veteran, averaged 3.1 points and 2 rebounds in 33 games last year. Before coming to the Lakers, he played with Philadelphia, San Antonio and Kansas City.

''We're sorry to see Mark leave,'' West said. ''He was a positive influence on our team.''

The Lakers have been busy since being eliminated by Phoenix in the Westrern Conference semifinals last season. In addition to the departure of Cooper, McNamara and Coach Pat Riley, Orlando Woolridge was traded to Denver and Sam Perkins was signed as a free agent.

GREENSBURG, Pa. (SEPT. 25) UPI - Sony Corporation of America said Tuesday it is on target with its plans to open a color television picture tube manufacturing plant, its largest in the United States, in Westmoreland County, Pa.

Sony officials said at a news conference construction should begin next spring.

''Everything is on target including the fact that our negotiations with the commonwealth are aimed at a Nov. 1 takeover of the plant,'' said Clint Michaelis, executive vice president of Sony Engineering & Manufacturing of America. Construction activities will total about $100 million, he said.

The Sigel Group of Narberth, Pa., has been selected as the architect for the project, Michaelis said.

Sony said it expects to hire about 250 hourly employees beginning next summer and another 100 positions should be filled between next summer and the projected 1992 start-up date. About 1,000 jobs are expected to be created in the first three years of operations, primarily filled by local workers, officials said.

Up to 4,000 applications already have been processed, Sony said.

The deal with the commonwealth calls for Sony to lease 800 acres of the 1,200-acre site in East Huntingdon Township, about 35 miles southeast of Pittsburgh, for $21 million, payable over 20 years. Pennsylvania also is to offer Sony $20 million in low-interest loans for plant renovations and water and sewage facilities. Another $3.5 million is to be provided for job training grants.

Pennsylvania bought the site from Volkswagen for an undisclosed price after the automaker closed the assembly plant in 1988.

Michaelis said Sony is in the process of reaching an agreement with local tax authorities. The Japanese company would pay more than $1 million in lieu of paying traditional property taxes, the same arrangement Volkswagen had.

In addition to updating plans for the tube plant, Sony revealed the Westmoreland County site still remains on a list of possible sites being

considered for its new television manufacturing facility. An announcement is expected in the next several months.

#90268u1724 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Senior Pentagon officials said Tuesday between 500 and 1,000 Soviet military advisers and technicians are in Iraq, many involved

in maintenance on Soviet-built bombers and fighters.

This differs significantly from the 150 to 160 military advisers mentioned previously by Soviet President Mikhail Gorbachev and Soviet Foreign Minister Eduard Shevardnadze.

The senior Pentagon officials, who spoke on condition they not be identified, said the discrepancy probably results from the way the advisers and technicians are counted.

Gorbachev and Shevardnadze are ''probably referring to uniformed personnel, working for the (army's) general staff,'' a Pentagon official said, while U.S. analysts include those specialists who do not wear uniforms.

The Pentagon officials said the Soviet Union has honored the U.N.- sponsored sanctions against Iraq for the Aug. 2 invasion of Kuwait and has not sent any military equipment or supplies to Baghdad.

At the same time, ''a group of Soviet specialists'' numbering between 500 and 1,000 in Iraq ''continue to be involved ... in basically maintenance work ... mostly associated with aircraft,'' one Pentagon official said.

Iraq has about 513 combat aircraft, including Soviet-built MiG and Su fighters and Tu-22 and Tu-16 bombers.

''They're away from the front lines,'' the Pentagon official said of the Soviet specialists, referring to the border between Saudi Arabia and Iraq and Iraqi-occupied Kuwait.

The Soviets have declined to pull their advisers and technicians out of Iraq, arguing that they are under legal contract and will come out once their contract expires.

A Pentagon official said ''bureaucratic struggles in the Soviet Union'' between those who want to honor the U.N. sanctions and cut off all support of Baghdad and those who want to maintain Moscow's longtime relationship with Iraq are the apparent reason for the Soviets taking a dual track of action.

#90268u1734 09/25/1990 ~United Press International

KARACHI, PAKISTAN (SEPT. 25) UPI - Deposed Prime Minister Benazir Bhutto, kicking off a campaign to regain power in Oct. 24 elections, told enthusiastic crowds Tuesday a vote for her Pakistan People's Party ''would mean a vote for democratic stability and against terrorism.''

Bhutto, the first woman elected to rule a Moslem country and now being investigated over corruption and nepotism allegations, toured six shantytowns

and four middle class districts in Karachi, a city of 8 million residents, told the crowds that cases against her, her family members and party colleagues were ''all fabricated and not true.''

''We were actually about to launch a revolutionary economic empancipation program for the rural masses in order to bring them out of the perpetual poverty and help them march into the 21st century along with their urban brothers,'' she said.

But the ''powers that be, the anti-people, exploitative, vested interests'' do not want her to bring about these changes and so she said they sacked her accusing her of being corrupt.

President Ghulam Ishaq Khan established Special Disqualification Courts to look into allegations of corruption involving Bhutto and members of her Pakistan People's Party. Those found guilty could be disqualified from running for elected jobs for up to seven years.

Bhutto has called the Special Disqualification Courts unconstitutional. She has said a judicial commission comprising Supreme Court judges should be appointed to look into the allegations of corruption against people who held government office.

Ishaq Khan implicated former Bhutto's father-in-law in ''financial irregularities'', according to papers filed Tuesday with the Lahore Special Disqualification Court.

No details were released on the charges against Hakim Ali Zardari, former chairman of the National Assembly's Public Accounts Committee.

Bhutto said Ishaq Khan ''is himself corrupt. He has accused me of horse trading (buying the loyalties of elected representatives) but after dismissing my government he has bought members of my party and appointed them ministers in the caretaker cabinet and one is the chief minister of Sindh province.''

''He has set free people accused of being traitors. He is also trying to oblige the terrorists,'' she said. ''The president had institued cases against me for nepotism, but he himself has indulged in nepotism by arranging loan write-offs for his in-laws and by trying to influence official decision in a cellular phone project contract to enable his in- laws to get the contract.''

Bhutto charged Ishaq Khan ''has also used his position to arrange the release of one of his relatives who was arrested in Canada on drug smuggling charges''.

The special courts have already issued two orders to the former Prime Minister to appear before the courts.

The first one deals with her alleged use of influence to favour a London-based

hotel sponsored in a land deal and the second pertains to theallocation of liquid petroleum sales agencies to her close relatives and friends on the grounds that they had suffered financial losses during under the military rule of General Zia-ul Haq. Zia died in an air crash in 1988.

The notice on the second case was issued on Monday. If Bhutto fails to prove that she was not guilty of what she has been accused, then she would also be barred from taking part in the Oct. 24 elections.

Bhutto has called the courts ''kangaro courts'' but has so far has not taken any public stand on the two notices issued to her.

Sources close to the PPP in Islamabad say that she would challenge the constitutionality and legality of the special courts but would not refuse to appear before them.

WASHINGTON (SEPT. 25) UPI - Turkish President Turgut Ozal told President Bush that Iraq's military might has been exaggerated but warned Tuesday it will be tough for Saddam Hussein to back down, an administration official said.

Although Bush and Ozal did not specifically discuss the propects of war in the Persian Gulf crisis, the Turkish leader gave a political and military assessment of Iraq and its president, said Assistant Secretary of State James Dobbins, who met with reporters after the two presidents concluded their talks at the White House.

Dobbins said Ozal told Bush that public assessments of Iraq's military capabilities have been ''somewhat exaggerated - that Iraq, after all, was a Third World state. It's not Germany. It's not the Soviet Union.''

As for Saddam, Dobbins quoted Ozal and his aides as saying that ''flexibility was not his strong point and that changing his mind or backing down from a situation was going to be difficult.''

Bush, with the support of the United Nations, has demanded Iraq's unconditional withdrawal from Kuwait, which was overrun Aug. 2 with a swift

military assault.

On Tuesday, Bush promised Ozal a package of political, economic and military rewards for Turkey's strong stand against Iraq, a neighbor to the south.

As Ozal was getting into his limousine to leave the White House, he was asked by reporters if he believed there would be war in the gulf.

''Only God knows,'' he replied.

The Pentagon has refused to offer a public assessment of Iraq's military power but has said Iraqi soldiers are believed to number more than 1 million.

Defense officials also have estimated there are 430,000 Iraqi troops in Kuwait and southern Iraq, backed up by 3,500 tanks, 2,500 armored personnel carriers and 1,700 artillery pieces.

Dobbins said Ozal gave his assessment of Iraq's military and Saddam at the request of administration, and that Bush and other U.S. officials he met with made no specific response.

He said Ozal expressed his belief there has been an ''exaggerated concern'' about Iraq's military, which was hardened by its eight-year war with Iran but also depleted by that bloody conflict.

But Dobbins added, ''He wasn't coming to tell us not to worry. I don't think he was saying it'll be a run over (and) that there won't be any casualties.''

During a picture-taking session in the Oval Office at the start of his talks with Bush, Ozal was asked how long Turkey, which cut off a lucrative pipeline with Iraq to comply with the U.N. embargo, could maintain such sacrifices.

''As much as is required,'' the Turkish president replied.

In formal departure remarks on the south lawn, Bush told Ozal that U.S.-Turkish relations ''have never been stronger.'' He said they had discussed ''how we might expand ties, politically, economically, culturally and militarily.''

On the economic side, Bush promised to work next month toward a new agreement lifting trade barriers on textiles from Turkey and said the United States will support Turkey's bid to become a member of the European Community.

Ozal, who emphasized that Turkey wanted ''trade not aid,'' was lavish in his praise of Bush's handling of the gulf crisis and his leadership in lining up international opposition to Iraq.

Ozal stresed the need for a peacful solution in the gulf and said, ''It is up

to every country to observe the mandatory sanctions and to make them work.''

A senior administration official said that Bush accepted Ozal's invitation to visit Turkey and said he hoped to be able to make the trip before the end of next year.

#90268u1748 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Marriott Corp. said Tuesday it would slash more than $500 million from the company's construction budget for new hotels and senior citizens centers in 1991 to bolster a sagging financial position.

The company, caught in a nationwide glut of hotel rooms, said Standard & Poor's Corp. placed certain long-term debt rated A- on the debt-rating agency's CreditWatch list Monday ''with negative implications,'' meaning an eventual downgrade is possible.

''Obviously, we are disappointed with S&P's action,'' said William Shaw, Marriott's chief financial officer. ''We have financial flexibility as well as strong, stable cash flow.''

Among other things, lower debt ratings translate into higher debt- service costs for companies.

In a statement issued by the lodging and contract service company, Shaw announced that Marriott was taking steps to delay construction of hotels and senior centers in 1991, cutting capital expenditures to about $650 million from $1.3 billion in 1990.

''We believe this delay, which we expect to last 12 to 18 months, will provide us with an extra margin of flexibility in the present uncertain financial, real estate and lodging markets,'' Shaw said.

Marriott hotels and seniors citizens centers ''now under construction will be completed primarily in 1991,'' he said.

Shaw also noted that the company, which has disposed of the Roy Rogers fast-food restaurant chain and other businesses, has sold about $900 million in assets in 1990 and expects to sell more than $700 million in other assets over the next few months.

He said that Marriott's food and other contract services, ''which contribute nearly 50 percent of Marriott's sales and cash flow, are not affected by many of the circumstances faced by the lodging industry.''

Marriott is also investigating projects with other companies as well as ventures overseas.

''We are placing greater emphasis on pre-financing development projects, developing with third parties or in joint ventures, and franchising, and we are very interested in long-term international expansion,'' Shaw said.

SRINAGAR, INDIA (SEPT. 25) UPI - Security forces intercepted two groups of militants who crossed from Pakistan into the Indian side of disputed Kashmir, sparking gun battles that left 13 militants dead, police said Tuesday.

The incidents occurred Monday night when security forces patrolling the Indo-Pakistan border intercepted two groups crossing into the Indian side near Kupwara, 65 miles northwest of Srinagar, the state capital of northern Jammu and Kashmir state, police said.

They said in the first incident, militants opened fire as they ran into an Indian border patrol that returned fire and killed five militants.

The second shootout occurred two hours later at Matschil in Kupwara region, where border patrol found a second group of militants entering from Pakistan.

They opened fire when militants ignored their call to surrender, resulting in a gun battle that left eight militants dead, police said, adding that the border patrol suffered no casualties.

Police gave no further details.

Moslem militants have been waging a campaign for secession of Kashmir, but the movement flared up into a popular uprising against Indian rule in mid-January after security forces opened fire on demonstrators, killing at least 35 people.

Since then more than 700 people have been killed in near-daily violence. Tens of thousands of troops and paramilitary forces have been deployed in the region, but have failed to crush the uprising.

India has repeatedly accused Pakistan of arming and training Moslem militants. Pakistan denies the allegations, but admits providing moral support to the movement.

Both New Delhi and Islamabad claim sovereignty over the region with India controlling two-thirds of disputed region and the remaining area under the control of Pakistan.

In a related development the Al-Omar Mujhaideen group that demands merger of Kashmir with Pakistan, announced that no private cars and jeeps would be used in the valley from Wednesday.

''All civilians have been asked to discontinue the use of light vehicles because Indian security guards are seen roaming about in this vehicles in plain clothes to pick up militants on information provided by informers (arrested members),'' said a statement from the militant group.

-30- 2469

#90268u1781 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Saying he ''can look America in the eye,'' South African President F.W. de Klerk vowed Tuesday that the racial reforms now under way in his country will eliminate the rationale for U.S. economic sanctions.

The sanctions were imposed over President Reagan's veto in 1986 to punish South Africa for its apartheid system of racial separation, and the question of whether to drop them has emerged as a theme of de Klerk's visit, the first to America by a South African president in a half-century.

President Bush said after meeting with de Klerk Monday he believed racial

reforms in South Africa were ''irreversible'' but several more specific conditions still had to be met before the sanctions could be ended.

In a National Press Club speech that punctuated a day of meetings with members of Congress, de Klerk said the question of sanctions had only come up ''indirectly'' during his discussions with Bush and Senate leaders.

''I did not come here with a shopping list,'' he said. ''We intend, because we believe it must be done, to do all the things to which the CAAA (Comprehensive Anti-Apartheid Act) requires. ... The time will come when automatically there will be compliance and sanctions will fall away.''

De Klerk said his goal was for Americans ''to accept our sincerity in wishing to create a new South Africa on principles to which you can subscribe.''

''I can look America in the eye and say, 'We are no longer divided,''' he said. ''Apartheid is not an issue any longer. It is only kept alive by those who now have a vested interest in keeping it alive.

''The challenge is to manage the transistion within South Africa in such a way that the fundamental human values which we share are able to survive the turbulance of adaptation required from both black and white.''

De Klerk, who released black South African leader Nelson Mandela in February and has since entered talks with Mandela's African National Congress, made specific promises on all the remaining reasons for U.S. sanctions.

He said political prisoners were being released under a schedule agreed to by the ANC and that his government has begun its consideration of lifting the state of emergency in Natal Province.

He said parliament next year would take up current laws restricting where blacks can live and buy land. He added that the Population Registration Act, which classifies South Africans according to race, ''is inseparable from the present constitution and will fall away when a new constitution is adopted.''

Anne Griffin, legislative director for TransAfrica, the group that led the fight for sanctions, said de Klerk's sincerity would remain in doubt until he launches a ''direct attack on the legislative foundation of apartheid.''

''You have to focus on the legislation. The fact that he hasn't moved on any of the cornerstones of apartheid has made us cautious,'' she said. ''So far, nothing has happened that anyone who scrutinizes his moves over the last year can say is irreversible.''

Just as Mandela did in his June appearance before Congress, de Klerk turned to American history in hopes of finding sympathy for his position.

But while Mandela invoked the names of George Washington and Thomas Jefferson to justify the use of violence, de Klerk indirectly referred to the U.S. experience with slavery and discrimination.

He began his speech, for example, by joking with the woman moderator of the event about past National Press Club policies barred women from joining.

''Of all the countries in the world, the United States of America might be the best equipped to understand the complexity of our problems, '' de Klerk said.

''You yourself have experienced the agony of conflicting choices. You do not realize how similar our histories are.''

WASHINGTON (SEPT. 25) UPI - The Treasury Department announced Tuesday it will offer $18.4 billion in 13-week and 26-week T-bills at its weekly auction next Monday to raise $1.45 billion in new cash.

But the department also said that it will ''postpone the auctions unless it has assurance of enactment of legislation to raise the statutory debt limit before the scheduled auction date.''

In a letter to congressional leaders released Monday, Treasury Secretary Nicholas Brady said the government could run out of cash by Oct. 4 unless Congress increases the debt limit to $3.509 trillion.

Congress has passed temporary legislation increasing the debt limit to $3.195 trillion, but that ceiling will revert to about $3.123 trillion at midnight Tuesday unless the permanent measure is approved.

''Without an increase in the debt limit, all issuance of Treasury securities would cease,'' Brady said in the letter.

DENVER (SEPT. 25) UPI - A former Silverado Banking, Savings and Loan Association executive testified Tuesday that a $900,000 line of credit extended by the failed thrift in 1986 to a Denver developer who had ties to Neil Bush may have been inappropriate.

Russell Murray, the one-time chief lending officer of the failed thrift, also said he did not have all the facts about the relationship between President Bush's son and the developer before acting on the request for the credit line.

Murray was the first witness to testify in public at a hearing by the Office of Thrift Supervision on allegations that Bush violated conflict- of-interest regulations while a member of Silverado's board of directors.

A final decision in the case is not expected until next spring. If Bush is found guilty, he would be barred from similar actions if he ever became involved in the thrift business again.

Bush, a Denver oilman, has steadfastly maintained that he did nothing wrong. He was on the thrift's board between 1985 and 1988, resigning just months before it was seized by regulators. The thrift's failure is expected to eventually cost taxpayers about $1 billion.

Bush, 35, did not attend the opening day of the hearing but was scheduled to testify later this week.

Although the hearing was opened to the public, the lead-off witness was allowed to testify behind closed doors Tuesday.

Administrative law judge Daniel Davidson allowed Michael Wise, the former president and board chairman, to appear in the judge's chambers. Davidson said he wanted to save Wise the ''ordeal'' of testifying in public. His testimony, however, may eventually be made public.

Another witness, former Silverado director Florian Barth, also refused to

testify Tuesday, apparently because he was named in a $200 million Federal Deposit Insurance Corp. suit against former Silverado officials. Government attorneys said they would try to subpoena him.

Most of Murray's testimony Tuesday concerned a $900,000 line of credit extended to Good International, a company owned by former Denver developer Kenneth Good. Neil Bush requested that Silverado's management approve the line of credit in 1986. The credit line was approved but never used.

Bush was one of the partners in JNB International, which was involved in a joint venture with Good International in Argentina. The OTS also has alleged that Good arranged for more than $3 million in financing for Bush's unsuccessful oil and gas exploration business.

Murray testified that he was aware there was a relationship between Good and Bush before he prepared a memo on the proposed line of credit for Good.

But he said if he had been aware of the full extent of the relationship, he would have referred the line of credit to Silverado's chief counsel to see if there were any violations of federal regulations.

The line of credit was approved by the thrift's loan committee and then by the board of directors. Bush abstained from voting.

Murray also testified that he now believes Silverado's counsel might have found the line of credit ''an inappropriate transaction,'' if the full details had been known about the Good-Bush relationship.

In the FDIC's suit, Bush and other Silverado officers were accused of ''repeatedly'' breaching their responsibilities to run the thrift safely. The suit said their ''gross negligence'' contributed to Silverado's collapse in December 1988.

Because the thrift's directors did not have liability insurance, they could become personally liable for any damages granted in the case.

The FDIC suit did not charge that Neil Bush profited directly from his role at Silverado, but it did say he failed to properly disclose his business relationships with two of the thrift's largest borrowers - including a $100,000 loan from Good that he never paid back.

President Bush has had no comment on the suits but has defended his son's integrity.

WEST BERLIN (SEPT. 25) UPI - Hundreds of Social Democratic delegates from East and West Germany converged on Berlin Tuesday for a three-day party congress that will end 44 years of division in advance of Oct. 3 German unification.

At the congress, which starts Wednesday, the East and West German Social Democratic parties will formally merge into a single party that will compete against Chancellor Helmut Kohl's Christian Democratic Union in the Dec. 2 federal election - the first in a unified Germany.

The 550 delegates were expected to nominate Oscar Lafontaine, prime minister of the West German state of Saarland, as Kohl's challenger, and were due to approve a 100-point government program drawn up by the party leadership.

''This is the beginning of the hot campaigning period leading up to the federal election,'' SPD federal manager Erik Bettermann said.

But recent polls showed that Kohl and his center-right CDU are far more popular than Lafontaine and the SPD.

Similar surveys show the SPD also trails the CDU in four of the five East German states, where regional elections are due to be held Oct. 14. The five states will join the 11 West German states in the Federal Republic of Germany Oct. 3.

In the first free elections in East Germany, March 18, the SPD gained only 22 percent of the vote against the CDU's 41 percent. In past West German elections, the SPD averaged about 38 percent.

''We are striving for 40 percent plus (of the vote),'' Lafontaine said.

Observers believe Lafontaine will face a tough task in gaining acceptance from

East German members because of his earlier calls to slow down the pace of unification.

The SPD, which like most other political parties had been banned in 1933 by Adolf Hitler, was re-established in 1945 after World War II.

One year later, the SPD in the Soviet occupied zone - later East Germany - was forced to merge with the Communist Party to form the Socialist Unity Party, the SED, which ruled East Germany until last fall's peaceful revolution.

More than 5,000 SPD members in East Germany who opposed the forced union with the Communists were arrested and imprisoned - many in Hitler's former death camps, which the Soviet forces used as prisoner of war camps.

SPD officials said about 400 of those arrested died during their imprisonment and another 1,000 died after their 1950 release as a result of their treatment in prison.

The SPD was reestablished Oct. 7, 1989, about one month before the Berlin Wall opened and one week before hardline Communist leader Erich Honecker was ousted.

The East and West CDU also are due to merge at an Oct. 1-2 party congress in the West German city of Hamburg. There is little doubt that by Oct. 3, Kohl will not only drop the word ''West'' from his government title but also from his party title. He currently is chairman of the West German CDU.

Until the ouster of the Communist leadership, the East German CDU was a ''bloc-party'' allied to the Communists and not linked to the West German CDU.

#90268u1839 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - After years of delay caused by disputes over verification, the Senate ratified Tuesday two treaties negotiated with the Soviet Union in the mid-1970s that limit underground nuclear tests to 150 kilotons.

The Senate voted 98-0 to approve the 1974 Threshold Test Ban Treaty, which limits nuclear tests to 150 kilotons, and the 1976 Peaceful Nuclear Explosions Treaty, which bars nuclear blasts over 150 kilotons for peaceful purposes.

Senate Democratic leader George Mitchell said the United States can now have ''high confidence'' that the tests can be monitored and urged the administration to immediately begin seeking a comprensive ban on all nuclear tests.

Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, said, ''We owe it to those who inhabit the planet now and those who will follow us to deal forcefully and resolutely with the vestiges of the cold war.

''We must reduce and, as soon as we can, end our reliance on nuclear weapons to maintain the peace and find new solutions to problems based more on our wit and wisdom than our weapons of war,'' Pell said.

He added, ''I hope that an early marker in our search for a peaceful and prosperous new world will be a complete end to nuclear testing. We have a solemn obligation we must not ignore, and a promise we are bound to keep.''

Sen. Jesse Helms, R-N.C., who previously resisted the treaties, said they now were ''effectively verifiable'' and said he would support ratification.

The United States and the Soviet Union have been observing provisions of the treaties negotiatied by Presidents Nixon and Ford, respectively, but neither had been ratified because of concerns about whether they could be verified.

Negotiations on verification procedures began in November 1987 and produced protocols allowing on-site verification that were signed June 1 in Washington by President Bush and Soviet President Mikhail Gorbachev.

The Senate Intelligence Committee reported Sept. 12 that the Soviet Union has not committed any ''major'' violations of the treaties since 1976 and said the United States now has ''sufficient'' capabilities to detect future violations.

But the report said ''there is a threat of Soviet intelligence exploitation of the inspection process.''

National security adviser Brent Scowcroft later wrote the committee to assure members ''the administration will take no action under the treaty that would endanger of compromise vulnerable U.S. programs.''

WASHINGTON (SEPT. 25) UPI - Defense Secretary Dick Cheney Tuesday extended until the end of the year a cost-cutting civilian hiring freeze he first imposed in January and that officials said has reduced the work force by 26,000 employees.

Cheney ordered the freeze Jan. 11 to cut expenses under the $300 billion Defense Department budget.

The defense secretary extended the civilian hiring freeze through Dec. 30, Pentagon spokesman Pete Williams said.

Since the freeze has been in effect, the civilian workforce has been reduced by 26,000 people as employees have retired or resigned, Williams said.

The Pentagon said the Defense Department had 1.156 million civilian employees in fiscal 1989, and the number had dropped to 1.130 million by July 1990.

#90268u1863 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - The American Medical Association called Tuesday for the resignation of the Health and Human Services inspector general, Richard Kusserow, saying U.S. physicians do not trust him.

Inspectors general are the watchdogs of the various federal agencies, attempting to uncover fraud and abuse within the agency and by people receiving money or services from the agency.

Doctors found to be defrauding or abusing the Medicare or Medicaid programs are not permitted to receive reimbursement from the federal health insurance programs.

''We found it necessary to send a letter to the president, seeking the resignation of Mr. Kusserow because of a lack of trust and confidence by U.S. physicians,'' said AMA Vice Chairman Robert McAfee, saying it has become ''increasingly difficult'' to work with Kusserow.

McAfee said doctors are ''being hassled'' because of Kusserow's overly aggressive policies. He denied he wants Kusserow out because doctors are feeling the pinch of Kusserow's mission to hunt down fraud and abuse.

Kusserow has no plans to step down, his spokeswoman said.

''The I.G.'s record speaks for itself and we were surprised by the AMA's action,'' said Judith Holtz.

White House comment was not immediately available.

#90268u1873 09/25/1990 ~United Press International

HOLLYWOOD (SEPT. 25) UPI - Moviegoers have paid more than $3.6 billion so far this year at the domestic box office, about 1 percent behind 1989's record-setting pace, when ticket sales for the year topped $5 billion.

With the romance-thriller ''Ghost'' and new releases ''GoodFellas'' and ''Postcards From the Edge'' keeping early fall sales from lagging, the year-to-date box-office total passed $3.63 billion over the weekend, Daily Variety reported Tuesday.

That compares with more than $3.69 billion for the same period last year and $3.28 billion at the same juncture in 1988.

The top 10 movies of the weekend, led by the Mafia tale ''GoodFellas, '' drew $34.2 million, up 5 percent from the prior weekend's $32.5 million and 2 percent better than the $33.5 million scored by the top 10 a year ago.

For the week, the domestic box office total reached $67 million, off from $71.2 million for the year-ago week. In 1988, the same week produced ticket sales of $52.6 million.

''Ghost,'' the year's surprise hit, has grossed $148.3 million for Paramount in 11 weeks and is almost certain to become the top money- maker of 1990. It trails only Disney's ''Pretty Woman,'' which has drawn in $172.5 million in 28 weeks.

In all, seven films have crossed the $100 million benchmark this year.

New Line Cinema's ''Teenage Mutant Ninja Turtles'' is the year's third-leading film, with $133.1 million in 26 weeks; Paramount's ''Hunt for Red October'' has a gross of $120.6 million in 29 weeks and Carolco's ''Total Recall'' has pulled in $117.8 million in 17 weeks.

Fox's ''Die Hard 2'' has sold $112.7 million of tickets in 12 weeks, and Disney's ''Dick Tracy'' has grossed $103.7 million in 12 weeks.

WASHINGTON (SEPT. 25) UPI - The Pentagon established a ''donations hotline'' Tuesday for people who wants to send toys, games and other items to U.S. troops supporting Operation Desert Shield in Saudi Arabia and the Persian Gulf region.

''Proposed donations would first have to be cleared through the hotline, at (703) 274-3561. Donators are responsible for shipment of items, at their own expense, to a collection point on the East or West Coast,'' the Pentagon said.

It also provided a list of acceptable items that ranges from reading material and exercise equipment to sun block and squirt guns. The list includes these items:

Games

Hand-held computer games (i.e., Games Boy)

Electronic portable games (i.e, Nintendo)

Cards, darts, chess, cribbage, checkers, bingo, Risk, Uno, Battleship, Pictionary, Bumper Pool, Scrabble, Scruples, air hockey, mini pingpong, Trivial Pursuit, Skittles, Abalone, backgammon, Monopoly, etc.

Music and Audio

WASHINGTON (SEPT. 25) UPI - The Bush administration opposed a bill Tuesday to subsidize the development of electric automobiles, despite testimony that such cars would reduce the American need for Mideast oil.

''Our addiction to foreign oil threatens our economy, our national security and our environment,'' said Rep. Robert Torricelli, D-N.J., who chaired a hearing by a House Science, Space and Technology subcommittee.

''Developing a practical electric car is not some idle puzzle for engineers,'' Torricelli said. ''It is part of a sound energy policy that will give this country back its self-reliance and help clean the thick haze of pollution from our skies.''

But J. Michael Davis, the Energy Department's assistant secretary for conservation and renewable energy, said the administration opposed the bill,

noting it ''essentially would provide subsidies for the commercialization of electric vehicles through cost discounts to the consumer'' designed to make the cars comparable in cost to gas-fueled vehicles.

''The intent is that these subsidies would enhance the marketability of electric vehicles to the point where the increased demand would lower the vehicle price as a result of the economies of scale associated with mass production,'' Davis said.

''However, it is unlikely that the economies of scale necessary to obtain the desired decrease in production cost will be achieved as a result of subsidies '' Davis testified. ''The price differential for vehicles that currently are being considered for production is much too great to achieve a significant increase in volume without a major drain on the treasury.''

During questioning, Davis conceded that the Reagan and Bush administrations had drastically reduced funding for electric vehicle research, compared to money spent during the Carter admnistration.

''I think a decade ago we had a much broader program,'' Davis testified.

Rep. George Brown Jr., D-Calif., said automobile companies have dragged their feet in designing electric cars. Brown introduced the bill - authorizing a five-year, $50 million program to develop mass-produced electric automobiles, with the federal government sharing the cost of initial commercial production.

''I've worked for the automobile companies for 25 years,'' Brown said. ''I've never seen them do anything they didn't have to, believe me.''

Although the administration opposes the bill, Davis testified that electric cars would improve urban air quality and ''will be essentially non-polluting if they use electricity generated with solar, hydroelectric or nuclear energy.''

They also would help reduce American imports of foreign oil, he said. The Energy Department is currently working on the three most promising types of batteries to extend the range of electric cars, now about 100 miles, to more than 200 miles ''on a single battery charge,'' Davis said.

''With current battery technology, electric vehicles are not economically competitive,'' Davis said.

Several automobile companies have produced prototype electric cars or vans, but they say advancements in battery reseach hold the key to commercial success. Critics have charged that automobile companies have never really been interested in alternatives to gasoline-fueled cars.

HOLLYWOOD (SEPT. 25) UPI - Pointing to more than 7,000 hate crimes against homosexuals last year, a prominent gay and lesbian activist group Tuesday charged the entertainment industry with gay bashing through negative images in movies.

''The situation has gotten much worse. Negative stereotypes, slurs and obnoxious jokes have increased in movies. It's a situation that has to change '' said Richard Jennings, executive director of the Gay & Lesbian Alliance Against Defamation.

The group, known by the acronym GLAAD, took out a $1,500, full-page advertisement in the Hollywood trade paper, Daily Variety, Tuesday, listing films with negative images of homosexuals.

''Gay and lesbian film characters are portrayed either as sissies or victims, or murderers and twisted villains. We are maimed and killed. We are verbally

abused with offensive terms such as 'faggot' and 'dyke,'' the ad said.

''There are an estimated 25 million lesbian and gay Americans. With all due respect for freedom of expression, isn't it time Hollywood used that freedom to depict lesbians and gay men in a more realistic and responsible way?'' the ad said.

Listing nine examples of films released this year or in development that present allegedly distorted or negative stereotypes, the ad includes ''Men at Work,'' which features several anti-gay jokes prompted by the tying up of one near-naked policeman behind another. Other movies listed include ''Wild at Heart,'' which employs the term ''faggots''; ''Miller's Crossing'' containing three negative gay characters; and ''Darkman'' with a gay primary villain who collects the severed fingers of his victims.

In ''Bird on a Wire,'' homosexual hairdressers are depicted as swishing stereotypes and are mocked and ridiculed. In ''Q&A,'' homosexual men are viciously beaten and strangled to death.

The rap movie ''House Party'' contains the type of dialogue GLAAD finds especially offensive.

''Do you want to become an AIDS candidate. Take your eyes off me. Don't even watch the kid or you'll go out like Liberace did ... Me a homo? Nah man, that's a no-no,'' a rap number in the movie says.

The group has held meetings with studio and production company heads in an attempt to increase awareness. A meeting with officials at KTMB Productions resulted in the omiting of anti-gay jokes in the new NBC television show ''The Fanelli Boys,'' Jennings said.

#90268u1938 09/25/1990 ~United Press International

(SEPT. 25) UPI - Japanese-built cars once again dominated the E-P-A's annual gasoline mileage ratings... winning nine of the top 10 spots. The German-made Volkswagen Jetta was the only non-Japanese car among the top 10 of the 1991 model-year cars. The E-P-A gave the top gas mileage rating to General Motors' Japanese-made import... the Geo Metro X-F-I. The tiny, three-cylinder sub-compact gets 50-plus miles a gallon. The biggest gas- guzzler was the Lamborghini D-BDiablo, a high-powered sports car that logged nine to 14 miles a gallon.

The Triple-A motor club says the average price of regular gasoline nation-wide jumped nearly two cents in the past week, to one dollar 31 cents a gallon. That's the highest price recorded since the Persian Gulf crisis began on August 2nd.

The Pentagon says the U-N economic sanctions against Iraq have ''proven very effective.'' Pentagon spokesman Pete Williams says Iraq is losing about 100-Million dollars a day in revenue from banned oil exports and its imports have been ''significantly reduced.''

The European Community's top energy official today called ''totally unjustified'' the recent sharp hikes in oil prices. The official warned the oil and gas industries that their recent practices could threaten their future relationships with governments.

The space shuttle Discovery has been given a green light for launch on October 6th. Discovery's four-day high-profile mission will be NASA's first shuttle flight in five months. Its five-man crew will fire a European probe over the poles of the sun.

Soviet President Gorbachev already has turned the Soviet Union topsy turvy with reforms... now he's proposing a new name for it. His suggestion- the Union of Sovereign Socialist States.

New York City police say a 13-year-old girl sitting on a bench in Brooklyn with a friend was shot in the head and slightly wounded last night. She was the fourth child hit by gunfire in the city in as many days.

Surgeon General Antonia Novello says quitting smoking is the ''single most important step'' smokers can take to live longer, with those who stop before age 50 cutting in half the risk of dying in the next 15 years. .

Researchers report in the Journal of the American Medical Association that people who have smoked at some time in their lives are more likely to have suffered a period of depression than non-smokers.

-30- 2564

#90268u1956 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - House members angrily accused the administration Tuesday of failing to warn Americans of the impending Iraqi occupation of Kuwait or prepare for their evacuation from those countries before the Aug. 2 invasion.

''This government let American citizens down,'' Rep. Robert Torricelli, D-N.J. said heatedly. ''It is the responsibility of this Congress not to let it happen again.''

''This administration blew it badly when it came to doping out from the beginning what was happening in that region,'' shouted Rep. Larry Smith, D-Fla.

House Foreign Affairs Committee members focused their arguments on a failure by the State Department to warn the 2,500 U.S. citizens in Kuwait and the 580

in Iraq that Iraqi forces were about to invade the Persian Gulf emirate, even though Baghdad's massing of troops on the desert border was well known.

The State Department did not issue an advisory warning against travel to Iraq or Kuwait until Iraqi D-Day Aug. 2. Some committee members said the advisory should have been issued earlier.

Elizabeth Tamposi, the assistant secretary of state for consular affairs, cooly defended the State Department's policy of not issuing a travel advisory until after the invasion and relying on assurances from Iraqi President Saddam Hussein afterwards that U.S. citizens will be permitted to leave both countries.

She said privately later that the congressmen expected the administration to have predicted that Saddam would invade Kuwait, a prediction she suggested could not be made.

Tamposi's testimony came two days after the final evacuation flight from Kuwait and Iraq, from where 1,900 trapped American women and children and other members of their families have been airlifted to freedom aboard nine U.S.-chartered Iraqi Airways flights since Sept. 7.

Another 600 to 700 Americans remain in Kuwait and between 300 and 350 in Iraq, including 69 people with medical problems.

She said Iraqi authorities have ''given us callous, vicious responses'' to U.S. requests for help for those 69.

''To be frank, the outlook is not good,'' Tamposi said of the American men left behind.

Since the invasion, Tamposi said, more than 540,000 people fled to Jordan from Iraq, about 40,000 have crossed from Iraq into Turkey, up to 70,000 have entered Syria from Iraq, more than 20,000 crossed into Iran from Iraq, and ''well over'' 240,000 people have fled Kuwait to Saudi Arabia and other gulf states.

Smith, his voice rising, charged that holding of Americans as hostages ''was an avoidable situation'' because the government ''did nothing - zero - to protect the lives and the safety of Americans'' in Kuwait before the invasion.

U.S. citizens were not warned or evacuated before the Iraqi move, Tamposi said because the ''prevailing consensus (among State Department policy-makers) was that there would not be an invasion.''

She said policy-makers thought the Iraqi buildup along the border ''didn't pose a threat to any Americans'' in Kuwait. ''From what they understood, we did what we thought was the right thing to do.''

Tamposi is an administrator and does not formulate policy.

Many experts in and out government said before the invasion that Saddam merely was rattling sabres by threatening to take over Kuwait unless the sheikdom forgave tens of billions of dollars of Baghdad's debts from the 8-year Iran-Iraq war.

Torricelli angrily charged that there were ''severe lapses of judgment. ... Any senior official of the State Department had a basic responsibility to issue an alarm. There is no senior official of the State Department who ultimately will escape responsibility. There is a judgment that is coming.

''It is too late, tragically, to do anything for them (the hostages) now. Those responsible should be held accountable.''

He said in the corridor afterwards there would be a ''political price to be paid for their poor judgment.''

Eni Faleomavaega, the congressional delegate from American Samoa, asked Tamposi for an accounting of Iraqi citizens in the United States.

He said afterwards that he wasn't suggesting a roundup of Iraqis, ''but we want to make sure they're here for a good reason'' and are not spies. ''We want to keep track of them.''

-30- 4527

#90268u1959 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - The dollar ended mostly higher Tuesday in New York, moving up against the West German mark but easing against the Japanese yen in a currency market dominated by mark-yen cross-trading.

The dollar was quoted at 1.5725 marks vs. 1.5590 Monday and at 136.75 yen vs.137.50.

Moving the market was a comment by a West German official at a meeting of the the International Monetary Fund that the yen should be stronger against the deutsche mark, said Francoise Soares-Kemp, Credit Suisse vice president.

''Presto. That was enough to get people going,'' Soares-Kemp said. ''That saw the market bid up the yen against the mark, and the dollar moved up against the mark.''

The dollar also found support in the market's perception of a deterioration in the Middle East situation, analysts said.

There was sentiment in the market that the United States is less vulnerable,

because it has its own oil supplies, than Japan and Europe would be if Persian Gulf oil fields and facilities are bombed, analysts said.

The market largely ignored the government's final report on the nation's second-quarter gross national product because the downward revision was not unexpected, analysts said.

The Commerce Department said GNP inched up only 0.4 percent in the second quarter. In its previous estimate, the government reported a 1.2 percent increase.

The British pound closed at $1.8680, down from $1.8810 Monday.

Other New York dollar rates: 1.3075 Swiss francs, up from 1.2975; 5.2645 French francs, up from 5.22; and 1,176.50 Italian lire, up from 1,166.50.

In Europe, the dollar closed mixed against major currencies in directionless trading, as markets awaited fresh developments in the Persian Gulf, analysts said.

Dealers blamed the lackluster trading on a slowing in oil price rises and news of the Federal Reserve possibly intervening to buy dollars to prop up the U.S. unit, as well as the lack of any major developments in the Middle East crisis.

In London, the pound dropped against the dollar, closing at $1.8750 vs. $1.8825 Monday.

The dollar closed slightly higher in Frankfurt at 1.5625 marks vs. Monday's 1.5590 but was marginally lower in Zurich at 1.2975 Swiss francs vs. 1.3040.

The dollar slipped in Paris and Brussels, to 5.2200 French francs vs. 5.2340and 32.09 Belgian francs vs. 32.23, respectively. But the dollar closed higher in Milan at 1,167.25 Italian lire vs. 1,167.20 Monday.

In Tokyo, the dollar gained against the yen on market perceptions the Group of Seven leading industrial nations had endorsed a weaker U.S. unit.

The dollar closed at 136.70 yen against Friday's close of 137.33. Japanese markets were closed Monday for a national holiday.

Gold closed sharply higher at $405.50 an ounce from $392.50 in Zurich and was also higher in London at $404.25 an ounce from $396.

Republic National Bank in New York closed cash gold at $402.50 an ounce vs. from $403 Monday. The New York Commodity Exchange settled contract gold at $404.40 an ounce, ahead from $403.

Gold buying was sparked by recent oil price increases, bullion traders said.

Silver was higher in both Zurich, at $4.90 an ounce from $4.85, and in London at $4.89 from $4.88 Monday.

Republic closed cash silver at $4.86 an ounce, off from $4.935. Comex silver ended trading at $4.834 an ounce, off from $4.915.

#90268u1965 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - Stocks closed sharply higher Tuesday in moderate trading but the rally was confined to the Dow industrials, which were boosted by bargain-hunting after Monday's plunge.

The Dow Jones industrial average, which sank 59.41 Monday to a 14- month low, jumped 32.67 to close at 2485.64.

Among broad market gauges, the New York Stock Exchange composite index rose 1.69 to 169.20 and Standard & Poor's 500-stock index jumped 3.67 to 308.26. The price of an average share gained 29 cents.

Advances barely led declines 767-744 among the 1,977 issues crossing the NYSE tape. Volume was 155,940,000 shares, down from 162,210,000 traded Monday.

Analysts said that with the Dow industrials at their lowest levels since July 1989, investors saw an opportunity to snap up some bargains, and did so, but only in blue chip issues.

''They're the ones that have been battered over this last bit of sell-off,'' said Sidney Dorr, vice president of institutional equity trading at Charles Schwab & Co. in San Francisco. ''So it was bargain hunting, but not with any incredible conviction.''

Dorr said investors seeking to commit money to the market now ''want to be exposed to any advance but want the most liquid situation,'' which would attract them to the blue chips, the large capitalization issues.

Earlier in the afternoon, some analysts attributed the advance to word that the House Appropriation Committee had approved a bill to delay the automatic Gramm-Rudman spending cuts and fund the government through Oct. 20. That, they said, fostered new hopes of an agreement and sent the Dow up sharply.

But just before the close, President Bush was quoted as saying he would veto any legislation to suspend the Gramm-Rudman deficit reduction law.

''I think they want to see things done this week,'' Dorr said.

Stocks opened higher Tuesday, but the early rally ran out of steam. By the

afternoon, however, the Dow industrials extended their advance once again but losing and gaining issues in the broad market were just about even.

The renewed advance in the Dow came as oil prices eased from Monday's surge. November oil futures closed down 72 cents at $37.53 a barrel.

Analysts were especially encouraged by the action Tuesday since many expected to see a further sell-off after Monday's tumble, especially with a lot of nervousness in the market over the events in the Mideast.

In that arena, oil prices backed off slightly after closing in on $40 a barrel Monday with the U.N. Security Council set to vote late Tuesday on a resolution which would tighten sanctions against Iraq with an air traffic embargo, further punishing Baghdad for its Aug. 2 invasion of Kuwait during an oil and border dispute.

U.N. diplomats said the air embargo would almost certainly be approved because the five permanent members of the council - the Soviet Union, the United States, China, France and Britain - have agreed on the resolution.

On the trading floor, MCA was the most active issue, catapulting 19 1/2 to 54 after confirming it was holding acquisition talks, following a report that Japan's Matsushita Electric Industrial Co. may buy the entertainment giant for up to $7.5 billion.

Philip Morris followed, up 1 to 44 7/8. Paramount Communications was third, surging 3 3/8 to 34 7/8, apparently benefiting from the news of takeover talks in the entertainment industry.

Chase Manhattan was also active, rebounding 7/8 to 12 after its recent pounding tied to news of a massive restructuring.

Among the other blue chips, AT&T rose 1 to 31 3/4, IBM added 1 3/8 to 106 3/8, General Electric gained 1 1/8 to 55 5/8, Coca-Cola added 1 to 39 1/4, and Merck jumped 1 3/4 to 75 1/4. Elsewhere, Chrysler lost 1/4 to 10 1/8, a 52-week low, eclipsing the old mark of 10 1/4. Analysts were said to cut earnings estimates and reiterate negative ratings on the auto giant, saying that because of its industry position, it must undercut Ford and General Motors to compete.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 186,453,250 shares, compared with 194,231,810 shares traded Monday.

Prices were mixed in moderate trading on the American Stock Exchange.

The Amex Market Value index rose 0.33 to 313.17. Declines led advances 287-238 among the 782 issues traded. The price of an average share added 1 cent.

Composite volume was 14,807,100 shares vs. 15,968, 100 traded Monday.

B.A.T Industries led the Amex issues, down 1/16 to 9 5/8.

The National Association of Securities Dealers composite index eased 2.62 to 354.78.

#90268u1998 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - President Bush announced Tuesday the creation of a U.S.-led multinational group to coordinate and disburse financial resources to countries ''rocked'' by rising oil prices and tension in the Middle East.

Since Iraq's Aug. 2 invasion of Kuwait, and the subsequent military response and U.N. economic sanctions, oil prices have doubled and are now approaching $40 a barrel.

''Serious challenges have emerged for countries rocked by unpredictable tides in the flow of oil, trade, displaced workers and refugees,'' Bush said in an address during the annual meeting of the International Monetary Fund and World Bank.

Under the weight of rising oil prices, the world economy is forecast to slow this year after seven years of expansion.

''We are determined not to allow the brutal behavior of one aggressor to undermine the historic process of democratic change or to derail the movement towards market-oriented economic systems,'' Bush said.

Bush said the new Gulf Crisis Financial Coordination Group was created to achieve ''effective, timely and sustained financial support'' to the countries most affected by the crisis, including the front-line nations of Egypt, Turkey and Jordan.

The group will be chaired by Treasury Secretary Nicholas Brady and members will include finance ministers and government officials from donor countries who will strive to ''transform commitments into concrete contributions,'' Bush said.

The White House said commitments of roughly $20 billion in economic assistance have been made since the invasion of Kuwait.

The coordinating group will include representatives from the United States, Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Germany, the United Kingdom, Italy, France, Japan, Canada, the European Community and Korea.

The IMF and World Bank will provide the group with technical advice and analytical support.

Bush also said he supports the IMF quota increase and the strengthening of the IMF arrears policy. Although quotas and arrears have been debated by the bankers, the Persian Gulf crisis has dominated nearly a week of sessions leading to the IMF-World Bank annual meeting.

During a series of high-level meetings over the weekend and Monday, the powerful interim and development committees of the IMF and World Bank agreed to expedite efforts to provide financial assistance to countries hurt by rising oil prices.

''No one can predict how deep and lasting the effects of this crisis will be, but forceful measures now will forestall greater problems later,'' said World Bank President Barber Conable.

''Prompt actions by governments of affected countries and by the international community are necessary,'' he said.

Opening the annual meeting, George Saitoti, chairman of the board of governors for the international lending institutions, stressed that the institutions should not ''overreact'' to the oil crisis, but should give ''special attention'' to countries most severely affected, including some of the world's least developed nations and those of Eastern Europe.

''Common sense suggests that we should be prudent about extending such financing to countries that might experience difficulties in servicing such new debt,'' he said.

Michel Camdessus, IMF managing director, called for greater economic cooperation among nations.

''Our collective response to the present crisis will produce only short-lived benefits, however, unless it is accompanied by an unflinching resolve by members, particularly the major industrial countries, to maintain sound economic policies,'' he said.

Camdessus warned central banks against easing monetary policy to offset the adverse impact of rising oil prices, saying such a move ''would yield neither

an enduring reduction in interest rates nor a lasting improvement in employment.''

Instead, he urged the central banks to calm the world's jittery financial markets by sending ''clear and credible signals that the authorities are determined to reduce inflation.''

#90268u2026 09/25/1990 ~United Press International

UNITED NATIONS (SEPT. 25) UPI - The U.N. Security Council ordered Tuesday an air traffic embargo on Iraq in retaliation for its invasion of Kuwait, allowing governments to ground aircraft or deny the overflight of their territories to planes suspected of carrying goods to the two gulf countries.

The new measure was aimed at tightening U.N. sanctions against Iraq, which has defied the world body for seven weeks. The resolution was approved on a 14 to 1 vote with Cuba voting against.

Iraqi troops invaded Kuwait Aug. 2, declared the small emirate one of its provinces and rounded up at least 20,000 Westerners to serve as human shields in case the U.S.-led multinational force in the Persian Gulf attacks Iraqi targets.

The 15-nation council meeting was attended by 13 foreign ministers and two ambassadors. The ministers included Eduard Shevardnadze of the Soviet Union, who was presiding over the meeting, Secretary of State James Baker, Douglas Hurd of Britain, Roland Dumas of France, Joe Clark of Canada and Pertti Kullervo Paasio of Finland.

In the resolution, the council particularly reminded governments participating in the embargo to act in accordance with international law such as the 1944 Chicago Convention, which protects the safety of airline passengers.

The convention, updated with a protocol in May, 1984, forbids the use of force to intercept civilian airlines and protects lives on board and the safety of the aircraft.

The protocol was written after the downing of Korean Airline Flight 007 by a Soviet MiG jet fighter Sept. 1, 1983, which killed a total of 269 passengers and crew members over the northern Japan Sea.

The council said planes should be denied takeoff permission if they carry cargo to or from Iraq or occupied Kuwait other than medical supplies or food for humanitarian purposes, which are allowed by the council.

Governments should deny overfly of their territorial space to planes destined to land in Iraq or Kuwait, whatever their nationalities or registration,

unless they submitted themselves to inspection at airports designated by thosestates outside of Iraq or Kuwait.

The council allowed governments to detain the planes ''as long as necessary'' for the purpose of verifying whether there is any cargo onboard that violated the U.N. trade and arms embargo imposed on Iraq Aug. 6, four days after Iraqi troops occupied Kuwait.

The council permitted states to detain ships of Iraqi registry entering their ports and which have been used in violation of U.N. sanctions. States can deny entrance to their ports to those ships except under circumstances to safeguard human life.

#90268u2030 09/25/1990 ~United Press International

(SEPT. 25) UPI - Saddam Hussein is steadily moving more troops into Kuwait and southern Iraq. The Pentagon says the number of Iraqi forces in the area has increased to 430-thousand, 70-thousand more than a week ago. Defense Department officials, however, concede that they have expanded the geographic area they are using in their Iraqi troop estimates. Two weeks ago, the Pentagon said there were 265-thousand Iraqi troops in Kuwait and southern Iraq. .

Also today, senior Pentagon officials reveal that there are between 500 and one-thousand Soviet military advisers and technicians in Iraq. The officials say many of the advisers are involved in maintenance on Soviet-built bombers and fighters. The figure differs significantly from the 150 to 160 military advisers mentioned recently by Soviet President Gorbachev and his foreign minister.

In Denver, a former executive of the Silverado Banking, Savings and Loan Association today questioned a 900-thousand-dollar credit line the failed thrift extended to a Denver developer who had ties to Neil Bush. Russell Murray, the bank's one-time chief lending officer, said the credit line may have been inappropriate. But he says he didn't know all the facts about the relationship between President Bush's 35-year-old son and the developer before acting on the request.

The Israeli army has resumed bulldozing homes in a Palestinian refugee camp in the occupied Gaza Strip, where a reserve soldier was burned to death last week. Six bulldozers destroyed 16 homes in the camp in one of the largest mass demolitions of Arab buildings since the start of the Palestinian uprising. Palestinian sources say the residents or owners of 38 shops and homes have received demolition orders.

A defiant European Community agriculture chief says he won't modify his proposal on farm subsidies, despite U-S warnings that world trade talks could

collapse. The proposal by Ray MacSharry for trade- liberalization talks in the General Agreement on Tariffs and Trade would cut farm supports by 30 percent over a 10-year period beginning in 1986. The United States will propose slashing subsidies by 70 percent over 10 years, beginning in 1991.

-30- 2359

#90268u2038 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - The federally subsidized crop insurance program, schedule for a shutdown by the House, got a vote of confidence Tuesday when the Senate voted to fully fund the program for the coming year.

The future of the money-losing program has been in doubt since the start of the year when the Bush administration proposed its termination this fall. The replacement would be a stand-by program for disaster- relief paymments.

Farm-state congressmen prefer the idea of reforming crop insurance, which has swallowed an average annual subsidy of $500 million during the past decade, but have been unable to agree on how to do it.

The administration has said it will continue to operate the program as usual unless Congress either changes it or replaces it.

Senators voted to supply full funding to the Federal Crop Insurance Corp. as part of the $51.16 billion agriculture appropriations bill for fiscal 1991. The bill passed 79-19, setting up the need for a House- Senate conference committee to write a compromise version.

The appropriations bill approved by the Senate would remove the limit on spending under the Export Enhancement Program - the major U.S. export subsidy program - and the Targeted Export Assistance program. The House has voted for a $500 million limit on the EEP in fiscal 1991 and a $200 million lid on the TEA. The administration asked for $900 million for the EEP.

Each bill devotes more than half its spending to public feeding programs, such as food stamps, the Women, Infants and Children program, and school lunches. The Senate bill would allot $17.25 billion for food stamps, up $2.48 billion from this year, and $2.35 billion for WIC, up $224 million.

Overall, the Senate would spend $815 million more than the House, but still $1.5 billion less than the administration requested. Congress appropriated $45.2 billion for the Agriculture Department and related agencies for this fiscal year.

The House voted July 18 to give the FCIC only enough money in fiscal 1991 to cover policies sold by the end of fiscal 1990 - Sunday. Under that plan, no other policies would be sold until the program was reformed.

The Senate bill would give the FCIC a total of $325.8 million for the new year or $224 million more than the House allotted. It also earmarked $174 million more than the House to pay the cost of subsidizing the premiums paid by farmers who buy crop insurance.

As part of work on the new farm policy law, the Senate adopted a package that calls for more realistic insurance rates, offering coverage over a broader area and requiring private insurance companies to bear more of the risk on policies.

Despite recent upturns in enrollment, farmer participation has been lower than expected. The White House has argued the government cannot afford to offer crop insurance and the special disaster-relief programs enacted after widespread crop failures.

The Senate bill agrees with the House in trying to eliminate funding for agricultural trade missions. Congress appropriated $197,000 for that purpose this year.

#90268u2056 09/25/1990 ~United Press International

(SEPT. 25) UPI - In a roller coaster day of trading, U.S. crude oil prices dropped nearly $1 a barrel Tuesday and products fell more than 2 cents a gallon in what was seen as a technical correction to the prior day's sharp increases.

On the European spot market, where crude barrels are bought and sold for cash, North Sea Brent ended the day down 45 cents to $39.95 a barrel after trading at midday at $40.70 a barrel.

Brent had ended Monday at $40.40 a barrel, the first time in a decade that crude had traded on any world market over $40 a barrel.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for November delivery fell 72 cents below Monday's close to $37.53 a barrel after trading as high as $38.90 a barrel.

The Merc, the world's largest exchange for oil future delivery contracts, opened down 95 cents from Monday's $38.25 close.

It then rallied around midday when Soviet Foreign Minister Eduard Shevardnadze in a U.N. speech denounced Iraq's Aug. 2 invasion of Kuwait and warned that war could break out ''any day any moment.'' Prices then fell toward the Merc's close.

''There was a general feeling that the market needed more of a correction,'' said Ed Kevelson of Dean Witter Reynolds' International Energy Futures Group in New York.

The U.N. Security Council was scheduled to vote late Tuesday on whether to expand to air cargos the Aug. 6 U.N. embargo on Iraqi and Kuwaiti exports. It was expected to approve expansion.

''If they don't vote to expand, I think you'll see (WTI) $35 a barrel tomorrow. If they do, I think you'll see $40 a barrel,'' Kevelson said.

The Pentagon estimated that Iraq was losing about $100 million a day in oil revenue and said the U.N. embargo on shipping had ''proven very effective.''

It also said Iraqi military forces in Kuwait and southern Iraq had increased by about a third in the past week to 430,000 troops.

Tom Bentz, director of trading at United Energy Inc. in New York, noted there also was some ''catching up'' on the Merc by the so-called ''back-month'' December, January, etc. delivery contracts, which were held to the Merc's $1.50 increase limit Monday.

The WTI December and January delivery contracts Tuesday rose $1.25 and $1.10 a barrel respectively.

Bentz said downward movement of the November crude price also was helped by pressure from heating oil and unleaded gasoline.

On the Merc, unleaded gasoline for October delivery ended the day down 2.18 cents to $1.0205 a gallon after trading as high as $1.045 a gallon earlier.

October home heating oil fell 2.72 cents to $1.012 a gallon, nearly 4 cents

lower that its $1.05 a gallon high for the day.

As with WTI crude, the back month delivery contracts rose considerably - ''catching up'' for being limited by exchange rules to increases of 4 cents a gallon Monday when the spot-month October contracts shot up almost 7 cents a gallon.

Traders were expecting the weekly American Petroleum Institute inventory survey to show that heating oil stocks rose 1-3 million barrels last week and those of unleaded gasoline 500,000 to 1.5 million barrels, Bentz said.

Released after the Merc closed, the API reported heating oil supplies actually rose 2.1 million barrels to 136.5 million barrels, while inventories of gasoline jumped 5.3 million barrels to 222.3 million barrels.

Whether or not the API statistics have any effect on Wednesday's market depends on what happens in the Persian Gulf crisis, whose events have been ruling world oil markets since the Iraqi invasion.

The United Arab Emirates' Dubai Light, the key Middle East crude shipped mainly to the Far East, lost 45 cents to $33.40 a barrel on the European spot market.

On the U.S. Gulf Coast spot market, prompt delivery WTI dropped 80 cents to $38.25 a barrel.

Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., lowered its posted price paid for crude oil at the wellhead by 75 cents to $36.25 a barrel for WTI.

Antonio Cardoso e Cunha, energy commissioner of the European Economic Community in Brussels, said the recent sharp increases in oil prices were the ''totally unjustified and indefensible'' result of speculation at the consumers' expense.

He warned industry that its ''futures relationships with governments'' could be threatened by recent practices.

(SEPT. 25) UPI - An early-autumn cold snap chilled 20 Southern cities with record low temperatures Tuesday, while a Western warmup brought Indian summer the Plains.

Early morning lows dipped into the 40s and 50s in seven Southern states, and the mercury dropped into the 30s in a few areas, the National Weather Service said.

Record lows were set in Florida, Georgia, Alabama, Mississippi, Louisiana, South Carolina and North Carolina.

Lewisburg, W.Va. recorded the nation's low temperature, 31 degrees, but the reading did not break a record.

Temperatures in the 70s and 80s were common across the Plains, climbing to the 90s in some places.

Concordia, Kan., basked in record 93-degree warmth, and record highs also were reached in Nebraska, Wyoming and North Dakota.

Elsewhere, flood waters receded in southwest Texas as clear skies and cool temperatures covered the region where roads had been closed Monday following weekend storms.

Rainshowers and occasional thunderstorms reached from southwest Oregon across northern California. Rain also fell from central Louisiana into Mississippi and along the southwest and east central coasts of Florida. Showers were scattered over western New York and lower Michigan.

-30- 1392

#90268u2120 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - House Republican leader Robert Michel of Illinois said Tuesday the Bush administration is ''exploring some options that border on'' dropping its long-standing insistence on a cut in the capital gains tax.

Such a move could be the key to breaking a months-long impasse at White House and congressional budget talks that began May 15.

It could also clear the way for passage of a budget plan that would prevent the imposition of steep, automatic spending cuts of up to $105.7 billion on Oct. 1 under the Gramm-Rudman balanced budget law.

Talking to reporters before he entered the latest round of negotiations Tuesday evening, Michel said he feels ''the price is too steep'' for inclusion of a capital gains tax cut plan in the $500 billion, five-year deficit reduction plan negotiators hope to achieve.

''There will be a price to be paid if you want to continue to insist on it (capital gains) and, in my opinion, the doggone price is too steep,'' Michel said.

He said that ''I still take my lead from the administration'' on the divisive issue that has helped produce an impasse at the talks. But he appeared tired of continuing to fight the capital gains battle.

Michel said the price for capital gains is too high both in terms of Democratic demands that any capital gains reduction be accompanied by an income tax rate increase on the wealthy and in terms of the public relations beating the GOP has taken in recent weeks for pushing a tax break seen as helping the rich.

''It's a combination,'' Michel said when asked what the steep price was.

Asked if the administration might drop its call to include a capital gains cut in the budget package, Michel said, ''We're not in that position yet.''

But, he said, ''They're exploring some options that border on it.''

And he said he believes the administration is prepared to back off ''from the original position'' for a large capital gains cut.

He said a budget agreement ''really could'' be made late Tuesday night or early Wednesday morning.

Asked whether the administration was prepared to drop capital gains, budget director Richard Darman told reporters, ''That's not really the fundamental issue at the moment.''

''The problem that we've been working on the last several days is seeing if there can be an agreement to cut enough spending in this overall package,'' Darman said.

Earlier, at the White House, President Bush vowed to veto any temporary spending bill that delays until Oct. 20 imposition of severe Gramm-Rudman law spending cuts.

Bush's comments came after the House Appropriations Committee, on a mostly party-line vote, approved a temporary spending bill that provides money to keep the government operating at current levels until Oct. 20.

Bush's signature on a temporary spending bill - called a continuing resolution - would be needed before Oct. 1 because Congress has not yet passed and sent to Bush any of the 13 appropriations bills needed to fund government spending for the 1991 fiscal year that begins on Monday.

What really angered Bush about the Appropriations Committee vote was that the panel's also included a provision suspending until Oct. 20 the Gramm-Rudman cuts.

''I will veto any continuing resolution that suspends Gramm-Rudman and budget discipline and thereby destroys our best chance of bringing this deficit under control once and for all,'' Bush told reporters on the south lawn.

At about the same time Bush was speaking, the House Rules Committee cleared the way for the controversial spending measure to come to the House floor either Wednesday or later in the week.

#90268u2164 09/25/1990 ~United Press International

(SEPT. 25) UPI - In Washington today, Iraq's ambassador delivered Saddam Hussein's videotaped response to President Bush's televised message to the Iraqi people last week. Major television networks say they will screen the tape and broadcast excerpts of it. The tape's arrival came as the U-N Security Council adopted a resolution calling for an air traffic embargo on Iraq.

Soviet Foreign Minister Eduard Shevardnadze today called on Iraq's Saddam Hussein to listen to reason and get out of Kuwait. In a speech to the U-N General Assembly, Shevardnadze said the Iraqi military occupation of Kuwait was an ''act of terrorism.'' He said unless something is done, ''civilization will be thrown back by half a century.''

The president of Turkey was at the White House today for talks with President Bush. An administration official says President Turgut Ozal told Bush that Iraq's military might has been ''somewhat exaggerated,'' but warned it will be tough for Baghdad to back down. Bush, backed by the United Nations, has demanded Iraq's unconditional withdrawal from Kuwait.

Soviet President Gorbachev today called Russian writer Alexander Solzhenitsyn ''a great man,'' but said his ideas are destructive and that he ''belongs to the past.'' Writing last week from abroad for two Soviet newspapers... Solzhenitsyn said the Soviet Union should divest itself and consist of only three Slavic republics. Gorbachev said those views ''are far away from reality.''

#90268u2165 09/25/1990 ~United Press International

(SEPT. 25) UPI - South African President F-W de Klerk says apartheid is NO longer an issue in his country. In a speech to the National Press Club in Washington, de Klerk says apartheid is ''only kept alive by those who now have a vested interest in keeping it alive.'' And he vowed that the racial reforms under way in South Africa will eliminate the rationale for U-S economic sanctions.

The Senate today ratified two nuclear test-ban limits signed with the Soviet Union in the mid 1970's. The United States and the Soviet Union have been observing the treaties. But senators opposed the treaties until protocols signed in June allowed on-site verification. The two treaties limit underground nuclear tests to 150 kilotons.

Scientists say that after a rough start... the Magellan probe is giving a ''revolutionary'' view of Venus. Project workers UNveiled a brief but dramatic movie made with Magellan data simulating a 12-mile- high flight above the tortured terrain. Photos show numerous volcanic craters, Los Angeles-sized impact craters, and large regions of cracked land covered in places by lava.

Residents in and around Savannah, Goergia, plan to send a batch of brownies to the U-S troops in Saudi Arabia... 120-thousand brownies, to be exact. More than one-thousand locals will gather in 30 kitchens around Chatham County for Bake Day next month. The brownies will then be flown to the 24th Infantry Mechanized Division's 18-thousand troops. The recipe includes plenty of eggs and chocolate... but is designed to withstand desert conditions.

-30- 1722

#90268u2170 09/25/1990 ~United Press International

BOSTON (SEPT. 25) UPI - Gov. Michael S. Dukakis announced another $310 million in state spending cuts Tuesday that will include elimination of entire human service programs in order to preserve the state's credit rating, already the nation's worst.

Dukakis said the new reductions - which are in addition to $419 million in cuts ordered previously this fiscal year - are necessary for the state to cope with still-declining revenues and to clear the way for a massive bond sale within the next 10 days to cover last year's budget deficit.

In the last year, the state has cut more than $1 billion in spending and eliminated more than 9,000 jobs. The new round of cuts will reduce the state budget to $13.39 billion for the fiscal year that began July 1.

''We understand perhaps better than any other state in the country, that if we're going to preserve our credit rating so that we can continue to have access to the financial markets, that we have got to be ahead of this problem and not behind it,'' said Dukakis, the 1988 Democratic presidential nominee.

Dukakis blamed the state's continuing fiscal woes on eroding consumer confidence in the economy, a deteriorating national economy and the Persian Gulf crisis, which has driven the price of crude oil to near record levels on the world market.

The announcement came as the Wall Street bond rating firm of Standard and Poors issued a bulletin reaffirming the state's BBB rating, the lowest state bond rating in the nation.

State Administration and Finance Secretary L. Edward Lashman said the state initially planned to sell $1.3 billion in bonds in two rounds this fiscal year to cover its debts, but he said the administration is now considering selling

the entire amount in the next 10 days.

Dukakis said he ''hoped'' that this was the last round of cuts he would have to make, but said the economy was so unstable he could not rule out further reductions.

House Ways and Means Committee Chairman Richard Voke agreed. ''This could get a lot worse,'' he said.

Among the ordered cuts are:

-Elimination of the entire remaining $2.4 million for the state contribution for the federal program that helps poor people pay for home heating oil.

-Elimination of $2.3 million for support services for residents of housing projects.

-Elimination of General Relief and medical benefits for those over 45 years old who have no work history for an $10.5 million savings.

-Extending the waiting period for disability applicants from 30 to 60 days for a savings of $11.9 million.

#90268u2172 09/25/1990 ~United Press International

MIAMI (SEPT. 25) UPI - Passengers on board Eastern Airlines jets will soon be able to reach out and touch someone from any row on the plane, under an agreement announced Tuesday by the struggling carrier and GTE Airfone.

GTE Airfone of Oak Brook, Ill., will install telephones in each seat row aboard Eastern's fleet of 150 or so jetliners, the companies said.

Eastern said first-class fliers will each have their own phone. In coach, travelers will have to share one phone per row.

Terms of the agreement were not disclosed.

Eastern, which hopes to woo business travelers to fuel its ascent out of Chapter 11 bankruptcy, said in-flight telephones have become increasingly popular among fliers, especially business people.

The airline, which filed for bankruptcy in March 1989, recently said it will double the number of first-class seats available on its flights, and offer those seats at coach rates, in an effort to attract business travelers.

Eastern had said it would offer individual phones as a part of that service.

GTE Airfone, which began installing phones this month, said the installation should be complete by the middle of next year.

The telephones, which are mounted in the back of an airline seat, can be activated with most credit cards, or an AT&T calling card. The rates for domestic calls is $2 per minute, plus an initial $2 fee.

#90268u2181 09/25/1990 ~United Press International

CLEVELAND (SEPT. 25) UPI - The chairman of the American Stock Exchange said Tuesday he sees the formation during the 1990s of a world market in which the stock of 200 to 500 companies will be traded throughout the world, 24 hours a day.

''The 1990s will be the decade of global markets,'' James Jones said during the Midwest Investors Relations Conference. ''That's the thinking that guides our strategic planning at the American Stock Exchange. As I see it, the securities world is heading toward a three-tier market.''

Jones said the first tier would be the 200 to 500 companies widely known and involved throughout the world.

The second tier, he said, would be made up of companies that may not be as well known in every market, but who are heavily involved in exports and joint ventures in other countries.

''Helping them meet this goal,'' Jones said, ''will be stock markets around the world that are linked through joint ventures or perhaps even closer ties.''

He sees the third tier being made up of smaller companies trading primarily in one national market.

''As this global scenario unfolds, the most compelling development that holds our attention is what's happening in western Europe as it moves toward economic unity in 1992,'' Jones said. ''What you have there are 12 different trading systems and legal structures trying to mesh with one another.

''The manner in which that evolves will have a major impact on relations with other trading partners, such as the United States and Japan.''

The American Stock Exchange last week announced an agreement with the government of Hawaii to explore trading in Hawaii.

''We see it as an opportunity to get more involved in the Pacific Rim,'' Jones said. ''It may also offer opportunities to trade during those hours when other major markets around the world are closed.

#90268u2234 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - Attorneys for Michael Milken, awaiting sentencing on six felony charges, Tuesday asked a federal judge to sentence the former junk bond king to probation and community service.

Milken could fulfill a community service obligation by working full time in drug and crime prevention programs at the Los Angeles Police Department, his defense attorney, Arthur Liman, proposed in a sentencing memorandum submitted to U.S. District Court Judge Kimba Wood.

Milken, former head of the high-risk, high-yield bond department at Drexel Burnham Lambert Inc., pleaded guilty in April to six felony charges, including conspiracy and mail fraud.

By pleading guilty to the six felonies, he avoided the most serious charges of racketeering in the 98-count indictment, filed in 1989.

Milken, 44, is scheduled to be sentenced Oct. 1. He faces a maximum possible sentence of 28 years in prison.

As part of the plea agreement, he already has agreed to pay $600 million in fines and penalties and to cooperate with the government after his sentencing.

Prosecutors had been expected to unseal their pre-sentencing report in the case but, in late afternoon, they said the report would not be released until possibly Wednesday.

However, Milken's attorney released a response to the government report which provided indications of its contents.

The prosecutors' report accuses Milken of insider trading violations, but contains no evidence of his trading on non-public information, the attorney wrote.

The government report also said its faith in Milken's cooperation ''has waned'' and that the value of his cooperation with the government's investigation ''has been diminished by the passage of time, '' Milken's attorney wrote.

The government also referred to Milken as ''unapologetic,'' Liman wrote.

Prosecutors are seeking to have Milken punished for crimes he did not commit, Liman argued.

''If the government had wanted Mr. Milken sentenced for other crimes, it should not have entered into the plea agreement which it did,'' Milken's

attorney wrote.

In arguing for leniency, his attorney wrote that Milken ''is a changed person.''

''He will be tormented for the remainder of his life by the realization that his family was devastated, his reputation destroyed and his life's work tainted by virture of his having committed these acts,'' the memorandum said.

''Michael recognizes that he has made serious mistakes in his life,'' the memorandum said. ''All that he requests is that he be allowed to begin the process of making amends and repaying his acknowledged debt to society by community service, rather than by incarceration which provides no opportunity for societal benefit.''

Also under terms of his plea bargain, Milken, who pioneered the use of so-called junk bonds to finance corporate takeovers in the 1980s, is barred for life from the securities industry.

In the memorandum on Milken's behalf, his attorney also argued that Milken's case has served as a deterrent and has ''had a profound impact on the way that business is conducted on Wall Street.''

''Everyone in the securities business is now on his or her guard,'' the memorandum said.

The memorandum also quoted extensively from letters of support for Milken, ranging from his seventh-grade history teacher to Laurence Tisch, head of CBS.

#90268u2255 09/25/1990 ~United Press International

LONDON (SEPT. 25) UPI - George Foreman moved closer to another world title shot Tuesday night, knocking out journeyman Terry Anderson in the first round at the London Arena.

Foreman, former heavyweight champion, recorded his 69th win in 71 fights, stopping his fellow American with a right hand with seconds to go in the round. The punch did not appear to be particularly devastating, but it was too much for Anderson, who failed to answer the count.

''The guy walked into a straight right hand and my knuckles are still sore,'' said Foreman. ''He punched hard, he jabbed hard and he caught me in the stomach - but I didn't let on I was hurt.''

It was the 24th win in as many fights for Foreman since he made a comeback after 13 years in retirement. Anderson is 19-4.

Foreman, 42, is aiming for another shot at the world heavyweight title he won in 1973. He lost it in 1974 to Muhammad Ali in the ''Rumble in the Jungle'' in Zaire.

Foreman's wish is to meet the winner of the upcoming bout between reigning world heavyweight champion James ''Buster'' Douglas and fellow American Evander Holyfield.

''If Evander Holyfield wins we have a verbal agreement I'll be his first defense,'' said Foreman.

If Douglas wins, he must make a mandatory defense, and it is unlikely Foreman would surpass Mike Tyson as the top-ranked challenger. Douglas has promised Tyson a rematch under terms of a settlement with Tyson's advisor, Don King.

Foreman weighed in for the fight at 259 pounds. Anderson missed the midday scheduled weigh-in, but later tipped the scales at 237.

#90268u2269 09/25/1990 ~United Press International

(SEPT. 25) UPI - The surgeon general today proposed the one most important step that smokers can take to improve their life span- quit smoking. Surgeon General Antonia Novello says smokers who stop before age 50 can cut their risk of dying in half in the next 15 years. Novello also says pregnant mothers can eliminate the most important modifiable cause of birth problems by kicking the habit.

Violence erupted in New Delhi today following the death of a student who set himself ablaze to protest a controversial federal job quota program. Police say students rampaged through the southern part of the capital... torching dozens of vehicles and hurling stones at officers. The Press Trust of India says police opened fire on a mob trying to torch a bus and police cars, killing at least one man.

New York police said today two Canadian tourists who helped an elderly lady cross a Brooklyn street were attacked by youths who mistook the Good Samaritans for muggers. The tourists were helping the woman to her feet after she fell when they were surrounded by 10 to 12 teen-agers armed with pipes and baseball bats. The Canadians got away by car and were treated for cuts and bruises. Area merchants later gave the pair 100 dollars to replace their smashed car windows.

Under-age drinking and rowdiness outside the Yale Bowl has led officials in New Haven, Connecticut, to ban beer bashes and tailgate parties at the annual football game between Yale and the University of Connecticut. Despite the state's legal drinking age of 21, police say students commonly drink at fraternity tent parties in the parking lot outside the stadium. An anti-drunk

driving group hailed the decision to ban the parties before a tragedy occurs.

#90268u2273 09/25/1990 ~United Press International

PHILADELPHIA (SEPT. 25) UPI - The collapse of three facades on a century-old building that killed three people last week was caused by rotted wooden fasteners that the building's owners knew were unsafe, a city inspector said Tuesday.

Don Kligerman, head of the city's Department of Licenses and Inspections, said the owners of the historic building just blocks from Independence Hall knew the three facades were structurally unsound as recently as July but did not reveal that fact until three days after the Sept. 18 tragedy.

Three tourists were killed in the incident, including a woman from Spain who was on her honeymoon. Ten others were injured.

Kligerman said no charges were filed against the building's owner, Pennsylvania Manufacturers Corp., but added the matter has been referred to the city solicitor and the district attorney.

Kligerman said the building was unique because of the wooden anchors used to hold the facade in place.

He said the wooden anchors were installed when the facades were erected in 1945. Steel was not used to secure the facades because the metal was in short supply immediately following World War II, Kligerman said.

The building was constructed as a seven-story structure in 1890 and underwent two restructurings. The last restructuring was completed in the 1930s and brought the building down to a one-story structure.

In his 15-page report released Tuesday, Kligerman noted that Pennsylvania Manufacturers officials have said they were planning to take measures to repair the facades.

PMC spokesman James Campolongo said Tuesday the company was apprised of the need for repairs following an inspection by an engineering firm on Aug. 24. A day before the collapse, Campolongo said, contractors were at the site to make an assessment of needed repairs in order to submit a bid for the job.

''The owner (PMC) was never told, nor did the professional engineer and contractors ever believe that the facade presented any immediate danger to the public,'' Campolongo said.

Kligerman disagreed with Campolongo and said that if precautions had been taken, such as blocking off the sidewalk, ''the tragedy could have been

averted.''

#90268u2293 09/25/1990 ~United Press International
LOS ANGELES (SEPT. 25) UPI - A state Court of Appeal refused Tuesday to lower the $5 million bail set for Charles H. Keating Jr., the former Lincoln Savings & Loan chief accused of defrauding elderly investors out of more than $250 million in the sale of worthless junk bonds.

A three-judge panel of the 2nd District Court of Appeal gave no reason for turning down the petition.

The denial came on Keating's seventh day in County Jail on the $5 million bail. Keating, 66, the former operator of the failed Lincoln S&L in Irvine, Calif., says he is destitute and cannot post such a high bail.

His attorneys were not immediately available for comment, but were expected to appeal the decision to the California Supreme Court.

District Attorney Ira Reiner praised the ruling.

''We feel that the $5 million bail was the appropriate bail and we're glad that the court of appeal upheld it,'' Reiner said.

In their petition to the appellate court - technically a writ of habeas corpus - Keating's attorneys argued their client was being held under an excessive bail that violates provisions of the state and U.S. Constitutions.

''It (the bail) bears no relation to ensuring Keating's appearance at future proceedings,'' the appeal states. ''It is 50 times higher than bail set for other defendants faced with identical charges.''

Keating's lawyer, Stephen C. Neal, said his client's six children would provide most of the security for a reduced bail and that he would never flee and leave them with the debt.

''There is no risk of flight in this case,'' Neal said.

Superior Court Judge Gary Klausner set the $5 million bail last Tuesday, saying that Keating's legal troubles made him a candidate to flee prosecution.

A special grand jury indictment accuses Keating and three associates of 42 state securites fraud charges.

The four defendants are accused of bilking 23,000 investors, mostly elderly people, out of $250 million in the sale of now-worthless uninsured junk bonds.

The charges accuse the four of scheming to sell the junk bonds issued by Lincoln's parent company, American Continental Corp., without telling investors the bonds were high-risk and uninsured. Authorities say many of the victims lost their life savings.

The three co-defendants are Judy J. Wischer, 42, former president of American Continental, Robin S. Symes, 37, former Lincoln chief executive officer, and Ray C. Fidel, former Lincoln president.

Klausner initially bail for them at $1 million apiece.

In a bid to lower Keating's bail, Neal argued that Keating, who just three years ago estimated his wealth at nearly $40 million, is now $5.2 million in debt.

But on Friday, following a two-day bail reduction hearing, the judge refused to lower Keating's bail.

However, the judge lowered Wischer's bail to $200,000 and bail for Symes and Fidel to $100,000 apiece. The three posted their bails Friday evening and early Saturday and were released.

The four defendants are scheduled to return to court Oct. 5 to enter pleas. If convicted, they could be sentenced to 10 years in state prison.

#90268u2305 09/25/1990 ~United Press International

NEW YORK (SEPT. 25) UPI - The U.S. commodities-trading watchdog agency Tuesday charged three traders on New York's Commodity Exchange with cheating and defrauding customers and said more charges were coming as part of an investigation.

The Commodity Futures Trading Commission in Washington alleged that Stanley B. Bell & Co., and the New York brokerage's Craig Bell of Muttontown, N.Y. with anti-competitive trading practices.

''The essence of the allegations is that Bell cheated and defrauded customers '' said Dennis Klejna, commission director of enforcement.

Mark Dickstein and George J. Fox, Jr., both of New York City, are charged with aiding and abetting the brokerage in its fraudulent practices, he said.

The charges were filed with a commission administrative law judge by his enforcement division, Klejna said. Any finding by the judge can be appealed to the commission and then to a Federal Court of Appeals.

The allegations are the latest growing out of a commisison civil and criminal

investigation into fraudulent trading practices at the Comex and other New York commodity trading exchanges.

''We would expect that there will be additional enforcement actions as a result of that investigation,'' Klejna said.

In a separate action, Shearson Lehman Hutton Brothers agreed to pay the commission $220,000 in settlement of allegations the firm violated regulations in trading frozen orange futures.

NEW YORK (SEPT. 25) UPI - Moody's Investor Service said Tuesday it downgraded ratings on Chase Manhattan Corp.'s long-term debt and commercial paper and on selected ratings of the troubled bank holding company's subsidiaries.

The latests in a series of downgrades ordered by debt-rating agencies came after Chase announced plans last week to lay off 5,000 employees, take a $625 million third-quarter loss and cut the company's quarterly dividend to 30 cents a share from 62 cents.

Chase, the No. 2 bank holding company in the U.S. after Citicorp, is the parent of Chase Manhattan Bank.

Moody's, which lowered ratings on about $8.4 billion of long-term debt Tuesday said the company's drastic steps to shore up its financial position were ''motivated by the continuing growth in Chase's nonperforming real estate assets.''

Chase ratings downgraded by Moody's were: senior debt, to Baa3 from Baa2; subordinated debt, to Ba2 from Baa3; preferred stock, to Ba2 from Baa3; and commercial paper, to Prime-3 from Prime-2.

#90268u2337 09/25/1990 ~United Press International

PHILADELPHIA (SEPT. 25) UPI - A convicted drug dealer Tuesday became the city's first woman to receive a life prison sentence under tough new federal drug legislation.

Myrna Suren, 42, wept and screamed for several minutes after the sentence was announced by U.S. District Judge Herbert J. Hutton.

Suren was convicted last year of running a drug ring, which she took over from her slain son, Luis Antonio ''Sexo'' Ortiz.

Ortiz headed the drug ring, known as the Gray Tape Organization, until he was

killed in 1988.

Prosecutors said the organization distributed as much as 50 kilograms (110 pounds) of cocaine a year, using juveniles to sell the drug. Sales often took place within close range of schoolyards, prosecutors said.

Suren was convicted based on testimony by another son, Moses ''Flash'' Suren, who agreed to cooperate with authorities to avoid a long prison term.

The Grey Tape Organization was one of several drug gangs in north Philadelphia that operated a widespread distribution network known as the O.K. Corral.

The Surens were among 35 members of the Gray Tape gang arrested last year in a drug sting operation.

#90268u2365 09/25/1990 ~United Press International

WASHINGTON (SEPT. 25) UPI - Iraqi President Saddam Hussien, in a videotaped message broadcast Tuesday to the American people, said he wants peace in the Middle East but warned the United States risks another Vietnam if it attempts to force Iraq out of Kuwait.

The Iraqi leader, dressed in a business suit, gave a rambling 76 minute lecture on war, peace, Middle East history and politics. The broadcast was accompanied by English subtitles provided by the Iraqi government.

He cited historical claims by Iraq over Kuwait and maintained that many in Kuwait welcomed the Aug. 2 invasion and annexation by Iraq, which he compared to the unification of East and West Germany.

U.S. officials had no immediate comment on the address.

Saddam, reading a script in measured tones, made the tape in response to a videotaped message President Bush made to Iraq that was broadcast on Iraqi TV Sept. 16.

Excerpts of Saddam's speech were shown on all four networks, and CNN said it would broadcast the entire speech at 1 a.m. EDT.

While often criticizing U.S. policy on the Middle East, Saddam at other times sounded a conciliatory note, calling for negotiations that will ensure a lasting peace in the region.

''Let us then resort to dialogue rather than arms as the road to a common understaning ... and an acceptable solution,'' he said.

However, Saddam said that if an international organization like the United

Nations is called upon to negotiate a settlement to the Middle East crisis, ''all issues'' should be considered, including the Palestinian uprising in Israeli-occupied territory.

''This is the serious way to reach a comprehensive and lasing solution to all the problems of the crisis in the reigon,'' he said. At another point, he said ''we threaten no one.''

Israel was a frequent target of harsh words by Saddam, which he said was an example of how the United States uses a double standard on Middle East issues. When the Israelis annexed land in the Middle East, Saddam said, ''no measures were taken against Israel.''

Israel annexed East Jerusalem immediately after the 1967 war and later annexed the Golan Heights of Syria. Neither annexation is recognized by the United States.

He charged that Israel's lobby in the United States is so powerful that it influences elections and therefore controls U.S. Middle East policy.

Saddam used the opportunity to speak directly to Americans and to bring up two unpleasant episodes in recent U.S. history - the Iran- Contra scandal and the Vietnam War.

The Iraqi leader warned President Bush that he risks ''repeating the Vietnam experience'' if he attacks Iraq, saying it would result in ''bigger sacrifices'' and a greater loss of life.

At another point, Saddam pointed out that ''President Reagan apologized to us'' for the Iran-Contra affair, in which the United States secretly sold arms to Iran and funneled the profits to the Nicaraguan Contra rebels at a time when such aid was banned by Congress. Iran in the middle of a bloody war with Iraq at the time.

''We have accepted his apology,'' Saddam said.

The Iraqi leader criticized the U.N.-sanctioned land and sea blockade of his country, and the proposed air blockade, which was adopted by the United Nations Tuesday.

''Thousands of children in Iraq will die because of malnutrition because of lack of milk,'' he said. Regarding the air blockade, he said: ''Have you ever heard of measures more boorish, more inhumane than these measures?''

To Bush's videotaped assertion that the majority of Arabs are behind the U.S. effort to contain Iraqi aggression, Saddam, seated with an Iraqi flag in the background, called for a working group composed of members of Congress and Iraqi lawmakers to investigate the claim.

The three broadcast networks ran excerpts of Hussein's tape as part of their Persian Gulf coverage, and said they would provide it to affiliates to use as they wish.

''We're treating it as a regular news story and we'll give it regular news coverage,'' said CBS's Catherine Upin.

''We feel we've given him (Hussein) a lot of coverage,'' she said. ''This is not state-run television. For Iraqis, Bush's tape was the first time they heard the American position.''

CBS recieved the tape from the State Department early Tuesday afternoon, and as the pool distributor, fed it to other news organizations at 3:30 p.m., Upin said.

NBC's Jane Sokol said there was not much news contained in Hussein's latest broadside. ''It's a least a week old,'' she said.

ABC's Scott Richardson said in New York that excerpts from the tape were shown but that no special reports were planned based on Hussein's response.

CNN showed lengthy excerpts from the tape on its 6 p.m. EDT ''The World Today'' program, and announced it would show the message in its entirety at 1 a.m.

#90268u2387 09/25/1990 ~United Press International

MIAMI (SEPT. 25) UPI - Tropical Storm Josephine began to weaken Tuesday as it drifted west across the Atlantic Ocean and was expected to lose its tropical storm characteristics by Wednesday.

At 6 p.m. EDT, Josephine was centered near latitude 20.3 north, longitude 36.5 west, or about 760 miles west-northwest of Cape Verde Islands, the National Hurricane Center said.

The storm was moving west at 10 mph, and was expected to continue in that direction until Wednesday. Maximum sustained winds were 40 mph, but forecasters predicted Josephine would gradually weaken into a tropical depression. Tropical storm-force winds extended 145 miles to the north and 60 miles to the south of the center.

Josephine is the 10th named storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30. It grew from a tropical depression, No. 12, that forecasters had been monitoring since late last week.

#90268u2406 09/25/1990 ~United Press International

HONOLULU (SEPT. 25) UPI - Aloha Island Air said Tuesday it has made all changes recommended by the National Transportation Safety Board, which blamed the pilot, airline, and FAA for a crash last October that killed 20 people.

The NTSB report, released Tuesday in Washington, said the probable cause of the accident was ''the decision of the captain to continue flight under visual flight rules at night into instrument meterological conditions which obscused rising mountainous terrain.''

The pilots, flying too low and without instruments in unexpected poor weather, thought they were following the Molokai shoreline - when in fact they were heading into Halawa Valley on the eastern tip of the island, the report said.

The twin-engine de-Havilland Dash-6 crashed into a cliff in Halawa Valley Oct. 28, 1989, killing the pilot, co-pilot, and 18 passengers - including eight members of the Molokai High School volleyball teams.

The board also faulted the airline for ''inadequate supervision of personnel, training, and operations'' and insufficient oversight by the Federal Aviation Administration.

Aloha IslandAir over the weekend released its own report of the accident, also blaming pilot error. It said the flight crew ''misjudged their position while attempting to maintain (visual) flight in the presence of unfavorable weather conditions rather than choosing to fly using instrument(s).''

Aloha IslandAir President James Williamson said the company investigation did not turn up supervisory or procedural deficiencies that contributed to the accident.

But, he said the airline has undergone a complete review of all its operational systems and procedures and ''several significant changes'' have been made including all of the board's recommendations.

The board said the plane descended to 500 feet during the flight, which officials said did not comply with the minimum altitude allowed for night operations within 5 miles of land.

Investigators said Capt. Bruce Pollard was probably fatigued and ''had a record of performance difficulties before joining Alohas IslandAir'' and continued to have such difficulties at the airline.

In addition, the first officer's ground school training did not comply with FAA-approved curricula, thereby disqualifying him to serve as first officer of the flight.

The board said the airline's operations were oriented toward visual flight rules, which fostered the erosion of pilot instrument skills and discouraged pilots from operating on instruments.

The safety board recommended that Aloha IslandAir change its flight schedules, operations, and flight crew duties to accomodate operations under instrument flight rules.

The airline should also do background checks of pilot applicants to verify their flight records and look into their training as well as disciplinary and safety records.

#90268u2536 09/25/1990 ~United Press International

LOS ANGELES (SEPT. 26) UPI - Paramount Pictures, which has posted mixed results this year, announced late Tuesday that studio co-chief Sidney Ganis

has left the top post at the company, as had been widely speculated.

Ganis, who will remain at the studio as an independent producer, will be replaced by 38-year-old David Kirkpatrick, a one-time screenwriter who has moved into the executive ranks. Kirkpatrick joined Paramount in July as executive vice president after leaving the post of president of production at Walt Disney Co.

Kirkpatrick's official title will be co-president of the motion picture group. Distribution chief Barry London will continue as the other co-president.

Both London and Kirkpatrick will report to studio Chairman Frank Mancuso.

The studio said Ganis has entered into an exclusive long-term agreement under which he will develop and produce movies for Paramount.

''Making motion pictures is a special privilege, and a long-term commitment of mine,'' Ganis said in the announcement. ''Paramount is the best home base for the kinds of films I look forward to making.''

Ganis, 50, was promoted to the top post two years ago when Ned Tanen stepped aside after four years at the studio helm. Industry insiders have said he has provoked problems at the studio because of indecisiveness and strained relations with some of Paramount's top talent, including producers Don Simpson and Jerry Bruckheimer and actor Eddie Murphy.

Paramount has been criticized because its big-budget summer films - Simpson-Bruckheimer's ''Days of Thunder'' and Murphy's ''Another 48 HRS'' - performed only adequately, while ''The Two Jakes'' was a major dud. Still, the studio has the summer's top hit with ''Ghost,'' which has made close to $150 million in less than three months.

Ganis is also credited with persuading Francis Ford Coppola to make ''The Godfather, Part III,'' which is due out at the end of the year.

Other Ganis projects set for release next year include ''Regarding Henry,'' starring Harrison Ford; ''Dead Again,'' directed by Kenneth Branagh and starring Donald Sutherland, and ''The Butcher's Wife,'' starring Demi Moore and Jeff Daniels.

Ganis served as a senior vice president at George Lucas's Lucasfilm Ltd. in Marin County, Calif., for seven years before joining Paramount in March 1986 as president of worldwide marketing. He previously held marketing posts at Warner, Fox, Columbia, Cinema Center Films and Seven Arts Productions.

(SEPT. 25) UPI - The former president and board chairman of the failed Silverado Banking, Savings and Loan refused to answer questions today on grounds of self-incrimination. Michael Wise's refusals were made behind closed doors in the first day of testimony in the conflict-of-interest case involving President Bush's son, Neil. The younger Bush... who was a member of the Denver thrift's board of directors... is expected to testify later in the week.

A state appeals court in Los Angeles today refused to lower the five-Million-dollar bail set for Charles Keating... the former Lincoln Savings and Loan chief accused of defrauding elderly investors. The panel gave NO reason for turning down the petition. The denial came on Keating's seventh day in L-A County Jail. The 66-year-old former operator of the failed Irvine, California, thrift says he's destitute and canNOT post such a high bail.

A prominent gay and lesbian activist is accusing the entertainment industry of gay bashing through negative images in movies. Richard Jennings... executive director of the Gay and Lesbian Alliance Against Defamation... says negative stereotypes, slurs and obnoxious jokes are on the rise in movies. Jennings says gay and lesbian film characters are portrayed either as sissies, victims, murderers or twisted villains.

Officials at Poland's Gdansk shipyard expressed disgust today that a Polish-born Millionairess is ending efforts to rescue the birthplace of Solidarity. Barbara Piasecka-Johnson yesterday announced she is pulling out of any projects to save the shipyard... which the communist government decided in 1988 to close. Reports were that the heiress wanted wage and workforce cuts... but Piasecka-Johnson says she was ''sabotaged by the Polish press.''

#90269b0025 09/26/1990 ~Business Wire

LINCOLN, NE (SEPT. 26) BUSINESS WIRE - Isco Inc. (NASDAQ:ISKO) Wednesday reported the following results for thee fiscal year ended July 31, 1990.

Earnings for the fourth quarter ended July 31, 1990 were $984,000, or 24 cents per share, on net sales of $9,046,000. For the same period last year earnings were $595,000, or 14 cents per share, on net sales of $7,814,000. The sales increase of 16 percent was accompanied by an 80 percent increase in operating income.

The Environmental Division generated operating income of $3.8 million on record sales of $18.8 million in fiscal 1990. This compares with operating income of $4.3 million and sales of $17.8 million in the previous year. While operating income was down 11 percent year over year, the fourth quarter results of $1,420,000 continue the upward trend shown in the previous three quarters of fiscal 1990.

Results for the Instrument Division were lower in fiscal 1990, with sales of

$12.8 million and operating income of $39,000. The comparable results for fiscal 1989 were $14 million and $628,000. However, the company believes that the delivery of the capillary electrophoresis systems and the supercritical fluid extraction device in early fiscal 1991 will improve performance.

International sales improved slightly to $5 million in fiscal 1990, compared with fiscal 1989 sales of $4.9 million. This change included a 13 percent increase for the Instrument Division and a 12 percent decline for the Environmental Division.

Incoming orders for fiscal 1990 were up 6.2 percent over fiscal 1989; the Environmental Division was up 9.6 percent while the Instrument Division was up 1.6 percent. The order backlog increased 49 percent from $1.6 million at the end of fiscal 1989 to $2.4 million at the end of fiscal 1990.

Isco manufactures water pollution monitoring equipment, including flow measuring devices, and is the leading manufacturer of wastewater samplers. Isco also manufactures chemical separation instruments for use in biochemistry and biotechnology research.

#90269b0037 09/26/1990 ~Business Wire

NEW YORK (SEPT. 26) BUSINESS WIRE - S&P assigns its 'A-1' rating to Blue Circle Industries PLC's US$400 million Euronote issuance facility.

Blue Circle is the U.K.'s leading cement producer; with other activities in branded home products such as heating systems and bathroom fixtures.

The rating is based the company's superior position in the mature U.K. cement industry, in which it is the lowest cost producer and has an extensive distribution network.

These advantages give Blue Circle significant earnings protection despite its exposure to the cyclical construction industry and increasing price competition in cement markets.

Earnings diversity comes from development of cement and building materials businesses in the United States, which have strong regional market share positions in the eastern states, as well as its home products businesses that have a strong presence in the renovation markets. Both the U.S. and U.K. construction markets are expected to show sluggish growth over the next year

and possibly beyond.

However Blue Circle's strong operating position and conservative capital structure, as evidenced by a net debt to total capital ratio of 23 pc at year-end June 30, provide sufficient financial flexibility to enable the company to maintain its strong financial profile despite difficult industry conditions, S&P said.

SAN JOSE, CA (SEPT. 26) BUSINESS WIRE - Hyundai is announcing reduced prices in its line of 80386 PCs.

Suggested retail prices (S.R.P.) on all of the 25MHz Super-386N models have been reduced, as well as the 100MB and 200MB versions of the 20MHz Super-386C and Hyundai's 80386SX model, the 16MHz Super-386S. According to Dan Lott, director of marketing, the price changes have been made to adjust for the recent introduction of the 33MHz Super-386T.

The Super-386N has been reduced by $200 on its single floppy, 40MB and 300 MB hard drive models. All of Hyundai's 80386 systems, including the Super-386N, have been reduced by $300 on the 100MB models, and $500 on the 200MB machines.

The new S.R.P. prices are as follows:

Super-386N:	$3395 with one 5.25-inch 1.2MB floppy
	$3995 with 40MB HDD added
	$4595 with 100MB HDD added
	$5095 with 200MB HDD added
	$6895 with 300MB HDD added
Super-386C:	$3395 with one floppy and 100MB HDD
Super-386S:	$2645 with one floppy and 100MB HDD

#90269b0058 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - VMX (NASDAQ:VMXI) Wednesday introduced a set of applications templates called VMX Worksolutions, based on VMX's recently introduced VMXworks application platform.

Worksolutions enable organizations to solve specific caller needs more effectively than traditional interactive voice response (IVR) or voice messaging systems. These Worksolutions templates will require varying degrees of customization, depending on the customer and the application.

Through the VMX Teamworks third-party developer program, VMX will be supporting a wide range of organizations in developing Worksolutions. Organizations supported by VMX Teamworks will include applications developers, independent programmers, VMX market specialists, VMX D.I.A.L.PRO value-adding systems companies, systems integrators and customer end users.

The first VMX Worksolutions -- Helpworks, Insureworks and 800 Secureworks -- are examples of new ways for companies to leverage their computer and telephony investments.

Helpworks -- a help desk application for service departments (e.g., MIS) to provide interactive telephone response to employees' inquiries and technical questions. With Helpworks, employees can call the help desk and leave a message describing their problem. Helpworks goes beyond traditional voice messaging by assigning callers trouble ticket numbers associated with dynamically created mailboxes.

Technicians can respond to inquiries with messages to these mailboxes. At their convenience, employees can call in, enter their trouble ticket number and hear the response to the problem.

Insureworks -- a policy and claims information line for insurance agents and policy holders. Insurance companies can provide faster response to inquiries

and provide information to callers more efficiently. The system provides a menu of choices and includes the ability to retrieve information about policies and claims, 24 hours a day, without the agent needing to be in the office.

Going beyond traditional IVR applications, should the agent or policy holder wish to obtain further information, Insureworks will assign a temporary voice mailbox permitting callers and agents to exchange questions and answers at their convenience.

800 Secureworks -- an innovative telephone security system that guards against 800 number fraud. The system uses information from computer databases to ask callers individually tailored questions to deter computer hackers. If callers cannot answer these questions correctly, a live attendant can be notified by the system and then conferenced into the call to assist the caller.

After callers do identify themselves accurately, they can access a full range of call and message processing functions. The system also provides reports on caller activity.

Users of VMXworks and Worksolutions include Viking Insurance (Irvine, Calif.), which specializes in non-standard automobile and motorcycle policies. ''Our service representatives used to spend an average of about 10 minutes per call. Now, with VMXworks, calls have been reduced to two or three minutes, freeing operators to spend more time on complex inquiries,'' said Steven Barton, Viking manager of facilities administration and planning.

San Diego-based Science Applications International Corp. (SAIC), the ninth largest systems integrator in the United States, is using VMXworks to provide 24-hour technical support to employees in offices nationwide. ''To do their job, help desk technicians are either on the phone or out providing service. Meanwhile, employees calling in for help with their computers and systems would be delayed and frustrated by telephone tag,'' notes Ronald Scott, SAIC telecommunications manager.

''With our new VMXworks system, the technician picks up the message, records the advice and the caller phones back for the answer using dynamic and expandable messaging capabilities that have substantially improved productivity.''

The new Worksolutions templates are currently sold, configured, installed and maintained by VMX's nationwide network of certified value-adding systems companies. ''With VMXworks, Worksolutions and the VMX value-adding systems companies, VMX is uniquely able to deliver to customers the emerging class of integrated messaging applications required to meet today's business needs,'' says Laura Watkins, VMX director of product marketing.

VMX is a leader in today's expanding call and message processing market, which

includes such enhanced capabilities as audiotext, voice response and call transaction processing. The company is also the world leader in voice message networking.

VMX products are distributed throughout North America and in more than 25 additional countries through value-adding systems companies, OEMS and directly by VMX sales offices. Headquartered in San Jose, Calif., the company has a major manufacturing, engineering, sales and support facility in Dallas. VMX sales offices are located in Los Angeles, New York City, Chicago, Atlanta, Washington and London.

BEVERLY HILLS, CA (SEPT. 26) BUSINESS WIRE - Litton Industries Inc. announced Wednesday that it is calling for redemption on Nov. 15, 1990, all of its floating rate subordinated notes due July 1, 2000, in the outstanding amount of $439,695,000.

The notes were issued in 1985 in a transaction in which Litton issued subordinated debt in exchange of its common stock.

The redemption price will be 100 percent of the principal amount and interest accrued to Nov. 15, 1990. Interest on the notes will cease to accrue after the redemption date.

The principal and interest will be paid on presentation and surrender of the notes at the Litton offices in Beverly Hills, Calif., or at the Midwest Securities Exchange Clearing Corp. in New York.

''A notice of redemption which provides more detail concerning the manner of repayment is being mailed to all noteholders of record within the next few days,'' said Joseph T. Casey, Litton vice chairman and chief financial officer. ''The redemption will further strengthen Litton's balance sheet and improve our positive cash flow.''

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

#90269b0065 09/26/1990 ~Business Wire

SAN FRANCISCO (SEPT. 26) BUSINESS WIRE - Glenhall Taylor Jr., vice chairman of the board of BankAmerica Corp. and head of credit policy at Bank of America has announced that he will retire at the end of the year.

Executive Vice President Michael E. Rossi, currently head of Bank of America's Commercial Banking Division, will succeed him as head of credit policy.

Taylor, 65, is a veteran of more than four decades of banking. He orchestrated the changes in credit policy that were instrumental in BankAmerica Corp.'s turnaround during the late 1980s.

Born and raised in San Francisco, Taylor began his banking career in 1948 as a part-time clerk at American Trust Co. while attending UC-Berkeley. American Trust Co. merged with Wells Fargo in 1960 and Taylor continued on to become an Executive Vice President and Chairman of the Credit Policy Committee.

He left Wells Fargo in 1983, when he was named Vice Chairman and chief credit officer by the financially troubled Seafirst. He was instrumental in achieving the turnaround at Seafirst. After a brief retirement, he was tapped by Seafirst's parent company, BankAmerica, in 1985 to strengthen Bank of America's loan portfolio and establish new credit procedures and policies.

Taylor's plan, which called for early identification of problem loans, rigorous review of new credits, and successful recoveries of loans previously charged off, has resulted in dramatic improvements in the bank's credit portfolio over the last five years.

Taylor is a member of the Board of Directors of Seafirst Corporation and a past national president and former member of the Board of Directors of Robert Morris & Associates, a professional association of bank loan and credit officers.

''We are extremely grateful for the unique contribution Glenhall has made at BankAmerica,'' Chairman and Chief Executive Officer Richard M. Rosenberg said. ''We just could not have achieved what we have achieved without him. Glenhall is quite simply the dean of credit in the United States. His record is remarkable," Rosenberg continued.

''He led the effort which brought Seafirst's troubled loan portfolio under control, then he came out of retirement and repeated his superb performance with the much larger and more complex portfolio at Bank of America. We have all been enriched by his counsel and his friendship.

''We're pleased to have as able a successor as Mike Rossi, whose record demonstrates his ability to manage this critical area of the business with prudence, insight, and creativity,'' Rosenberg added.

Rossi, 45, began his career at Bank of America in 1966 as an international credit and lending officer. He then spent 16 years with CitiBank and Wells Fargo before rejoining Bank of America in 1986 as senior vice president and manager of the bank's Latin America Special Assets Group.

He was named senior credit officer for the bank's World Banking Group in 1987, then headed the Asia Division, before being named to head the Commercial Banking Division.

Rossi and Taylor will work closely together for the remainder of this year, as Rossi assumes the role of chief credit officer. Rossi will also become a member of the bank's Managing Committee and Asset and Liability Policy Committee and will chair the Credit Policy Committee.

Following his retirement at the end of this year, Taylor will continue as a director of Seafirst Corporation and Seafirst Bank and as a consultant to BankAmerica on matters of credit policy.

Succeeding Rossi as head of the Commercial Banking Division will be Jack Meyers, 47, an executive vice president with 25 years of banking experience who currently heads Credit Risk Management for the Commercial Banking Group. Meyers joined Bank of America in 1985 and organized the California Banking Group's Special Credits Group which managed the group's problem loan portfolio.

He also served as senior commercial credit officer for the California Banking Group and as president of BancAmerica Commercial Corp.

#90269b0075 09/26/1990 ~Business Wire

SAN ANTONIO, TX (SEPT. 26) BUSINESS WIRE - La Quinta Motor Inns Inc. (NYSE:LQM) Wednesday announced board action adopting a shareholder rights plan that provides for rights to be issued to shareholders of record on Oct. 9.

According to Sam Barshop, chairman and chief executive officer: ''This action has been taken after long and careful study, and was not taken in response to any pending takeover or proposed change in control of the company. The adoption of a shareholder rights plan has become common practice in major American companies and a well-accepted approach to ensuring that all shareholders receive a fair price and are treated equally in the event of a takeover.''

Under the plan, the rights will initially trade together with La Quinta's common stock and will not be exercisable. In the absence of further board

action, the rights will become exercisable and allow the holder to acquire La Quinta common stock at a discounted price if a person or group acquires 15 percent or more of La Quinta's common stock.

In the case of persons that are eligible to report their ownership of La Quinta stock to the Securities and Exchange Commission on Schedule 13G rather than Schedule 13D (generally because they acquired their shares before La Quinta became a public company or they are institutional investors holding shares for investors only), and persons that are affirmatively determined by La Quinta's board of directors not to have interests adverse to those of La Quinta and its shareholders, the triggering percentage of stock ownership is 25 percent rather than 15 percent. Rights held by persons who exceed the applicable threshold will be void.

Under certain circumstances, the rights will entitle the holder to buy shares in an acquiring entity at a discounted price.

The plan also includes an exchange option. In general, after the rights become exercisable, the board of directors may, at its option, effect an exchange of part or all of the rights-other than rights that have become void-for shares of La Quinta common stock. Under this option, La Quinta would issue one share of common stock for each right, subject to adjustment in certain circumstances.

La Quinta's board of directors may, at its option, redeem all rights for 2 cents per right, generally at any time prior to the rights becoming exercisable. The rights will expire Oct. 9, 2000, unless earlier redeemed by the board of directors.

The issuance of the rights will not affect reported earnings per share and will not change the way in which La Quinta common stock is currently traded.

La Quinta Motor Inns Inc. develops, owns, and operates or licenses limited services lodging facilities. At Sept. 26, La Quinta operated 208 inns in 29 states.

#90269b0081 09/26/1990 ~Business Wire

SUNNYVALE, CA (SEPT. 26) BUSINESS WIRE - DAVID Systems and Indiana University Friday announced an agreement deploying DAVID 10BASE-T equipment and apparatus as part of the Indiana University Computing Network, a TCP/IP internetwork linking multiple applications and users.

The agreement is part of a multi-year program being implemeted by the

University Computing Services organization for providing total data connectivity throughout Indiana University's multiple campuses, with access to regional and national data networks.

With an enrollment of over 85,000 students, Indiana University has a computing environment spread over eight campuses, consisting of 23 general-access mainframes located in computing centers, 49 departmental-level mainframes, and in excess of 6,000 microcomputers, representing multiple vendors.

DAVID's equipment is being used for the last leg of the data connection, linking end users, located in the academic and administrative areas of the university, to a backbone network.

The basic connectivity vehicle covered in the agreement is the DAVID ExpressNet 132 port Intelligent Concentrator, Indiana University will initially deploy 120 of these units to serve approximately 8,000 end users with 10BASE-T connectivity.

Indiana has required all buildings on their Bloomington campus with multiple twisted pair wiring for future data connectivity; some 17,000 jacks were wired in the academic, administrative and dormitory buildings.

The initial phase will provide connectivity only to the academic and administrative buildings. Expansion to the dorms will be the subject of planning in the near future.

Other applications include several electronic conferencing systems, both local and international in membership; office automation services; student services including an online advising system and a dynamic schedule of classes during registration periods; and access to application software, largely for academic usage, including statistics packages, mathematical and statistical programming libraries, programming languages and data bases.

Formed to enhance the role of integrated digital communication, DAVID Systems supplied its first Ethernet LAN products in 1985. As a technical leader in its field, DAVID holds six communications patents and is an active participant in the IEEE802.3 10BASE-T Consortium at the University of New Hampshire.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

The DAVID LAN product family includes the DAVID ExpressNet 10BASE-T Hub, Intelligent Concentrators (48 and 132 port), the DAVID ExpressView network management system, the VolksNet 10BASE-T Ethernet LAN for small network configurations, and the DAVID Ether-T Adapters for IBM personal computers and compatibles. DAVID Systems currently has over 150,000 ports of Ethernet installed worldwide.

#90269b0083 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - US Sprint announced Wednesday that it will build the world's first public frame relay service in 1991.

The service will make data communications more cost-effective than private line circuits and faster than traditional forms of packet switching.

When commercially available in the third quarter of 1991, US Sprint's frame relay service will process and route data up to 10 times faster than conventional methods. US Sprint estimates that the domestic market for frame relay services will reach $800 million by 1995, due in large part to the growing trend toward interconnecting of local area networks (LANs).

The company's frame relay service will be available from any point in the United States. It will also be available in the United Kingdom and Japan via the SprintNet international network. Other international locations will be added later.

Frame relay will bring less costly high-speed data communications capability to a greatly expanded base of corporate and government customers, including federal agencies using US Sprint services through the FTS2000 telecommunications network.

The service will utilize data switches manufactured by US Sprint, along with the company's fiber-optic network. Test service will begin in the second quarter of 1991, followed by commercial availability in the third quarter of 1991.

US Sprint is a unit of United Telecommunications, Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

#90269b0085 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - US Sprint announced Wednesday an

innovative new technological capability that allows customers using such services as medical imaging and videoconferencing to dial up the exact amount of transmission capacity needed to achieve clear, distinct images.

The new technology is called NX56 (N times 56).

''This capability gives doctors and others transmission of a clear image, almost instantaneously. Customers may select the bandwidth they need and pay only for the transmission capacity they actually use.

''This will provide users with much greater flexibility in tailoring services to their individual requirements,'' said Richard Smith, president of National Markets for US Sprint, who made the announcement during a news conference held at the Tele-Communications Association (TCA) trade show in San Diego.

According to Smith, NX56 is ideal for applications like medical imaging. Doctors in widely dispersed locations can share images produced by CAT scans, MRI scans or sonograms. They can have access to expert opinions without having to send the patient to a far-away site.

And instead of sending pictures in the mail overnight, they can transmit the information in a matter of minutes or even seconds. In addition, it allows doctors to dial up whatever bandwidth they need to achieve a clear, detailed image.

Other applications for NX56 include transmission of computer-assisted design and computer-assisted manufacture documents, transmission of robotics action files, videoconferencing, and transactional polled networks.

Developed as an enhancement to US Sprint's Switched 56 capability, NX56 allows customers to transmit multiples of 56 kbps (kilobits per second) data at tariffed voice rates. It provides the opportunity to aggregate bandwidth and gives users the option of selecting bandwidth data in increments of 56 kbps, from 1 to 8 channels now, and eventually, from 1 to 24 channels.

NX56 will be provided via customer premises equipment and VPN-56 service. It will be available throughout the US Sprint network.

It is scheduled for introduction in the first quarter of 1991, when manufacturers are expected to release customer premise equipment (CPE) capable of supporting the service.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SANTA ANA, CA (SEPT. 26) BUSINESS WIRE - Clean Air Resins Inc., through its majority shareholder Genatron Inc., an OTC Pink Sheet company, announced that it had entered into its first distribution contract with Clean Earth Resins Inc., a Stockton-based company.

Clean Earth Resins was granted an exclusive distributorship for all of Clean Air's roof, deck, and waterproofing coatings in seven northwestern states. Additionally, Clean Earth will have the right to sell on a non-exclusive basis all products of Clean Air, including the other water-based, non-toxic, non-flammable, elastomaric resins used for making linear polyurethane clear and pigmented paints, primers, chaulkings, and various foams.

Clean Earth will have to meet sales-performance standards to maintain its exclusive distribution contract. By year five their gross sales volume must exceed $5 million plus and continue up each year thereafter.

Craig Lease, president of Clean Earth, stated: "It's an encouraging feeling to know that when marketing these high-quality products at competitive prices that you're not only substantially lowering air pollution but also making a safer environment for the job workers, as well as for the general public.

"We're happy to have these fine products which exceed EPA and AQUMD standards and believe that for this reason we will be able to surpass all sales expectations."

PROVO, UT (SEPT. 26) BUSINESS WIRE - Providence Hospital's LifeGuard Alaska, operated by Rocky Mountain Helicopters Inc. (NASDAQ:RMHI) of Provo, is making history Wednesday.

The program's Lear jet flew into Magadan, USSR, and is transporting an 8-year-old burn victim to the United States - marking the first time ever a dedicated medical aircraft has completed such a mission to Russia.

The mission follows three months of discussion between U.S. Immigration, FAA, State Department and Customs officials and their Soviet counterparts regarding medical evacuation and search and rescue operations, according to Dick Towell, associate administrator for Providence Hospital in Alaska, and Dr. Ted Mala, director, Institute for Circumpolar Health Studies, University of Alaska, Anchorage.

Towell says the flight marks a milestone in a series of such agreements. ''We now have visa-free visiting between Nome, Alaska, and Provideniya, USSR. Alaska Airlines and Aeroflot (USSR's national carrier) have been approved for a route exchange beginning next spring between Magadan, Anchorage and San Francisco. The only Aeroflot flights right now come through New York and Washington. These developments have all acted together to make this mission possible.''

''Rocky Mountain Helicopters, based in Provo, Utah, is helping to fund the transport. We see this as being an ideal opportunity to not only to save a life but to aid in furthering diplomatic relations between the two countries '' says Russ Spray, vice president over Medical Operations for Rocky Mountian Helicopters.

Rocky Mountain Helicopters operates LifeGuard's Lear jet for Providence Hospital. ''We became the industry leader through innovation,'' says Spray. ''It's certainly that operational creativity that allowed completion of this mission today.''

SAN JOSE, CA. (SEPT. 26) BUSINESS WIRE - R-Byte Wednesday announced the appointment of Gerald F. Boudreau as vice president of sales and marketing and an officer of the company.

Boudreau will establish and manage worldwide sales and marketing activities for R-Byte.

R-Byte was founded in 1989 to design, manufacture and market high capacity, 3.5-inch computer tape drives utilizing 4MM digital audio tape (DAT) technology. The company's intial product design is based upon technology acquired from Seagate Technology.

''As we near completion of the engineering of our first 4MM tape drives, we have started assembling the team to bring our products to market,'' said Ian Turner, president and chief executive officer of R-Byte.

''Jerry Boudreau's outstanding track record in building and managing highly effective sales and marketing organizations in peripherals companies makes him the ideal person to head up this team.''

Boudreau joins R-Byte from Hitachi America Ltd., where he was director of marketing and business planning for the Computer Division. Prior to Hitachi, Boudreau was director of the Storage Products Business Unit and director of the Business Management Office for Fujitsu America Inc.

Boudreau has also held positions in marketing and sales at Dataproducts Corp., ITT, Qume, Eastman Kodak and IBM.

''R-Byte has an exciting, leading edge technology targeted at meeting specific market needs and a management team with extensive experience in product development and operations,'' said Boudreau.

''I am excited to have the opportunity to help establish the initial strategy of a company that will become the leader in the 4MM DAT market.''

R-Byte was founded in 1989 by Ross Johnston, previously the director of Advanced Development at Seagate. The management team includes Turner, president and chief executive officer; Johnston, vice president of engineering; and Winnie Paauw, controller.

The company received venture capital financing from Oak Investment Partners,

Institutional Venture Partners, Mohr Davidow Ventures and Sigma Partners.

#90269b0137 09/26/1990 ~Business Wire

SANTA ROSA, CA. (SEPT. 26) BUSINESS WIRE - Wednesday, Research and Development magazine presented Optical Coating Laboratory Inc. (NASDAQ:OCLI) with its prestigious ''R & D 100'' award for MetaMode, OCLI's revolutionary patented coating process which produces the coatings on the spectacular Vectra sunglass lenses.

The award, bestowed at Chicago's Museum of Science and Industry, recognizes MetaMode, a metal mode reactive sputtering process, as ''significant new technology.''

''It is because OCLI invented MetaMode that we also created Vectras,'' said Richard Norgrove, Ophthalmics product manager. ''And it is MetaMode coating superiority that places Vectras at the top of the sunglass market.

''MetaMode coatings provide Vectra sunglass wearers with glare-free vision, true color transmission, more protection from the sun's harmful rays than any other leading sunglass brand, and scratch-resistant coatings ten times more durable than standard coatings.''

MetaMode permits fully automated deposition of precisely controlled metal or dielectric coatings at high rates. It is a unique ''cold'' process, allowing flat and irregularly shaped substrates, such as glass or plastic, to be coated at or near room temperature, usually eliminating the need for heating and cooling cycles.

There is virtually no limit to the number of layers that can be coated in one run, and large volumes of product can be coated with precise optical uniformity.

Information about MetaMode will be exhibited from Sept. 26 to Oct. 28 along with scientific and technological breakthroughs from such companies as Eastman Kodak, General Electric, NASA Lewis Research Center, National Institute of Standards & Technology and Hughes Aircraft Co.

The exhibit is expected to draw more than 300,000 people.

For more information on OCLI's high-tech, high-fashion Vectra sunglasses, call

OCLI toll-free at 1-800-233-OCLI (6254).

MONTEREY PARK, CA (SEPT. 26) BUSINESS WIRE - Ameron (NYSE:AMN) Wednesday reported higher sales and earnings for the third quarter ended August 31, 1990 as compared with 1989.

L.R. Tollenaere, chairman and chief executive officer, said that continued strong demand for construction products in Hawaii and increased deliveries of large-diameter concrete and steel pipe in Southern California and the Southwest contributed to the improved performance.

Despite the rise in sales and earnings from consolidated operations on a year-to-date basis, net income was reduced due to lower equity results from affiliated companies.

Ameron
Third-Quarter Sales and Earnings

	Three Months Ended August 31, 1990	1989
Sales	$121,000,000	$120,864,000
Net income	4,554,000	4,185,000
Net income per share/a	1.20	1.05

	Nine Months Ended August 31, 1990	1989
Sales	$326,347,000	$311,020,000

SAN FRANCISCO (SEPT. 26) BUSINESS WIRE - Furnishings 2000 Inc. announced that since filing for protection under Chapter 11 of the Bankruptcy Code, it has been required to cease operations due to lack of funds and has filed a motion with the Bankruptcy Court to require its secured creditor, which has a security interest in all of the company's inventory, to remove the inventory

collateral from the company's stores and warehouses and to pay rent until the inventory is removed.

The company believes that there is only an outside chance that it will be able to obtain alternate financing to operate its stores and, in the absence of any alternate financing, anticipates that proceeds from the sale of its store leases and other assets will be insufficient to pay all creditor claims in full. In that event, no distribution will be available to stockholders.

NEWPORT BEACH, CA (SEPT. 26) BUSINESS WIRE - National Telephone & Communications Inc. (NTC) has entered the cellular telephone market as the first nationwide full-service provider, it was announced Wednesday by Donald J. Rackemann, president of the Newport Beach-based discount long-distance carrier.

NTC now has the capability to deliver a cellular telephone, together with an area code and an activated local phone numer, to anyone in the country within 72 hours, Rackemann said.

Recently concluded agreements between NTC and Total Cellular Network Inc. have made it possible to offer the unique full service in more than 700 licensed areas throughout the country.

Rackemann pointed out that he anticipates substantial penetration of the cellular telephone market through the efforts of NTC's network of over 500 representatives across the United States.

NTC is a publicly held company and is certified by the California Public Utilities Commission.

HOUSTON (SEPT. 26) BUSINESS WIRE - Propane inventories in the United States remain tight as winter approaches in the Northeast, highlighting the need for additional delivery capabilities to serve the needs of customers in New York and other Northeastern states.

Texas Eastern Products Pipeline Co. (TEPPCO) is increasing its efforts to

identify and implement increases to its system deliverability in the Northeast said company President Michael D. Burke.

''Additional storage capacity is critical in New York and other Northeastern states, especially if there is a repeat of the extremely cold weather experienced in December and January this past winter,'' Burke said. ''For that reason, we are intensifying our efforts in evaluating alternative locations for such facilities.''

TEPPCO officials said events in the Middle East have impacted the world supply of propane because Kuwait was a significant exporter of the product.

''On a market-by-market basis, it is hard to identify the specific impact of Kuwait's loss. But overall, a lower world supply reduces the available product for response to immediate needs, such as winter demand in the Northeast,'' Burke said.

TEPPCO's existing storage facilities in New York are being filled to levels approaching capacity.

''Demand for propane as an environmentally attractive fuel continues to increase both among residential and commercial users,'' Burke said. ''Of particular note is the potential increase in the use of propane in electric cogeneration plants.''

An additional week or two of severe temperatures in early 1990 would have rendered the Northeast's propane distribution capacity insufficient, Burke said.

''Since last winter, we have been working to identify various options for meeting the needs of propane customers in the Northeast,'' he said. ''TEPPCO believes that solutions such as additional propane sources, incremental storage and enhanced pipeline delivery capacity into the Northeast will be critical in the future and are being evaluated.''

TEPPCO is continuing to evaluate the possibility of participating in a proposed pipeline project to Quebec, which would link additional supply sources to the Northeast and would also provide the region with incremental storage for peak demand periods.

''The critical need in New York and the entire Northeast is additional storage of supplies that are available on demand. TEPPCO is committed to working with the people of New York and the Northeast to meet that need,'' Burke said.

TE Products Pipeline Co., Limited Partnership, headquartered in Houston, was formed to acquire, own and operate the refined petroleum products and liquefied petroleum gas (LPG) pipeline business of Texas Eastern Products Pipeline Co., the general partner of the limited partnership. The company is

one of the largest pipeline common carriers of refined petroleum products and LPGs in the United States.

FREMONT, CA (SEPT. 26) BUSINESS WIRE - Everex Systems Inc. (NASDAQ:EVRX) Tuesday announced an expanded distribution agreement with Merisel, (NASDAQ:MSEL) a major distributor of Everex STEP systems and peripheral products.

Under the terms of the agreement, Merisel will now carry the full line of Everex Tempo personal computers.

Designed to provide users with quality systems at affordable prices, the Everex Tempo line includes the Tempo 286/12, Tempo 286/16, Tempo 386sx/16, Tempo 386/20 and 386/25. Everex Tempo systems are fully compatible with Everex STEP systems and may be used in conjunction with STEP file servers as network nodes.

Merisel, formerly Softsel/MicroAmerica, is one of the largest distributors of microcomputer hardware and software products to computer resellers worldwide. The company presently stocks over 7,000 products from more than 400 hardware and software vendors for sale to 50,000 computers resellers worldwide.

International operations account for approximately 30 percent of sales and consist of seven wholly owned subsidiaries serving resellers in Canada, Europe Latin America and Australia in addition to a joint venture in the Soviet Union.

The company supplies products for microcomputer platforms including Apple Macintosh, IBM and compatibles and a variety of UNIX and workstation systems, in addition to offering a wide range of services to help resellers support these products.

Everex Systems Inc., with headquarters in Fremont, designs, manufactures and supports a complete family of industry-standard personal computers and peripherals. Everex products are distributed through a worldwide dealer and VAR network.

SALT LAKE CITY (SEPT. 26) BUSINESS WIRE - Unisys Corp. and Applied Information Sciences Inc. (AIS), Wednesday announced that AIS will participate in the Unisys Open/OLTP Software Partnership Program (SPP).

The program allows software developers to begin development of applications and tools for distributed, On Line Transaction Processing (OLTP) prior to the release of Open/OLTP products by Unisys. AIS, makers of connectivity tools for diverse computing systems, will receive development assistance and support from Unisys.

Under the terms of the agreement, Unisys and AIS will work together to tightly integrate the Unisys Open/OLTP offerings with the AIS UniAccess product suite. The Unisys Open/OLTP architecture provides a commercial OLTP environment for UNIX systems based on emerging industry standards for distributed transaction processing now being developed by X/Open and others.

AIS' UniAccess products will provide an interactive client/server gateway that allows UNIX systems access to mainframe and minicomputer servers, including those made by Unisys, IBM and DEC.

Together, Unisys and AIS products will enable distributed, heterogeneous transaction processing combining PCs and workstations, Open/OLTP UNIX systems, and mainframes. Both the Unisys Open/OLTP products and the AIS Open/OLTP-based UniAccess products will be released early in 1991.

The Unisys Software Partnership Program provides participating companies with the Open/OLTP software at no charge, Open/OLTP training, and special support for the duration of the program. New SPP members will be enrolled until first customer shipment of Open/OLTP products by Unisys.

Open/OLTP will also be incorporated into the on-going AIS Prototype Partnership program. As part of this program, AIS will provide customers with design and implementation assistance to develop prototype products for OLTP environments, based on the Unisys ALLY and Open/OLTP software, and AIS' UniAccess products.

Applied Information Sciences Inc. (AIS), headquartered in Landover, Md., is a growing information systems development and management consulting firm. AIS was founded to deliver advanced applications tools and a wide range of services to meet the information needs of government and commercial clients.

Unisys Corp. is a leading provider of commercial UNIX systems. Unisys actively participates in the development of open systems standards as a founding member of UNIX International and as a member of X/Open. Unisys was the first company to receive an XPG2 compliance certificate from X/Open.

SEYMOUR, CT (SEPT. 26) BUSINESS WIRE - Summagraphics Corp. (NASDAQ:SUGR) Wednesday announced earnings and revenues for the first quarter of fiscal year 1991.

Net sales for the first quarter of fiscal 1991 increased 72.1 percent to $17,983,793 over the $10,447,294 reported for the first quarter of fiscal 1990. Operating income increased 2.6 percent to $1,311,201 from $1,277,851 reported for the prior year.

As a result of the acquistions, the company went from earning interest to paying interest and reported $269,568 of other expense in the current quarter vs. $174,055 of other income in the prior quarter.

Income before taxes decreased 28.3 percent to $1,041,633 from the $1,451,906 reported for the comparable quarter of the prior year. The company reported net income of $750,795, a decrease of 33.7 percent from the $1,131,853, reported for the prior year.

On a per share basis, earnings were 20 cents compared with the 30 cents reported for fiscal 1990.

William J. Lifka, president, chief executive officer and chairman stated, '' This is the first complete quarter that includes the integration of Houston Instrument with Summagraphics' operations. Despite the decrease in earnings, results for the quarter were within our range of expectation with operating profits showing a significant improvement over fourth quarter of fiscal year 1990.

Summagraphics Corp. is a leading international manufacturer of computer peripheral products used principally in computer graphics, computer-aided design and other advanced applications.

Summagraphics, founded in 1972, is the pre-eminent designer, developer, and marketer of digitizers through its Summagraphics Digitizer Division, which offers brand names including SummaSketch, Bit Pad, and Microgrid.

Through its Houston Instrument Division, the company manufactures computer peripheral devices including the popular DMP 50/60 series of pen plotters and

the recently announced LDS 4000 wide format scanner.

SAN JOSE, CA (SEPT. 26) BUSINESS WIRE - Businessland Inc. (NYSE:BLI) announced an agreement in principle with its senior noteholders to resolve all issues of compliance with the covenants of its $50 million senior notes.

The company previously reported in its year-end earnings news release that it was in violation of certain of the operating covenants contained in such notes. Under the terms of the waiver, the effective rate of interest has been increased by 0.50 percent effective Dec. 15, 1990, to 10.25 percent, and certain financial covenants have been modified.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business.

The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, three in West Germany, five in Canada and one in Japan. It reported sales of $1.35 billion in fiscal 1990.

#90269b0615 09/26/1990 ~Business Wire

TORRANCE, CA (SEPT. 26) BUSINESS WIRE - Epson America Inc. announced Wednesday its support of NeWSprint, Sun Microsystems' raster image processing software for the SPARC-based family of workstations.

Epson is developing printer handlers that work with NeWSprint to produce PostScript-language emulation on its line of dot-matrix, laser and ink jet models. The technology allows users of UNIX workstations to choose among a full spectrum of personal printers that accommodate different needs and

budgets.

Peter Bergman, director of Epson's printer business unit, said the alliance is mutually beneficial for both companies. ''As a worldwide leader in imaging technology, Epson has the sales and service network needed to support the national distribution of NeWSprint.

The software handlers are being developed at the Epson Technology Center in Santa Clara, Calif., ensuring optimum functionality of its printers in conjunction with NeWSprint.

Epson manufactures a wide range of 9-pin and 24-pin dot-matrix printers that are ideal for use in general business environments. The DFX-8000, a 9-pin model capable of printing 1,066 characters per second, is designed for producing reports, wide spreadsheets and voluminous drafts.

Epson's 24-pin printers feature letter-quality output for business correspondence, word processing and presentation graphics. Among its extensive line of 24-pin models are the LQ-860 and LQ-2550 color printers.

Workstation users in engineering, project-management and specialty graphics environments can achieve detailed output from Epson's EPI-4000 ink jet printer which produces sharp, 300-by-300 dot-per-inch resolution on 11-by-17-inch B-sized paper. The EPL-6000 laser printer produces quality output at a significant savings over the cost of printers with built-in PostScript language.

An Epson printer being used with a SPARCstation will be demonstrated at the Seybold Show, Oct. 3-5, in San Jose, Calif. The software handlers being developed for NeWSprint will be available in early November and distributed through authorized reseller outlets that carry Epson printer and computer products.

Expanding connectivity into the UNIX environment is Epson's latest step toward integration across multiple platforms and operating environments. Alliances with hardware and software vendors ensure broad-based compatibility with Epson printers as the industry standard.

Recent alliances within the industry include IBM mainframe interfaces manufactured by Avatar Technologies and I-O Corp., Freedom of Press software for Macintosh computers from Custom Applications Inc., and Windows and OS/2 operating software from Microsoft Corp.

Epson is also playing an integral role in Sun's expansion into the mainstream computer market. Bergman explained: ''Until now, UNIX customers have had to use expensive PostScript printers with their workstations. Now that Sun has begun attracting PC customers with its low-cost SPARCstation, it is looking to companies such as Epson to provide cost-effective printing solutions.''

SPARC (Scalable Processor Architecture) is the leading reduced instruction set computer (RISC) processor within the industry. NeWS (Networking Windowing System), is a PostScript-compatible imaging model tied to the X Window system.

NeWSprint software supports output devices connected to a SPARC system. It incorporates raster image processing (RIP) within the workstation to interpret PostScript-language codes before they are sent to the printer, enabling all types of printers to emulate PostScript.

Epson America Inc. is a manufacturer and marketer of personal computer and imaging products serving the North American marketplace.

LAS VEGAS (SEPT. 26) BUSINESS WIRE - MarCor Resorts Inc. opened the doors to the country's first all-suite hotel- casino -- the Rio Suite Hotel & Casino.

Since then, the property has maintained more than 90 percent occupancy with significant repeat business.

Located just west of the famous ''Las Vegas Strip'' and three miles from McCarran International Airport, the Rio offers unprecedented hospitality amenities.

The Rio features 430 spacious suites, meeting and convention facilities, a pool with sand beach, five restaurants, 50,000 square foot full service casino and an exciting Brazilian Carnival theme throughout its facilities. The Rio's elevated property site amid the flat topography of Las Vegas makes the hotel uniquely visible throughout most of Las Vegas.

''We're very excited about the Rio and the early success that we've seen since opening,'' said Anthony A. Marnell II, chairman of the board and chief executive officer of MarCor Resorts, Inc.

''Hotel guests and casino patrons are thrilled with the Rio, where each guest is treated like a VIP,'' added James A. Barrett, Jr., president and chief operating officer of MarCor Resorts, Inc. The Rio is the initial resort gaming property of MarCor Resorts, Inc.

The Rio offers the discriminating vacationer, ''short hop'' traveller, businessman and local gaming customer impeccable services and outstanding amenities. Guests enjoy a suite vacation at affordable and attractive prices with living quarters averaging 200 square feet larger than other hotels,

fabulous entertainment and spacious convention facilities.

Robert R. Maxey, president and chief executive officer of the Rio, explained, ''The Rio offers first class amenities to all our guests, not just a selected 'high roller' group. This uniqueness has contributed to our unprecedented popularity.''

Meeting and banquet facilities at the Rio range in size from an executive Board Room for 10 to 22 people, to the Sugar Loaf Room with banquet seating for 540. There is classroom seating for 450, theatre seating for 800 and cocktail reception space for 900. -0- Note: Black and white and color photos available upon request to Amy

SAN DIEGO (SEPT. 26) BUSINESS WIRE - Rockwell International Corp. and Aristacom International Inc., Alameda, Calif., Wednesday announced their joint Development Partners Program in which Aristacom will provide a software product that will link Rockwell's Automatic Call Distribution systems to applications based on IBM (and compatible) System/370 mainframes.

SCIL Galaxy is the newest addition to Aristacom's SCIL Link product family (Switch Computer Interface Link). SCIL Galaxy lets users integrate their existing mainframe-based applications with Rockwell's Galaxy without re-writing software or purchasing additional computer hardware.

According to Aristacom's President and Chief Executive Officer Charles D. Kissner: ''Rockwell is a leading vendor of call management systems. We are proud of our partnership with this fine company and look forward to enabling users of IBM and compatible mainframes to use their resources in the most strategic way possible.''

SCIL Galaxy, together with Aristacom's SCIL ICP (Intelligent Call Processor), brings advanced teleservicing features to existing customer applications. These features include predictive dialing, automatic customer record lookups, automatic customer call-back, synchronized voice/data delivery to the desktop, simultaneous voice/data transfer and/or conference and many others.

''Rockwell is proud to include Aristacom in our Development Partners Program '' said Richard Beyer, vice president and general manager of Rockwell's Switching Systems.

''We regard them as an important member of this group of vendors dedicated to providing Total Transaction Call Processing solutions. Total Transaction Call Processing is Rockwell's strategy for combining information and telecommunications technology so that users of our ACDs can take advantage of the automation capabilities available today.''

Beyer said: ''The agreement strengthens Rockwell's role in the IBM arena. It allows our customers to more tightly incorporate their mainframe applications and databases into their call processing operations without having to spend the time and effort to understand the technical integration intricacies of this new area. These time and technology investment savings translate directly to competitive advantage.''

Rockwell Switching Systems, part of Rockwell Communication Systems, is a recognized leader in the design, development and manufacture of Automatic Call Distribution systems. Rockwell Switching Systems is headquartered in Downers Grove, Ill.

#90269b0623 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - Aristacom International Inc., of Alameda Calif., has added three new investors and, as well, has raised additional funding from the company's existing venture capital backers.

The amount of the investment was not disclosed.

Aristacom's new investors include Institutional Venture Partners, Menlo Park, Calif., St. Paul Venture Capital Inc., St. Paul, Minn., and Ameritech Development Corp., Chicago. In addition, Aristacom's existing backers, Sevin Rosen, Bayless, of Dallas, and Accel Partners, of San Francisco, have increased their investments in the company.

Institutional Venture Partners is a private venture capital partnership with over $275 million in capital under management. St. Paul Venture Capital Inc. is a wholly owned subsidiary of St. Paul Fire and Marine Insurance Co., a member of The St. Paul Companies. Ameritech Development Corp. is a wholly owned subsidiary of Ameritech.

Founded in 1988, Aristacom provides mainframe and desktop software that enhances the integrated power of telephony and computing resources. As an early leader in this new market, Aristacom has been shipping products for over a year.

The products link and coordinate computers and telephony systems enabling companies to offer faster, more effective and more personal service. After an Aristacom installation, customers are served faster and more professionally while agents spend more time in customer relations and less time manipulating the phone and computer systems.

Service and productivity improvements are not the only gains. Companies find their service agents like their jobs better because they are relieved of many of the frustrating technical tasks and tedious, repetitive information-gathering steps associated with their work.

Fogelsong will join Aristacom's board of directors. This board is chaired by Dixon Doll of Accel Partners. Sevin, Rosen, Bayless is represented on the board by Jon Bayless and Ron Brittian.

For St. Paul Venture Capital, the investment decision was also a natural extension of their current interests in ISDN and telephony networking companies. Aristacom has been using ISDN to improve both data and voice communications.

Aristacom provides products to many market segments, including financial, insurance, travel, manufacturing, distribution, retail and customer service.

CITRUS HEIGHTS, CA (SEPT. 26) BUSINESS WIRE - Pro-Dex Inc. (NASDAQ:PDEX), a dental management company headquartered in Citrus Heights, reported the following results for the fiscal year ended June 30, 1990.

Total company revenues increased nine percent over the previous fiscal year. During the first five months of the 1989 fiscal year, the company operated nine locations. Four unprofitable centers were sold in November of 1988 and the company has operated the remaining five locations since that time.

The dramatic increase in the company's profitability results largely from reduced overhead and tight cost controls that were put in place when the company reorganized to manage the fewer number of locations.

According to Dr. M. Larry Kyle, vice president and general manager, ''We met our goals of increasing revenues and returning the company to profitability. We are optimistic about the current year as we are adding additional specialty services and continuing to practice tight cost controls.''

Pro-Dex Inc.

MOUNT VERNON, NY (SEPT. 26) BUSINESS WIRE - Lillian Vernon Corporation (AMEX:LVC) Wednesday reported results for the second quarter of fiscal 1991, ended August 25.

Revenues for the second quarter of fiscal 1991 were $25.5 million, compared to $26.7 million in the same period last year. For the quarter, net income was $241,000 or $.03 per share, compared to $541,000 or $.06 per share, earned in the second quarter of fiscal 1990.

Revenues for the first half of fiscal 1991 were $55.5 million compared to $56.1 million for the first half of the prior year. For the first six months of fiscal 1991, net income was $1.6 million or $.18 per share compared to $1.8 million or $.20 per share for the first half of fiscal 1990. The results reflect the Company's recent 3-for-2 stock split.

The Company attributed the softness in its results to an overall slowdown in consumer spending resulting from concerns about the economy and current world events.

Lillian Vernon Corporation is a specialty catalog company that markets gift, household, decorative and children's items. During fiscal 1990, Lillian Vernon mailed more than 121 million catalogs in 15 editions and filled over 4 million customer orders.

BOSTON (SEPT. 26) BUSINESS WIRE - Stratus Computer Inc. of Marlboro, Mass., U.S.A., Wednesday announced that it has signed a long-term OEM (original equipment manufacturer) agreement with NEC Corp., of Tokyo, giving NEC non-exclusive rights to sell Stratus' UNIX-based, fault-tolerant XA 2000 Continuous Processing Systems worldwide.

According to the terms of the agreement, NEC, as OEM, will sell Stratus' forthcoming reduced instruction set (RISC-based) computers. The computers will be equipped with Stratus' FTX (UNIX System V) operating system software.

Targeting the telecommmunications market, NEC will use Stratus systems in a variety of applications, integrated with various NEC telecommunications systems. For example, NEC will integrate the Stratus systems with its NEAX 61 central office switch equipment. Together, they will be marketed by NEC to telephone service providers as a delivery vehicle for advanced applications,

such as: 800 and 900-number services; calling card verification; and private virtual network services (i.e., providing network services for businesses).

This class to telephony applications -- which addresses some of the fastest-growing segments of the computer and telecommunications markets -- requires continuous computer availability (i.e. 24-hour-a-day uptime). Stratus' ''fault tolerant'' hardware and online service technology are specifically designed to provide this level of performance.

NEC will employ telecommunications hardware and software products -- now under development and testing at Stratus -- including: Signalling System 7 (SS7) and CCITT/7 software; interfacing hardware and software for Integrated Services Digital Network (ISDN); and special XA2000 packaging and power that complies with voice and data requirements worldwide.

The primary market for the combined NEAX61-XA2000 product includes telephone service providers, such as PTT (Postal, Telephone and Telegraph) authorities worldwide and Regional Bell Operating Companies in the U.S.

NEC Corp. is a leading global supplier of communications systems and equipment; computers and industrial electronic systems; electron devices, including semiconductor devices; home electronics products; and value-added network (VAN) information services. NEC's research and development, production, marketing and service activities are based on its synergistic concept of ''C&C,'' the integration of computers and communications.

Stratus Computer Inc. is a leading supplier of fault-toleant systems for critical online computing applications, such as online transaction processing and online data communication and telecomunications applications. The company offers the broadest range of fault-tolerant systems and maintains the highest standard for computer reliability.

BRIGHTON, MA (SEPT. 26) BUSINESS WIRE - Grove Bank for Savings (NASDAQ: GROV) announced Wednesday that the board of directors has declared a quarterly cash dividend of nine cents per share on the 1,470,417 shares outstanding. The dividend is payable Oct. 22, 1990 to shareholders of record on Oct. 8, 1990.

When announcing the vote Thomas R. Venables, president and chief executive officer stated that "the continuing profitability of the bank and high level of capital were positive factors in the decision to maintain our dividend program."

Grove Bank's total assets at June 30, 1990 were $207.3 million and stockholder's equity was $26.1 million, or 12.59 percent of assets. Book value per share was $17.75 on June 30, 1990.

Grove Bank, a Massachusetts-chartered stock savings bank became public in August, 1986. The bank's deposits are insured by the Federal Deposit Insurance Corp. (FDIC) and the Deposit Insurance Fund of Massachusetts (DIFM).

ATLANTA (SEPT. 26) BUSINESS WIRE - Zenox Inc. (NASDAQ:ZENO) Wednesday announced that it has contracted to purchase 100 percent of Ritecare Inc., a Georgia-based nursing home managment company, as well as the Hallmark Nursing Home, located in Warner Robins, Ga.

A Zenox subsidiary, Carehaven Homes Inc., itself a healthcare management

company, will actually acquire and merge the business of Ritecare into its own. Carehaven Homes has assumed full management responsibilities of Hallmark's 126 bed-facility already.

Terms of the acquisition require Zenox to pay $1.9 million in cash for the facility and management company, as well as assume certain of their liabilities, according to Richard English, president and chief executive officer of Zenox.

This further expands the Zenox healthcare division and is expected to add approximately $2 million in revenues plus an estimated $250,000 of pre-tax net income to Zenox annually, according to English.

Zenox is a diversified USA holding company with existing USA subsidiaries engaged in manufacturing, healthcare, communications, car rental franchise operations, investments and construction industries. Zenox has undergone significant growth in the past 16 months, primarily through an aggressive program of acquisitions.

PHILADELPHIA (SEPT. 26) BUSINESS WIRE - The Berwind Group announced Wednesday that it has established a financial services group -- its fifth major business area.

The new organization, Berwind Financial Group, will provide investment banking services to middle market and large corporate clients, as well as make merchant banking investments.

Berwind Financial Group's investment banking services will specialize in mergers and acquisitions, valuations, fairness opinions, financial advisory services and private placements of securities (including senior and subordinated debt, and equity).

In the merchant banking area, the new group will act as principal focusing on acquisition of businesses for investment purposes.

William A. Frack Jr. will head the new group as its president. Frack, who was instrumental in establishing the Berwind Financial Group Inc. has more than 20 years' experience in middle market investment and merchant banking.

Prior to joining Berwind, he was president of CoreStates Investment Banking. Earlier, he served as president of Blunt Ellis & Loewi Capital Co.; vice president of corporate development, Jim Walter Corp. and was previously

associated with Smith Barney & Co.

The Berwind Group's origins date back to 1874 when the Berwind-White Coal Mining Co. began operations. Over the years, through acquisition and internal growth, Berwind diversified into natural resources, industrial products, real estate, pharmaceutical and health care and now, financial services.

Berwind is a large privately-held corporation with 30 subsidiaries operating in 17 countries.

Berwind Financial Group Inc. will be located at 1500 Market St., Philadelphia, Pa., 19102. (215/563-2800)

CHICAGO (SEPT. 26) BUSINESS WIRE - Donald E. Webber has been named president of Kemper Sales Company (KSC), announced Richard A. Redeker, chairman of KSC.

He succeeds Thomas J. Mackimm, who is retiring at the end of this year.

According to Redeker, Webber will oversee the day-to-day activities and operations of Kemper Sales Company. ''In his 15 years in the business, Don has demonstrated outstanding leadership ability and has proven himself as an excellent manager,'' said Redeker. ''We are tremendously excited about having a person of his caliber lead our sales organization in the 1990s.''

Most recently, Webber was senior vice president and director of sales for MFS Financial Services in Boston, where he was responsible for overseeing the activities of five sales departments, which included MFS's 60 field regional vice presidents. He also served on MFS's Policy Committee. In addition, he was the national accounts manager for all of MFS's major distributors throughout the country. Before that, Webber was vice president and national sales manager.

Before joining MFS in 1980, Webber was a mutual fund product manager with Northwestern National Life (NWNL) in Minneapolis. He has also been a broker with Merrill Lynch in Minneapolis.

Webber is a graduate of St. Olaf College in Northfield, Minnesota.

Kemper Sales Company is the sales and distribution arm of Kemper Financial Services and Kemper Investors Life Insurance Company (KILICO).

VALENCIA, CA (SEPT. 26) BUSINESS WIRE - 3D Systems Inc., a subsidiary of 3-D Systems Inc. (NASDAQ: TDSSF; VSE: TDS.V), has filed a patent infringement claim against Quadrax Corp. and Quadrax Laser Technologies in United States District Court in Providence, R.I., alleging infringement of United States Reexamination Patent No. B1 4,575,330 and U.S. Patent No. 4,929,402.

The claim follows an earlier action by Quadrax Laser Technologies seeking a declaration that its Mark 1000 laser modeling system does not infringe 3D's patents.

After a review of Quadrax's product descriptions in light of Quadrax's assertions, 3D has now alleged that both Quadrax Corp. and its wholly owned subsidiary, Quadrax Laser Technologies, have infringed certain 3D patent rights, directly, indirectly, or both through activities to date taken in connection with the Mark 1000 laser modeling system and past use of other infringing laser modeling equipment.

3D is actively pressing forward with the suit at this time and intends to vigorously pursue its claims of patent infringement.

3D Systems Inc. is a California company formed in March 1986 to develop, manufacture and market equipment which produces plastic models from solid modeling CAD data.

The company's StereoLithography process currently utilizes an ultra-violet laser beam which passes over a vat of liquid polymer, hardening the liquid wherever the beam impinges on the liquid, so that it creates a solid, three-dimensional object which conforms exactly to the stored computer design.

#90269b0697 09/26/1990 ~Business Wire

TORONTO (SEPT. 26) BUSINESS WIRE - Bramalea Ltd. Wednesday announced its financial results for the nine months ended July 31 which included a provision for the diminution in value of certain land investments.

For the nine months Bramalea generated cash from operations of $112.3 million or $1.52 per common share compared with $115.8 million or $1.67 per common share in the corresponding 1989 period.

During the quarter, the company completed a comprehensive review of its land investments to ensure the book cost reflects the realities of today's market conditions. As a result of this review, management is satisfied that in total the current value of land is well above book cost.

This provision has resulted in an after-tax charge of $115.2 million against earnings in the third quarter creating a net loss of $68.8 million ($1.01 per common share) for the nine months. Sites affected by this provision are located primarily in the Toronto area, which is experiencing a cyclical downturn.

Bramalea's diversified portfolio of income producing assets is well leased and provides a strong underpinning to the capital base of the company. At over $800 million, this base continues to be one of the largest in the industry and would be substantially higher if it reflected the current value of the company's assets.

The portfolio includes Trilea Centres Inc., with one of the largest shopping centre operations in Canada, totalling 14 million square feet in 28 centres. These centres are beginning to benefit from Trilea's recent expansion and renovation program, with the growth in retail sales in the current year outperforming the industry as a whole.

Commercial developments are proceeding on schedule and have a high level of preleasing. Certain new developments have been deferred and all new projects will be considered in the light of current economic conditions and preleasing levels.

In the first nine months of the current fiscal year, Bramalea closed the sale of 1,347 housing units, compared with 2,149 closings in the 1989 period.

Closings for the 1990 fiscal year are estimated at 1,700 units. The general and administrative costs connected to these activities have been reduced as part of a company-wide program to reduce costs and overhead expenses.

UPPER SADDLE RIVER, N.J.(SEPT. 26) BUSINESS WIRE - Western Union announced Wednesday that it has signed an agreement to interconnect its electronic mail system with Sweden via international X.400 standards.

Service is expected to be available in mid-November. The new interconnection will be made between Western Union 400 (SM) service and Sweden's TEDE400/Telebox service, allowing Western Union's E-mail subscribers to exchange messages with customers of Teledelta, the Swedish electronic mail service. This is the fourth international agreement for X.400 service to be completed by Western Union. The Company also has announced X.400 interconnections with most of the major public E-mail systems in the United States.

Western Union 400 service is fully integrated with the Company's EasyLink (R) public messaging services, which give users worldwide delivery capability via fax, telex and electronic mail, as wll as access to more than 900 online databases.

''This link with Sweden is another significant step in Western Union's policy of forming interconnections with major public electronic messaging systems throughout the world,'' said Donald Casey, Product Manager for Western Union 400 service.

''Our agreement will facilitate international communications for Western Union subscribers who communicate with major companies in Sweden as well as for Swedish companies that need to reach the extensive array of corporations on the Western Union system,'' he added.

Western Union provides a broad range of messaging, financial and other services, both domestically and internationally, to meet specific needs of business customers and individual consumers. The Company is the leading provider of public electronic mail services, which enable business customers to reach more than seven million electronic mail, fax and telex users worldwide.

#90269b0707 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - AT&T Wednesday announced arrangements with five telecommunications organizations to expand international virtual private network capability.

The arrangements are with France Telecom, Regie des Telegraphes et Telephones (RTT) in Belgium, Mercury Communications Ltd. in the United Kingdom, Kokusai Denshin Denwa Co. Ltd. of Japan, and Unitel of Canada.

A virtual private network (VPN) gives users many of the benefits available with dedicated private networks. However, until now only very large companies - the Fortune 50 - could justify the cost of international dedicated networks.

Now, even mid-sized companies - the Global 1000 and more - with calling volumes of more than two hours a day can take advantage of VPN technology to enhance their global business and reduce international communications costs.

VPN users can, for example, design their own private seven-digit dialing plan for faster calling between their business offices, sending voice, facsimile, and voiceband data between any of the participating telecom administrations.

This expansion of AT&T's Global Software Defined Network (GSDN) represents a significant step in AT&T's Global Networking vision. GSDN connections are expected to grow to 15 countries within two years.

"With today's announcement, we can now provide VPN capability to nearly 85 percent of the Global 1000 companies," said Frank Ianna, vice president of Marketing for AT&T International Communications Services.

"It's another step toward keeping our commitment to meet our customers' international networking needs. We now can provide these important services cost effectively to a much broader base of multi-national companies," he said.

During the coming year, AT&T plans to announce several GSDN features that will let customers use a wide range of network options as their businesses globalize. The new arrangements announced today are part of AT&T's plan to provide GSDN service with the greatest possible number of communications carriers worldwide.

"As part of our GSDN growth, AT&T is pursuing an open international architecture for Virtual Private Networks," said Ray Butkus, director of International Business Services for AT&T International Communications Services.

CONTACT: AT&T - At TCA, San Diego, David Bikle, San Diego Convention Center, AT&T Booth 1028 or After TCA: (201) 953-7614 (office) or (201) 871-0047 (home) or AT&T, Basking Ridge, Rick Wallerstein, (201) 953-7911 (office) or (201) 771-9570 (home).

#90269b0708 09/26/1990 ~Business Wire

SAN DIEGO (SEPT. 26) BUSINESS WIRE - AT&T and British Telecom Wednesday announced the availability of the international virtual private network connection between AT&T's Global Software Defined Network (GSDN) service and BT's International FeatureNet service.

The GSDN/International FeatureNet connection will provide voice, facsimile and voiceband data communications up to 9.6 kilobits per second (kbps). Similar to private networks, GSDN features fast call setup times and high quality transmission, but with improved price performance.

This is the second international virtual private network connection available between AT&T's Global Software Defined Network service and British Telecom. Previously, AT&T established GSDN connectivity to the UK through British Telecom's International CityDirect service.

AT&T offers two access options to the GSDN/International FeatureNet connection. Current Software Defined Network (SDN) users can access GSDN as part of their SDN service, or dedicated GSDN access can be provided to non-SDN users who want to expand their corporate networks to the UK. This option is also attractive to UK businesses that want to expand their networks to the U.S.

''With the addition of the International FeatureNet connection, we offer businesses with significant calling to the UK a choice of high quality services at lower costs. The International FeatureNet connection can be ordered right now for availability starting in December,'' said Doug Macbeth, AT&T Manager, GSDN.

When compared to AT&T's direct dialed international calling, Global Software Defined Network prices for a typical business call can represent a 44 percent savings. Savings over PRO(sm) WATS and MEGACOM(R) WATS average 38 and 26 percent respectively.

The new International FeatureNet allows companies that already have a domestic virtual private network in the U.S. to connect into it from the UK and to use a compatible numbering plan.

'' "We expect International FeatureNet's flexibility and added features to be very attractive to businesses on both sides of the Atlantic,'' said Ken Durling, Manager International Voice Business Services, British Telecom.

BASKING RIDGE, NJ (SEPT. 26) BUSINESS WIRE - AT&T Wednesday announced it has paid $12 million to purchase a portion of a transpacific fiber-optic cable that is currently under construction.

AT&T will use the North Pacific Cable for a variety of international telecommunications services.

This second transpacific fiber-optic cable is scheduled to be put into service in early 1991. Landing points for the $400 million cable are Pacific City, Oregon; Seward, Alaska; and Miura, Japan.

AT&T currently uses the first transpacific fiber-optic cable, completed in April, 1989, for connections between the U.S. mainland and Hawaii, Japan, Guam Hong Kong, the Philippines, Taiwan and Korea.

AT&T has already begun work on what will be a third Transpacific fiber-optic cable scheduled for completion in October, 1992. AT&T also uses satellite facilities to provide additional analog and digital circuits to Pacific Rim countries.

''By providing services over the North Pacific Cable in addition to other facilities, we increase our ability to provide our customers with diverse routing options for their international private line circuits,'' said Elaine Kaup, Deputy Director -- AT&T International Dedicated Services. ''This capability is important to those customers with critical communications requirements between the U.S. and the Pacific Rim.''

In addition to private line services, AT&T will carry by North Pacific Cable a wide array of switched services such as international long distance service, Switched Digital International and international virtual private line service.

AT&T's Switched Digital International provides transmission speeds of 56 and 64 kilobits per second and is ideal for video conferencing, high-speed facsimile, electronic data transfer, digitized voice and computer aided engineering. Pricing is usage sensitive, making it ideal for occasional uses.

AT&T's version of international virtual network service, AT&T Global Software Defined Network services allow businesses to design their own private dialing

plan for calls within the network. It features fast call-set-up times, high-quality transmission and greater management over internal communications.

NASHUA, NH (SEPT. 26) BUSINESS WIRE - Nashua Corp. (NYSE:NSH) Wednesday announced that it has acquired PHD Computer Services Inc., a remanufacturer of Canon cartridges, based in Brentwood, N.H.

Terms of the agreement were not disclosed. The company indicated that current annual revenues of PHD are less than $5 million.

''The acquisition of PHD establishes Nashua in the emerging marketplace for remanufactured cartridges for laser printers,'' said Charles E. Clough, president and chief executive officer. ''PHD's technical and manufacturing capabilities, combined with our process expertise and established distribution channels, position Nashua to actively participate in one of the fastest-growing areas of office supplies.''

Cartridge remanufacturing involves replacing the worn parts, installing a new drum, and replenishing the cartridge with new toner. Properly remanufactured

cartridges offer performance characteristics equal to those of new cartridges.

Canon cartridges are used in more than 80 percent of all laser printers sold today. Prior to the emergence of cartridge ''recharging,'' businesses were throwing away these cartridges and buying new ones for as much as $100.00 each. Purchasing remanufactured cartridges results in substantial savings for businesses and is ecologically preferred to disposing cartridges after a single use.

Nashua Corp. provides a diverse mix of products and services which includes coated paper products, computer products, office supplies and photofinishing services.

The 1-2-3 Release 3.1 Government Edition combines new features requested by PC users in government agencies with an easy-to-use, WYSIWYG (What-You-See-Is-What-You-Get) graphical environment, powerful analytic tools, and advanced spreadsheet publishing.

Features unique to the 1-2-3 Release 3.1 Government Edition include spreadsheet file translation capabilities for Multiplan version 4.0, Enable version 2.0, and SuperCalc version 4.0, enabling government users who work with different spreadsheet programs to easily exchange information with the

best-selling 1-2-3.

The product also includes Sideways, an add-in product from Funk Software that allows 1-2-3 users to print wide reports on dot matrix printers, and a DataLens Driver that provides direct access to information residing on Microsoft SQL Server databases.

"Lotus is committed to delivering applications that are tailored to the needs of the government marketplace," said Tom Ruff, general manager of Lotus Federal Marketing.

"The 1-2-3 Release 3.1 Government Edition delivers on this commitment by providing the best in spreadsheet publishing and analytical power, combined with the translation, sideways printing, and data access capabilities government users need."

1-2-3 Release 3.1 offers the widest range of publishing, presentation, and analytic tools found in any spreadsheet available today. From within the graphical environment of 1-2-3 Release 3.1, users can perform all spreadsheet operations without leaving the familiar 1-2-3 program.

This includes the ability to modify or enter spreadsheet information, add color, change fonts, and print presentation-quality output. In addition, the product maintains keystroke, macro, and data compatibility with earlier versions of 1-2-3.

The 1-2-3 Release 3.1 Government Edition includes a .PIF file that configures the product for use with Windows 3.0. Users can launch Release 3.1 from an icon that is supplied with the spreadsheet and transfer data between applications through the Windows clipboard.

When operating under Windows 3.0 386/Enhanced mode, 1-2-3 Release 3.1 uses Windows memory management facilities and allows 1-2-3 users to take advantage of task-switching capabilities.

In addition to delivering government-specific editions, Lotus maintains an electronic bulletin board for federal government users that provides access to information about Lotus products, including schedules for Lotus' weekly government product seminars. Users can also download printer drivers and demonstrations of Lotus products. The access number for the bulletin board service is (703) 527-2282.

SYSTEM REQUIREMENTS, PRICING, AND UPGRADES

1-2-3 Release 3.1 requires an IBM PC AT, PS/2, Compaq or compatible (with an 80286 or higher microprocessor), a hard disk, one megabyte of available system RAM, and DOS 3.0 or higher.

The suggested retail price of the 1-2-3 Release 3.1 Government Edition, which is not copy protected, is $595. Network Server and Node Editions of the product will be available in the fourth quarter of 1990 at a suggested retail price of $795 and $495, respectively.

All customers who purchased 1-2-3 Release 3.0 before May 7, 1990, may upgrade to Release 3.1 for a $35 materials and handling charge. Registered users who buy or have bought 1-2-3 Release 3.0 on or after May 7, 1990, are entitled to a free upgrade to Release 3.1 through December 31, 1990.

1-2-3 Release 2.2 users may upgrade for a suggested retail price of $75 through December 31, 1990. Registered users of 1-2-3 Release 1, 1A, 2, and 2.01 may upgrade to 1-2-3 Release 3.1 for a suggested retail price of $150.

The government editions of 1-2-3 are available through Lotus Authorized Government Resellers, including 800 Software, Egghead Discount Software, GTSI, and Softmart. For more upgrade information, users may call 1-800-343-5414.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers, and mainframes. NOTE: All prices and terms are for the U.S.A. only.

ZAANDAM, The Netherlands (SEPT. 26) BUSINESS WIRE - Koninklijke Ahold nv, one of Europe's largest food retailers and one of the top 10 supermarket operators in the USA, has agreed to acquire the Impodra chain of liquor stores in The Netherlands from Allied Spirits & Wines Nederland bv. The transfer is expected to take place at the end of 1990.

The Impodra retail outlets will be integrated into Ahold's Gall & Gall chain of liquor stores, which, together with the Etos health and beauty aids and Pharmatos pharmaceutical activities, form the Ahold Specialty Business Group.

Impodra has 70 retail outlets in The Netherlands, approximately 200 employees and had revenues of about Dfl 100 million (over $50 million at year-end 1989 exchange rates) in 1989.

Gall & Gall is Holland's leading liquor store chain with 270 stores, 950 employees and sales of Dfl 350 million (some $180 million) in 1989.

Koninklijke Ahold nv is a leading international food retailer. In The Netherlands, Ahold's Albert Heijn subsidiary is the food retailing market leader. Ahold also has considerable interests in the United States where it is the parent company of three successful retail chains, BI-LO, Giant Food Stores and First National Supermarkets. In Europe, Ahold is an active member of cooperative alliances linking major food retailers in nine European countries.

Ahold's shares trade on the Amsterdam Stock Exchange and may be accessed on the Reuters Equities 2000 service under the symbol AHLN.AS and on Quotron under the symbol AHOLN.EU. They also trade in ADR form in the US (symbol 3KAHLY on the electronic OTC Bulletin Board).

#90269b0759 09/26/1990 ~Business Wire

TAMPA, FL (SEPT. 26) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ:EESI) Wednesday announced that revenues for the year ended June 30 increased to a record $19,221,910 as compared to $18,798,224 for the previous

year.

Net income for the year decreased to $802,184 from $1,057,046 in 1989 and net income per share decreased from 25 cents to 19 cents.

The decrease in net income was caused by negative results from the Company's asbestos removal division due to severe industry competition, losses on several 1989 summer public school projects, and increases in worker's compensation insurance costs caused by state mandated retroactive rate adjustments and other related costs aggregating $280,000.

The Company's net income for fiscal year 1990 can be attributed to its landfill, waste hauling, and laboratory services subsidiaries. The Company is taking steps to minimize any adverse impact its asbestos removal division may have on future profitability of its overall operations.

Reveunes and net income for the fourth quarter were $3,668,612 and $175,987 respectively, as compared to $5,559,969 and $300,931 for the fourth quarter of fiscal year 1989. The Company expects a very strong first quarter in fiscal year 1991 ending Sept. 30 from its landfill, waste hauling, and laboratory subsidiaries.

Revenues from the Company's second landfill acquisition in mid-July 1990 will be included in first quarter results.

At June 30, the Company had working capital of $5,860,938 and a current ratio of 3.3 to 1 compared to working capital of approximately $6.8 million and a current ratio of 4.2 to 1 at June 30, 1989.

EESI has recently signed options to purchase several landfills in the Eastern United States. The Company is currently reviewing over 24 landfill and waste hauling acquisitions in 12 states. The Company plans to make several landfill and waste hauling acquistions within the next several months.

#90269b0766 09/26/1990 ~Business Wire

HAUPPAUGE, NY (SEPT. 26) BUSINESS WIRE - Orbit Instrument Corp. (NASDAQ:ORBT) Wednesday announced the results of operations for the twelve months ended June 30, 1990.

Orbit reported net earnings for the twelve months ended June 30, 1990 of approximately $1,483,000 (16 cents per share) on net sales of approximately $57,226,000 as compared to a net loss of approximately $2,724,000 (29 cents per share) on net sales of approximately $50,689,000 for the comparable period

of the prior fiscal year.

Earnings per share for fiscal 1990 includes 4 cents per share resulting form an extraordinary gain in connection with the company's branded apparel segment. Earnings per share for the prior fiscal year includes a loss of 29 cents per share resulting from the discontinuance of the company's voice response subsidiary.

Max Reissman, the president of the company, stated that the results demonstrated the initial success of the company's strategy to reduce its dependence on the defense industry and develop other business segments to add to the company's growth.

Orbit is a Long Island based manufacturer of customized electronic components and subsystems for military and non military governmental applications. Its subsidiaries are Orbit Semiconductor, which is a state of the art manufacturer of customized semiconductors servicing the high reliability and quick turn around markets; and USA Classic which manufactures men's and boy's active wear under the ''Everlast'' name as a licensee of Everlast World's Boxing Headquarters Corp., childrens' garments under the ''Nautica'' trademark under license from Nautica Apparel Inc., all garments under the ''Riddell'' trademark under license from RHC Licensing Corp. and childrens' garments under the ''B.U.M. Equipment'' trademark under license from Chauvin International Ltd.

The following is a summary of the comparative results of operations for the twelve months ended June 30, 1990 and June 30, 1989.

WARREN, NJ (SEPT. 26) BUSINESS WIRE - Optical Data Corp., the Warren based electronic publisher, Wednesday announced its board of directors has accepted an investment and distribution proposal from Jostens Learning Corp. Under terms of the agreement, John Kernan, chairman and CEO of Jostens Learning, will join the Optical Data board.

"This is a great strategic fit for us," said William Clark, president and CEO of Optical Data. "In joining forces with Jostens Learning, we acquire capital to help fuel our rapid growth, expand our sales coverage into key new market segments and establish formal business links with a powerful, capable partner for joint product development efforts."

Optical Data is the foremost producer, publisher and distributor of educational videodiscs and multimedia products. Optical Data's "Windows on Science" program recently was recommended by the Texas Textbook Committee for statewide adoption.

If the recommendation is approved by the Texas State Board of Education in November, "Windows on Science" will become the first multimedia program to compete directly with traditional textbooks for state adoption funds. In addition to selling its own products, Optical Data also is the exclusive distributor of educational videodiscs for ABC News InterActive and the National Geographic Society.

Jostens Learning Corp. is the industry leader in educational technology. It develops, sells and services integrated learning systems and recently became the first educational software company to exceed annual sales of $100 million. Jostens Learning is wholly owned by Jostens Inc., of Minneapolis.

"We are very excited about this investment," said John Kernan. "The educational publishing industry will see extraordinary changes during the 1990s. Our association with Optical Data improves the strategic positioning of both companies." For more information, contact Pam Herber at Optical Data Corp., 30 Technology Drive, Warren, N.J. 07059, telephone: (908) 668-0022.

TAMPA, FL (SEPT. 26) BUSINESS WIRE - Pharmacy Management Services, Inc. (NASDAQ:PMSV) announced Wednesday that Kevin J. McKeon, C.P.A., has been named Vice President and Chief Financial Officer.

McKeon joins Pharmacy Management Services from Home Shopping Network, Inc., where he most recently held the position of Corporate Controller. While with Home Shopping Network, he also served as Director of Special Projects and

Assistant Controller. Prior to joining that company, Mr. McKeon was Audit Manager with Laventhol & Horwath, and had been employed by Grant Thornton as Audit Supervisor. In commenting on the appointment, Mr. Cecil S. Harrell, President and Chief Executive Officer, stated, ''We are very pleased to have Kevin McKeon join PMSI, as he brings an important element to our Management Team. During his tenure at Home Shopping Network, the company grew from $160 million to over $1 billion in revenues. This provides him with invaluable experience in continuing our implementation of the financial controls and programs necessary to guide PMSI's continued growth and expansion.'' McKeon will report to Mr. William F. Chastain, Jr., Chief Operating Officer, and assumes the duties of CFO from Chastain.

In addition, Harrell announced the promotion of Loraine Daugherty to Vice President of Medical Device Operations. Harrell said, ''The promotion of Ms. Daugherty from Departmental Director demonstrates the Company's commitment to expanding its Technical Medicine Division operations and the overall continuing growth and development of PMSI's management organization structure.'' Daugherty will continue to report to Mr. Chastain, COO.

Pharmacy Management Services, Inc. is a leading independent national provider of medical cost containment services and products to workers' compensation payors and claimants and to physical therapy clinics in the rehabilitation product and services marketplace.

#90269b0792 09/26/1990 ~Business Wire

DALLAS (SEPT. 26) BUSINESS WIRE - Daniel Wilhelm, formerly a partner in DW and Co., was named General Manager of Program Operations for Prime Network, it was announced Wednesday by Ed Frazier, Prime Network's president/chief executive officer.

Wilhelm will be headquartered at Prime Network's SportsCom operations center in Houston, and will be responsible for properly distributing Prime Network's programming to its regional affiliated sports networks.

Prime Network, the nation's largest sports programming group, reaches over 21 million cable homes through its affiliated regional sports networks.

Wilhelm comes to Prime Network from DW and Co. in Pittsburgh where he was a partner since January, 1990 in the management consulting production design firm for established television and video communications ventures. He was responsible for new business development in broadcast and non-broadcast programming.

As a management consultant, he helped various organizations establish television and video communication production opportunities. His list of clients included Penn State University, West Virginia University, CNG Industries, Xerox Corp. and Alcoa.

From 1986-89, Wilhelm was director of Facilities Sales for TPC Commuications/Channel One Ltd., a production facility and program distribution service entity in Pittsburgh. In that capacity, Wilhelm developed and implemented marketing plans along with managing the operations budget for the company's television production center.

Among his clients were Orion Television, Laurel Entertainment, Bill Cosby's Picture Pages, Buena Vista Television and MCA.

Wilhelm also developed the Penn State Sports Network, a television production package that centered on Penn State athletics. Wilhelm got his start in the television industry in 1984 as Director of Advertising and Sales for Total Communication Systems (TCS Sports) in Pittsburgh, a syndicated sports network.

During his three years with TCS, Wilhelm designed and implemented the advertising, promotion and merchandising programs for various sports properties in the network.

While at TCS, Wilhelm was credited with creating the Meadows Racing Network, an in-house viewership betting system still in operation today. As a result of Wilhelm's development, the track handle and viewership increased by over 40 percent.

Wilhelm started his career in 1979 with Proctor & Gamble in Cincinnati as a sales representative. Within one year, he was promoted to District Field Representative, assisting in new product introduction and special events planning. In 1981, he was promoted again to Unit Manager over package soaps and detergents.

A graduate of Penn State University, Wilhelm holds a Bachelor of Science degree in Marketing and Business Administration.

#90269b0794 09/26/1990 ~Business Wire

MIDDLETOWN TOWNSHIP, NJ (SEPT. 26) BUSINESS WIRE - Bellcore researchers have developed a unique, low-cost prototype device that can detect fires involving polyvinyl chloride (PVC) before there's smoke or even heat.

This device could help prevent many potentially dangerous and costly fires.

PVC, a common cable and wire insulation material, is widely used in large mainframe computer systems, in telephone company switching offices, in connecting personal computers, and in electrical wiring in virtually all homes and offices. The material is also used extensively for vinyl floor and wall coverings.

When PVC overheats or burns, it produces hydrogen chloride gas. This extremely corrosive gas can destroy electronic equipment not only in the same room as a fire but even several floors away, and can pose additional dangers to those responding to a fire.

Today, other sensors detect fires after they have ignited by ''seeing'' the smoke -- using ionization or ''light scattering'' technologies -- or by ''feeling'' the heat -- using thermal sensing devices.

Bellcore's new research prototype device ''senses'' a fire involving PVC in its incipient stage by detecting the presence of hydrogen chloride gas. This gas must be emitted before PVC burns.

Bellcore's experimental device uses as its active sensing element an inexpensive quartz crystal coated with zinc that is set to vibrate at a certain frequency. The sensor is attached to a small, palm-sized computer that monitors changes in the frequency of the vibration of the crystal. According to Neuburger, other sensors are more complex in terms of design and incorporate more costly materials.

Zinc was chosen because it represents one of the major metal finishes used in telecommunications equipment. This metal is corroded by hydrogen chloride gas forming zinc chloride which rapidly absorbs water from the air.

The added weight of the water and zinc-chloride residue on the surface of the quartz crystal changes the frequency at which the crystal vibrates. That change will set off an alarm, before flame or smoke is present.

Bellcore is testing its prototype device in telephone company switching offices in Kentucky, in collaboration with South Central Bell.

So far, laboratory tests at Bellcore have indicated that the sensor is very reliable, according to Neuburger. ''Feedback from the field study will be invaluable as we do further research on this technology,'' he noted.

Neuburger and his colleagues are remotely monitoring the sensors over the public telephone networks from several hundred miles. ''We're confident that if a condition that causes PVC wiring to overheat ever occurs, our sensors will let us know,'' notes Neuburger.

Bellcore provides research and other technical support to the telephone companies of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp. and U S WEST, as well as Cincinatti Bell Telephone Co. and The Southern New England Telephone Co.

STAMFORD, CT (SEPT. 26) BUSINESS WIRE - Champion International Corporation Wednesday filed with the Securities and Exchange Commission a shelf registration statement covering $600 million of debt securities.

The securities may be offered from time to time in amounts and on terms to be determined at the time of sale. The company may sell the securities to or through underwriters, possibly including Goldman, Sachs & Co. and Salomon Brothers Inc, and also may sell the securities directly to other purchasers or through agents.

The company presently expects that the net proceeds from the sale of the securities may be used to pay at maturity a portion of its commercial paper and short-term notes, to reduce or refinance long-term debt, to finance capital expenditures or for general corporate purposes.

Champion is one of America's leading manufacturers of paper for business communications, commercial printing, publications and newspapers. Headquartered in Stamford, the company owns or controls 6.4 million acres of timberlands in the United States and is also a major manufacturer of plywood and lumber.

NEW YORK (SEPT. 26) BUSINESS WIRE - The Quick & Reilly Group Inc., reported earnings of 36 cents a share or $3,411,392 for the second quarter ending Aug. 31, 1990 vs. 34 cents a share or $3,224,286 for the previous year's second quarter.

Revenues increased 15 percent to $30,159,458 from $26,256,057.

A spokesman for the firm said that the crisis in the Mideast had significant bearing on the quarterly results.

The retail side of the business experienced a surge in August, while the specialist operation was hurt by the volatility in that market.

JJC Specialist Corp. was allocated one new stock in the quarter - Cash America Investments Inc.

The company repurchased 100,500 shares of its stock in August and September. This buyback was authorized in 1987 for up to one million shares.

LAWRENCEVILLE, NJ (SEPT. 26) BUSINESS WIRE - Leslie E. Goodman and Rosemarie B. Greco have been elected president and chief executive officer of First Fidelity Bank, N.A., New Jersey, of Newark, and Fidelity Bank, N.A., of Philadelphia, respectively, Tony Terracciano, chairman and chief executive officer of First Fidelity Bancorporation (NYSE:FFB), announced Wednesday.

Goodman, 47, a senior executive vice president of the Bancorporation, a member of its Office of the Chairman and a director, is also responsible for First Fidelity Bank, N.A., North Jersey, of Totowa; Morris Savings Bank, of Morristown, and First Fidelity Bank, Princeton.

Greco, 44, also was elected a senior executive vice president of the

Bancorporation, a member of its Office of the Chairman and will be recommended for membership on the Bancorporation board of directors at its October meeting. She will also be responsible for First Fidelity Bank, N.A., South Jersey, of Burlington.

''Les and Rosemarie are both outstanding bankers, first-rate business managers and career First Fidelity employees, who know our markets very well,'' Terracciano said. ''Les has spent virtually all of his 24 years as a First Fidelity banker serving Central and North Jersey customers and Rosemarie's knowledge of the Philadelphia banking market has been acquired over more than 20 years of service.''

''They also know our institution well and their help will be invaluable as we move forward quickly toward full integration,'' Terracciano added.

Besides Terracciano, Goodman and Greco, Peter C. Palmieri, chief credit officer and vice chairman, and Wolfgang Schoellkopf, chief financial officer and vice chairman, are members of the Office of the Chairman.

Bancorporations's northeastern Pennsylvania unit, Merchants Bancorp Inc., composed of Merchants Bank, N.A., of Allentown, and Merchants Bank (North), of Wilkes-Barre, and headed by Robert W. Knipe, chairman and chief executive officer, will report directly to Terracciano.

''We will continue to rely on Bob Knipe's experience and knowledge to keep us number one in the Lehigh Valley and northeastern Pennsylvania markets,'' Terracciano said.

''With Bob, Rosemarie and Les providing the leadership, we intend to prove that a fully-integrated banking company can continue to provide its customers and communities personal service and total commitment, the hallmarks of community banking,'' Terracciano added. ''Efficiency and scale need not be the enemies of good service and good citizenship but rather their allies.''

Goodman, of Lawrenceville, N.J., who began his career in 1966 as a management trainee with the predecessor First National State Bank of New Jersey, has served as chief executive officer of three First Fidelity units. From 1979 to 1981, he headed the Trenton-based First National State Bank of Central Jersey and from 1981 to 1987, First Fidelity Bank, N.A., County, of Hackensack, N.J. The Trenton and Hackensack units were merged into the Newark bank. From 1987 to 1988, he served as senior executive vice president and senior lending officer of the Newark bank. His most recent assignment has been as chief executive officer of Fidelity Bank, N.A., of Philadelphia.

Born in Jersey City, N.J., Goodman grew up in Elizabeth, N.J. He holds three degrees from Rutgers University: a summa cum laude bachelor's degree, a master's degree in management and a law degree. He was a member of Phi Beta Kappa.

Goodman is a director of the Greater Philadelphia First Corporation, the University of Pennsylvania Medical Center, the Hospital of the University of Pennsylvania, Hill International Inc., WAWA Inc., and the World Affairs Council of Philadelphia. He is a member of both the New Jersey and Pennsylvania bars and is a member and former director of the Young Presidents' Organization.

Greco joined the Philadelphia bank in 1968 as a branch secretary and rose through staff and management ranks in several departments, including Community Banking, Operations and Human Resources.

In 1978, she was named vice president and director of Human Resources. In 1979, she was elected a senior vice president of the bank and in 1982, she was named head of Community Banking with responsibility for consumer services, the branch network and credit and fee-services to small and mid-sized businesses. She was elected an executive vice president in 1983 and president of the bank in January 1987.

She is the first and only woman to be admitted to the Association of Reserve City Bankers and she serves as a member of the Advisory Commission of the Pennsylvania State Department of Banking.

Greco's long record of community service includes membership on the Philadelphia Board of Education, 1985 to 1989, and membership on the City Planning Commission of Philadelphia from 1984 to 1985. She was the first chairperson and an original member of the Mayor of Philadelphia's Commission for Women. She has twice served by appointment of the Pennsylvania Governor on the Philadelphia Special Judiciary Nominating Panel.

Greco is a member of the board of directors of the Philadelphia Orchestra; a member of the Philadelphia board of directors of the State of Israel Bonds, and a member of the executive committee of the Greater Philadelphia Chamber of Commerce. She also is a director of the General Accident Insurance Company. Currently she is a member of and advisor to the Philadelphia Finance Association, Women's Way, the Girl Scouts of Greater Philadelphia and the Girl's Coalition of Southeastern Pennsylvania.

A life-long Philadelphian, Greco is a magna cum laude graduate of St. Joseph's University, Philadelphia, which she now serves as a trustee. She also holds an honorary doctor of law degree from Temple University.

First Fidelity, with $30 billion in assets and more than 500 offices in New Jersey and eastern Pennsylvania, is among the nation's 25 largest banking companies.

#90269b0821 09/26/1990 ~Business Wire
SOMERVILLE, MA. (SEPT. 26) BUSINESS WIRE - Central Cooperative Bank (NASDAQ:CEBK) announced Wednesday that it is likely to incur a significant loss resulting from it being the holder of a $1 million principal amount subordinated capital note of Sentry Federal Savings Bank, the Hyannis, Mass. -based institution declared insolvent and taken over by the Federal government last Friday, Sept. 21, 1990.

Central's net after tax loss on this investment could be as much as approximately $580,000. Central had been receiving interest payments on the note on a timely basis through the date of the insolvency.

''Even assuming this level of loss, Central Cooperative Bank remains a healthy bank with capital ratios significantly in excess of all regulatory requirements,'' stated chairman and chief executive officer of Central, Joseph R. Doherty.

As part of the government action, certain assets and liabilities of Sentry Federal Savings Bank have been assumed by a new bank, Sentry Savings Bank, F.S.B. Although it is impossible to determine whether the new bank will honor the subordinated capital note obligations, it is expected that a significant portion, if not all of the subordinated note obligations will be eliminated as part of the insolvency and government takeover process.

At July 31, 1990, Central had total assets of $242.6 million and stockholders' equity of $28.9 million, or 11.9 percent of total assets.

HOUSTON (SEPT. 26) BUSINESS WIRE - The board of directors of MAXXAM Inc. Wednesday named John M. Seidl president and John T. La Duc senior vice president and chief financial officer.

Seidl will continue as chairman and CEO of MAXXAM's Kaiser Aluminum & Chemical Corp. subsidiary, and La Duc will continue as Kaiser vice president and CFO.

Commenting on Seidl's and La Duc's appointments, MAXXAM chairman and CEO Charles E. Hurwitz said, ''I stated when Mick Seidl came on board in January of 1989 that we felt very fortunate to have attracted a man with his broad business, government, and academic experience to be chairman of Kaiser during its new era of growth and profitability. Mick has lived up to all of our

expectations, and we are delighted to reward him with these new responsibilities at MAXXAM. John La Duc has played a key role at Kaiser Aluminum, and this new position is an excellent and deserved opportunity for him.''

Seidl, 51, joined Kaiser Aluminum in January 1989 as chairman and CEO. Before that, he served as president, chief operating officer, and a director of Enron Corp., a diversified energy-based corporation which operates America's largest natural gas pipeline network.

La Duc, 47, has served as vice president and CFO of Kaiser Aluminum since January of this year. He served as corporate treasurer beginning in 1987 and as vice president and treasurer beginning in 1989.

Seidl will succeed Dr. William C. Leone, 66, who announced in March that he would retire as MAXXAM president in September 1990. Leone will continue as a vice chairman, consultant to and director of MAXXAM and certain subsidiaries, concentrating on policies relating to MAXXAM's real estate and forest products businesses, and he will continue on the executive committees of MAXXAM, Kaiser Aluminum, and The Pacific Lumber Co. La Duc will succeed James V. Iaco Jr., who announced in June his intention to resign later this year.

MAXXAM (AMEX:MXM) is engaged in aluminum operations through Kaiser Aluminum, forest products operations through Pacific Lumber and real estate operations through several wholly owned subsidiaries.

PONZANO VENETO, ITALY (SEPT. 26) BUSINESS WIRE - Benetton Group's first half consoldated results for the six months ended June 30, 1990 broke the Lire 1,000 billion barrier, the company reported at today's Board Meeting.

Net sales for the period of Lire 1,046.2 billion (U.S. $853.1 million) represented a 25% increase from sales of Lire 836.3 billion (U.S. $682.0 million) last year. Operating income for the first six months of 1990 was Lire 138.2 billion (U.S. $112.7 million), compared to Lire 122.3 billion (U.S. $99.7 million) for the same period in 1989.

Consolidated sales of Lire 2,000 billion (U.S. $1,630.9 million) are expected for the full year. As of June 30, 1990, the Group employed more than 3,000 people.

''These results,'' commented Chairman Gilberto Benetton, ''confirm that the Group continues to be driven by in-depth market knowledge, advanced production technology and above all, by our extensive network of highly motivated representatives.''

Over Lire 17 billion (U.S. $13.9 million) was spent during the period to improve and expand production facilities, not only in Italy, but also in Spain and Brazil, where two new factories were recently completed.

Based in Italy, Benetton is a world leader in the design, manufacture and marketing of distinctive casual apparel for men, women and children. Its products are marketed principally under the brand name ''United Colors of Benetton.'' Benetton shares are listed on the Milan, Rome, Turin, Venice and Frankfurt Stock Exchanges, and are traded on the London Stock Exchange (Seaq International). The Company's American Depositary Shares are traded under the symbol ''BNG'' on the New York Stock Exchange and the Toronto Stock Exchange.

TORONTO (SEPT. 26) BUSINESS WIRE - Moore Corp. Ltd. has announced a new system which can perform certain business form applications without using paper.

It is the hand-held intelligent terminal ''ASIST'' and is capable of handling both text and graphic data.

Moore and its joint venture in Japan, Toppan Moore Co., have been engaged in research and development to improve the efficiency of office automation. With the recent trend toward capacity expansion and high speed of computer and networking systems, many corporations are seriously pursuing the development of a strategic information system (SIS) as a core of their future strategies.

Under these circumstances, the accurate and timely collection of information and data input at the source are regarded as more important than ever before. Toppan Moore has successfully developed a new system combining a history of expertise in business forms, with a high level of electronic and computer technology.

The newly developed hand-held intelligent terminal, ASIST (Application Specific Integrated System Terminal) is designed not only to collect error-free data at the source of entry but also to provide operators with proper procedural guidelines. This system can be customized to accommodate the needs of a variety of industries.

The device is like a ''Portable Clipboard Computer'' and functions as special instruction notes, check list and job procedure management data collection, all of which the operator used to have to carry around separately.

Inforite Corp. is a wholly owned subsidiary of Toppan Moore Co. Ltd. in Tokyo, Japan which in turn is a joint venture of Toppan Printing Co. in Japan and Moore Corp. Ltd. in Toronto.

WESTFORD, MA (SEPT. 26) BUSINESS WIRE - September 26, 1990--Concurrent Computer Corporation today announced the appointment of George H. Sampson as vice president of development. Mr. Sampson will be responsible for the company's worldwide product development functions with major locations in Massachusetts, New Jersey and England.

Denis R. Brown, CEO and president of Concurrent, commented, ''George brings an extensive background in the areas of software and systems development, both as a consultant and as a corporate executive, all necessary qualities for this key role.''

Mr. Sampson holds a Bachelor's of Science degree in Physics and a Master's in Business Administration from Fairleigh Dickinson University. He joined GTE's Information Systems Division immediately after obtaining his Bachelor's degree where he progressed to

director, systems and software. Mr. Sampson then moved to ITT's Defense Communications Division where he was director, software engineering and later senior program director of switching systems. In 1985, Mr. Sampson joined Productivity Products International as vice president, operations and development and subsequently formed his own software consulting company.

Concurrent Computer Corporation is the leading supplier of high-performance, real-time computer systems worldwide. The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public-sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

LAS VEGAS (SEPT. 26) BUSINESS WIRE - United Gaming Inc. (NASDAQ:UGAM) announced Wednesday that the Chaparral Casino project of its United Coin Machine subsidiary has been put on indefinite hold.

Carole A. Carter, chief operating officer, attributed the project delay to an inability to obtain financing because of the uncertain nature of today's banking and financial markets.

Carter further stated the indefinite hold of the Chaparral will not have an effect on the other operations of the company.

Also, United Gaming announced it will file a fifteen day extension with the Securities and Exchange Commission for the submission of its Annual Report on Form 10-K.

United Gaming maintains a market leadership position as the largest gaming machine route operator. In addition to its gaming machine route operations, the company also manufactures and sells video and reel-type gaming devices in many areas of the world. United Gaming is also the operator of a casino and three gaming arcades in Nevada.

DOVER, NH (SEPT, 26) BUSINESS WIRE - The board of directors of Great Bay Bankshares Inc., (NASDAQ:GBBS) has declared a $.15 per share regular quarterly dividend payable Oct. 22, 1990, to shareholders of record as of Oct. 8, 1990.

Commenting on the company's decision to declare its eleventh quarterly dividend, Donald R. Hatt, president and chief executive officer, stated that, ''Although our strong capital position has permitted us to maintain our current level of dividend this quarter, the company continues to be affected by an adverse real estate market in New England and deteriorating economic conditions.

''As a result, management will be carefully evaluating whether a change in the Company's dividend policy is appropriate in future quarters.''

Great Bay Bankshares Inc., with 2,733,750 shares of common stock outstanding, is the parent holding company of Southeast Bank for Savings, a $300 million, FDIC insured, full-service community bank; and Constitution Trust Co., which has $55 million of assets under management.

RALEIGH, NC (SEPT. 26) BUSINESS WIRE - First Citizens BancShares Inc. has agreed in principle to purchase Brevard Federal Savings and Loan Association, according to a joint announcement made Wednesday by James B. Hyler Jr., president of First Citizens BancShares Inc., and Jerry H. Jerome, president of Brevard Federal Savings and Loan Association.

Terms of the agreement provide for the simultaneous conversion of Brevard Federal from a mutual institution to a stock company and First Citizens BancShares' acquisition of the savings and loan. Brevard Federal will be merged into First Citizens Bank, the wholly owned subsidiary of First Citizens BancShares, at a later date.

The acquisition is subject to several conditions, including finalization of a purchase agreement; adoption and approval of a plan of conversion by Brevard Federal's board of directors; affirmative vote of the majority of Brevard Federal's eligible members; and approval from applicable federal and state regulatory agencies.

No date has been set for consummation of the purchase, but completion of the acquisition could occur in the summer of 1991. Brevard Federal's management and staff will be offered employment by First Citizens Bank.

An independent appraisal firm will conduct a valuation of Brevard Federal that will take into consideration such factors as economic and demographic conditions in Brevard Federal's market areas and financial projections of its results of operations.

To effect to conversion/merger, First Citizens BancShares intends to utilize a combination of its Class A stock in a four-to-one ratio with its Class B stock with the acquisition of the latter security at the option of the prospective shareholder.

The total number of both classes of BancShares' stock issued will be determined at the close of the offering by dividing the valuation of Brevard Federal by the market prices of BancShares' securities and considering the four-to-one pro-rata offering stipulation.

According to Hyler, the proposed purchase would benefit First Citizens Bank's operations in the Western region of North Carolina. ''We made a strategic decision to increase our service area in the Western portion of our state when we acquired 33 branches as a result of the First Union National Bank and Northwestern Bank merger in 1985.

''Since that time, we have been working to expand our operations in these

areas. The acquisition of Brevard Federal would further strengthen our efforts and our market presence in Western North Carolina.''

Jerome said that the decision to sell to First Citizens was based on the compatibility of the two institutions. ''We believe strongly that our decision to affiliate with First Citizens is consistent with our philosophy to serve in the best interests of our members, communities and employees,'' he said.

''Brevard Federal's customers will be well-served by First Citizens' commitment to high-quality service and its reputation for safety and soundness.''

Brevard Federal has approximately $135 million in assets and operates offices in Brevard at South Caldwell Street; in Cashiers at U.S. Highway 64; in Franklin on Palmer Street Circle; in Highlands at West Main Street; and in Lake Toxaway at U.S. Highway 64.

First Citizens BancShares in the holding company of First Citizens Bank, a $4.4 billion statewide financial institution that operates 330 offices in 166 North Carolina towns and cities. BancShares' Class A and Class B common stock is traded over-the-counter, and Class A is quoted on the NASDAQ National Market System under the symbol FCNCA.

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows James Madison Ltd.(TICKER: JML) on Sept. 21, 1990, reported it anticipates a loss for the third quarter.

The company had previously noted in its second quarter report that it had foreclosed on a resort loan and was carrying this asset in "other real estate owned".

Rather than operate the resort, James Madison elected to accept an offer from an established resort owner/operator, resulting in a $1.0 million pre-tax loss to be recorded in the third quarter, 1990.

Additionally, preliminary indications are that the company may need to double its allowance for loan losses from the $12.6 million recorded June 30, 1990.

James Madison will thereby receive in excess of 40% of any loss reflected in pre-tax income.

The company's primary capital ratio, while reduced to approximately 9%, will remain above the regulatory minimum of 5.5%.

-30- 1073
#90269c0024 09/26/1990 ~Comtex
WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Pacific

Inland Bancorp.(TICKER: PIBC) changed its independent accountant from McGladrey and Pullen on Sept. 17, 1990, to KPMG Peat Marwick.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

#90269c0025 09/26/1990 ~Comtex

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows George A. Zugmier, effective Sept. 4, 1990, resigned as a member of the board of directors Lodgistix Inc.(TICKER: LDGX) Zugmier cited specific disagreements with the board on matters related to the company's operations, policies and practices.

Lodgistix stated that the company disagrees with Zugmier that he expressed disagreement at meetings of the board of directors on matters other than the proposed business combination with Sulcus Computer Corp.(TICKER: SULC), to which he was opposed.

Lodgistix further noted Zugmier first stated his disagreement with accounting policies and procedures at a board meeting on Aug. 29, 1990.

The company reported it believes Zugmier had been opposed to management decisions since his resignation as chief executive officer on Oct. 30, 1989, and that this opposition continued until his removal as chairman of the board on Aug. 29, 1990.

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Drillstar Corp.(TICKER: DRIL) lost $32,998, at an unknown price per share, on revenues of $69,177 for the quarter ended June 30, 1990.

This compares with earnings of $81,862, at an unknown price per share, on revenues of $393,004 for the same period in 1989.

-30- 473

#90269c0027 09/26/1990 ~Comtex

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows on July 9, 1990, Esther Yeaman filed suit to collect a previously assigned court judgement from Supermail Int'l Inc.(TICKER: SPML), in the amount of $615,271 including interest and attorneys' fees.

The previous court award to her son, David Yeaman, was in the amount of

$325,000, on Nov. 19, 1987. (The Yeaman Judgement).

On Aug. 10, 1990, Supermail filed a motion to vacate the Yeaman Judgement and sought a stay of execution of the judgement.

The stay was reinstated by the Sacramento Superior Court on Sept. 5, 1990, until Sept. 20, 1990.

On that date, the court set a hearing for Oct. 3, 1990, to consider Supermail's motion to reinstate the stay order.

Supermail filed an action Sept. 13, 1990, in California against David Yeaman and his mother, and two Utah law firms, and intends to file such action in Utah.

The company's management and counsel contend Supermail has a valid and enforceable right of setoff against the Yeaman Judgement, and the company reports it intends to continue to vigorously resist the attempts by the Yeamans to enforce the Yeaman Judgement without giving effect to Supermail's right of setoff.

#90269c0028 09/26/1990 ~Comtex

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows the board of directors of NAC Re Corp.(TICKER: NREC) on Sept. 13, 1990, approved a second amendment to the Rights Agreement dated June 9, 1988, between the company and the American Stock Transfer & Trust Co.

The agreement sets forth a description and terms of the preferred stock purchase rights distributed to shareholders of record of the company at $0.10 par value, on June 21,1988.

As a result of a stock split of common stock declared June 8, 1989, each right now entitles the holder to purchase from NAC Re one one-hundred and fiftieth of a share of Series A Preferred Stock, at a price of $56.67 per one-one hundred and fiftieth of a share, or $5,667 per share, subject to adjustment.

The second amendment provides that, unless the rights are earlier redeemed or the acquisition of share is made pursuant to a qualifying offer, if a person or group becomes the beneficial owner of 15% or more of the company's voting stock, proper provision will be made so that each holder of record of a right, other than the acquiring person, will thereafter have the right to receive, upon payment of the exercise price, that number of shares of the Series A preferred stock, having a market value at the time of transaction equal to two times the exercise price.

#90269c0029 09/26/1990 ~Comtex
WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows United Trans-Western Inc., effective Aug. 30, 1990, refinanced most of its existing debt.

In connection with the refinancing, a loan agreement and promissory note in the original principal amount of $3.25 million were executed with Hibernia National Bank in Texas.

Terms of the loan provide for accrual of interest at a varying rate per annum equal to the prime rate of Hibernia, plus 1%.

The loan matures in August, 1993.

It is payable in 35 monthly installments of declining principal amounts, plus interest.

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Prime Capital Corp.(TICKER: PRME) on Aug. 30, 1990, sold leases to AT&T Credit Corp. through its wholly-owned subsidiary, Prime Leasing Inc., with original equipment cost of approximately $29.7 million.

The cash purchase price of the leases was $20.71 million.

The sale represented 121 lease schedules under a master lease agreement with E.I. DuPont de Nemours as lessee, which consisted of AT&T telecommunications equipment.

After payment of the underlying nonrecourse debt, the company realized cash of approximately $7.7 million.

The sale disposed of approximately 15% of Prime Leasing Inc.'s total assets on a net book value basis.

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Canaveral International Corp.(TICKER: CANI) reported on Sept. 20, 1990, that the holder of a mortgage on property jointly owned by a wholly-owned subsidiary of Canaveral International Corp. and another related company had notified Canaveral that the mortgage is in default in the amount of $2.12 million.

Canaveral reports that payment must be made by Sept. 28, 1990, or foreclosure and sale of the property may result.

On Sept. 21, 1990, the lender extended the period of time in which default may be cured until Oct. 15, 1990.

The company reports it is in negotiation with a qualified third-party purchaser, and is attempting to reach further accomodation with the lender.

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Stanwick Corp.'s board of directors on Sept. 20, 1990, reviewed the company's plan to liquidate, as adopted Feb. 4, 1986.

On Feb. 2, 1990, Stanwick collected payment on its claim before the Iran-United States Claims Tribunal, the last major asset to be collected by Stanwick.

The company reports that since February, 1990, it has worked to pay off liabilities.

Its major liability, the workers compensation liability to The Travelers Insurance Co. (TICKER: TIC), was negotiated with The Travelers, and the company paid $175,396 in May, 1990, to close the matter.

The board decided to make a final distribution of remaining assets of Stanwick to stockholders.

This aggregates $1.85 million, or $2.07 per share, based on 894,197 shares outstanding.

This distribution is to be made to shareholders of record as of Sept. 30,1990.

To receive this final distribution, shareholders must redeem their shares by transmitting shares to the transfer agent and must request that the final distribution be paid.

The transfer agent is: Riggs National Bank, 1120 Vermont Avenue, N.W., Washington, D.C. 20036, Attn: Shareholder Relations Dept.

#90269c0048 09/26/1990 ~Comtex

WASHINGTON (SEPT. 26) COMTEX - The 8-K report filed at the SEC shows Callon Consolidated Partners L.P.(TICKER: CCLZ) on Sept. 12, 1990, announced its shareholders voted in favor of an amendment to its partnership agreement allowing acquisition of oil and gas properties for cash.

This would be supplemented by borrowings and drilling of development- type wells.

This would change the character of the partnership from a depleting entity to an ongoing operation engaged in acquisition, development and production of oil and gas properties, the company reports.

Callon Petroleum Co., the company's general partner, is actively engaged in acquisition of producing oil and gas properties, Callon Consolidated reports.

As of Dec. 31, 1989, the partnership's oil and gas reserves were estimated at 2.8 million barrels of oil and 8.6 billion cubic feet of natural gas.

The estimated present value of future cash flow from such reserves was $30 million.

WASHINGTON (SEPT. 26) COMTEX - The 10-K report filed at the NASD shows Global Gaming and Technology Inc. lost $136,630, or $0.01 per share, on revenues of $12.451 for the fiscal year ended June 30, 1990.

This compares with a loss of $104,956, at an unknown price per share, on revenues of $113,888 in fiscal 1989.

Global Gaming is engaged in the design, manufacture, and marketing of electronic microprocessor-controlled gaming machines.

The company reports that during the most recent fiscal year, it did not apply for any gaming licenses.

Global Gaming states the lack of gaming licenses in Nevada and New Jersey is a severe detriment to the company's growth.

The company added that, in effect, sales are confined to much smaller and less lucrative markets.

#90269c0087 09/26/1990 ~Comtex

WASHINGTON (SEPT. 27) COMTEX - Kona Enterprises Inc. filed a registration statement with the SEC in which it proposes to offer 1.25 million shares of its common stock at an offering price of $6.00 per share.

Prior to this offering, there has been a limited trading market for the common stock of the company and there is no assurance that an active market will continue after completion of this offering.

J. Lee Peeler & Co. Inc. is underwriting the offering.

Kona reports its objective is to become a holding company for a diversified group of operating businesses.

Kona reports it anticipates concentrating its search on operating businesses in the light manufacturing, wholesale distribution and retail industries.

Kona's executive office is located at 2200 West Main Street, Suite 900, Durham NC 27705 and its telephone number is (919) 286-7212.

TOKYO (SEPT. 27) - Japan's crude oil reserves at the end of August totaled 521.5 million barrels, the equivalent of 142 days' consumption, the Natural Resources and Energy Agency reported Thursday.

The figure was almost unchanged from the month-before level of 519.2 million barrels.

Government-held stockpiles at the end of August accounted for 197.3 million barrels and private-sector stocks 324.2 million barrels, the report said.

#90269d3100 09/26/1990 ~French/German News Agency

TOKYO (SEPT. 26) - Japanese steel production in the October-December quarter is expected to rise 2.7 percent over the same period last year to 28.35 million tons, the ministry of international trade and industry (MITI) forecast Wednesday.

The projected figure would be the fifth largest output ever in a third quarter and the highest since 1980, MITI officials said.

They attributed the brisk production to strong domestic demand for steel products, supported by a booming construction industry.

Domestic steel consumption is expected to rise 3.9 percent to a record 20.35 million tons during the three-month period.

But exports will decline 10 percent because of continued sluggish sales to the Soviet Union, they said.

-30- 914

#90269d3120 09/26/1990 ~French/German News Agency

PERTH, AUSTRALIA (SEPT. 26) - Australian business tycoon Alan Bond resigned from the board of his flagship company Wednesday, Bond Corporation Holdings (BCH) announced.

In a statement issued here, BCH said Mr. Bond and two other senior executives

who quit with him would continue to act as consultants during a capital restructuring which is seen as vital to the company's survival.

"Peter C. Lucas, a long-time director, has agreed to accept appointment as the chairman of the board," the statement said.

It said Tony Oates had resigned as senior executive of finance and administration and Peter Mitchell had quit as senior executive of corporate planning and development.

In July, Mr. Bond told a bond holders' meeting in London that he was ready to resign as company chairman.

Bond Corp. had debts estimated at five billion U.S. dollars in May and offered to sell its Australian brewing interests to Bell Resources Ltd for 1.43 billion.

#90269d3150 09/26/1990 ~French/German News Agency

TOKYO (SEPT. 26) - Nippon Yusen K.K. (NYK), Japan's top shipping company, Wednesday said it had agreed to purchase five percent of the outstanding common stocks of Rio Grande Industries, Inc. (RGI), parent of the Southern Pacific Transportation Company.

NYK's senior managing director for liner operations, Hiroshi Takahashi, said the two firms intend to close the purchase before the weekend, but refused to disclose the value of the transaction.

He said the purchase would strengthen NYK's long-standing relationship with the affiliated railroads of RGI, including Southern Pacific, on which NYK's intermodal services in North America have relied since 1926.

RGI is also the parent company of the Denver and Rio Grande Western Railroad and the St. Louis Southwestern Railway Company.

#90269d3540 09/26/1990 ~French/German News Agency

HONG KONG (SEPT. 26) - British companies are keen on submitting tenders for Hong Kong's controversial new airport project with or without China's blessing British Minister of Trade Tim Sainsbury said here Wednesday.

Mr. Sainsbury told reporters at the end of a five-day visit to the British colony that "China should take interest" in the 16.3 billion U.S. dollar scheme, which he called "a long term and an exciting project."

The trade minister said, "it is important for the continuing prosperity of

Hong Kong", which is to revert to Chinese rule in 1997.

China, although having no objection to Hong Kong having a new airport, has expressed the wish to talk with the colonial government on the financial feasibility of the facility, whose financing would stretch beyond 1997.

"One of the principal objectives of my current visit is to stress the UK's keen interest in playing a substantial role in the construction of the new airport and associated infrastructural projects," Mr. Sainsbury said.

"I'm confident that British firms would be able to submit highly competitive tenders to the project."

Mr. Sainsbury added, "We have a great deal of experience to offer in this particular field and UK companies will be putting in strong bids for all the key elements of the project," which will have the full support of the British government.

"British consultants, I am delighted to see, are here in large numbers and involved in many different projects," he said.

Hong Kong Governor Sir David Wilson has said Hong Kong would go ahead with the new airport with or without China's blessing.

Beijing officials have previously branded the mammoth project as part of a "British conspiracy" to hand over a bankrupt Hong Kong in 1997, while the project backers fear lack of Chinese support could deter investors.

Mr. Sainsbury was leaving here Wednesday for Jakarta.

#90269d3620 09/26/1990 ~French/German News Agency

SYDNEY (SEPT. 26) - Australia's domestic airlines, still reeling from a year-long pilots' strike, were hit Wednesday by a strike of aircraft refuellers which has grounded half the scheduled flights and stranded at least 10,000 passengers.

The strike, over manning for refuelling duty, has disrupted the travel plans of thousands of people including tourists and families going away for school holidays which started the same day.

Major airlines appealed to passengers to postpone their flights as long as possible.

"There is no sign of a settlement in the meantime," said a spokesman for Ansett Airlines, which was forced to cancel more than half its 200 services and reschedule the remainder.
